PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, SECOND SESSION

SENATE—*Thursday, April 20, 1978*

(Legislative day of Monday, February 6, 1978)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by Hon. DENNIS DECONCINI, a Senator from the State of Arizona.

PRAYER

The Reverend Charles Boonstra, pastor, The Presbyterian Church, Huntsville, Tenn., offered the following prayer:

Almighty God, Creator of time and space and life, we pause in this Chamber to ask for Your gifts of love and wisdom.

The destiny of this Nation and our neighbors rests in this body. Qualify us for the expectations of our time.

Give us a love for people. Forgive us that we are so often fatigued by them, worn out by their multitude, and irritated by their asking. As our Nation faces its mission to humanity, we ask that we may reflect Your spirit.

Encourage in us the faith that is not afraid to risk its life to redeem humanity. Motivate us to lift our world rather than lean on it. Help us to recover that kind of humility that is willing to be guided by Your wisdom.

Make us Your servants even when we want You to serve us. Give sight where we are blind, light when we stumble, and direction when we are confused.

Eternal God, we reach out for Your benediction. Still the storm of violence around us. Speak calm over this troubled world. In the tension of our time, may we feel the steadying power of Your healing greatness.

When the telling of our time is done, and those not yet born shall reflect, may we be known as those who had the courage to live ahead of our time, unwilling to compromise what You intended for all humanity: A life of peace and brotherhood.

In the name of Jesus, our Lord. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., April 20, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable DENNIS DECONCINI, a Senator from the State of Arizona, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. DECONCINI thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD, Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Wednesday, April 19, 1978, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Select Committee on Small Business be authorized to meet during the session of the Senate on Tuesday, April 25, 1978, from 1 p.m. up until 4 p.m. to hold hearings on the nomination of Mr. Milton D. Stewart for the position of Chief Counsel for Advocacy at the Small Business Administration.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

REV. CHARLES J. BOONSTRA

Mr. BAKER. Mr. President, it is a great personal pleasure for me today to have as our guest my pastor from my hometown of Huntsville, Tenn., the Reverend Charles J. Boonstra, who just delivered the opening prayer.

Reverend Boonstra's prayer at the opening of the Senate today is but a small sample of the grace, the wisdom, and the warmth which he shares with us so generously as members of the First United Presbyterian Church in Huntsville. I am happy that he was able to be here with us today, as is his son Michael.

Reverend Boonstra is a graduate of Hope College and Western Theological Seminary in Holland, Mich. He is a native of Muskegon, Mich., and he has served congregations in Michigan, Iowa, New York, and Florida before coming to Tennessee a year and a half ago.

He has another son, in Berkeley, Calif., and a daughter in Princeton, N.J.

Reverend Boonstra is my friend, as well as my pastor, and his presence here today is most gratifying to me.

Mr. ROBERT C. BYRD. Will the distinguished Senator from Tennessee yield?

Mr. BAKER. I am happy to yield to the majority leader.

Mr. ROBERT C. BYRD. Mr. President, I join with the distinguished minority leader in welcoming to the Senate today his constituent, this great churchman. I appreciate the prayer, and I am certainly delighted that Senator BAKER'S friend and pastor could open the Senate with prayer today. I personally greet him at this time in behalf of the Senate.

Mr. BAKER. Mr. President, I thank the majority leader for his kindness and generosity, and I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Oklahoma (Mr. BARTLETT) is recognized for not to exceed 15 minutes.

URBAN POLICY

Mr. BARTLETT. Mr. President, as the June 30 expiration date for the New York City Seasonal Loan Act approaches, debate on basic American urban policy will intensify. I welcome this increased dialog and the chance it affords Americans to consider the fundamentals of the relationship that should exist between the Federal Government and State and local governments.

During this debate I expect to address myself to a number of specific questions, especially with regard to New York City. However, at this time I would like to attempt to put the discussion into some kind of perspective.

The pronouncements of many of the Nation's mayors, as well as the recently

announced "new partnership" urban policy of President Carter, have accustomed us to demands for billions of dollars of Federal taxpayers' money to "save the cities." We hear from all sides that the Nations' large cities are struggling for their very existence, that their survival is at stake. It would serve the public interest much better if the hysterics and exaggerated language were dropped and it was admitted that what we are facing is a choice, not a crisis. The American people are reflecting new realities by voting down increased school levies, as in Ohio, and by moving away, as in New York City.

Most of the problems that the cities face are problems that Federal money or programs can do little to resolve. Strained budgets, rising crime rates, economic stagnation, nightmare unemployment, and poverty are not problems that are so easily solved by the Federal Government as the mayors and the President seem to think. In 1954, total Federal aid to States and local governments was about $3 billion. In 1976, the total had increased to over $59 billion—from $3 billion to $59 billion in only 22 years. These years span the time in which the so-called crisis of the cities reached major dimensions—Federal involvement has not noticeably slowed this process, and, in fact, in some cases it has demonstrably increased the deterioration of some cities.

Many of our Nation's mayors apparently live in a dream world in which they think that Federal money is all they need to solve their problems. They must wake up to the fact that most of their problems are being brought about by shifting socioeconomic relationships, and that cities are in a period of transition. Many of them must face the fact that Americans are voting with their feet, and thereby undercutting the economic base of their cities.

New York City is a prime, or perhaps the prime, example of this deteriorating economic base. During the 1960's, private sector employment in the city grew only 2 percent, compared to almost 27 percent in the entire country. During that decade, U.S. employment in manufacturing grew about 7 percent, but it declined in New York City by 19 percent, representing a loss of 180,000 jobs.

Since 1970 the city has experienced a drastic decline in employment, with a loss of 468,000 jobs, just over an 11 percent decrease in employment. Since 1969 manufacturing employment has fallen at an annual average rate of 48,000 jobs. Total population between 1970 and 1975 decreased in New York City by 5.2 percent. As a General Accounting Office study sagely points out—

The prospects for halting this trend are not bright.

The question arises whether the Federal Government should even be trying to reverse this trend. After all, the situation has arisen because of the free choice of American citizens reacting to changing economic and political realities. I am firmly convinced that no good will be accomplished trying to prohibit these fundamental changes from taking place by damming up the cities with Federal dollars and trying to halt the flowing times. By trying to do so we only treat symptoms, not causes, and we make the final reckoning worse.

Conservatives, such as myself, are often accused of being naysayers because we criticize those who want to spend taxpayers' money on programs ostensibly designed to help the cities and their residents. The fact is, we are not the naysayers to change. It is, rather, those people who wish to spend other people's money to maintain the cities as they have been who are the naysayers. As the demographic situation changes, and as the socioeconomic choices made by people change, we are seeing the emergence of new forms of economic organization within political structures that have not changed fast enough to keep pace. As real as many of the problems cities face are, most of them are problems of transition, not of survival. They are problems of choice, not of ultimatums, so that most of the cries to "save the cities" are nothing more than cries of "wolf." The times are changing, and cities as we have traditionally known them may, in fact, be dying. That does not mean there need to be any catastrophes or tragedies. It only means we must be flexible.

The complexities and dislocations of change are very real, but my conviction is that the flexibility necessary for an adequate response resides in the lowest level of our national organization, that is, with the local and State governments. Where the cities and States have failed to take the initiative in planning, in reacting to a changing tax base, and in facing the needs of the future, the Federal Government has in the past and can continue in the future to try to assist cities by helping them coordinate their activities and by taking into account the urban effects of Federal actions. However, the Federal Government can be of most help to our cities by undertaking policies to stop inflation and prevent its rekindling, not by yielding to demands to introduce gerrybuilt dams into the stream of changing economic reality.

It has become a tired old song that we conservatives are not responsive to the problems and concerns of ordinary people. The fact is, we are deeply concerned. Our concern springs from a sincere compassion and empathy for the situation of ordinary people. That does not imply that we are blind to reality, as many of our liberal friends appear to be.

Compassion, packaged in the sweet-smelling wrappings of unkeepable promises, unfilled hopes, and other people's money, is not compassion at all, but deception. The compassion of a conservative garbs itself in the robes of constructive compromise, self-reliance, personal dignity, personal responsibility, and a social conscience that recognizes the proper limits of Federal power and jurisdiction. We conservatives are, in fact, the true liberals in the sense of supporting individual liberty and responsibility, while the so-called liberals are ever-ready to impose their particular version of social justice onto the rest of us.

The decision of the New York State Court of Appeals, at the end of 1976, concerning the constitutionality of New York City's debt moratorium, is illustrative of this fundamental concern for responsibility. New York's high court declared that the debt moratorium imposed in November of 1975 in order to save New York City from bankruptcy was unconstitutional. In order to save itself from bankruptcy New York City got the State of New York to declare that New York City did not have to pay back its municipal bonds. The State justified this by calling forth the "police powers of the State" to insure the carrying out of the city's functions.

The court rightly, I believe, ruled that such appeals to police power are invidious expedients, making meaningless the verbal pledge to back bonds with "the full faith and credit" of the city as enunciated in the New York State constitution. The court rejected the hysterical and dangerous ideas that incantations of police power and financial emergency could suspend constitutional prescriptions. "Neither life nor law is that easy," the court decision stated.

Another thing that that court decision points up, I believe, is that the prospect of a Federal Government bailout of the cities has tempted officials at all levels of government to blur the line dividing the constitutional powers granted to the Federal, State, and local governments. The whole affair has tended to confuse the determination of where responsibility to citizens lies. That 1976 court decision was a timely reminder that constitutions are meant to limit abuses of governmental power. More decisions in that vein, concerning Federal loans or Federal loan guarantees, will do much to make New York and all our cities face, squarely, their problems, and to recognize them as local land State problems. Hopefully, all levels of government in America will take the lesson. Our Nation's cities most assuredly do have problems to solve, but their officials and citizens must view these problems as opportunities for constructive change, not as excuses for succumbing to the false compassion of demagoguery or the cheshire cat smile of Federal interventionists.

SENATE JOINT RESOLUTION 128—DESIGNATING JULY 1, 1978, AS "FREE ENTERPRISE DAY"

Mr. BARTLETT. Mr. President, I send to the desk a Senate joint resolution and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The joint resolution will be stated.

The assistant legislative clerk read as follows:

Whereas the rapid development of America's economy is a result of the interaction of the free enterprise of our people and the abundant natural resources of our land; and

Whereas the present great prosperity of the United States is based upon free enterprise; and

Whereas the principles of free enterprise are inexorably bound with our principles of individual political freedom; and

Whereas the belief of Americans in the essential justice of free enterprise is being increasingly challenged throughout the world.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating July 1, 1978, as "Free Enterprise Day" and calling upon the people of the United States and interested groups and organizations to observe such day with appropriate ceremonies and activities.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution?

Mr. ROBERT C. BYRD. Mr. President, the joint resolution has been cleared on this side of the aisle. We have no objection.

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, the joint resolution has been cleared with the ranking member of the jurisdictional committee and we have no objection to its consideration and passage.

The ACTING PRESIDENT pro tempore. Without objection, the Senate will proceed to its immediate consideration, and, without objection, the joint resolution will be considered to have been read the second time.

Mr. HARRY F. BYRD, JR. Mr. President, first, I congratulate the able Senator from Oklahoma (Mr. BARTLETT) for presenting this joint resolution. I do not know of anything more important to the economic well-being of the majority of our citizens than the perpetuation of the free enterprise system.

It is under the free enterprise system that the overwhelming majority of the people of our Nation have attained the highest standard of living of any nation in the world.

What so deeply concerns me about what has been going on in Washington for so long, and what is going on in Washington now, are the unsound policies, excessive regulation, and uncontrolled spending which, if not checked, will destroy the free enterprise system.

I am very pleased that the Senator from Oklahoma has introduced this resolution and I am pleased that the Senate appears prepared to adopt the resolution.

Mr. BAKER. Mr. President, I associate myself with the remarks of the distinguished Senator from Virginia and offer my commendation to the distinguished Senator from Oklahoma for taking this initiative at this time. I think he does a great service to this country and to the Senate for bringing it to our attention for action at this point. I hope we can proceed now to its adoption.

Mr. BARTLETT. Mr. President, if I may briefly comment on the remarks of the distinguished Senator from Virginia and compliment him for them. Also, I wish to join not only with him but with the remarks of the minority floor leader.

Mr. President, all Americans learn at an early age that the United States is the great historical experiment in representative popular government, but too few Americans learn, or ever come to realize, that the United States is also the greatest experiment in free private enterprise—in capitalism, in the history of the world. It is unfortunate so few people realize this, because as heirs to the world's most spectacularly successful economic system, Americans should understand the basis and reasons for our current prosperity. They should understand that our political freedoms and our material well-being are inexorably intertwined. And they should understand it before they lose it.

Every society must resolve three fundamental economic problems: First, how much of and which goods and services it shall produce; second, how shall it produce these goods; and third, who is to receive the benefit of these goods and services? The United States, predominantly, has solved these problems with a system of privately determined prices and markets. By allowing such decisions to be made privately, under the pressure of price competition and consumer demand, we have provided for our collective well-being, as well as for our individual freedoms. Our capitalist free enterprise system has proven itself capable of feeding, housing, clothing, transporting, educating, entertaining and freeing an ever-growing population at standards of living unimaginable in most of the world.

Among the many different things that were responsible for the phenomenal growth in this country's wealth were an ambitious people, bountiful resources, and a government that permitted and encouraged its citizens to exercise their ingenuity. The Government's policy, for the most part, was devoted to private capitalism. It supported private enterprise, competition, and efficient production.

For example, in 1862, Congress passed the Homestead Act. It gave each person willing to take the risks of moving west 160 acres of land, for a small fee, if he lived on and improved that land for 5 years. Subsequent acts provided land even cheaper. The cheap land and the West's rich resources drew settlers out in droves. The first settlers often found life hard, but the resources and opportunities for success drew more and more people west. America's industrial revolution led to great increases in productivity for all the westward moving people. Farmers soon became involved in production for national, as well as international, markets with the introduction of railroads.

The private railroads, in fact, helped make the far-flung territories of North America a nation. Yet it is an American myth that our railroads were built mainly through the financial help of the Government and would have been impossible without it. In fact, the railroads serve as an early example of the disastrous effects government control and participation can have on private enterprise. Government help to the railroads amounted to 10 percent of the cost of all the railroads in the country, but even this limited assistance has been disastrous to the railroads. As an example, I quote from Steward Holbrook's "The Story of American Railroads":

In a little more than two decades, three transcontinental railroads were built with government help. All three wound up in bankruptcy courts. And thus, when James Jerome Hill said he was going to build a line from the Great Lakes to Puget Sound without government cash or land grant, even his close friends thought him mad. But his Great Northern arrived at Puget Sound without a penny of federal help, nor did it fail.

Thank goodness this took place before the era of doctrinaire Government intervention in the economy, and the Government limited its involvement to 10 percent. Very soon private enterprises built railroads which crisscrossed the entire Nation.

Our economy has changed drastically since then, but Government policies have changed even more drastically. Within the last 40 years there has been a great deal of legislation passed by Congress which does not accept the free market as the basis for our economic organization. It does not foster competition or enhance growth. Instead it hampers competition and promotes inefficient production, featherbedding, inflation, and Government regulation. All of which means a lower standard of living and less personal freedom for everyone.

As a result of such Government policies, our economy has been suffering from rising unemployment and inflation, as well as declining productivity and investment. Yet a large number of people in this country apparently want more Government intervention. They want the Government to be a big brother—to provide more and more services, to guarantee higher and higher incomes, and to protect us from more and more risks. They are asking the Government to provide a utopia on Earth. To a large extent such people are asking for these things out of ignorance—ignorance of what our market system means to them and ignorance of the consequences of what they are asking for.

In an effort to provide utopia, the Government has grown out of control. Last year, government at all levels employed more than 14 million people. That is about 16 percent of America's work force. In recent years, Government employment has grown four times as fast as private employment.

Increasing Government regulation of the country's industries has distorted the price-setting mechanism of the marketplace. Government regulation has been one of the major causes of increasing costs and of shortages since the Second World War—in housing, energy, credit, cars—the list is nearly endless. Government control of the economy, no matter on whose behalf it has ostensibly been undertaken, has been the primary source of all the economic evils in our industrial history.

Despite all this, many people persist in demanding that the Government provide more—more of everything to make life easier and less risky. The problem is that Government intervention does not make life easier; it never has and it never will.

For one thing, Government planning and intervention in the economy can

never possibly be sophisticated enough to make the millions of decisions which determine what Americans buy, how much they buy, and at what prices they buy it. Only the free market system has ever been able to do that. In fact, as the economy becomes more complex we should be relying increasingly on the marketplace, not the opposite, as is the actual case today. The forces of demand and supply always operate, but they operate best, to the benefit of all, in a free market. In addition, the free market system is the only system in mankind's history which has affirmed the right of the individual to make these decisions for himself and to recognize that by so doing we all benefit. Capitalism is the only system of economic organization that asserts that men are free and not just creatures of the Government.

Mr. President, our society has faced many dangers in its 200-year history, but none, I believe, are so alarming as the withering of the will to succeed on one's own, and the confusion into which the moral justification for free enterprise has fallen. Therefore, we must demonstrate as best we can, and celebrate whenever we can, the economic efficiency and essential moral justice of our free market capitalist system. I have introduced the resolution calling for the President to set aside July 1, 1978, as "Free Enterprise Day" and I urge all my colleagues to support it.

The joint resolution (S.J. Res. 128) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

Mr. BARTLETT. I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Virginia (Mr. HARRY F. BYRD, JR.) is recognized for not to exceed 15 minutes.

A REMARKABLE AMERICAN—GEN. LUCIUS D. CLAY

Mr. HARRY F. BYRD, JR. Mr. President, I rise to say a few words in regard to a remarkable American, who died this week.

Gen. Lucius D. Clay was one of our country's ablest sons. General Clay served as military governor of Germany and then as commander of the U.S. Armed Forces in Europe immediately following World War II.

General Clay held that important position in 1948 and 1949, at which time, the Soviet Union put into effect a land blockade of West Berlin.

General Clay came to Washington, met with then President Truman, and asserted his confidence that, given the airplanes, General Clay could supply Berlin indefinitely without war through what became known as the Berlin Airlift.

I have long thought that this is one of the most remarkable achievements in American history. As a newspaper correspondent, I was in Berlin shortly thereafter and could see first hand just how important that airlift was to the people of Berlin.

During the 327 days that the Berlin blockade was in effect, General Clay's airlift carried a total of 2,343,000 tons of food and coal; 2,343,000 tons of these essential supplies were brought into Berlin by air.

That is an average of some 7,000 tons a day.

It was the spirit and the genius, the perseverence, the determination, and the capacity of Lucius Clay, backed by a resolute President, Harry Truman, which made this operation the successful feat that it was.

I think the United States and the free world and, of course, the German people, owe General Clay a great debt of gratitude. I wanted to say these few words today in regard to one of America's ablest sons.

RHODESIA: WHY? WHY? WHY?

Mr. HARRY F. BYRD, JR. Mr. President, the Washington Star yesterday published an excellent editorial on the situation in Rhodesia.

This editorial points out the folly of the present policy of our State Department.

Our State Department is attempting to force the three moderate black leaders and Ian Smith, the four of whom have reached an agreement as to majority black rule in Rhodesia, to bring into the new government Marxist-oriented terrorist guerrillas. Our State Department is not satisfied with a transition to black rule under moderate black leadership, but demands much more.

It is attempting to force Rhodesia to include in its government Marxist-oriented terrorists, who are fighting the Rhodesian people from bases outside of Rhodesia.

The Star editorial brings out, in my judgment, a very important point in regard to this Rhodesia matter. I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

RHODESIA: WHY, WHY, WHY?

The road to Dar es-Salaam, like a more famous road, is paved with good intentions. And is it really less treacherous?

There, in the capital of Tanzania, an Anglo-American diplomatic team (Secretary Vance, Ambassador Young, and Dr. Owen, the British foreign secretary) met again with Joshua Nkomo and Robert Mugabe, the fire-eating leaders of the Rhodesian Patriotic Front.

Afterwards, the parley was pronounced a success, inasmuch as Messrs. Nkomo and Mugabe said they might join an "all-party" conference on Rhodesia's future. If this is success, what would failure consist of? The two guerrilla leaders haven't given an inch on the tough program they outlined at Malta some weeks ago. In fact, they have toughened it. They still want a single-party dictatorship on Marxist lines in Rhodesia. They still demand control of the army and the police, and a "predominant" role in the transitional government. As for the future, Mr. Mugabe now denounces political variety—that is, the toleration of any political parties other than his own—as a "luxury."

These views are unacceptable to the new government in Salisbury, where Prime Minister Ian Smith and his National Front have set in motion a plan for majority rule, adopted a new constitution, and released political prisoners.

So what is the gain? The aim of the Anglo-American plan, supposedly, is to avoid a civil war. But its effect may ultimately be otherwise. The other day in Nigeria, President Carter subscribed to a communique describing the new internal government in Rhodesia as illegal. We are not sure what that means. It may be illegal in the sense in which the Continental Congress was illegal in 1776, for whatever ice that cuts.

The heart of the matter, however, is that Bishop Muzorewa and the other black leaders inside Rhodesia have a far larger political constituency than either Mr. Nkomo (who has a slight one) and Mr. Mugabe (who reportedly has next to none). The hope of the latter two for power in Rhodesia—other than by shooting their way in—is kept alive today by an unholy collaboration between the U.S., Great Britain, and their arms suppliers in the Soviet Union.

If the issue is, as advertised, democratic rule in Southern Africa, will someone please explain to us how that objective is advanced by continuing to abase ourselves before those who spout anti-democratic and authoritarian demands?

Mr. HARRY F. BYRD, JR. I yield back the remainder of my time and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll. The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(Routine morning business transacted and additional statements submitted are printed later in today's RECORD.)

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

FOREIGN INTELLIGENCE SURVEILLANCE ACT OF 1977

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now proceed to the consideration of S. 1566, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (S. 1566) to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic

surveillance to obtain foreign intelligence information.

The Senate proceeded to consider the bill, which was reported from the Committee on the Judiciary with amendments; and from the Select Committee on Intelligence with amendments.

The ACTING PRESIDENT pro tempore. Time for debate on this bill is limited to 2 hours, to be equally divided and controlled by the Senator from Massachusetts (Mr. KENNEDY) and the Senator from South Carolina (Mr. THURMOND), with 1 hour on any amendment, with 30 minutes on any debatable motion or appeal, and with 20 minutes on any point of order.

Mr. BAYH. Mr. President, I ask unanimous consent that the following members of my staff and the staff of the Select Committee on Intelligence be granted privilege of the floor during proceedings on S. 1566 and during the vote on the bill and any amendments: Abe Shulsky, Keith Raffel, Stan Taylor, William G. Miller, Earl Eisenhower, Tom Connaughton, Angelo Codevilla, Walter Ricks, Mark Gitenstein, Mike Epstein, Dave Bushong, Tom Crowley, Sam Bouchard, Patrick Norton, Edward Levine, Tom Moore, David Shaw and John Elliff.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that Ken Feinberg, of my staff, be granted privilege of the floor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. GARN. Mr. President, I ask unanimous consent that Eric Haltman, of the Judiciary Committee, be granted privilege of the floor during the debate and votes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. GARN. I also ask unanimous consent that Bob Heppler, of Senator HEINZ' staff, and Kay Davies, of Senator DOMENICI's staff, be granted privilege of the floor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. Who yields time?

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time not be charged to either side.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KENNEDY. I yield myself such time as I might use.

Mr. President, today the U.S. Senate writes a new chapter in the ongoing 10-year debate to regulate foreign intelligence electronic surveillance. In considering S. 1566, the Foreign Intelligence Surveillance Act of 1978, the full Senate at long last has the opportunity to place foreign intelligence electronic surveillance under the rule of law. The abuses of recent history sanctioned in the name of national security and documented in detail by the Church committee highlight the need for more effective statutory controls and congressional oversight.

Recent prosecutions in the Humphrey and Trong cases point out the need for this legislation. Without S. 1566 in place serious constitutional issues are raised in those cases: Is the warrantless surveillance constitutional? and, even if it is, may the Government use the evidence obtained in a subsequent criminal prosecution for espionage? or does the Government, in so doing, violate the provisions of title III? S. 1566 resolves these issues and must be dealt with expeditiously.

We have the major responsibility for seeing to it that history does not repeat itself, that civil liberties and the rights of our citizens are not bargained away in the name of national security.

S. 1566 benefits from broad bipartisan support. It has the overwhelming support of both the Senate Judiciary Committee and the Senate Select Committee on Intelligence. My distinguished colleagues, Senator BAYH, Senator THURMOND, and Senator GARN have been particularly instrumental in the development of this legislation. Working together we have fashioned a product which brings to an end the fruitless and unsatisfactory debate of the past.

S. 1566 has been endorsed and supported not only by this administration, but by the Ford administration as well. Both Attorney General Bell and Attorney General Levi have been most cooperative and helpful in the drafting of the bill. The legislation constitutes a major step forward in bringing needed safeguards to the unregulated area of foreign intelligence surveillance. It is designed to strike a balance between the protection of national security and the protection of our human liberties and rights. It is a recognition, long overdue, that the Congress does have a role to play in the area of foreign intelligence surveillance.

S. 1566—building upon S. 3197, legislation drafted in 1976 with the dedicated help of Attorney General Levi—achieves a major breakthrough in the long debate over foreign intelligence electronic surveillance. It is the culmination of past efforts and present hopes. This legislation would, for the first time, substitute carefully prescribed accountability and oversight for the arbitrariness of the past. The bill would require that all foreign intelligence electronic surveillance in the United States—as well as some overseas interceptions—be subject to a judicial warrant requirement based on probable cause. For an American citizen to be surveilled, there must be probable cause that he is an agent of a foreign power—a citizen acting for or on behalf of a foreign power—and engaging in sabotage, terrorism, or clandestine intelligence activities. It is the courts, not the executive, that would ultimately rule on whether the surveillance should occur. The bill would require that, before such surveillance could occur, a named executive branch official—such as the Secretary of Defense—certify in writing and under oath that such surveillance is necessary to obtain foreign intelligence information.

Mr. President, these statutory provisions are the very heart of the legislation. They relegate to the past the wiretapping abuses visited on Joseph Kraft, Martin Luther King, Jr., and Morton Halperin. They prevent the National Security Agency from randomly wiretrapping American citizens whose names just happen to be on a list of civil rights or antiwar activists.

The legislation provides the type of accountability which has heretofore not existed. It would for the first time expressly limit whatever inherent power the executive may have to engage in electronic surveillance in the United States. In so doing, the bill ends a decade of debate over the meaning and scope of the "inherent power" disclaimer clause currently found in title III.

S. 1566 would also provide civil and criminal sanctions to those who violate its provisions. It requires that all extraneous information—unrelated to the purposes of the surveillance—be minimized. And it mandates that before any information obtained can be used at a subsequent criminal trial, the trial court must again find that all statutory wiretap procedures have been met.

Most of the concerns expressed by some about various provisions of the bill have been satisfactorily resolved in the Senate committees. I and others in the Congress shared these very concerns over the years; thus, for example, either the Attorney General or the Deputy Attorney General must personally sign off on each application; the application must state whether "physical entry is required to effect the surveillance," thereby notifying the court whether or not a break-in is necessary in order to install the surveillance device; use of the information obtained by the surveillance is further restricted—even in the case of non-American citizens—to "lawful purposes"; any testing of new electronic surveillance equipment, tests which are not covered by this legislation, cannot be directed against specific American citizens without their consent.

Most importantly, Mr. President, the issue of the so-called noncriminal standard has been resolved to the satisfaction of all the parties concerned. Both S. 3197 last year, and the bill introduced this year, retained a narrowly restricted provision allowing for electronic surveillance in the absence of a statutory recognition that the activity is criminal.

This provision, as originally drafted, remained a major stumbling block to prompt passage of the legislation. Many were convinced that S. 1566 would establish an unfortunate precedent if statutory recognition were conferred on electronic surveillance in the absence of a showing of criminal conduct. After long and difficult negotiations this crucial issue has been resolved. A special tribute is owed Senator BAYH, Senator GARN, and the other members of the Senate Intelligence Committee for developing alternate language and providing for a criminal standard. The bill now provides for

an explicit statutory recognition of criminality, but would also call for a lower standard of criminal conduct than the traditional "probable cause that a crime is being committed." Instead, the alternate language would speak in terms of probable cause that a person is engaged in "clandestine intelligence gathering activities that involve or may involve a criminal violation." All other clandestine intelligence activities that "involve or are about to involve" a criminal violation; or sabotage, terrorism, or activities in furtherance thereof. This latter sabotage and terrorism language will hopefully be worked out by amendment on the Senate floor.

This language goes a long way in striking a proper balance between the legitimate interests of national security and civil liberties. It is a criminal standard: but the standard which must be met for a warrant to be issued is closer to "reasonable suspicion" than evidence of an ingoing existing criminal enterprise. It is, I believe, the major breakthrough needed to develop bipartisan legislation in this area.

Mr. President, some might argue that this legislation is regressive and does not provide sufficient protection for civil liberties: others might maintain that it goes too far and will inhibit the functioning of our intelligence agencies. I disagree on both counts.

Legislation can hardly be labeled regressive which for the first time places strict statutory controls on foreign intelligence electronic surveillance. The judicial warrant and executive certification procedures guarantee the type of external and internal controls which I and others have long advocated. I am not completely satisfied with every single facet of the legislation; few people will be. In an area as sensitive and important as this, it is difficult if not impossible to support every provision. But those who would defeat this bill, because they are not satisfied with every section in it ignore the fact that today there is no statute at all. The courts currently have no role to play whatsoever in this area; executive discretion alone controls. Senate efforts at providing any safeguards have until today been exercises in futility. Despite my own reservations with a few provisions of the bill, I remain even more uncomfortable leaving the American people with no legislative protections whatsoever in this area.

Nor will S. 1566 undercut the effectiveness of our intelligence agencies. The needs of our intelligence agencies in protecting the national security have been carefully taken into account by both Senate committees, the administration and, perhaps most importantly, the intelligence community itself. The legislation has built-in safeguards to preserve the flexibility and secrecy of our intelligence effort. For example, the notice requirement is very limited, as is the power of the court to examine the validity of the certification in cases involving embassies and certain entities controlled by foreign governments. The requirements of what must go in the warrant application are similarly limited. S. 1566 is inapplicable to most overseas and national security agency electronic surveillances; and, finally, the legislation differs substantially from the provisions of current law authorizing wiretaps in domestic criminal investigations. The pending Senate bill now requires evidence of criminal activity before a warrant may be issued in foreign intelligence cases but, as already noted, establishes a less stringent "probable cause" standard of criminality, thus making it easier for the Government to secure a warrant for these limited purposes. Other provisions dealing with length of surveillance, minimization of the surveillance and congressional oversight are carefully drafted with national security interests paramount.

Two other criticisms have been raised in recent weeks—that the bill provides for too much judicial secrecy and will diminish the responsibility and accountability of the executive branch. But the first criticism is more accurately related to the sad state of existing law while the second ignores completely the theory underlying the judicial warrant requirement.

There is no "judicial secrecy" today, because the courts are not part of the process at all. It is the executive branch that exercises the secret and uncontrolled discretion, free from any statutory restraints. And, even if a lenient judge is quick to rubberstamp 99 out of 100 applications, the ever-present possibility that this application will be the one rejected by the court should act as an effective deterrent to abuse.

Mr. President, this legislation is designed to strike a balance, a careful balance that will protect the security of the United States without infringing on the civil liberties and rights of the American people. I believe the time has at last arrived when Congress and the Executive together can fill one of the last remaining loopholes in the laws governing wiretapping and other electronic surveillance in the United States. One should view this bill for what it is, a major effort by the Congress, long overdue, to place foreign intelligence electronic surveillance under the rule of law.

Finally, Mr. President, as I mentioned earlier, I acknowledge the very effective work of my colleague on the Judiciary Committee, Senator THURMOND, and the strong bipartisan support we have had throughout the fashioning of this legislation.

I mentioned in my remarks the leadership that was provided by President Ford and General Levi, who worked very closely with the committee in recent years; this bipartisan support has continued with President Carter and General Bell.

Of course, I also acknowledge the very close and cooperative relationship that we have had in working with the Intelligence Committee, with our colleague on the Judiciary Committee, Senator BAYH, who was tireless in the preparation and development of this legislation, with his excellent staff, and with Senator GARN who was enormously helpful in the shaping of this legislation.

It is a bipartisan effort, involving a balancing of interests. I am, of course, cognizant of the efforts of a small group of Senators that began just after the Keith case in 1972. We have had 7 years of hearings, involving the great leadership of Senator Sam Ervin, Senator MUSKIE in chairing a Subcommittee of the Foreign Relations Committee, Senator MATHIAS and Senator NELSON, who for years have been working in this area and, of course, our former colleague, Senator Phil Hart, who was enormously dedicated to the approach in this bill. He was a leader in the Senate in insuring protection of the liberties of our citizens.

This is the culmination of an extraordinary effort by the members of those committees, and their activity and involvement should be appreciated by not only the Senate but by the American people.

Mr. President, I reserve the remainder of my time.

Mr. GARN. Mr. President, I think it would be appropriate if the chairman of the Intelligence Committee spoke first. I defer to my distinguished chairman.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. KENNEDY. I yield such time as he may need.

Mr. BAYH. Mr. President, I appreciate the courtesy of our distinguished colleague from Utah. We have been on the same wave length in working together here on this matter for some time. I am glad to follow his lead on this matter.

Mr. GARN. I thank the Senator very much.

The ACTING PRESIDENT pro tempore. The Senator from Utah is recognized.

Mr. GARN. Mr. President, for nearly 2 years, much of my time and effort as a member of the Intelligence Committee has been devoted to the problem of electronic surveillance for foreign intelligence purposes. Particularly, as vice chairman of the Rights of Americans Subcommittee, I and my distinguished colleague, Senator BAYH, have spent days and weeks trying to balance the privacy rights of Americans against the need of the Government to obtain legitimate national security information. After all, the security of Americans in their communications is nothing without a secure America within which those communications can take place.

This has not been an easy task. But with the help and cooperation of Senators KENNEDY, EASTLAND, INOUYE, BAYH, BAKER, and THURMOND with the active interest and support of all of the members of the Judiciary and Intelligence Committtees; and with the valuable contributions of the Attorneys General of both the Ford and the Carter administrations—with the help of all of these people we have produced a bill which for the first time brings all electronic surveillance conducted within the United States under judicial review.

S. 1566 is unique in many ways. It reflects a skillful and careful blending of the sometimes competing interests of civil liberties and national security; it has matured through a 2-year period of close Senate-executive branch cooperation; and its sponsorship represents a

unique bipartisan collaboration in the interests of national security.

Some have wondered what a conservative Senator such as myself was doing cosponsoring what they thought was a liberal bill. The answer is quite simple. This is not a liberal bill. It is not a conservative bill. It is neither a Democratic nor a Republican bill. The tasks of balancing cherished constitutional liberties with increasingly threatened national security needs is too important to be left to partisanship.

This bill grew out of needs created by two separate problems. One was the serious gap which developed over the last several years in the area of foreign intelligence surveillance within the United States. In the face of increasing intelligence activities in the United States by the KBG and other foreign intelligence agencies—much of which involves Americans in one way or another—in the face of this, there have been very few authorizations for electronic surveillance of U.S. citizens for foreign intelligence purposes during the last 5 years. And in one of the very few cases of such surveillances, the current Humphrey case, the defense has put forth the argument that the information obtained by surveillance is not usable since it was not authorized by a judicial warrant. This bill will put an end to that. It will remove the uncertainty and ambiguity which for the last several years has clouded the atmosphere and hindered our counterintelligence officers from carrying out their responsibilities. Let me assure my colleagues that those agencies of the Government who have responsibility for counterintelligence activities within the United States support this bill. They look forward to being able to conduct legitimate foreign security surveillance, when such is needed, with the confidence that the information they obtain will stand up in court if prosecution is sought.

The second need which gave rise to this bill is one with which we are all familiar. Clearly, there have been abuses of the so-called inherent presidential authority in the past. These abuses were unfortunate and should never have occurred. But they did, and in reaction to them we virtually have closed off an important source of foreign intelligence information. This bill initiates procedures and establishes principles which, we believe, will prevent future abuses.

To those of my colleagues who are concerned about bringing the judicial branch into an area where they previously have not been involved, I wish to remind them that when approving warrants against foreign powers and foreign officials, the judge has three responsibilities: First, he determines that the target is in fact a foreign power or foreign official; second, he finds that the procedures proposed in the application will allow an adequate minimization of the acquisition and retention, and prohibit the dissemination, of information concerning U.S. persons which does not relate to national defense, foreign affairs, terrorism, or the activities of a foreign intelligence agency; and third, he reviews a certification from the White House that the information sought by the surveillance relates to, and if concerning a U.S. person, is necessary to the national defense or the ability of the United States to protect itself against certain acts which threaten domestic tranquility.

When U.S. citizens are to be the target of surveillance, then the judge plays a more expanded role. But that is as it should be. As long as our counterintelligence officers have probable cause to believe that a U.S. person's activities may involve a violation of a criminal law, then a judge ought to be more deeply involved. He ought to be involved for two reasons: To see that the rights of the citizen are being protected and to enhance the possibility that information so obtained will be usable in court proceedings.

Many who have followed this bill will recall that when it was introduced last year, several of us requested that the bill include a noncriminal standard for the authorization of warrants. The noncriminal standard was necessary, in my judgment, for several reasons: First, it is very hard to determine if sophisticated, secret spying activities involve a particular criminal offense; second, the desire to use surveillance-obtained information to uncover a wider network of foreign agents often prevents prosecution; and third, the Government may not desire prosecution since to do so would require them to reveal even more sensitive information in a court proceeding. To require that a crime was, or was about, to be committed would have prevented the FBI from conducting much of the investigatory work which is so essential in counterintelligence activities.

Thus, the earlier version of this bill had a noncriminal standard. This bill does not and that difference should be explained. This bill contains a criminal standard, but it loosens somewhat the certainty necessary for that standard to be reached. This bill allows a warrant to be issued on probable cause that a U.S. person's activities "involve or may involve a violation of the criminal statutes of the United States." The use of the phrase "may involve" gives sufficient flexibility and has allowed us to use the more widely acceptable criminal standard. Officials of the FBI and the Department of Justice have assured me that this criminal standard is acceptable to them.

There are some who fear that this bill is too broad and might allow for future abuses. There are others who fear that this bill might preclude legitimate and necessary surveillance. The fact that we have worked for nearly 2 years to balance these needs convinces me of the soundness of this legislation. I believe that the bill protects civil liberties to the maximum extent possible while not foreclosing to our Government the tools it needs to carry out counterintelligence.

Mr. NELSON. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. GARN. I would be happy to yield to the distinguished Senator.

Mr. NELSON. Mr. President, I ask unanimous consent that Peter Connelly of my staff be permitted the privileges of the floor during the debate and rollcalls on this legislation.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. GARN. The distinguished Senator from Wisconsin interrupted me at a very appropriate time, the end of my remarks.

I yield the floor.

Mr. KENNEDY. I ask unanimous consent that Irene Emsellem and Glenn Feldman of Senator Abourezk's staff be permitted access to the floor during the consideration of this legislation.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAYH. I ask unanimous consent that Mr. Ira Shapiro be granted the privileges of the floor during the debate and rollcalls in the consideration of this legislation.

The PRESIDING OFFICER (Mr. NELSON). Without objection, it is so ordered.

Mr. KENNEDY. I yield the floor at this time.

Mr. BAYH. Mr. President, I appreciate very much the thoughtful remarks of the distinguished Senator from Massachusetts, as well as the distinguished Senator from Utah.

I must confess to having rather mixed feelings as we gather together here. I suppose in the depths of my heart, as one who believes very strongly in the freedoms of this country, I am nervous when we get involved in legislation which has the end product of guaranteeing and prescribing the use of scientific and technological devices which can spy on and pry into our lives.

I wish we were living in a world and at a time when that was not necessary, but I think anyone who is at all realistic about what is going on in the world and, indeed, what is going on in this country, has to recognize that this is a utopian view which we hope some day will come if we all persist, but certainly is not the kind of time in which we are living today.

Part of my nervousness, I guess, also goes to the recognition that this bill is required absolutely, unqualified, because of certain misconduct and abuse which are almost unbelievable as far as conduct which one likes to believe is typical of that followed by public officials in the United States. It is conduct where the standards go back over a long period of time, and there is little to be gained, it seems to me, by rehashing those abuses incident by incident because there is enough blame to go around affecting large numbers of people and all of the political philosophies that exist in this country.

So I think the real world has to recognize a significant contribution that this particular legislation is going to make to the delicate balance which is necessary in our society between protecting individual liberties, on the one hand, and yet giving the intelligence agencies the tools they need to protect society, on the other.

The bill before the Senate today, S. 1566, the Foreign Intelligence Surveillance Act of 1978, is the first major intelligence reform measure to be considered by the Congress. It will bring an end to

the practice of electronic surveillance by the executive branch without a court order in the United States. It establishes standards for issuing court orders that reconcile the interests of personal privacy and national security in a way that is fully consistent with the fundamental principles of the fourth amendment and due process of law.

I want to make clear what kind of surveillance this bill covers. The term "foreign intelligence surveillance" might be misleading. It is electronic surveillance targeted against persons who are within the United States, for the purpose of obtaining foreign intelligence information. The techniques include conventional wiretaps and bugging devices, television monitoring, and similar devices that invade a person's reasonable expectation of privacy.

The "foreign intelligence" obtained from this surveillance includes two basic kinds of information. The first is "positive" foreign intelligence about the intentions and capabilities of foreign powers. That kind of intelligence information is used by the President and the National Security Council for the conduct of foreign affairs and the military defense of the Nation. The second kind of information is foreign counterintelligence about spies and international terrorists. Foreign counterintelligence information is used by the FBI to protect against the activities of the Soviet KGB and other hostile intelligence services, as well as to protect against international terrorist activities.

Electronic surveillance is an essential means for obtaining both positive foreign intelligence and foreign counterintelligence information. S. 1566 authorizes such surveillance with safeguards to protect constitutional rights.

This legislation has been developed with broad bipartisan support and the strong endorsement of two administrations. Two years ago Attorney General Edward H. Levi, working closely with Senator KENNEDY and other members of the Judiciary Committee, drafted the first version of this bill. It was reported in 1976 by the Judiciary and Intelligence Committees, but failed to reach the floor before adjournment.

The present bill picked up where that bill left off. Attorney General Griffin Bell and the Carter administration, in consultation with both the Judiciary and Intelligence Committees, agreed to several major improvements in the legislation. The administration accepted the principle that the bill would establish the "exclusive means" for national security surveillance in this country. The protections of the bill were broadened to include certain international communications of Americans. The new bill allowed the judge to review all aspects of surveillance of an American citizen or permanent resident alien.

I note Senator KENNEDY pointed out the bill was not perfect. Indeed, it is not. Both he and I would like to see certain other protections provided in it. One, we do not guarantee the rights of Americans wherever they may travel. There is legislation that has been introduced by many of us who are supporting this bill, both in the Judiciary and Intelligence Committees, which is designed to provide charters for the various intelligence agencies. In that bill we provide very clear protections for American citizens wherever they travel. Whether we will be successful in reaching this goal I must say is yet to be determined. But indeed that is a goal that is very much before us.

The bill as introduced with these improvements was a good one. But I believe it is now better because of the careful deliberations by the Judiciary and Intelligence Committees during the past year. The members of these committees represent a wide range of views on electronic surveillance for intelligence purposes. I know that some of the members have been fearful that any departure from strict fourth amendment law enforcement procedures would endanger the rights of individuals. Other members have been equally concerned that a court order for intielligence surveillance might hamper the ability of the Government to protect the Nation's security.

Despite these wide differences, those of us who have considered this bill so long and so carefully have come to understand why this legislation is necessary. We have made accommodations along the way to make sure that the bill accomplishes its intended purposes. The administration, the intelligence agencies, and interested private groups have participated fully in these deliberations. The final result was agreement on two basic principles.

First is the principle that a court order is required for all electronic surveillance in the United States. The means for carrying out this objective is the establishment of a special court composed of a limited number of designated judges, who consider the applications for surveillance orders. The idea of a special court was first suggested by the Supreme Court in the Keith case in 1972.

Only, Mr. President, by insisting on the presence of the judiciary, both in providing authority and in providing review, were we able, in my judgment, to remove the temptations to which various public officials have succumbed in the past, of getting involved for purposes that were very questionable, and, indeed, in many instances, for purposes of a primarily political nature.

The judges of the special court will, under the bill, apply different standards and procedures depending upon who is the surveillance target. In the case of foreign powers and foreign officials, the judge's role is limited. His duty is to insure clear accountability within the executive branch by requiring a written certification that the surveillance is needed to obtain foreign intelligence information. He also makes certain that information about Americans obtained as a byproduct is used properly. If the surveillance is directed at an official foreign government establishment, the surveillance may last as long as a year before a new court order is required.

On the other hand, in the case of an American citizen, a resident alien, or a private foreign citizen visiting this country, the judge's responsibility is greater. He must make detailed probable cause findings of fact and review the surveillance every 90 days.

These different standards and procedures make it possible to have a court order for all surveillance, without exception.

The second fundamental principle is that a criminal standard is required for surveillance of American citizens and permanent resident aliens. Reaching agreement on this principle took the most careful study.

Mr. President, I think it is important to note that probably the most controversial, the most sensitive, and yet probably the most important aspect of this legislation was that standard, the criminal standard which is required before electronic surveillance of a more traditional kind can be targeted against Americans in this country. It took a great deal of persuasion and of willingness to compromise on the part of all the parties involved.

I would particularly point out the role played by Senator KENNEDY, of course, as chairman of the Judiciary Committee, of Mr. Feinberg, his staff member, of John Elliff, my staff member on the Intelligence Committee, of Senator GARN and his staff member, Stan Taylor, and of all of the heads of the agencies involved who were concerned. We had to work out the wording so that it would not deny them the tools they rightfully required to protect us, but at the same time we were able to establish a criminal standard, which I think was fundamental if we were to fulfill our responsibilities.

The basic problem was that foreign spies use very clever techniques to avoid detection. This makes it hard for the FBI to meet an ordinary criminal standard. However, the Intelligence Committee worked with the Justice Department, with FBI intelligence officials, and with civil liberties experts to develop a more practical standard that is still linked to the criminal laws.

These two principles—a court order for all surveillance in this country, and a criminal standard for surveillance of Americans—are critically important for the future. They establish the legitimacy of electronic surveillance for intelligence purposes. They help remove the cloud of uncertainty that has lingered too long over agencies such as the FBI.

The Intelligence Committee is making every possible effort to insure that our intelligence agencies conduct themselves properly and in accordance with the law. And I must say that I have been heartened by the kind of cooperation we have received in the Intelligence Committee from those who have the responsibility of conducting the intelligence activities of this country. I hope we can continue to build on this rapport and this cooperation, which was initiated under the leadership of my predecessor as chairman of the committee, the distinguished Senator from Hawaii (Mr. INOUYE).

Unfortunately, I think we have to recognize that the law itself is still unclear where foreign powers and foreign agents are concerned. That is why prompt enactment of this bill is vital. As long as

the law is confused and inadequate, many people will fear abuses.

The details of S. 1566 are sometimes complex and hard for the ordinary citizen to understand. But he will clearly understand these two fundamental principles. He will know that the law forbids any U.S. intelligence agency from wiretapping or bugging anyone in the United States without the approval of a Federal court. And he will know that his privacy is protected unless he engages in criminal activities.

That is what it takes: engaging in a criminal activity that has sufficient qualities or characteristics that a Federal judge will grant a request for a warrant for subsequent electronic surveillance.

The bill also sends a message around the world. In many countries, if not most, a visitor to that country has no protection whatsoever against being wiretapped or bugged by the secret police. But in the United States, where we like to feel that we establish a higher standard, and where we feel a high degree of sensitivity about the rights of all human beings, the law will protect private citizens from abroad who visit our Nation if they are not involved in detrimental activity harmful to the United States.

In some cases the protections are somewhat less than those afforded to our own people. But the legal standard has been carefully drafted to meet demonstrated counterespionage needs, and not to allow indiscriminate surveillance of foreign visitors.

I believe the American people can take pride in this legislation. It represents all that we stand for as a nation with a living Constitution that can be adapted to new problems without sacrificing its fundamental values. It shows that all three branches of Government can share responsibility for the most sensitive intelligence activities, so that our system of checks and balances will continue to work as the framers of the Constitution intended.

As James Madison wrote in Federalist No. 51:

> If men were angels, no government would be necessary. If angels were to govern men, neither external nor internal controls on government would be necessary. In framing a government which must be administered by men over men, the great difficulty lies in this: you must first enable the government to control the governed; and in the next place oblige it to control itself. A dependence on the people is, no doubt, the primary control on the government; but experience has taught mankind the necessity of auxiliary precautions.

How wise our Founding Father was so long ago.

Many people deserve credit for bringing this bill to the Senate floor with broad support today. Senator KENNEDY began more than 5 years ago to question the surveillance practices of the executive branch. He and the present Presiding Officer (Mr. NELSON) introduced pioneering bills in this field. Former Senator Ervin and the members of the Watergate Committee helped break through the wall of executive arrogance that concealed electronic surveillance abuses. Senator CHURCH and the members of his select committee investigated the other abuses of the past and laid them out for the public to see. Among the members of the Church committee, the late Senator Philip Hart, Vice President MONDALE, and Senator BOB MORGAN helped develop the recommendations on intelligence activities and the rights of Americans that led to this bill.

Attorney General Levi and President Ford made the decisions that brought about executive branch support for the principles of the bill. Their actions marked the end of nearly 40 years of executive opposition to meaningful legislation in this field.

Attorney General Bell and President Carter carried forward this initiative and helped refine and improve it. And I certainly think it is to President Carter's credit that he is really the first President of the United States who has given up the inherent authority that has been claimed by his predecessor to use foreign intelligence as a reason to invade our privacy through various electronic procedures.

Finally, there are scores of other people—in the Justice Department and other executive agencies, representing the private groups interested in this bill, and on the staffs of the committees—who have devoted long hours over many months to this legislation. Their constructive criticism and advice have made this bill the product of many minds working together.

This bill is a beginning, not an end. There is much more to accomplish before we have a full legislative framework for intelligence activities.

The Intelligence Committee has already begun its hearings on S. 2525, the National Intelligence Reorganization and Reform Act, which provides legislative charters for our intelligence agencies and protects the rights of Americans against improper intelligence investigations. That is our next objective.

Certainly, Senator HUDDLESTON, of Kentucky, deserves a great deal of credit for his leadership in this area.

I urge the Senate to pass S. 1566 and demonstrate to the people of this country and the world that, in the United States, liberty and national security are partners and not enemies.

I would say one last word in conclusion. I have not been involved in a piece of legislation where the issues have been more important and the sincere judgments of the parties involved have been arrayed expressing such a broad cross section of agreement and disagreement. We have had some very intense feelings expressed on this legislation. If it were not for the willingness to work toward the goals of protecting the country and protecting the rights of individuals, we would not have been successful.

I again salute the floor manager of this bill (Mr. KENNEDY) for his leadership.

I would like to say a word about my colleague from Utah (Mr. GARN), who was the ranking member of the Subcommittee on the Rights of Americans of the Intelligence Committee.

He looked at this legislation carefully. He had some reservations about it. I think probably he has reservations about it where we are now, as I do. We recognize it is not a perfect piece of legislation. But he, as well as other members of our subcommittee and the full committee, and, hopefully, Members of the Senate as a whole, are willing to put aside our personal preferences and move toward a common goal. Without that kind of tenacity and willingness to follow what I believe is the setting of an example of the legislative process that we have witnessed throughout the past several months, we would not be here today.

I would also like to express my thanks to the vice chairman of the Intelligence Committee (Mr. GOLDWATER), who moved in committee that we recommend S. 1566, as amended, for enactment. No one is more devoted than he to the defense of the Nation, and we greatly value his support.

Mr. THURMOND. Mr. President, I wish to join my distinguished colleagues, Senator KENNEDY, Senator BAYH, and Senator GARN, in expressing my support for the Foreign Intelligence Surveillance Act of 1978.

This bill comes before the Senate at a most critical point in the course of world events. International tensions are increasing and the newspapers are filled with accounts of international terrorist activities. We have no assurances that the United States will be free from this kind of activity now or in the future. That is why it is important that definite procedures be established to permit the use of foreign surveillance methods.

Mr. President, this legislation strikes a proper balance between the civil liberties of the individual and the need for this Nation to collect foreign intelligence information important to its security and its conduct of foreign affairs.

In providing a warrant procedure the American public is reassured that no individual will be subject to electronic surveillance unless a judicial officer has authorized it and that the individual is engaged or may be engaged in intelligence-gathering activities on behalf of a foreign government. The procedure will also insure that the Government will be able to collect foreign intelligence information necessary for the United States to protect itself from intelligence gathering by foreign agents within the United States.

Mr. President, this bill also provides that a court order approving electronic surveillance may be granted by any one of seven district court judges publicly designated by the Chief Justice of the United States. In addition, there shall be a special panel of three judges designated to review the denial of any application for an order approving electronic surveillance. Each judge designated shall serve for a maximum of 7 years and not be eligible for redesignation.

There are provisions for the employment of electronic surveillance in an emergency situation where an authorized order cannot be reasonably obtained. The Attorney General may authorize an emergency wiretap for up to 24 hours, but must within that period either obtain an authorized order or terminate the surveillance. If the appropriate authorization is not obtained, no information or evidence obtained may be used

in a trial, court, or other similar Government proceeding.

Mr. President, although the case law in this area has supported or left untouched the policy of the Executive in the foreign intelligence area having the constitutional power to engage in electronic surveillance for foreign intelligence purposes and without a judicial warrant, S. 1566 lays down definite congressional guidelines for the use of foreign electronic surveillance. I support this approach because I believe that the failure of the Congress to act decisively in this area may lead to a chilling effect on the use of foreign electronic surveillance in this country. The Nation needs to have the kind of information provided by electronic surveillance in order to conduct its foreign affairs, maintain its military strength, and preserve domestic peace.

There is no requirement in this bill, Mr. President, that certain targets of electronic surveillance be actually engaged in the commission of a crime. Nor should there be such a requirement for those engaged in actual spy activities.

Our espionage statutes were written before World War I, and the nature of intelligence gathering has changed a great deal since that time. Much espionage today is directed at industrial processes and trade secrets. The gathering of material of this nature by foreign agents for the benefit of foreign powers who are not our allies is generally not illegal, but the Government should be able to discover these clandestine activities.

Furthermore, even activities which in their completed state would be crimes, but have not reached the threshold of criminal conduct, may go undiscovered unless the Government is able to collect information about foreign intelligence services working at the direction of a foreign power. The retention of a noncriminal standard in the bill will allow the Government to discover this kind of foreign surveillance activity.

Mr. President, this bill comes before the Senate as the product of careful consideration by two committees, the Intelligence Committee and the Judiciary Committee. As ranking member of the Judiciary Committee I can assure my colleagues that all aspects of this legislation have been thoughtfully considered. The Department of Justice, the Central Intelligence Agency, the Defense Department—all our Federal agencies with intelligence responsibilities have been consulted. Likewise, the American Civil Liberties Union and other public groups have had the opportunity to present their views and suggestions to improve the bill. Two administrations, the present one, and the Ford administration, have supported this legislation. It has bipartisan support in this body.

Mr. President, I ask my colleagues to judge this bill on its legislative record over the past few years in the Senate. It has withstood the scrutiny of many eyes and is now ready for approval. I support S. 1566 and urge my colleagues to do likewise.

Mr. STONE. Mr. President, I ask unanimous consent that Tom Moore, of my staff, be granted the privileges of the floor during the votes and proceedings on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I make the same request for Mr. Jim Davidson, of the staff of Senator MUSKIE.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I make the same request for Eric Hultman, of the staff of the Judiciary Committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WALLOP. Mr. President, I ask unanimous consent that Angelo Codevilla, of my staff, be granted the privileges of the floor during the consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

The question is on agreeing to the first committee amendment.

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. GARN. I ask unanimous consent that it be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

M. THURMOND. Mr. President, I understand that the distingiushed Senator from New York desires time. How much time?

Mr. MOYNIHAN. I ask 10 minutes.

Mr. THURMOND. On behalf of Senator KENNEDY, I yield 10 minutes to the Senator from New York.

Mr. MOYNIHAN. I thank the Senator. May I amend that to ask for 12 minutes?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I am happy to join with all my colleagues on the Select Committee on Intelligence in supporting passage of the Foreign Intelligence Surveillance Act. This bill represents the culmination of a great deal of effort, a good part of which was expended by my colleagues before I had the honor of joining them. Two successive Attorneys General, from opposite parties, worked closely with the committee in the drafting of this bill, and were fully in support of its general concept and most of its detailed provisions.

I would support the bill, if for no other reason than that it is a fitting monument to the high regard in which we should—and, in the main, do—hold the right to privacy of every American.

We were forcefully reminded, several years ago, of the necessity of vigilance in protecting this right by the work of the Church committee, the distinguished chairman of which has been on the floor this morning. Following the disclosure of abuses involving warrantless wiretapping and surveillance, the executive branch, under both Presidents Ford and Carter, responded with two Executive orders and a series of regulations promulgated by the Attorney General, to control this sort of behavior. It seems that this effort at self-regulation by the executive branch has been successful—so successful, in fact, that the Attorney General informed us earlier this year that only one U.S. citizen was the target of warrantless electronic surveillance for foreign intelligence purposes this year.

We now know that this particular citizen was reasonably suspected of passing classified Government documents to a foreign country, and that the electronic surveillance involved was of a particularly nonintrusive sort—a videotape, with no audio recording, was made of the subject's behavior in his work area in a Government office building.

Some might then ask, if the wrong has already disappeared, why do we need such a massive remedy? The first, and more obvious reason, is the need for extreme care in protecting the right of privacy of our people. In fact, I have often spoken about the incomprehensible fact—to which I will return in a few moments—that our Government has been neglecting a much more serious threat to the privacy of communications in this country than that theoretically posed by the U.S. intelligence agencies. Nonetheless, even if the wrong has disappeared, it makes sense to construct some barriers against its possible reappearance.

But there is a second, and less obvious, reason why this, or some similar, remedy is needed. As a result of the incessant attention and criticism focused on the intelligence agencies by the press and by a series of congressional committees, and as a result of the confusion created by the absence of statutes in this area, our intelligence agencies today very likely find themselves uncertain of their authority and may well be increasingly reluctant to stick their necks out and take aggressive action which will later be found to have violated the law.

This is an understandable concern on their part; while only three people have been indicted for espionage in the last year, five current or former officers of intelligence agencies—including former CIA and FBI Directors—have been indicted for alleged violations of law. While we can as little condone violation of the law by Government officials as by anyone else, we should have some sympathy for officials who thought their actions fell within a widely understood and accepted consensus—even if that consensus were tacitly rather than explicitly accepted and transmitted to newcomers.

It now turns out that this tacit consensus is recognized neither by the law nor by the political process, and that officers of the intelligence agencies are to be held to written legal standards. Yet these written legal standards were not drafted with the requirements of intelligence collection in mind.

To make matters worse, this development is taking place at a time when the

number of Soviets and Eastern European diplomats, businessmen, students and even merchant seamen visiting the United States is rising rapidly. We know from long experience, both our own and that of nations friendly to us, that many of these visitors from Communist countries are engaged in clandestine intelligence activities; for the most part this must mean inducing, by one means or another, Americans with access to sensitive information to share it with them. While it would be nice to think that this cohort of foreign agents, with one exception, has been so unsuccessful as to obviate the need for electronic surveillance, I think we must admit that this is unlikely to have been the case.

Consequently, the Judiciary and Intelligence Committees have introduced the present bill to authorize the use of electronic surveillance to obtain foreign intelligence information, while, at the same time, protecting the right to privacy of U.S. citizens and aliens from abuse by our own intelligence agencies.

In doing this, however, we are entering virgin legislative territory. Until now, no nation in the world has tried to regulate its foreign intelligence agencies in the manner in which we now propose to do. The attempt to bring a whole area of heretofore unregulated behavior under the strict rule of law exposes us to two risks: First, we may unduly restrict our intelligence agencies and so endanger our national security or the successful conduct of our foreign policy; or second, we may so distort the procedures and traditions of the judiciary as to weaken the protection it can afford individual citizens and aliens, to force it to make inherently administrative—that is, nonjudicial—decisions, and, ultimately, to dissipate the high prestige in which the judiciary is held and on which the bill itself so heavily relies.

In all candor, I must admit that I am unable to offer any assurances that these risks will not materialize. The very unprecedented nature of the bill should make us wary of accepting assurances of this sort.

I do, however, wish to call attention to a provision of the bill, on which we have not focused our attention, but which I believe speaks to these concerns. My colleagues and I included in the bill the following provision, section 2528(b):

(b) On or before one year after the effective date of this chapter, and on the same day each year thereafter, the Select Committee on Intelligence of the United States Senate shall report to the Senate, concerning the implementation of this chapter. Said reports shall include but not be limited to an analysis and recommendations concerning whether this chapter should be (1) amended, (2) repealed, or (3) permitted to continue in effect without amendment.

This provision for annual review suggests that we should devote some thought to the criteria against which the select committee should judge the adequacy of the bill. While only the members of the select committee are charged with the responsibility of reviewing the working of the bill and making recommendations, every Senator can take part in the discussion by which are established the standards against which the bill is to be measured.

In this spirit, I would like to discuss some questions which the select committee should consider in the annual reports it will issue on this bill.

First, are we receiving an adequate amount of foreign intelligence information? Or, are we being unduly restricted in our foreign intelligence activity by this bill?

Second, are we able to counter foreign espionage activities in the United States? To put the matter bluntly, are we catching Soviet and other Communist spies in proportion to the increasing opportunities for espionage which the Soviet Union and other Communist countries enjoy?

Third, have we made progress in protecting the privacy of our communications from hostile intelligence services? While this bill does not directly address this question, it does define as an "agent of a foreign power," and hence as someone whose communications are subject to interception—

any person who—knowingly engages in clandestine intelligence gathering activities for or on behalf of a foreign power, which activities involve or may involve a violation of the criminal statutes of the United States.

Thus, the authority provided by this bill is available to help protect the privacy of Americans from the activities of foreign intelligence services. This bill alone, however, is clearly insufficient for this purpose. For this reason, 16 colleagues joined me last summer in sponsoring the Foreign-Surveillance Prevention Act (S. 1950).

Accordingly, Mr. President, I should like to call further attention to this problem of the intrusion by foreign intelligence agencies in the private communications of American citizens. So far as one can tell, this is of an incomparably greater order of magnitude than anything ever contemplated, much less actually carried out, by American intelligence agencies.

I recall the Attorney General's report to us that this year, there has been one American citizen who has been subject to warrantless electronic surveillance by American intelligence agencies.

However, I would not be surprised if upwards of 1 million American citizens were, at this moment, having their telephone calls listened to by the KGB, the committee of state security of the Soviet Union. They are overheard by receivers on the top of the Soviet Embassy here in Washington. A new Soviet Embassy soon to be built on a hill in Washington, will, for this purpose, no doubt, be even better situated for the interception of the telephone calls of anyone on this floor, or in the gallery, or who will read this RECORD. Telephone calls are intercepted for the Soviet Mission to the U.N. in Manhattan and from their skyscraper in Riverdale, in New York City, again for the purpose of intercepting and sorting out by computer American telephone calls. This massive invasion of our privacy by Communist intelligence agencies is taking place daily and blatantly; viewers of a recent Columbia Broadcasting System program saw the receivers on the top of the Soviet Embassy here in Washington.

So, Mr. President, last year, as I said, in cooperation with 16 colleagues, I introduced a bill entitled "The Foreign Surveillance Protection Act," S. 1950. I said, in introducing the bill on July 27, 1977:

The principle here is simple: so far as electronic surveillance is concerned our law defines what Americans cannot do to each other; it is time for a law which says what foreign governments cannot do to us.

Unfortunately, Mr. President, the Judiciary Committee, to whom this bill was referred, has not until now had the opportunity to consider it and to hold hearings on the subject.

Yet, at this moment, when we adopt such a major piece of legislation protecting the privacy of Americans against their own intelligence agencies, is it not an appropriate time to ask whether we will protect ourselves, the same Americans, against the activities of foreign governments? Now that we are about to enact strong statutory safeguards for the protection of privacy against the activities of U.S. intelligence agencies, is it not all the more incumbent on us to provide adequate safeguards against the activities of foreign intelligence services?

Since I introduced the Foreign Surveillance Protection Act last July, the administration, as reported in the Atlanta Constitution of November 20, has set up an interagency committee under the chairmanship of Dr. Frank Press, who is the President's science adviser, to coordinate Government policy on communications security. It is time for Congress to assure itself that this committee is on the road to solving the problem or, if it is not, to enact legislation to clarify the duty of the Government to protect the privacy of communications from foreign intelligence services, and to authorize, if necessary, the actions by which this can be done.

Mr. President, I wish to emphasize one thing here. I admire and trust the administration and its behavior, but I cannot help but note that much of its present calm about this matter derives from its having secured its own communications against Soviet interception, not ours.

Every institution comes first, and to Government, Government comes first, but cannot the citizenry come second?

In any event, it seems to me time for Congress to assure itself that this interagency committee is doing its job and also to ask what should be done about governments who come to the United States and install facilities violating the laws.

The Soviet interception of American telephone conversations, to my knowledge, Mr. President, is a criminal act.

If the distinguished Presiding Officer, the Senator from Wisconsin, were to set up today on the roof of the University Club next to the Soviet Embassy and do during the day what the Soviets do during the day, alas, the Senator probably would be arrested and charged with criminal invasion of privacy, or whatever the law may be, and treated without ap-

propriate respect by his own Government because he would be violating the law. But if he were a Russian intelligence agent next door, that would be different.

The intelligence agent is different in that he is immune from arrest in some instances, but he is not immune from being declared persona non grata.

In the meantime, the fourth amendment rights of Americans have to be protected.

In open hearings, I asked the counsel to the CIA, who said to me, that the fourth amendment protects us only against violations by our own Government, and that the fourth amendment provides no protection against violations by foreign governments.

If that is so, it suggests to me that a statute is in order.

I do not want to detain the Senate further on this matter, but I understand that the Chairman of our Select Committee on Intelligence, the distinguished Senator from Indiana who has been so much responsible for the legislation now before us, feels that the Judiciary Committee will be in a position to hold hearings on the legislation which we have introduced, legislation having to do with foreign surveillance of American citizens in this country.

I wonder if that is not the case?

The PRESIDING OFFICER. The time of the Senator from New York has expired.

Mr. MOYNIHAN. May I ask for 2 additional minutes?

Mr. BAYH. I yield the Senator 2 additional minutes.

In response to the question of our colleague from New York, I will say that as a member of the Judiciary Committee, I will be glad to use whatever little influence I might have on those who are in a position to make this decision.

I think we should have hearings.

The Intelligence Committee, of which the Senator from New York is a member, does not have jurisdiction over this matter. However, it is certainly within reason that we could hold hearings on the subject.

Mr. MOYNIHAN. Yes.

Mr. BAYH. However, we would not be permitted to hold hearings on the bill since that is a product of the Judiciary Committee authority. It has been referred, as the Senator from New York is very well aware.

Mr. MOYNIHAN. What my friend suggests, if I understand him is that the Intelligence Committee will hold hearings on this subject, and that it will make its findings available to the Judiciary Committee for any course it may wish to pursue.

Mr. BAYH. That is accurate.

Mr. MOYNIHAN. Fine.

I want to thank the distinguished Senator from Indiana and the distinguished Senator from South Carolina who is listening with such courtesy, and say that the Judiciary Committee surely would wish to show itself as zealous to protect Americans against eavesdropping by Communist agents as by the FBI.

Mr. BAYH. Would the Senator permit me to state one thought?

Mr. MOYNIHAN. I am happy to.

Mr. BAYH. I share his concern and I am sure I shared his shock when we were first made privy to the extent of this clear invasion of the privacy of American citizens.

I must say, I would not want the record to read that the issue is quite as clearcut as it might read if we stopped a discusion of this issue right now. I talked to a number of people in high places, as I am sure the Senator from New York has, and they are concerned about this. Hopefully, we will be able to find a way to deal with it. Maybe his bill is the answer.

But I think it is important to point out that we have a problem here that is a much stickier wicket than just the traditional kind of diplomatic immunity.

I think the security of the questions involved precludes any of us discussing the details of this again. But I think it is fair to say that the United States, and aware of its activities elsewhere in the world, does not put our country and countrymen at an issue having totally clean hands in this argument.

Mr. MOYNIHAN. The Senator is entirely correct.

Mr. President, one final observation. After Watergate, after the findings of the Church committee, are we not warned against people who rise and whisper in our ears that in the interests of national security we must violate the constitutional rights of Americans?

When we hear that, we become alerted to the abuses of the past and become concerned about possible abuses of the future.

American citizens have as much right not to have the Russians eavesdropping on them as not to have their own Government eavesdropping on them.

Mr. President, I thank the Chair, I thank the chairman of the select committee, and I thank the Senator from South Carolina.

The PRESIDING OFFICER. Who yields time?

Mr. MORGAN addressed the Chair.

Mr. BAYH. I yield to the Senator from North Carolina whatever time he wants.

Mr. MORGAN. Approximately 10 minutes.

Mr. BAYH. He is a distinguished member of our subcommittee and the previous committee and is certainly well qualified to speak on this subject.

The PRESIDING OFFICER. The Senate has 7 minutes remaining.

Mr. MORGAN. I thank my distinguished colleague and I will try to make my remarks as brief as I can.

Mr. BAYH. If the Senator will permit me, I think the time restraints permit an hour for each amendment on the bill, and if the Senator from North Carolina does not have sufficient time, we have three or four amendments that will not require nearly an hour to discuss, and I am prepared to introduce one of those, if the Senator needs the time.

Mr. GARN. If the Senator will yield, we have adequate time. We have 45 minutes remaining on this side of the aisle. I would be happy to yield what time is necessary for the Senator from North Carolina and the Senator from Wyoming.

Mr. MORGAN. I thank my distinguished colleague.

The PRESIDING OFFICER. The Senator from North Carolina is yielded 10 minutes—7 minutes from the majority side and 3 minutes from the minority side.

Mr. MORGAN. Mr. President, first, I commend the distinguished Senator from Indiana, who chairs the Select Committee on Intelligence; the distinguished ranking minority member of that committee, the Senator from Utah; and the distinguished Senator from Massachusetts and the distinguished Senators from South Carolina for the splendid work they have done on this most difficult piece of legislation, it really is landmark legislation.

I am extremely interested in this subject and have been for many years. I became interested in illegal and unlawful wiretapping when I became attorney general of North Carolina more than 10 years ago, at which time I ordered my State bureau of investigation to cease all wiretapping unless properly warranted. Then, as a member of the Church committee, I say what could happen. So I wholeheartedly endorse this bill, and I commend my colleagues who have worked so hard on it.

Mr. President, there are several stories behind today's consideration of the Foreign Intelligence Surveillance Act of 1978. Not only does it mark the culmination of one of the Senate's first efforts to place the activities of our intelligence agencies under the rule of law, but it also demonstrates that within this body and the Executive there remains intact an unalterable respect for the rights of American citizens.

The history of wiretapping and electronic surveillance in this country is long and vivid. The Supreme Court, in the case of Olmstead against United States, in 1928, held as admissible evidence which had been obtained through the use of a wiretap. In his famous dissent to that decision, Justice Brandeis stated that the makers of our Constitution "conferred as against the Government, the right to be let alone—the most comprehensive of rights and the right most valued by civilized man." Justice Brandeis went on to say, speaking of techniques to be used in the future:

> The progress of science in furnishing the Government with means of espionage is not likely to stop with wiretapping. Ways may some day be developed by which the government, without removing papers from secret drawers, can reproduce them in court and by which it will be able to expose to a jury the most intimate occurrences of the home.

Justice Brandeis' words could almost be considered prophetic for that day has come. Not only has the rapid development of technology been accompanied by an increase in the use of electronic surveillance techniques, but we have also seen our most valued right—to be left alone by our Government—consistently violated.

In the series of court cases which followed the *Olmstead* decision, our law evolved to the point where warrantless electronic interceptions of private communications were considered "unreason-

able searches and seizures." Title 18 of the Omnibus Crime Control and Safe Streets Act of 1968 codified much of the existing case law by prohibiting government eavesdropping except to gain evidence in certain cases of serious crimes and by requiring a warrant in those cases. Case law as well as our present statutes have left unanswered the question of whether an exception to the warrant requirement exists in cases of national security where there is the possible involvement of a foreign power.

Not only did this loophole in the law exist, but our highest executive officers, going back for decades, have attempted to legitimize warrantless electronic surveillance under the guise of Presidential claims of inherent authority to do whatever may be necessary in the interest of national security. In 1940, President Roosevelt authorized the use of electronic surveillance against "persons suspected of subversive activities against the Government of the United States, including suspected spies." Litigation which rose out of the warrantless electronic surveillance of staff members of the National Security Council was concluded last year. And a current espionage trial taking place at this very moment here in Washington has as one of its primary issues the question of whether the President has an inherent right to conduct warrantless electronic surveillance for national security purposes.

Mr. President, I have been closely involved with our Nation's intelligence agencies, their activities, and the guidance and direction they receive since I first came to the Senate. Two lessons I have learned which stand out very clearly in my mind are—one, that in this time of highly charged nationalist movements and outbreaks of terrorism throughout the world, we need and must have the best available intelligence if we are to continue to maintain our stature in the world, and, two, that the activities of our intelligence agencies must be conducted pursuant to rules of law consistent with our Constitution.

I have found out intelligence agencies capable of competently carrying out their assigned tasks, and the Intelligence Oversight Committee has proven to be a workable forum for the interchange of ideas between the executive branch and the Congress. The end result in this case is the legislation before you, which I wholeheartedly endorse.

As we all know, there exists a direct conflict between the ideas of a democracy and intelligence which gives rise to a distinct difficulty in drawing a balance between what activities our Government may participate in in order to protect us and the protection of our ideals of individual liberties. I feel that too often in the past, our law enforcement agencies, followed by our intelligence agencies, came down on the side of vigorous pursuit of their activities to the detriment of the American citizen. Just as there are bad apples in every barrel, there are those in this country who will engage in espionage on behalf of our adversaries. And while we must, repeat, must be vigilant in our pursuit of these traitors, we must remember that the vast majority of American citizens love their country and would not participate in activities to its detriment, especially when cooperation with the enemy is involved.

Because of my faith in the American people, I was unable to support last year's attempt to legislate in this area. That legislation, which would have permitted electronic surveillance of persons not involved in criminal activity, was inconsistent not only with the trust I have in the American citizen, but was also contrary to my concept of how the Congress should go about implementing reform of our intelligence agencies through legislation. The past had shown me that even though our governmental leaders and members of the intelligence community may have had the best intentions, there were abuses. One abuse led to another, and another, and eventually we may have been faced with a KGB or Gestapo without even knowing it. The origins of the abuses rested in the fact that Americans who had done no wrong could be investigated, in the absence of criminal conduct. Once the investigations started, there was no stopping point.

S. 1566 has adopted a criminal standard with which I feel comfortable. Not only will the passage of this legislation constitute a significant guide as we consider other legislation dealing with intelligence, but it assures that such future legislation and the activities of our intelligence agencies will be conducted in accordance with the principles of our Constitution.

Mr. President, there are those who say that we cannot gain the kind of intelligence we need in order to protect the country and the people of this country without sometimes engaging in electronic surveillance without warrants. I would argue with these people.

As I mentioned earlier, when I came into office as attorney general of North Carolina, I immediately declared that we would not engage in any kind of illegal wiretapping or electronic surveillance, except by warrant of the courts. I found that our agents in the State bureau of investigation became more proficient. They were able to do their jobs; they did a better job.

If we establish, as we will by this bill, that we in Government, we in the intelligence agencies, we in the law enforcement agencies, must live within the law, then we will learn to do it, and we will learn to do a better job of it.

I do not see how we can continue to generate respect for our system of Government and respect for the laws of this land when we have people in Government disobeying these very laws.

I wholeheartedly endorse the proposed legislation. I commend the two committees that have worked so hard and so diligently with the members of the executive branch in coming up with a bill with which I think most Members of the Senate feel comfortable.

The PRESIDING OFFICER. Who yields time?

Mr. GARN. Mr. President, I yield 10 minutes to the distinguished Senator from Wyoming.

Mr. WALLOP. Mr. President, I thank my colleague, the distinguished senior Senator from Utah.

Mr. President, as is pointed out in the committee report, there are good reasons to pass such a bill as this. We need a clear legal authority for electronic surveillance for national security. We need standards, and there needs to be a means, an agency, to make certain those standards are observed.

Nevertheless, while we rush to protect the rights of our citizens, as individuals, in one field, I think we must take care not to trample their rights to have their system of government remain intact in other fields.

The bill provides clear legal authority, and sets out some standards. They are arguable standards. For example, a U.S. person working for the interests of a hostile power may not be surveilled under this bill unless it can be shown he is doing what he is doing under the control of the foreign power. Freelancers may not be surveilled. There are other questions on standards set forth in my additional views to the Intelligence Committee's report.

But the main issues that concern me in the bill are of a constitutional nature. The power to surveil for purposes of national defense and foreign affairs is clearly part of the President's powers over defense and foreign affairs. Yet, this bill stipulates that before the President exercises part of his powers over defense and foreign affairs his actions must be approved by another branch of Government.

Congress has the right to set standards for the exercise of Presidential powers and I have no quarrel with that. We further have the right to demand the President adhere to them. But do we have the right to prevent him from acting until a judge has approved?

Do we have the right to direct that article III Federal judges perform functions such as the ones we have in this bill?

The Supreme Court may well say no.

Furthermore, is it wise to bring judges into the fields of defense and foreign affairs? Are we so happy with the growth of judicial power in other fields in recent years that we wish to extend it?

Mr. President, I point out certain historical precedents for this question in my additional views, and I shall quote briefly from them here. The courts themselves have questioned their ability in this matter.

> Heretofore the judicial branch has resisted temptations to declare itself competent in foreign affairs and defense. In the case of *Chicago Southern* v. *Waterman Steamship Co.* (333 U.S. 103, 111, 1948), the Supreme Court acknowledged the court's incompetence in matters of foreign intelligence. The substance of such matters, said the courts "are delicate, complex, and involve large elements of prophecy. They are and should be undertaken only by those directly responsible to the people whose welfare they advance or imperil." Such decisions are in "the domain of political power, not subject to judicial intrusion or inquiry."
>
> Clearly, defense and foreign relations are political tasks. That is to say, they are to be conducted subject to the people's power to elect. The power to surveil for purposes of defense and foreign affairs belongs to that

branch of government empowered by the Constitution to command the armed forces and conduct foreign affairs. There are no judicial criteria for interpreting whether this or that foreign visitor is or is not an agent of a foreign power, whether this or that American's connection with persons who may have some relation with the intelligence services of a foreign power has sufficient connections to warrant surveillance.

The Senate should think about such questions before acting in haste.

Do we really want to view the process of gathering intelligence for our protection under the rubric of criminal law? Do we want to assume that unless a U.S. person may be guilty of something we cannot surveil him to gather information we may need to safeguard ourselves from foreign powers or from terrorists?

Will these combinations of restrictions hamper our defense? What will the American people say if and when the kind of terrorism which is now ravaging Western Europe hits us? Will they blame us for this bill?

May I suggest that if these questions are not given due attention today, a time may come when we will wish they had been examined more carefully.

Mr. President, the interesting thing is that it was not the courts but Congress who discovered the abuses of the recent past, and who brought them to the attention of the courts. Perhaps it would be a wiser choice for us to take that direction, rather than to intricately intermesh the three separate branches of our Government. When one does that one makes it impossible for one branch to render a real judgment on the other. Should all branches be involved in a decision the time could come when injured persons would have no one left to appeal to.

That is my basic concern, that once the courts have entered into this field, Americans will find it harder to redress abuses. If a court authorizes abusive surveillance Congress can finally try to do something about it. But to overrule a court is harder than to question a President's judgment.

Indeed, what we are saying here, I guess, is that we should have faith in our Presidents, that they will use their power to surveil judiciously, and that we should have faith in our ability as a Congress, through the Judiciary Committee and Intelligence Committee, to conduct such oversight as is necessary, and to bring a final appeal place; namely, the courts of the United States, within the reach of someone who may have been surveiled in an illegal manner. But if once the courts approve Presidential decisions on surveillance before the fact then, it seems to me an individual's judgment that he has been wrongly surveilled is his to share in solitude, because there will be no other place for him to pursue it.

Mr. President, I have a question that I wish to direct to the distinguished chairman of the Intelligence Committee who also is on the Judicial Committee that provides the linkages in this matter, I guess, because I think perhaps an answer to these questions now might well prick the attention of Congress as we overview the results of this act in the years to come.

I ask Senator BAYH, the chairman of the Intelligence Committee, whether that committee will have authority under the bill to evaluate surveillance that a court approves, and would the oversight committee be limited by the fact that a court has approved that surveillance?

Mr. BAYH. No, it would not, I say to my distinguished colleague from Wyoming. The court and the oversight committee have different functions. The job of the Intelligence Committee is to determine whether the executive branch is following the intent of the legislation and whether the law needs to be changed. If the executive branch violates the intent of Congress and the court misunderstands that intent and approves the surveillance, then we must act. Our duty under the bill is to recommend any changes needed in the law. This gives us the authority to look into all significant aspects of the surveillance.

The PRESIDING OFFICER (Mr. HATHAWAY). The Senator's 10 minutes have expired.

Mr. WALLOP. Mr. President, will the distinguished Senator from Utah yield us another 5 minutes?

Mr. GARN. I am happy to yield 5 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 5 additional minutes.

Mr. BAYH. Mr. President, I think the purpose of the legislative branch or the role of the legislative branch has been quite appropriately emphasized by the Senator from Wyoming, in the judgment of the Senator from Indiana, he, indeed, being involved not only in this particular legislation, but in trying to get charter legislation passed, as the Senator from Wyoming is very much aware is presently before our committee. The fact that we are saying to the agencies, "Thou shalt not violate the rights of the individual Americans and thou shalt go to a judge before you undertake certain kinds of surveillance activities," in no way lessens our responsibility to oversee whether the judge is doing his job or not, or whether the whole system is working properly.

I thing the congressional oversight role is extremely important with or without the bill.

Mr. WALLOP. If the executive branch violates the intent of Congress in this bill and the court misunderstands that intent and approves a surveillance, then who acts? Do we, Congress, act?

Mr. BAYH. Congress in its oversight function hopefully would find the weakness and then would make recommendations as to how the law should be changed to keep that kind of weakness from continuing.

Mr. WALLOP. This is not part of the conversation that we have had earlier. But would there be no way in which we could draft legislation setting out the standards by which and under which wiretap surveillance or electronic surveillance would be conducted, without giving the court the yea or nay say before the pact?

Mr. BAYH. Yes, Congress could establish standards, give this authority strictly to the executive branch, either the Attorney General, the President, or some designee. There are certain responsibilities that must be carried out by executive branch in the proposed charter legislation. There is a wider area of designated responsibility to the executive branch. But it was the feeling of most of us involved in the process that led us where we are now that given the kinds of abuses that have existed in the executive branch, and not just the most recently advertised experiences, that we would be wiser if we gave the judge the authority to make that determination as to what the purpose of the executive branch was and whether it did indeed meet the standards we had put in the legislation.

Mr. WALLOP. Are we not than putting the judicial branch into the executive business, giving them the decison before the fact rather than after the fact?

Mr. BAYH. I do not think so, I say to my friend from Wyoming.

The executive branch initiates proposals, and the way this would work, of course, is that one of our intelligence agencies, their personnel in the field, would have matters brought to their attention that they thought merited electronic surveillance—that the country was about to be harmed by certain activities or could be harmed by certain activities.

Then they would make this application to the Justice Department. The Justice Department would then make the proper request through the judge, and the judge would look at the application to see whether it was meritorious. If he thought it was then he would permit, under the limitations of the bill, the surveillance to proceed.

It would not be a procedure initiated by the judicial branch.

Does the Senator from Wyoming have similar concerns about the role of the judge in granting warrants under title 3 electronic surveillance in the 1968 crime control and safe streets bill?

Mr. WALLOP. But in this particular instance I have more concern about the foreign affairs and intelligence affairs than I do have as to the standards of conduct for criminal affairs for the simple reason that the courts are less expert in the field of foreign affairs, by their own admission.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. THURMOND. I yield 1 more minute.

Mr. BAYH. I understand the concerns of the Senator from Wyoming, and I appreciate the fact that he has pursued these concerns.

Our feeling was, and I think the basis for this procedure in this bill is, first of all, we have adequate precedent under the Crime Control and Safe Streets Act of 1968 where under title 3 the judicial warrant-granting procedure has been utilized now for almost 10 years. It has worked very well. Even prior to that the pursuit of judicial warrants in certain areas like this was a well-accepted pro-

cedure rooted in fundamental fourth amendment principles.

The second area I think the Senator from Wyoming should recognize—and I am sure he does, but I would just like to point it out in our colloquy—is that a person who is abused under this act does not need to wait for a judge or Congress to recognize the error. He or she, if abused, is certainly within his or her constitutional rights to pursue remedies available under this act through a court of law under a different judge, we would assume, where the rightness of the decision of the original judge and the executive branch would then be tested.

The PRESIDING OFFICER. The Senator's 1 minute has expired.

Mr. WALLOP. May I just respond?

Mr. THURMOND. I grant the Senator and yield 2 more minutes.

Mr. WALLOP. I thank my friend from South Carolina.

The only thing I would say to my friend from Indiana is in the crime bill there is a difference. There the issue is very specifically crime, and the purpose of surveillance is to bring the case to trial, whereas in intelligence cases it is doubtful that many of them will ever come to trial. There is seldom a trial for somebody who is involved in this kind of thing. We are not trying to catch criminals but to gather information to protect the national interest of the country. So I perceive a difference in the Safe Streets Act and in the use of electronic surveillance in crime as opposed to the use of electronic surveillance to conduct national defense and interior defense of the country.

Mr. BAYH. I should point out to my friend from Wyoming we established a different criminal standard in dealing with spies, and a noncriminal standard for foreign officials, and certain agencies or institutions that exist in this country, which are controlled by foreign governments as front operations, and the Senator is familiar with that. We established a different standard, a different criminal standard, than that applied under title 3. So the standard is not the same.

Mr. WALLOP. I understand that. The only thing that worries me, and worries me considerably, is it is drawn so tightly that the freelancers, the guys not under the control of the foreign government, are not subject to control.

Mr. BAYH. I would suggest to my friend that if that person is doing anything that comes close to violating a crime he comes close to title 3. I think if we believe in our Constitution and how it protects people in this country, not just our own citizens, that a freelancer, if he is to pursue activity that is close to sabotage, does it at his peril, because he then can be wiretapped under title 3, because to commit sabotage or espionage is to commit a crime covered by title 3.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. BAYH. I thank my friend.

● Mr. ABOUREZK. Mr. President, the Senate is acting today on one of the most important pieces of legislation to come before this body in some time.

For 40 years, Presidents have engaged in electronic surveillance for foreign intelligence purposes in the United States. Their common justification for these activities has been some claimed "inherent constitutional power" which somehow superceded the warrant requirements of the fourth amendment.

If enacted today, S. 1566 will end this pattern. For the first time, Congress will go on record as saying that no such "inherent power" exists. For the first time, we will require that a detached magistrate review the requests for surveillance activities within the United States. For the first time, warrants will be required in the area of foreign intelligence electronic surveillance. And for the first time, executive branch officials will be required to justify their requests for these warrants on the record.

All of these factors are important. Yet, as my colleagues know, one issue above all others has concerned me during the deliberations on this legislation. That, of course, has been the standard by which such surveillance orders may be issued against American citizens.

I have long felt and consistently argued that any legislation which allowed for the issuance of an order against an American citizen on anything less than a criminal standard would be a violation of the fourth amendment. In my view, our Government ought not to be allowed to invade the privacy of its citizens in such a massive way without a showing of probable criminal activity.

After carefully reviewing the Foreign Intelligence Surveillance Act, as amended, I have concluded that it meets that basic standard. In every instance in which a warrant can be issued against an American citizen under the bill, the Government must demonstrate, to the satisfaction of a Federal judge, that a nexus exists between the activities of the citizen and a violation of the criminal laws.

Mr. President, I have been involved in the deliberations on this legislation for over 3 years. Others, such as Senator KENNEDY, Senator NELSON, and Senator MATHIAS, have been involved for even longer. There were times that I believed that differences between the legislative and executive branches on the intricacies of this legislation would not be overcome.

Now, however, I wish to commend my colleagues in the Judiciary and Intelligence Committees, and the President and Attorney General Bell, for the diligent and thoughtful manner in which these difficult deliberations have been concluded. I believe that we have succeeded in fashioning a bill that is workable and worthwhile and one deserving of support.●

Mr. BAYH. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc, and, as agreed to, be considered original text for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it so ordered.

The amendments of the Committee on the Judiciary are as follows:

On page 2, line 17, strike "a" and insert "any";

On page 2, line 18, after "person" insert a comma and "knowing that such person is engaged in activities";

On page 10, beginning with line 10, strike through and including line 11, and insert "or the Deputy Attorney General";

On page 10, line 15, after "and" insert "prohibit";

On page 10, line 15, after "dissemination" insert a comma and "except as provided for in subsections 2526(a) and (b),";

On page 13, line 2, after "corporations" insert "or associations";

On page 18, line 10, after "section 2521 (b)(6)" insert a comma and "and a statement whether physical entry is required to effect the surveillance";

On page 20, beginning with line 21, insert the following:

"(C) when the target of the surveillance is not a foreign power as defined in section 2521(b)(1) (A), (B), or (C), the type of information sought to be acquired and when the target is a foreign power defined in section 2521(b)(1) (A), (B), or (C), the designation of the type of foreign intelligence information under section 2521(b)(5) sought to be acquired;

On page 21, line 11, after "2521(b)(6)" insert "and whether physical entry will be used to effect the surveillance";

On page 25, beginning with line 19, insert the following:

No information acquired from an electronic surveillance conducted pursuant to this chapter may be used or disclosed by Federal officers or employees except for lawful purposes.

On page 26, line 9, after "States," insert "a State, or a political subdivision thereof,";

On page 26, line 19, after the period, strike through and including page 27, line 18, and insert in lieu thereof the following:

"(d) Any person who has been a subject of electronic surveillance and against whom evidence derived from such electronic surveillance is to be, or has been, introduced or otherwise used or disclosed in any trial, hearing, or proceeding in or before any court, department officer, agency, regulatory body, or other authority of the United States, a State, or a political subdivision thereof, may move to suppress the contents of any communication acquired by electronic surveillance, or evidence derived therefrom, on the grounds that—

"(1) the communication was unlawfully acquired; or

"(2) the surveillance was not made in conformity with the order of authorization or approval.

Such motion shall be made before the trial, hearing, or proceeding unless there was no opportunity to make such motion or the person was not aware of the grounds of the motion.

"(e) Whenever any court is notified in accordance with subsection (c), or whenever a motion is made by an aggrieved person pursuant to subsection (d), to suppress evidence on the grounds that it was obtained or derived from an unlawful electronic surveillance, or whenever any motion or request is made by an aggrieved person pursuant to section 3504 of this title or any other statute or rule of the United States, to discover, obtain, or suppress evidence or information obtained or derived from electronic surveillance, the Federal court, or where the motion is made before another authority, a Federal court in the same district as the authority, shall, notwithstanding any other law, if the Government by affidavit asserts that disclosure or an adversary hearing would harm the national security of the United States, review in camera and ex parte the application, order, and other materials relating to the surveillance as may be necessary to determine whether the surveillance was authorized and conducted in a manner that did not violate any right afforded by the

Constitution and statutes of the United States to the aggrieved person. In making this determination, the court shall disclose to the aggrieved person portions of the application, order, or other materials relating to the surveillance only where such disclosure is necessary to make an accurate determination of the legality of the surveillance. If the court determines that the electronic surveillance of the aggrieved person was not lawfully authorized or conducted, the court shall in accordance with the requirements of law suppress the information obtained or evidence derived from the unlawful electronic surveillance. If the court determines that the surveillance was lawfully authorized and conducted, the court shall deny any motion for disclosure or discovery unless required by due process.

On page 29, line 17, strike "(d)" and insert "(f)";

On page 36, line 24, after "that" insert "no particular United States person shall be intentionally targeted for testing purposes without his consent,";

On page 38, beginning with line 25, insert the following:

(i) Section 2518(10) is amended by striking the word "intercepted" and inserting the words "intercepted pursuant to this chapter" after the first appearance of the word "communication".

On page 39, line 4, strike "(i)" and insert "(j)";

On page 39, line 8, strike "(j)" and insert "(k)".

The amendments of the Select Committee on Intelligence are as follows:

On page 1, line 4, strike "1977" and insert "1978";

On page 2, line 3, following "2527. Report of electronic surveillance." insert "2528. Congressional oversight.";

On page 3, beginning with line 6, strike through and including line 19, and insert in lieu thereof the following:

"(A) any person, other than a United States person, who—

"(i) acts in the United States as an officer or employee of a foreign power; or

"(ii) acts for or on behalf of a foreign power which engages in clandestine intelligence activities contrary to the interests of the United States, when the circumstances of such person's presence in the United States indicate that such person may engage in such activities in the United States, or when such person knowingly aids or abets any person in the conduct of such activities or conspires with any person knowing that such person is engaged in such activities;

On page 4, beginning with line 9, strike through and including page 5, line 10, and insert in lieu thereof the following:

"(B) any person who—

"(i) knowingly engages in clandestine intelligence gathering activities for or on behalf of a foreign power, which activities involve or may involve a violation of the criminal statutes of the United States;

"(ii) pursuant to the direction of an intelligence service or network of a foreign power, knowingly engages in any other clandestine intelligence activities for or on behalf of such foreign power, which activities involve or are about to involve a violation of the criminal statutes of the United States;

"(iii) knowingly engages in sabotage or terrorism, or activities which are or may be in preparation therefor, for or on behalf of a foreign power;

"(iv) knowingly aids or abets any person in the conduct of activities described in subparagraph (B)(i) through (iii) above, or conspires with any person knowing that such person is engaged in activities described in subparagraph (B)(i) through (iii) above: *Provided*, That no United States person may be considered an agent of a foreign power solely upon the basis of activities protected by the first amendment to the Constitution of the United States."

On page 7, beginning with line 5, strike through and including page 8, line 4, and insert in lieu thereof the following:

"(A) information which relates to, and if concerning a United States person is necessary to, the ability of the United States to protect itself against actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power;

"(B) information with respect to a foreign power or foreign territory which relates to, and if concerning a United States person is necessary to—

"(i) the national defense or the security of the Nation; or

"(ii) the successful conduct of the foreign affairs of the United States; or

"(C) information which relates to, and if concerning a United States person is necessary to, the ability of the United States to protect against—

"(i) sabotage or terrorism by a foreign power or an agent of a foreign power, or

"(ii) the clandestine intelligence activities of an intelligence service or network of a foreign power or an agent of a foreign power.

On page 11, beginning with line 11, strike through and including page 12, line 6, and insert in lieu thereof the following:

and which are reasonably designed to insure that information which relates solely to the ability of the United States to provide for the national defense or security of the Nation and to provide for the conduct of foreign affairs of the United States, under subparagraphs (B) and (C) above, shall not be disseminated in a manner which identifies any United States person, without such person's consent, unless such person's identity is necessary to understand or assess the importance of information with respect to a foreign power or foreign territory or such information is otherwise publicly available.

On page 13, line 2, after "powers" insert "as defined in section 2521(b)(1)(A) through (E)";

On page 15, beginning with line 5, insert the following:

"(d) Each judge designated under this section shall so serve for a maximum of seven years and shall not be eligible for redesignation: *Provided*, That the judges first designated under subsection (a) shall be designated for terms of from one to seven years so that one term expires each year, and that judges first designated under subsection (b) shall be designated for terms of three, five, and seven years.

On page 17, beginning with line 1, strike through and including line 2, and insert in lieu thereof the following:

"(A) that the certifying official deems the information sought to be foreign intelligence information;

On page 23, line 7, after the period, insert "At the end of the period of time for which an electronic surveillance is approved by an order or an extension issued under this section, the judge may assess compliance with the minimization procedures required by this chapter.";

On page 24, line 23, after "thereof" insert a semicolon and "and no information concerning any United States person acquired from such surveillance shall subsequently be used or disclosed in any other manner by Federal officers or employees without the consent of such person, except with the approval of the Attorney General where the information indicates a threat of death or serious bodily harm to any person";

On page 25, line 13, after "(F)" insert "and in accordance with the minimization procedures required by this chapter";

On page 26, line 4, after "Government" insert "of the United States, of a State, or of a political subdivision thereof";

On page 3, beginning with line 10, insert the following:

"(g) In circumstances involving the unintentional acquisition, by an electronic, mechanical, or other surveillance device of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and where both the sender and all intended recipients are located within the United States, such contents shall be destroyed upon recognition, except with the approval of the Attorney General where the contents indicate a threat of death or serious bodily harm to any person."

On page 31, beginning with line 6, insert the following:

"§ 2528. Congressional oversight

"(a) On a semiannual basis the Attorney General shall fully inform the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence concerning all electronic surveillance under this chapter. Nothing in this chapter shall be deemed to limit the authority and responsibility of those committees to obtain such additional information as they may need to carry out their respective functions and duties.

"(b) On or before one year after the effective date of this chapter, and on the same day each year thereafter, the Select Committee on Intelligence of the United States Senate shall report to the Senate, concerning the implementation of this chapter. Said reports shall include but not be limited to an analysis and recommendations concerning whether this chapter should be (1) amended, (2) repealed, or (3) permitted to continue in effect without amendment.

"(c) In the Select Committee on Intelligence of the United States Senate shall report that this chapter should be amended or repealed, it shall report out legislation embodying its recommendations within thirty calendar days, unless the Senate shall otherwise determine by yeas and nays.

"(d) Any legislation so reported shall become the pending business of the Senate with time for debate equally divided between the proponents and opponents and shall be voted on within thirty calendar days thereafter, unless the Senate shall otherwise determine by yeas and nays.

"(e) Such legislation passed by the Senate shall be referred to the appropriate committee of the other House and shall be reported out by such committee together with its recommendations within thirty calendar days and shall thereupon become the pending business of such House and shall be voted upon within three calendar days, unless such House shall otherwise determine by yeas and nays.

"(f) If the case of any disagreement between the two Houses of Congress with respect to such legislation passed by both Houses, conferees shall be promptly appointed and the committee of conference shall make and file a report with respect to such legislation within seven calendar days after the legislation is referred to the committee of conference. Notwithstanding any rule in either House concerning the printing of conference reports in the record or concerning any delay in the consideration of such reports, such reports shall be acted on by both Houses not later than seven calendar days after the conference report is filed. In the event the conferees are unable to agree within three calendar days they shall report to their respective Houses in disagreement.".

On page 35, line 21, after the period, insert "No communication common carrier or officer, employee, or agent thereof shall disclose the existence of any interception under this chapter or electronic surveillance as defined in chapter 120, with respect to which the common carrier has been furnished either an order or certification under this subparagraph, except as may otherwise be lawfully ordered.";

On page 36, line 18, after "duty" insert "under procedures approved by the Attorney General";

On page 37, line 13, after "provided" insert "that no particular United States person shall be intentionally targeted for such purposes without his consent,"

Mr. BAYH. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAYH. Is it the understanding of the Chair that the bill now before us contains the amendments added to its original text by vote of the Judiciary and Intelligence Committees?

The PRESIDING OFFICER. The Senator is correct.

UP AMENDMENT NO. 1237

(Purpose: To clarify the intent of the bill that information obtained from emergency surveillance without a court order may be used if the court issues an order approving the surveillance)

Mr. BAYH. Mr. President, I send to the desk an amendment at this time.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Indiana (Mr. BAYH) proposes an unprinted amendment numbered 1237:

On page 24, lines 16 and 17, strike out "without an order having been issued" and insert in lieu thereof "and no order is issued approving the surveillance".

Mr. BAYH. Mr. President, this amendment clarifies the intent of the bill with respect to emergency situations where surveillance is undertaken and the court later issues an order approving the surveillance.

We owe a debt of gratitude to our colleague from Missouri (Mr. DANFORTH) for pointing this out to us. The way the bill was originally worded, even if the emergency wiretap had been agreed to by the court, technically, the language of the bill as it was denied the use of the information gathered during that agreed-to emergency period.

The amendment is fully consistent with what we all had intended to have in the bill in the first place.

Mr. THURMOND. Mr. President, we have no objection to the amendment.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. BAYH. I yield back the remainder of my time.

Mr. THURMOND. I yield back my time.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

UP AMENDMENT NO. 1238

(Purpose: To clarify language relating to the authority and responsibility of Congressional committees to obtain information relating to electronic surveillance)

Mr. BAYH. Mr. President, I send to the desk at this time another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Indiana (Mr. BAYH) proposes an unprinted amendment numbered 1238:

On page 31, line 12, strike out "those committees" and insert in lieu thereof "the appropriate committees of each House of Congress".

Mr. BAYH. Mr. President, this amendment deals with the requirement of other committees to have access to certain information. The amendment acknowledges that other committees, other than the Intelligence Committees, may have an appropriate need for information about surveillance under this bill to carry out their particular duties. Under the rules of the Senate, for example, the Judiciary Committee might need such information.

Mr. GARN. Mr. President, will the Senator yield for a question?

Mr. BAYH. I will be glad to yield.

Mr. GARN. Does the Senator believe the phrase "appropriate committees of each House" gives committees other than the Intelligence Committees and the Judiciary Committees of each House access to such information?

Mr. BAYH. I thank the Senator for bringing that up. The answer is "No." Other committees, other than the Intelligence Committees and the Judiciary Committees, already have jurisdiction over certain responsibilities set forth in S. 1566. This amendment acknowledges that jurisdiction, and does not decrease it in any way. The jurisdiction of other committees is not affected by this bill. In passing Senate Resolution 400 in the 94th Congress, the Senate expressed the view that the security of sensitive intelligence information would be enhanced if a single select committee were authorized to receive it. The Senator is aware of the safety requirements under Senate Resolution 400, and for that reason the Intelligence Committee plays that important role.

Mr. THURMOND. Mr. President, in view of the Senator's statement making it clear that the Judiciary Committee is included, we have no objection to the amendment.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. CHURCH. Mr. President, will the Senator from Indiana yield?

Mr. BAYH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAYH. How much time remains?

The PRESIDING OFFICER. On this amendment?

Mr. BAYH. On the bill.

The PRESIDING OFFICER. The Senator from South Carolina has 24 minutes. The Senator from Indiana has used all his time.

Mr. BAYH. Before we pass this amendment, I yield to the Senator from Idaho so that we may utilize the remaining time on the amendment for a colloquy with the Senator from Idaho.

Mr. CHURCH. I thank the Senator from Indiana very much.

First of all, I wish to commend him and the other Senators on his committee and on the Judiciary Committee for having brought this bill to the floor.

The second volume of the final report of the Senate Select Committee on Intelligence Activities, which it was my privilege to chair, made the recommendation that no Americans be targeted for electronic surveillance except upon a judicial finding of probable criminal activity. The report added:

Targeting an American for electronic surveillance in the absence of probable cause to believe a crime might have been committed or might be committed is unwise and unnecessary.

This bill is the first legislative effort to enact one of the major recommendations of the Select Committee, and for that I am most grateful.

Senators will remember that shortly following our investigation, the Senate did act upon our recommendation to establish a permanent intelligence committee, which the distinguished Senator from Indiana (Mr. BAYH), now chairs. I think all of us recognize that was a wise decision. The committee is functioning, as we hoped it would, as an effective oversight committee. It has given Congress the facts and the power that are needed to prevent abuses and excesses done in secrecy by our intelligence agencies.

I welcome the final debate today on the Foreign Intelligence Surveillance Act of 1978. It adopts the so-called criminal standard, by requiring probable cause to believe that an American is engaged in clandestine intelligence gathering activities which involve or may involve a Federal crime.

This has been the historic method by which we have sought to protect individual liberty against arbitrary government in this country. I commend the Senator most highly, and both committees most highly, for establishing this standard in the intelligence field.

I would like to ask my good friend the Senator from Indiana if it is true that this bill, if enacted into law, would also supercede any Presidential claim of inherent power to conduct electronic surveillance in violation of its provisions. As the Senator knows, in the past some Presidents or some spokesmen for Presidents have claimed that the office of the Presidency had such an inherent power, at least in the absence of action by the Congress. I am interested in establishing some legislative history that the enactment of this statute would be a definitive act of Congress in this field, and would supersede any prior claim that the President or the office of the Presidency possesses an inherent power to act apart from the provisions of this bill.

Mr. BAYH. I appreciate the question of my friend and colleague from Idaho. I had earlier, in my opening remarks, pointed out that we were here today very largely because of the stimulus provided by the Senator from Idaho and his select committee, and, indeed, this is the first legislation that has followed up on its recommendations.

I think the most important ingredient in the bill is the ability to get all the parties to sign off on the need, somewhat reluctantly by some, but to go forward, now, with the criminal standard which is fundamental to our system of jurisprudence in this country; and, indeed, the Senator did cite that language in his

report to which our staff gave so much credence.

As the Senator, who is a good lawyer, knows, the question of inherent authority ultimately will, of course, be decided by the Supreme Court of the United States, but the history of this bill indicates that the President is prepared to waive that, by joining in the preparation and introduction of this bill; and we have legislation drafted here that is intended to take away any inherent authority.

The Supreme Court itself in the steel seizure case, it seems to me, gave us very strong precedent for acting not just out of whim or out of response to Watergate and other abuses, but, indeed, under the precedent established in the steel seizure case.

Mr. CHURCH. I agree with the Senator's observation and was going to allude to the Youngstown Steel case. I believe the Senator is correct in assuming that the precedent established in that case would suggest that once the Congress has acted and a statute has been signed into law governing the procedures to be followed the statute as written by Congress would be controlling. This is true even in the intelligence field. In the case of this bill, we have established a criminal standard as in ordinary criminal cases, which will govern the use of electronic surveillance within the United States. I would hope that in the future Presidents would abide by the law as written by the Congress. I am certain the Supreme Court would sustain the validity of the law against any attempt in the future by a President to assert some inherent power.

That is why I think this is such an important historic step. I am grateful to the leadership the Senator from Indiana has given this legislation. I am grateful to the other Senators present—Senator THURMOND and Senator KENNEDY, the ranking member of the Judiciary Committee, for their long interest in this matter. Senator KENNEDY and I joined in a letter last year in which we strongly urged that the criminal standard be observed in the intelligence field.

I believe this bill represents a definite improvement over the earlier version of the bill that the Senate considered last year.

I want to say to Senator KENNEDY that he has been a tower of strength in this effort. I am very grateful to him and to everyone who worked to bring this bill to the floor of the Senate today.

Mr. BAYH. Again let me say I appreciate the great contributions of the Senator from Idaho. As he knows, the art of intelligence is an art and not a science. There are many gray areas. It is a nebulous world. Of course, we all want to protect our country. In structuring the criminal standard, we have used words which we feel are as close to the words of art as we can, to give flexibility to those who need to get involved in the use of some of this technology which is now available to protect our country but to nevertheless apply that perhaps a bit broader standard to the criminal test which I think is basic to our system in this country.

Mr. CHURCH. I agree with the Senator. I also recognize the difficulty of drawing the line between the legitimate requirements of national security and the preservation of individual liberty. It is in that definition that the survival of freedom is to be found.

Mr. GARN. Mr. President, many of us have been concerned that the adoption of a criminal standard would make it impossible for the FBI to get a court order for surveillance of people obviously engaged in traditional spying activity. For example the FBI might observe someone making "drops," and then known Soviet intelligence agents coming along and picking up what was dropped. This is traditional spying tradecraft, but the FBI cannot determine what information is being secretly transmitted to the intelligence agents. That is the kind of case where a judge might not find probable cause that a specific crime is about to be, or will be, committed. However, the standard requiring probable cause that the activity may involve a crime would allow surveillance in such cases. Therefore, I support the new standard because it provides enough flexibility to deal with the real problem faced in counterintelligence investigations. I agree with my colleagues that the standard is intended to deal with what we traditionally call spying activities.

Mr. BAYH. Mr. President, I am prepared to yield back the remainder of my time.

Mr. THURMOND. Mr. President, we yield back the remainder of our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. Who yields time?

The Senator from Indiana.

UP AMENDMENT NO. 1239

(Purpose: To delete language relating to the time at which a judge may assess compliance with the minimization procedures required)

Mr. BAYH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Indiana (Mr. BAYH), on behalf of Mr. ABOUREZK, proposes an unprinted amendment numbered 1239.

On page 23, beginning with the word "At" in line 7, strike out all down through the word "the" in line 9 and insert in lieu thereof "The".

Mr. BAYH. Mr. President, I submit this amendment on behalf of our distinguished colleague from South Dakota (Mr. ABOUREZK). The purpose is to clarify the language relative to the judge's ability to review compliance with minimization procedures at any time. One of the most important ingredients in this bill is the strict requirement of how information that is accidentally acquired is handled. With some of this electronic surveillance, one unintentionally picks up information about American citizens when trying to direct it at foreign entities. The minimization procedures are very important. The amendment of the Senator from South Dakota would clarify this. It is fully consistent with the language of both reports from the Judiciary and the Intelligence Committees. I would urge the committee to accept it.

Mr. THURMOND. We have no objection to the amendment, Mr. President.

Mr. KENNEDY. Mr. President, I think it is a constructive amendment, as the Senator from Indiana has explained it. That is our understanding of it. I believe it is an improvement. I would urge its acceptance. I yield back the remainder of my time.

Mr. THURMOND. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1240

(Purpose: To modify language relating to the standard for surveillance of persons engaged in sabotage or terrorism for or on behalf of a foreign power)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an unprinted amendment numbered 1240.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, beginning with the word "which" in line 25, strike out down through the word "therefor" in line 1 on page 6 and insert in lieu thereof "in furtherance thereof".

Mr. KENNEDY. Mr. President, the issue is what the criminal standard should be for sabotage or terrorism under the bill. The bill currently speaks in terms of "may." Our bill in the Judiciary spoke in terms of "will." This amendment is a compromise, avoiding any reference to either word. Actually, by leaving in the words "knowingly engages," the amended language speaks in terms of present activity and not conjecture.

It would read, therefore, Mr. President, on line 24, "knowingly engages in sabotage or terrorism or activities in furtherance thereof."

I understand it is acceptable and is satisfactory to both committees.

Also, Mr. President, the Intelligence Committee amended the bill to require a criminal standard for surveillance of Americans, beginning on page 5, line 11. That standard speaks of two kinds of clandestine intelligence activities—first, clandestine intelligence gathering activities that involve or may involve a Federal crime; second, other clandestine intelligence activities that involve or are about to involve a Federal crime. When it refers to "gathering" does the bill mean traditional spying activity?

Mr. BAYH. Yes, the intent of the bill is that clandestine intelligence gathering

means what is traditionally described by the word spying—in ordinary, everyday language.

Mr. GARN. I have no disagreement with that or with what Senator KENNEDY has just suggested in his amendment dealing with terrorist and sabotage activities.

I have no objection to this amendment.

Mr. BAYH. Mr. President, this was a matter of some significant negotiations among the various parties involved. I think it is pretty well reconciled right now.

The term "in furtherance" of sabotage or terrorism is intended to encompass activities supportive of acts of serious violence; for example, purchase or surreptitious importation into the United States of explosives, planning for assassinations, or financing of or training for such activities. It could reasonably be interpreted to cover providing the personnel, training, funding, or other means for the commission of acts of terrorism. The "in furtherance" provision is also adopted in order to permit electronic surveillance at some point before the danger sought to be prevented—for example, a kidnaping, bombing, or a hijacking—actually occurs.

It is a delicate kind of situation, when you are talking about terrorism. In addition to apprehending the culprits after the fact, we wanted to provide language that would increase the chance of preventing the act and thus the language "in furtherance."

Mr. President, my distinguished colleague from New Jersey (Mr. CASE) was desirous of asking us to elaborate further on this point. I should like, just for a moment, to state his thoughts:

The question might arise whether a person who engages in seemingly innocent activities which might incidentally aid a terrorist working on behalf of a foreign power should be considered an agent of a foreign power.

The answer is that it depends on the particular circumstances. A person can act in furtherance of such a terrorist and thus be considered an agent of a foreign power by engaging in an apparently innocent activity. For example, if a person's role in a terrorist act is to drive another person with a bomb to the planned bombing site, the driver could be considered to have acted knowingly in furtherance of terrorism and thus be considered an agent of a foreign power. On the other hand, if the person had dropped a friend off and had no idea that he was carrying a bomb, he would not be considered to have knowingly acted in furtherance and thus could not be considered an agent of a foreign power. In addition, in order for a person to be considered acting in furtherance of terrorism or sabotage on behalf of a foreign power, he must be engaged in activities that are an integral part of the terrorist plan. For example, a landlord who rents an apartment to a person he knows might be engaged in terrorism cannot be considered an agent of a foreign power. Of course, engaging in constitutionally protected activities cannot be the basis for considering a person an agent of a foreign power under S. 1566. For example, the trial counsel of an accused terrorist or the person who posts bail for him cannot be considered an agent of a foreign power even though it might be construed that he was acting in furtherance of terrorism. Nor could a member of a group which took no action except to support terrorists acting on behalf of a foreign government in exercise of their constitutional rights be construed an agent of a foreign power.

● Mr. STEVENSON. Mr. President, Senator KENNEDY's amendment changes that section S. 1566 which defines as an agent of a foreign power "any person who knowingly engages in sabotage or terrorism, or activities in furtherance thereof." Any person who fits that condition may be placed under surveillance through the procedures described in the bill. Senator KENNEDY's amendment substitutes the phrase, "in furtherance thereof" for the phrase, "which are or may be in preparation therefor."

I do not object to that change, however, I wish to stress one point. This change does not alter the committee's report language even though that language was written in explanation of the original phrase. The new language, "in furtherance thereof," is understood to encompass a wide range of terrorist activities, including but not limited to, knowingly funding, harboring, training, supporting, or supplying terrorist groups. This is meant to include activities which may be in furtherance of terrorist acts in general even if not in furtherance of a particular terrorist act.

Mr. President, the threats of terrorism are serious and will be more serious in the future. Intelligence community officials have assured me that the standards for electronic surveillance established by this legislation will facilitate their efforts to identify and apprehend terrorists and, hopefully, forestall terrorist incidents.

What little attention terrorism has attracted has been focused on crisis management rather than prevention. I hope this bill helps to shift that focus and to give the intelligence community the authorities it needs to enhance detection and prevention.

The Intelligence Committee has begun a major study of international terrorism, as a result of which, I am convinced that we must prepare to more effectively prevent terrorism through improved intelligence collection. This bill, as amended, is a small step in that direction and deserves support.●

Mr. THURMOND. Mr. President, I have no objection to the amendment.

The PRESIDING OFFICER. Is all time yielded back?

Mr. KENNEDY. I yield back my time.

Mr. THURMOND. We yield back our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1241

(Purpose: To clarify the requirement for identifying the target of electronic surveillance in an application for an order approving electronic surveillance and in an order approving such surveillance)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes unprinted amendment No. 1241.

On page 16, line 1, after the word "identity" insert ", if known,".

On page 20, line 16, after the word "identity" insert ", if known,".

Mr. KENNEDY. Mr. President, the language is added to make clear that if the identity of the target of surveillance is known to the Government, it does not have the discretion to refuse to identify the target and just give a description. The amendment language mandates that the identity of the target must be specified if known. If not known, it is perfectly permissible to give a description. This is at the top of page 16.

Quite clearly, if the target is known, the identiy of the individual or the target should be given.

This is just clarifying language, consistent with the spirit of the legislation. It is a matter of concern to the Senator from South Dakota (Mr. ABOUREZK). I urge its adoption.

I yield back the remainder of my time.

Mr. THURMOND. Mr. President, we have no objection to the amendment. I yield back my time.

The PRESIDING OFFICER. All time having been yielding back, the question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1242

(Purpose: To permit persons whose communications or activities have been illegally subjected to electronic surveillance to move to suppress the contents of any communication acquired by such surveillance)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an unprinted amendment numbered 1242.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 27, line 19, strike out "a subject" and insert in lieu thereof "the target".

On page 27, line 20, after "surveillance" insert "or whose communications or activities have been subject to electronic surveillance".

Mr. KENNEDY. Mr. President, this amendment is actually technical in nature. The bill now speaks in terms of "the subject." This is vague; what is meant is "the target" or the person who was overheard. This language makes that clear and conforms to the remainder of the statute. It makes it clear who has standing to raise this issue. It is basically a technical matter, one of clarification.

If there is no objection, I am prepared to yield back the remainder of my time.

Mr. THURMOND. Mr. President, I do not believe the word "subject" is used anywhere else in the bill so, in order to make it uniform, it seems that this would be a proper step to take. Therefore, we do not object to the amendment.

We yield back our time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1243

(Purpose: To eliminate the statutory requirement that amendments proposed by the Select Committee on Intelligence of the Senate to the new chapter (added to title 18, United States Code, by the bill) be expedited for consideration in each House)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes unprinted amendment No. 1243.

Mr. KENNEDY. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 31, line 22, strike out "amendment." and insert in lieu thereof "amendment.'." On page 31, beginning with line 23, strike out all down through line 4 on page 33.

Mr. KENNEDY. Mr. President, this eliminates the statutory requirement that future amendments of the bill be considered under very strict time limitations. I understand the proponent of this language in the intelligence committee (Mr. HATHAWAY) has no objection to deleting these requirements. The language is drawn from the 1976 version of the bill, where it was considered necessary because of the noncriminal standard. Since we have changed that to a criminal standard, there is no need for the language. Obviously, if an emergency arises necessitating prompt consideration of amendments to the law, I trust that the Senate would give a top priority to the amendments.

With that information, Mr. President, if there is no objection, I am prepared to yield back the remainder of my time. I urge the adoption of the amendment.

Mr. THURMOND. Mr. President, as I understand it, the amendment will strike sections (c), (d), (e), and (f).

That is correct, is it not?

Mr. KENNEDY. The Senator is correct.

Mr. THURMOND. Mr. President, we have no objection to the amendment.

We yield back our time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. KENNEDY. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

● Mr. PAUL G. HATFIELD. Mr. President, I rise in strong support of S. 1566, a bill which would, at long last, establish fair and uniform procedures for the procurement of warrants by the executive branch to conduct electronic surveillance in the United States when it finds that the security of our Nation is at stake. I would like to commend my distinguished colleagues on the committee, especially the Senator from Massachusetts (Mr. KENNEDY), who spearheaded this effort, and the Senator from Indiana (Mr. BAYH), who, as chairman of the Select Committee on Intelligence, lent his expertise to this endeavor, for their patience and persistence in finally bringing to legislative fruition the need to balance the rights of our citizenry from unreasonable intrusions into their privacy and the need for our Government to protect all of us from dessication of our precious liberties from abroad. This bill is also a fitting tribute to the late Senator from Arkansas, John L. McClellan, whose concern in this area was well known.

It goes without saying that our Government must have a strong capability to be able to identify those who, by surreptitious means, are bent upon weakening our Nation's foundations from within. Few would dispute the fact that we live in a dangerous world in which hostile intelligence activities are still carried on, often right under our noses, to our detriment. Realism demands that those whose mission it is to ferret out threats to our security be equipped with legal tools sufficient to do the job.

But, Mr. President, we are a free people, and it is our strong desire to remain free which has not only protected us and our institutions from collapse but has also kept us us from enslaving ourselves behind barricades designed to protect us from others. It is testament to our collective desire to live free that we have emerged from recent disclosures of domestic attacks on our freedoms even more determined and confident than before. The revelation of those abuses was like a cleansing fire—they did not weaken and threaten us, they forged a new purpose. We understand that electronic surveillance, if co-opted by the lawless for abusive ends, is a threat to our freedom and cannot be permitted. We are strong enough, however, to understand that electronic surveillance is a useful detection and enforcement tool and can be used, within sufficiently clear and narrow legal constraints, as a weapon against the unscrupulous. As the Select Committee on Intelligence has pointed out—

Electronics surveillance techniques have understandably enabled (our intelligence) agencies to obtain valuable information relevant to their legitimate intelligence missions. Use of these techniques has provided the Government with vital intelligence, which would be difficult to acquire through other means, about the activities and intentions of foreign powers and has provided important leads in counterespionage cases.

I do not discourage skepticism, I invite it. Jefferson once said that a healthy skepticism of government's self-professed capacity for protecting us from ourselves and our enemies is the main ingredient of democracy and, as the elected servants of the people, we ought never to forget it. So we must always be skeptical when the Government proposes to protect us and study such a proposal carefully to assure ourselves that our individual freedoms do not fall before the need for collective security. The Senator from Massachusetts (Mr. KENNEDY) stated the dilemma well:

The complexity of the problem must not be underestimated. Electronics surveillance can be a useful tool for the Government's gathering of certain kinds of information; yet, if abused, it can also constitute a particularly indiscriminate and penetrating invasion of the privacy of our citizens. My objective over the past six years has been to reach some kind of fair balance that will protect the security of the United States without infringing on our citizens' human liberties and rights.

Mr. President, I have studied this proposal carefully and have read, with skepticism, the testimony of the witnesses and the reports of the committees. I am satisfied that the proper balance has been struck. I am satisfied that the right of the people to be secure in their persons, houses, papers and effects, secured by the fourth amendment to the Constitution, will be protected. I am satisfied that electronic surveillance in the name of national security will have to pass the judicial muster envisioned by the framers when they drafted that amendment. I am satisfied that the need to move swiftly against those engaged in clandestine, subversive activity on behalf of a foreign power will not suffer as a result of the imposition of these procedures. Finally, I am satisfied that enactment of this bill will end the ability of surveillers to convert the principle of "national security" to perverse purpose.

The bill provides external and internal checks on the executive. The external check is found in the judicial warrant procedure which requires the executive branch to secure a warrant before engaging in electronic surveillance for purposes of obtaining foreign intelligence information. Such surveillance would be limited to a "foreign power" and "agent of a foreign power." U.S. citizens and lawful resident aliens could be targets of electronic surveillance only if they are: First, knowingly engaged in "clandestine intelligence activities which involve or will involve a violation" of the criminal law; second, knowingly engaged in activities "that involve or will involve sabotage or terrorism for or on behalf of a foreign power"; or third, "pursuant to the direction of an intelligence service or intelligence network of a foreign power" are knowingly or secretly collecting or transmitting foreign intelligence in a manner harmful to the security of the United States. All other persons—such as illegal aliens or foreign visitors—could also be targets if they are either officers or employees of a foreign power or are "knowingly engaging in clandestine intelligence activities for or on behalf of a foreign power under circumstances which indicate that such activities would be harmful to the security of the United States." For such surveillance to be undertaken, a judicial warrant must be secured on the basis of a showing of "probable cause" that the target is a "foreign power" or an "agent of a foreign power." Thus, the courts, for the first time, will ultimately

rule on whether such foreign intelligence surveillance should occur.

Before a warrant can be requested, a designated executive branch official must first certify in writing to the court that the information sought to be obtained is "foreign intelligence information" as defined, and that the purpose of the surveillance is to obtain such information. Moreover, the Attorney General is required to make a finding that the requirements for a warrant application have been met before he authorizes the application. These provisions provide an internal check on applications for electronic surveillance by establishing a method of written accountability within the executive branch.

Other procedural safeguards assure that the Government will not engage in illegitimate eavesdropping or misuse of information so acquired. The bill requires that each order include a detailed procedure to minimize the extraneous or irrelevant information that might otherwise be obtained. Information required concerning U.S. citizens or lawful resident aliens can be used and disclosed only for foreign intelligence purposes or in connection with the enforcement of the criminal law; even if the target is not a U.S. citizen or lawful resident alien, information acquired can only be used for "lawful purposes." Detailed provisions safeguard the right of the criminal defendant to challenge the validity and propriety of the surveillance. If the target is an individual or a specified type of foreign power, the application for a warrant must state the means by which the surveillance will be effected. When the target is an "official" foreign power, as defined, the application must still designate the type of electronic surveillance to be used and whether or not physical entry will be used to effect the surveillance. Finally, the Attorney General is required to transmit to the Congress annually certain statistics concerning the surveillances engaged in during the preceding year.

It must also be emphasized that warrant orders issued subject to the bill's procedures would not be "open-ended." Electronic surveillance could be conducted against persons other than a special foreign power for 90 days or the period necessary to achieve the order's purposes, whichever is less. When the special class of "official" foreign powers is targeted for surveillance, such surveillance cannot exceed 1 year without specific reauthorization. The special court would always retain the right to review the minimization procedures under such orders to insure that, during the course of the surveillance, sufficient steps are taken to protect the rights of collateral parties who may be surveilled during that period.

Let us serve notice on potential enemies that we are strong enough to safeguard our people and their servant institutions in a manner consistent with the Constitution. Let us show our people that we are deserving of their confidence because we have found a way to protect them from our enemies without making the means of protection an enemy to their liberty. Mr. President, I urge my colleagues in the Senate to support S. 1566 as reported.●

● Mr. NELSON. Mr. President, S. 1566, the Foreign Intelligence Surveillance Act is landmark legislation. From Watergate and the Church committee report, we learned that warrantless electronic surveillance had been used by every administration from Roosevelt to Nixon. This legislation responds by bringing this most intrusive investigative technique under the rule of law, worked out painstakingly by Members of Congress and two administrations. The legislation sensitively balances civil liberties and national security, preserving both. It is a singular achievement.

It is the culmination of years of effort by concerned citizens both within and outside the Congress.

I first introduced legislation to curb warrantless national security electronic surveillance in December 1973. Since that time I have worked continually with Senators KENNEDY, MATHIAS, other Members of Congress and two administrations in an effort to legislate curbs on warrantless electronic surveillance. Before the Church committee was established by Congress I met with then Attorney General Saxbe in an effort to persuade the administration to agree to legislation subjecting national security taps and bugs through a judicial warrant procedure. Subsequently, Senators MATHIAS, KENNEDY, and I met with Attorney General Levi on the same issue. Ultimately, these meetings and other cooperative efforts led to the Ford administration's initiative in this area, S. 3197, the predecessor to the bill before us today.

Throughout these efforts my premise has been that national security electronic surveillance, like any other electronic surveillance, must be subject to the fourth amendment's prohibition or unreasonable searches and seizures. Two principles have guided these legislative efforts. First, the fourth amendment demands that before the privacy of an individual is invaded, a judicial warrant based on probable cause must be obtained. The amendment states:

> The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

For some years, every American President has asserted that he was not bound by the fourth amendment requirement of probable cause when the "national security" of the United States was in question. They asserted an "inherent authority" to wiretap persons who they subjectively believed to present threats to the national security of the United States without any prior approval by a judge.

The abuses reported by the Church committee occurred because for 40 years Presidents asserted, unchallenged, the "inherent" power to authorize warrantless electronic surveillance for foreign intelligence when they deemed it necessary. I believe that there is no inherent authority to disregard the fourth amendment in the name of national security. If anything, we now know that the need for judicial warrant procedure is particularly acute when national security is involved because first amendment rights of speech and association are often implicated, along with fourth amendment rights. The entire premise of the fourth amendment is that those involved in ferreting out crime or responsible for producing foreign intelligence cannot be trusted to judge the reasonableness of the searches they propose.

The second principle has been that no American should be the target of electronic surveillance unless and until a judicial finding is made that there is probable cause to believe that the person may be involved in criminal conduct. This criminal standard asserts the traditional protections of the fourth amendment and provides the fullest possible guarantee that constitutionally protected rights will not be jeopardized by electronic surveillance in the future in a way that they have in the past.

In the 94th Congress I joined with Attorney General Levi, Senator KENNEDY and others in the cooperative effort which produced S. 3197. That legislation represented the first time that an administration expressed the willingness to submit its national security wiretapping to a judicial warrant procedure. It was a vital step for which President Ford and Attorney General Levi deserve great credit. However, by the end of the Congress I was forced to note my opposition to the bill in the form that it had finally taken. The legislation contained a careful, limited, but troublesome departure from the criminal standard for American citizens. It also contained a section which suggested the continued existence of inherent Presidential power to authorize warrantless electronic surveillance in the United States in "unprecedented circumstances."

S. 1566 represents a continuation of the effort started by the Ford administration. However, two principal issues which have concerned me and other Members of Congress have been resolved. This legislation contains no reservation of, or reference to, inherent Presidential power. Once enacted, it would represent the sole authority for national security electronic surveillance in the United States. Whether the target is a U.S. citizen, foreign visitor, or foreign embassy, the judicial warrant must be obtained. Additionally, the legislation guarantees that an American citizen could not become the target of electronic surveillance without a judicial finding of probable cause to believe that that citizen may be involved in criminal activities. Along with the existing statute dealing with criminal wiretaps, this legislation blankets the field. If enacted, the threat of warrantless electronic surveillance will be laid to rest.

The Church committee noted that a root cause of the intelligence abuses it uncovered was our complete failure to

apply the constitutional system of checks and balances to intelligence operations. One of the strongest features of this bill is that it fully reasserts our faith in our basic constitutional system. Congress' failure with respect to intelligence operations has been twofold: First, we have failed to enact statutes which told the intelligence community what was permitted and what was prohibited. Second, we have failed to conduct meaningful oversight of intelligence operations, with a sensitive eye to their constitutional implications. The passage of this legislation marks a first step toward providing the intelligence community with clear, written legislative guidance. The inclusion in the statute of stringent oversight provisions reflect the Intelligence Committee's commitment to continue to assure that this statutory scheme operates as Congress has intended, meeting legitimate national security needs while protecting constitutional rights.

In addition to the central role played by the judiciary, consistent with the commands of the fourth amendment, a frequently overlooked but vital feature of this legislation is that it insures executive accountability. Before electronic surveillance can take place, a high ranking official in the national security on foreign relations area must certify its necessity in writing. The Attorney General must also approve every application before it comes before the judge. This is a striking departure from the pattern of the past in which "deniability" was often built into the system to insure that responsibility for intelligence abuses could not be traced.

The flagrant abuses of warrantless wiretaps in the past will be doubly prevented. Not only can the court reject applications which are not consistent with the statutory requirements, but few executive officials will sign an application unless they can personally assert that the electronic surveillance proposed is in line with the statutory authorization. In sum, the legislation assigns to each branch of government a clear, responsibility, appropriate to the experience and talents of that branch. It is consistent with fundamental principles.

Recent events underscore the need for this bill. We know that this administration authorized electronic surveillance of Ronald Humphrey, a USIA employee suspected of conspiring with a North Vietnamese citizen to commit espionage. This electronic surveillance was conducted pursuant to the claimed inherent power: Presidential authority to proceed without a warrant in the foreign intelligence area.

Without prejudging the outcome of the Humphrey case, I note that the case raises substantial national security issues. If this legislation had been in effect, a warrant could undoubtedly have been obtained to conduct this electronic surveillance. But the incident should remind us of potential dangers inherent in the current process. If this legislation does not pass, it is easy to predict the course of future events.

With passing time, perhaps in periods of internal discord, the memory of recent abuses will fade. Future Attorneys General will be less scrupulous about requiring proof that the proposed target of electronic surveillance is actually the agent of a foreign power. The required showing of collaboration will degenerate, and people will again be surveilled because of their social relationships with foreign citizens, or simply because their views are unpopular. Constitutionally protected activity will again be jeopardized. Legislation is needed to place the final decision about where national security electronic surveillance is justified, not in the executive branch, but in the judiciary consistent with what the fourth amendment commands.

The position of the Carter administration has been straightforward. They have supported this legislation, and will adhere to it as the sole authority for electronic surveillance in the United States. However, until it is passed, they will rely on their Executive order, and where necessary, in inherent power to proceed without a warrant. Quite clearly, the solution for Congress is to enact this legislation and resolve the issue.

The passage of this legislation is important in its own right, but it is also vital for what it signifies for the future. This legislation could not have been written and passed without extraordinary contributions by the Justice Department; the national security community, the Judiciary and Intelligence Committees and the civil liberties communities, and an impressive commitment to compromise on the part of everyone concerned. The same principals will face other formidable tasks in the future: most notably, the crafting of legislative charters for the FBI and the CIA. While this legislation will not be easily achieved, what we are accomplishing today carries with it the possibility of future successes as well. We have demonstrated that it is possible to react to the Church committee's revelations without overreacting; to balance the conflicting claims of national security and civil liberties.

This legislation serves our country well.●

● Mr. DOLE. Mr. President, I would like to commend the members of the Judiciary and Intelligence Committtees for their work in putting together a reasonable answer to the many problems encountered in regulating foreign intelligence wiretaps. S. 3197, a bill very similar to this one, has been reported out of committee during the 94th Congress but was never considered by the full Senate. This bill reflects that earlier efforts as well as additional study and further refinements by both committees.

A COMPROMISE

Of course, S. 1566 is a compromise between a number of Senators who hold somewhat different views on the regulation of wiretapping in the foreign intelligence area. However, all parties seem to agree that reform and clarification of the law in this area is badly needed and I believe that this bill is a reasonable reform. As such, I support the bill.

The basic thrust of this legislation is found in the requirement that warrants be issued for all wiretaps made in connection with U.S. foreign intelligence operations. The bill both sets up the judiciary machinery for issuing such warrants and lays out the standards for their issuance. I trust that this legislation will provide an expeditious procedure for granting such warrants while limiting their use and protecting people from unwarranted violation of privacy.

The fourth amendment has been the principal legal bulwark protecting privacy-related rights in this country. However, interpreting its prohibition on "unreasonable searches and seizures" has not been a matter free of difficulty. Of course, the fourth amendment was adopted long before the telephone and long before the need for intensive foreign intelligence operations became apparent. The fourth amendment is very near the heart of our American structure of rights and freedoms. While highly relevant to contemporary intelligence operations, it does not itself provide the detailed prohibitions and restrictions which are needed if we are to best protect privacy while maximizing the effectiveness of our intelligence efforts. Hopefully, more effective regulation will be provided under S. 1566.

PROTECTING THE FOURTH AMENDMENT

In regulating wiretaps we need to stay within the meaning of the fourth amendment, which remains the conceptual bulwark and the literal foundation of privacy-related rights in this country. This legislation is within the fourth amendment requirements and should always be interpreted in a way that will keep it there.

However, this Senator does have some reservations about this bill. This bill is a compromise in a very difficult area—and so it can be predicted that many of us would not view this as a perfect bill. Therefore, I would encourage my colleagues to keep their eye on the use of wiretaps in the future, in case additional reforms or refinements are needed.

THE RESPONSIBILITY OF THE EXECUTIVE BRANCH

I hope that the establishment of judicial machinery for granting warrants will not lessen the degree of responsibility of the executive branch to examine carefully the need for such wiretaps prior to asking for them. The stamp of judicial approval should not be used to sanction an abdication of the responsibility of the executive branch in protecting the privacy of Americans.

I would also hope that the language incorporated into the standards for issuance of wiretaps will not be too restrictive. For instance, before a warrant can issue in certain cases, the standards require that the subject of the wiretap have "knowingly" engaged in the activity prompting the wiretap request.

As a former county attorney charged with the prosecution of criminal offenses, I recognize the difficulties inherent in a burden of proof incorporating the word "knowingly." These difficulties become very obvious in the courtroom, and I hope that they will not prove too burdensome in the sort of ex parte hearing anticipated by S. 1566. Certainly, I hope a reasonable interpretation will be given

to that word, and that it will not cause problems in obtaining wiretaps for appropriate intelligence efforts.

Once again, let me reiterate my support for this legislation and let me express my hope that it will work to the satisfaction of those, like myself, who are concerned about protecting privacy-related rights while providing for an effective foreign intelligence surveillance system for this country.●

● Mr. MATHIAS. Mr. President, I rise to speak in support of S. 1566, the Foreign Intelligence Surveillance Act of 1978.

A few years ago, I joined with some of my colleagues in an effort to enact legislation to provide clear guidelines regarding the use of electronic surveillance in foreign intelligence cases. We knew we faced a long, uphill struggle. We knew we faced a formidable task in convincing both a majority of our colleagues and the intelligence community of the need for such statutory guidelines.

Momentum was slow in building. Regrettably, support for this concept began to mushroom only after it became clear that numerous abuses in the use of electronic surveillance in foreign intelligence cases had already occurred. These abuses were carefully and comprehensively documented in the final report of the Select Committee on Intelligence, on which I served.

Much to their dismay, the American people learned that beginning with President Franklin Roosevelt, every administration has asserted the right to conduct, and has conducted, warrantless wiretapping and bugging of Americans in foreign intelligence cases.

These revelations shocked the conscience of the American people. Americans demanded prompt, effective remedial action by the Congress and the executive branch. These calls for reform were not ignored.

In the 94th Congress, I joined with a bipartisan group of Senators and Representatives in sponsoring S. 3197, the first bill ever supported by a President and an Attorney General to require judicial warrants in foreign intelligence cases. Although S. 3197 was not enacted, it laid the groundwork for the bill before us today.

President Ford and his Attorney General, Edward Levi, deserve great credit for breaking with the long-standing tradition of the executive branch and submitting S. 3197 to the Congress. President Carter and Attorney General Bell deserve similar credit for fulfilling their pledges to strongly support S. 1566.

Enactment of S. 1566 would assuredly be a milestone in our Nation's history. It would be a ringing reaffirmation of America's commitment to the fundamental liberties embodied in our Constitution. Above all, it would insure that electronic surveillance in foreign intelligence cases would be conducted in conformity with the principles set forth in the fourth amendment. It would require an impartial magistrate outside the executive branch and the intelligence community to authorize such wiretaps. As the Supreme Court properly noted in the Keith case:

> The Fourth Amendment contemplates a prior judicial judgment, not the risk that executive discretion may be reasonably exercised. This judicial role accords with our basic Constitutional doctrine that individual freedoms will best be preserved through a separation of powers and division of functions among the different branches and levels of government. (*United States* v. *United States District Court*, 407 U.S. 297 (1972).)

At the time S. 1566 was introduced last year, I expressed my concern over certain provisions in the bill, especially the section allowing for electronic surveillance of an American citizen who is not involved in criminal activity. I urged the appropriate committees to scrutinize this issue and to consider amending this provision to bring it into conformity with the recommendations of the Senate Select Committee on Intelligence calling for a criminal standard in foreign intelligence cases.

This issue was a subject of intense debate in both the Judiciary and Intelligence Committees. And, the bill has now been amended in response to concern such as my own. As drafted at present, S. 1566 requires that U.S. citizens and resident aliens not be subjected to electronic surveillance unless they engage in intelligence-gathering activities which involve or may involve violations of the criminal laws of the United States.

I support this important change. In my view, it is consonant with recommendations of the Church amendment and strikes an appropriate balance between the intelligence-gathering needs of the United States and the constitutional rights of Americans.

In moving promptly to enact this bill, Congress can take an important step toward restoring the balance between the legislative and executive branches contemplated in the Constitution. For the past several decades, Congress has abdicated its responsibility to establish by law the framework in which executive power is to be discharged. As the select committee found, this abdication contributed to many of the abuses of power it uncovered.

Unless this bill is enacted, there will continue to be no statute whatever regulating the executive's conduct in the area of foreign intelligence. This situation must be corrected. It would resolve once and for all the debate over executive power to order electronic surveillance in national security cases—a debate that has heated up dramatically since the disclosure of the Humphrey case.

I urge my colleagues to join me in supporting this important legislation.●

● Mr. BIDEN. Mr. President, enactment of S. 1566, the Foreign Intelligence Surveillance Act represents the culmination of an arduous but productive legislative process. It is a reaffirmation of the principle that it is possible to protect the national security and at the same time the Bill of Rights. This legislative process has produced a bill which effectively accommodates the first and fourth amendment rights of our fellow citizens with the needs of our national security community to protect our liberties from enemies foreign and domestic.

Foreign intelligence surveillance was the very first matter on the agenda of the newly created Intelligence Committee when I joined it in May of 1976. For almost 2 years we have struggled with this ancient dilemma of our democracy—whether we must risk our liberty in order to protect it. Although this process of drafting and redrafting, endless meetings and negotiations with all levels of the executive branch has taken what appears to be an inordinate amount of time. It is indeed rewarding to find that it is not necessary to compromise civil liberties in the name of national security. It is for that reason that I rise in support of S. 1566.

There have been times during the past 2 years when representatives of the executive branch, and indeed, even some of my colleagues, surely have been impatient with me and other critics of earlier proposals. There have been times when we have appeared to allow our doubts about the wisdom of such legislation to lead to a "nitpicking" approach to the legislative process. However, I am convinced that this careful analysis of the legislation born of considerable doubt about how to accommodate these interests has led to legislation which does not compromise either national security or civil liberties.

In the words of our Founding Fathers, "eternal vigilance is the price of liberty." They intended we be vigilant of enemies, foreign and domestic, and equally vigilant of those who claim the necessity to sacrifice liberties in the face of those enemies. As long as we are willing to invest our energies in this pursuit, we can preserve our democracy and the Bill of Rights.

For the last four nights we have been witness through the NBC program "Holocaust" to the terrifying consequences of the failure to honor the principle of vigilance. On the last night of that program my 9-year-old son asked me, "Daddy, will this ever happen in our country?" I thought a moment and then told him no it will not, as long as we are willing to put in the time and energy to seek an accommodation of national security with civil liberties and insist that neither principle be compromised, we will never grant to the state the horrifying powers the Germans delegated to their leaders. So in a sense it is poignant that on the day following this presentation we should enact legislation which restricts the power of the executive branch to spy on its citizens in the name of national security. It is a testament to the fact that a police state is less likely in our country than any other in the world.

Finally, it is important to remember that legislation as comprehensive and complicated as S. 1566 is also the product of political courage and the investment of many man-hours of work. Many Members of this body and their staffs deserve much credit for the enactment of this legislation but none more than the senior Senator from Massachusetts and the senior Senator from Indiana. As representatives of the two committees primarily responsible for this legislation, they invested literally thousands of hours of work in developing this bill and they

deserve our thanks and congratulations.●

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, I shall ask for the yeas and nays on passage, so I suggest the absence of a quorum, the time to be evenly divided.

The PRESIDING OFFICER. The time will have to come out of the time of the Senator from South Carolina.

Mr. THURMOND. That is fine. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask for the yeas and nays on passage of the bill.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. I ask for third reading, Mr. President.

The PRESIDING OFFICER. If there be no further amendments to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum on the time of the Senator from South Carolina.

Mr. THURMOND. I have no objection.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Does the Senator from South Carolina yield back his remaining time?

Mr. THURMOND. Mr. President, I yield back my time and suggest we have a vote on the bill.

The PRESIDING OFFICER. The question is, Shall the bill pass? The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Colorado (Mr. HASKELL), the Senator from New Hampshire (Mr. MCINTYRE), and the Senator from Ohio (Mr. METZENBAUM) are necessarily absent.

I further announce that, if present and voting, the Senator from Ohio (Mr. METZENBAUM) and the Senator from New Hampshire (Mr. MCINTYRE) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Idaho (Mr. MCCLURE) is necessarily absent.

The result was announced—yeas 95, nays 1, as follows:

[Rollcall Vote No. 128 Leg.]

So the bill (S. 1566), as amended, was passed, as follows:

S. 1566

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Foreign Intelligence Surveillance Act of 1978".

SEC. 2. Title 18, United States Code, is amended by adding a new chapter after chapter 119 as follows:

"Chapter 120.—ELECTRONIC SURVEILLANCE WITHIN THE UNITED STATES FOR FOREIGN INTELLIGENCE PURPOSES

"Sec.

"2521. Definitions.

"2522. Authorization for electronic surveillance for foreign intelligence purposes.

"2523. Designation of judges authorized to grant orders for electronic surveillance.

"2524. Application for an order.

"2525. Issuance of an order.

"2526. Use of information.

"2527. Report of electronic surveillance.

"2528. Congressional oversight.

"§ 2521. Definitions

"(a) Except as otherwise provided in this section the definitions of section 2510 of this title shall apply to this chapter.

"(b) As used in this chapter—

"(1) 'Foreign power' means—

"(A) a foreign government or any component thereof, whether or not recognized by the United States;

"(B) a faction of a foreign nation or nations, not substantially composed of United States persons;

"(C) an entity, which is openly acknowledged by a foreign government or governments to be directed and controlled by such foreign government or governments;

"(D) a foreign-based terrorist group;

"(E) a foreign-based political organization, not substantially composed of United States persons; or

"(F) an entity which is directed and controlled by a foreign government or governments.

"(2) 'Agent of a foreign power' means—

"(A) any person, other than a United States person, who—

"(i) acts in the United States as an officer or employee of a foreign power; or

"(ii) acts for or on behalf of a foreign power which engages in clandestine intelligence activities contrary to the interests of the United States, when the circumstances of such person's presence in the United States indicate that such person may engage in such activities in the United States, or when such person knowingly aids or abets any person in the conduct of such activities or conspires with any person knowing that such person is engaged in such activities;

"(B) any person who—

"(i) knowingly engages in clandestine intelligence gathering activities for or on behalf of a foreign power, which activities involve or may involve a violation of the criminal statutes of the United States;

"(ii) pursuant to the direction of an intelligence service or network of a foreign power, knowingly engages in any other clandestine intelligence activities for or on behalf of such foreign power, which activities involve or are about to involve a violation of the criminal statutes of the United States;

"(iii) knowingly engages in sabotage or terrorism, or activities in furtherance thereof, for or on behalf of a foreign power;

"(iv) knowingly aids or abets any person in the conduct of activities described in subparagraph (B) (i) through (iii) above, or conspires with any person knowing that such person is engaged in activities described in subparagraph (B) (i) through (iii) above: *Provided,* That no United States person may be considered an agent of a foreign power solely upon the basis of activities protected by the first amendment to the Constitution of the United States.

"(3) 'Terrorism' means activities which—

"(A) are violent acts or acts dangerous to human life which would be criminal under the laws of the United States or of any State if committed within its jurisdiction; and

"(B) appear to be intended—

"(i) to intimidate or coerce the civilian population,

"(ii) to influence the policy of a government by intimidation or coercion, or

"(iii) to affect the conduct of a government by assassination or kidnaping.

"(4) 'Sabotage' means activities which would be prohibited by title 18, United States Code, chapter 105, if committed against the United States.

"(5) 'Foreign intelligence information' means—

"(A) information which relates to, and if concerning a United States person is necessary to, the ability of the United States to protect itself against actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power;

"(B) information with respect to a foreign power or foreign territory which relates to, and if concerning a United States person is necessary to—

"(i) the national defense or the security of the Nation; or

"(ii) the successful conduct of the foreign affairs of the United States; or

"(C) information which relates to, and if concerning a United States person is necessary to, the ability of the United States to protect against—

"(i) sabotage or terrorism by a foreign power or an agent of a foreign power, or

"(ii) the clandestine intelligence activities of an intelligence service or network of a foreign power or an agent of a foreign power.

"(6) 'Electronic surveillance' means—

"(A) the acquisition by an electronic, mechanical, or other surveillance device of

the contents of any wire or radio communication sent by or intended to be received by a particular, known United States person who is in the United States, where the contents are acquired by intentionally targeting that United States person, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes;

"(B) the acquisition by an electronic, mechanical, or other surveillance device, of the contents of any wire communication to or from a person in the United States, without the content of any party thereto, where such acquisition occurs in the United States while the communication is being transmitted by wire;

"(C) the intentional acquisition, by an electronic, mechanical, or other surveillance device, of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and where both the sender and all intended recipients are located within the United States; or

"(D) the installation or use of an electronic, mechanical, or other surveillance device in the United States for monitoring to acquire information, other than from a wire or radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes.

"(7) 'Attorney General' means the Attorney General of the United States (or Acting Attorney General) or the Deputy Attorney General.

"(8) 'Minimization procedures' means procedures which are reasonably designed to minimize the acquisition and retention, and prohibit the dissemination, except as provided for in subsections 2526 (a) and (b), of any information concerning United States persons without their consent that does not relate to the ability of the United States—

"(A) to protect itself against actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power;

"(B) to provide for the national defense or security of the Nation;

"(C) to provide for the conduct of the foreign affairs of the United States;

"(D) to protect against terrorism by a foreign power or an agent of a foreign power;

"(E) to protect against sabotage by a foreign power or an agent of a foreign power; or

"(F) to protect against the clandestine intelligence activities of an intelligence service or network of a foreign power or an agent of a foreign power;

and which are reasonably designed to insure that information which relates solely to the ability of the United States to provide for the national defense or security of the Nation and to provide for the conduct of foreign affairs of the United States, under subparagraphs (B) and (C) above, shall not be disseminated in a manner which identifies any United States person, without such person's consent, unless such person's identity is necessary to understand or assess the importance of information with respect to a foreign power or foreign territory or such information is otherwise publicly available.

"(9) 'United States person' means a citizen of the United States, an alien lawfully admitted for permanent residence (as defined in section 101(a)(20) of the Immigration and Nationality Act), an unincorporated association a substantial number of members of which are citizens of the United States or aliens lawfully admitted for permanent residence or a corporation which is incorporated in the United States, but not including corporations or associations which are foreign powers as defined in section 2521(b)(1)(A) through (E).

"(10) 'United States' when used in a geographic sense means all areas under the territorial sovereignty of the United States, the Trust Territory of the Pacific Islands, and the Canal Zone.

"§ 2522. Authorization for electronic surveillance for foreign intelligence purposes

"Applications for a court order under this chapter are authorized if the President has, by written authorization, empowered the Attorney General to approve applications to Federal judges having jurisdiction under section 2523 of this chapter, and a judge to whom an application is made may grant an order, in conformity with section 2525 of this chapter, approving electronic surveillance of a foreign power or an agent of a foreign power for the purpose of obtaining foreign intelligence information.

"§ 2523. Designation of judges authorized to grant orders for electronic surveillance

"(a) The Chief Justice of the United States shall publicly designate seven district court judges who shall constitute a special court, each member of which shall have jurisdiction to hear applications for and grant orders approving electronic surveillance anywhere within the United States under the procedures set forth in this chapter, except that no judge designated under this subsection shall have jurisdiction of the same application for electronic surveillance under this chapter which has been denied previously by another judge designated under this subsection. If any judge so designated denies an application for an order authorizing electronic surveillance under this chapter, such judge shall provide immediately for the record a written statement of each reason for his decision and, on motion of the United States, the record shall be transmitted, under seal, to the special court of review established in subsection (b).

"(b) The Chief Justice shall publicly designate three judges, one of whom shall be publicly designated as the presiding judge, from the United States district courts or courts of appeals who together shall comprise a special court of review which shall have jurisdiction to review the denial of any application made under this chapter. If such special court determines that the application was properly denied, the special court shall immediately provide for the record a written statement of each reason for its decision and, on petition of the United States for a writ of certiorari, the record shall be transmitted under seal to the Supreme Court, which shall have jurisdiction to review such decision.

"(c) Proceedings under this chapter shall be conducted as expeditiously as possible. The record of proceedings under this chapter, including applications made and orders granted, shall be sealed and maintained under security measures established by the Chief Justice in consultation with the Attorney General and the Director of Central Intelligence.

"(d) Each judge designated under this section shall so serve for a maximum of seven years and shall not be eligible for redesignation: *Provided*, That the judges first designated under subsection (a) shall be designated for terms of from one to seven years so that one term expires each year, and that judges first designated under subsection (b) shall be designated for terms of three, five, and seven years.

"§ 2524. Application for an order

"(a) Each application for an order approving electronic surveillance under this chapter shall be made by a Federal officer in writing upon oath or affirmation to a judge having jurisdiction under section 2523 of this chapter. Each application shall require the approval of the Attorney General based upon his finding that it satisfies the criteria and requirements of such application as set forth in this chapter. It shall include the following information—

"(1) the identity of the Federal officer making the application;

"(2) the authority conferred on the Attorney General by the President of the United States and the approval of the Attorney General to make the application;

"(3) the identity, if known, or a description of the target of the electronic surveillance;

"(4) a statement of the facts and circumstances relied upon by the applicant to justify his belief that—

"(A) the target of the electronic surveillance is a foreign power or an agent of a foreign power; and

"(B) the facilities or the place at which the electronic surveillance is directed are being used, or are about to be used, by a foreign power or an agent of a foreign power;

"(5) a statement of the proposed minimization procedures;

"(6) when the target of the surveillance is not a foreign power as defined in section 2521(b)(1) (A), (B), or (C), a detailed description of the nature of the information sought;

"(7) a certification or certifications by the Assistant to the President for National Security Affairs or an executive branch official or officials designated by the President from among those executive officers employed in the area of national security or defense and appointed by the President with the advice and consent of the Senate—

"(A) that the certifying official deems the information sought to be foreign intelligence information;

"(B) that the purpose of the surveillance is to obtain foreign intelligence information;

"(C) that such information cannot reasonably be obtained by normal investigative techniques;

"(D) including a designation of the type of foreign intelligence information being sought according to the categories described in section 2521(b)(5);

"(E) when the target of the surveillance is not a foreign power, as defined in section 2521(b)(1) (A), (B), or (C), including a statement of the basis for the certification that—

"(i) the information sought is the type of foreign intelligence information designated; and

"(ii) such information cannot reasonably be obtained by normal investigative techniques;

"(F) when the target of the surveillance is a foreign power, as defined in section 2521(b)(1) (A), (B), or (C), stating the period of time for which the surveillance is required to be maintained;

"(8) when the target of the surveillance is not a foreign power, as defined in section 2521(b)(1) (A), (B), or (C), a statement of the means by which the surveillance will be effected, and when the target is a foreign power, as defined in section 2521(b)(1) (A), (B), or (C), a designation of the type of electronic surveillance to be used according to the categories described in section 2521(b)(6), and a statement whether physical entry is required to effect the surveillance;

"(9) a statement of the facts concerning all previous applications that have been made to any judge under this chapter involving any of the persons, facilities, or places specified in the application, and the action taken on each previous application; and

"(10) when the target of the surveillance is not a foreign power, as defined in section 2521(b)(1) (A), (B), or (C), a statement

of the period of time for which the electronic surveillance is required to be maintained. If the nature of the intelligence gathering is such that the approval of the use of electronic surveillance under this chapter should not automatically terminate when the described type of information has first been obtained, a description of facts supporting the belief that additional information of the same type will be obtained thereafter.

"(b) The Attorney General may require any other affidavit or certification from any other officer in connection with the application.

"(c) The judge may require the applicant to furnish such other information as may be necessary to make the determinations required by section 2525 of this chapter.

"§ 2525. Issuance of an order

"(a) Upon an application made pursuant to section 2524 of this title, the judge shall enter an ex parte order as requested or as modified approving the electronic surveillance if he finds that—

"(1) the President has authorized the Attorney General to approve applications for electronic surveillance for foreign intelligence information;

"(2) the application has been made by a Federal officer and approved by the Attorney General;

"(3) on the basis of the facts submitted by the applicant there is probable cause to believe that—

"(A) the target of the electronic surveillance is a foreign power or an agent of a foreign power; and

"(B) the facilities or place at which the electronic surveillance is directed are being used, or are about to be used, by a foreign power or an agent of a foreign power;

"(4) the proposed minimization procedures meet the definition of minimization procedures under section 2521(b)(8) of this title;

"(5) the application which has been filed contains the description and certification or certifications, specified in section 2524(a)(7) and, if the target is a United States person, the certification or certifications are not clearly erroneous on the basis of the statement made under section 2524(a)(7)(E) and any other information furnished under section 2524(c).

"(b) An order approving an electronic surveillance under this section shall—

"(1) specify—

"(A) the identify, if known, or a description of the target of the electronic surveillance;

"(B) the nature and location of the facilities or the place at which the electronic surveillance will be directed;

"(C) when the target of the surveillance is not a foreign power as defined in section 2521(b)(1)(A), (B), or (C), the type of information sought to be acquired and when the target is a foreign power defined in section 2521(b)(1)(A), (B), or (C), the designation of the type of foreign intelligence information under section 2521(b)(5) sought to be acquired;

"(D) when the target of the surveillance is not a foreign power, as defined in section 2521(b)(1)(A), (B), or (C), the means by which the electronic surveillance will be effected, and when the target is a foreign power, as defined in section 2521(b)(1)(A), (B), or (C), a designation of the type of electronic surveillance to be used according to the categories described in section 2521(b)(6) and whether physical entry will be used to effect the surveillance; and

"(E) the period of time during which the electronic surveillance is approved; and

"(2) direct—

"(A) that the minimization procedures be followed;

"(B) that, upon the request of the applicant, a specified communication or other common carrier, landlord, custodian, contractor, or other specified person furnish the applicant forthwith any and all information, facilities, or technical assistance, necessary to accomplish the electronic surveillance in such manner as will protect its secrecy and produce a minimum of interference with the services that such carrier, landlord, custodian, contractor or other person is providing that target of electronic surveillance;

"(C) that such carrier, landlord, custodian, or other person maintain under security procedures approved by the Attorney General and the Director of Central Intelligence any records concerning the surveillance or the aid furnished which such person wishes to retain;

"(D) that the applicant compensate, at the prevailing rate, such carrier, landlord, custodian, or other person for furnishing such aid.

"(c) An order issued under this section may approve an electronic surveillance not targeted against a foreign power, as defined in section 2521(b)(1)(A), (B), or (C), for the period necessary to achieve its purpose, or for ninety days, whichever is less; an order under this section shall approve an electronic surveillance targeted against a foreign power, as defined in section 2521(b)(1)(A), (B), or (C), for the period specified in the certification required in section 2524(a)(7)(F), or for one year, whichever is less. Extensions of an order issued under this chapter may be granted on the same basis as an original order upon an application for an extension made in the same manner as required for an original application and after new findings required by subsection (a) of this section. In connection with applications for extensions where the target is not a foreign power, as defined in section 2521(b)(1)(A), (B), or (C), the judge may require the applicant to submit information, obtained pursuant to the original order or to any previous extensions, as may be necessary to make new findings of probable cause. The judge may assess compliance with the minimization procedures required by this chapter.

"(d) Notwithstanding any other provision of this chapter when the Attorney General reasonably determines that—

"(1) an emergency situation exists with respect to the employment of electronic surveillance to obtain foreign intelligence information before an order authorizing such surveillance can with due diligence be obtained, and

"(2) the factual basis for issuance of an order under this chapter to approve such surveillance exists, he may authorize the emergency employment of electronic surveillance if a judge designated pursuant to section 2523 of this chapter is informed by the Attorney General or his designate at the time of such authorization that the decision has been made to employ emergency electronic surveillance and if an application in accordance with this chapter is made to that judge as soon as practicable, but not more than twenty-four hours after the Attorney General authorizes such acquisition. If the Attorney General authorizes such emergency employment of electronic surveillance, he shall require that the minimization procedures required by this chapter for the issuance of a judicial order be followed. In the absence of a judicial order approving such electronic surveillance, the surveillance shall terminate when the information sought is obtained, when the application for the order is denied, or after the expiration of twenty-four hours from the time of authorization by the Attorney General, whichever is earlier. In the event that such application for approval is denied, or in any other case where the electronic surveillance is terminated and no order is issued approving the surveillance, no information obtained or evidence derived from such surveillance shall be received in evidence or otherwise disclosed in any trial, hearing, or other proceeding in or before any court, grand jury, department, office, agency, regulatory body, legislative committee, or other authority of the United States, a State, or political subdivision thereof; and no information concerning any United States person acquired from such surveillance shall subquently be used or disclosed in any other manner by Federal officers or employees without the consent of such person, except with the approval of the Attorney General where the information indicates a threat of death or serious bodily harm to any person. A denial of the application made under this subsection may be reviewed as provided in section 2523.

"§ 2526. Use of information

"(a) Information concerning United States persons acquired from an electronic surveillance conducted pursuant to this chapter may be used and disclosed by Federal officers and employees without the consent of the United States person only for purposes specified in section 2521(b)(8)(A) through (F) and in accordance with the minimization procedures required by this chapter, or for the enforcement of the criminal law if its use outweighs the possible harm to the national security. No otherwise privileged communication obtained in accordance with, or in violation of, the provisions of this chapter shall lose its privileged character. No information acquired from an electronic surveillance conducted pursuant to this chapter may be used or disclosed by Federal officers or employees except for lawful purposes.

"(b) The minimization procedures required under this chapter shall not preclude the retention and disclosure, for law enforcement purposes, of any information which constitutes evidence of a crime if such disclosure is accompanied by a statement that such evidence, or any information derived therefrom, may only be used in a criminal proceeding with the advance authorization of the Attorney General.

"(c) Whenever the Government of the United States, of a State, or of a political subdivision thereof intends to enter into evidence or otherwise use or disclose in any trial, hearing, or other proceeding in or before any court, department, officer, agency, or other authority of the United States, a State, or a political subdivision thereof, any information obtained or derived from an electronic surveillance, the Government shall prior to the trial, hearing, or other proceeding or at a reasonable time prior to an effort to so disclose or so use the information or submit it in evidence notify the court in which the information is to be disclosed or used or, if the information is to be disclosed or used in or before another authority, shall notify a court in the district wherein the information is to be so disclosed or so used that the Government intends to so disclose or so use such information.

"(d) Any person who has been the target of electronic surveillance or whose communications or activities have been subject to electronic surveillance and against whom evidence derived from such electronic surveillance is to be, or has been, introduced or otherwise used or disclosed in any trial, hearing, or proceeding in or before any court, department officer, agency, regulatory body, or other authority of the United States, a State, or a political subdivision thereof, may move to suppress the contents of any communication acquired by electronic surveillance or evidence derived therefrom, on the grounds that—

"(1) the communication was unlawfully acquired; or

"(2) the surveillance was not made in

conformity with the order of authorization or approval.

Such motion shall be made before the trial, hearing, or proceeding unless there was no opportunity to make such motion or the person was not aware of the grounds of the motion.

"(e) Whenever any court is notified in accordance with subsection (c), or whenever a motion is made by an aggrieved person pursuant to subsection (d), to suppress evidence on the grounds that it was obtained or derived from an unlawful electronic surveillance, or whenever any motion or request is made by an aggrieved person pursuant to section 3504 of this title or any other statute or rule of the United States, to discover, obtain, or suppress evidence or information obtained or derived from electronic surveillance, the Federal court, or where the motion is made before another authority, a Federal court in the same district as the authority, shall, notwithstanding any other law, if the Government by affidavit asserts that disclosure or an adversary hearing would harm the national security of the United States, review in camera and ex parte the application, order, and other materials relating to the surveillance as may be necessary to determine whether the surveillance was authorized and conducted in a manner that did not violate any right afforded by the Constitution and statutes of the United States to the aggrieved person. In making this determination, the court shall disclose to the aggrieved person portions of the application, order, or other materials relating to the surveillance only where such disclosure is necessary to make an accurate determination of the legality of the surveillance. If the court determines that the electronic surveillance of the aggrieved person was not lawfully authorized or conducted, the court shall in accordance with the requirements of law suppress the information obtained or evidence derived from the unlawful electronic surveillance. If the court determines that the surveillance was lawfully authorized and conducted, the court shall deny any motion for disclosure or discovery unless required by due process.

(f) If an emergency employment of the electronic surveillance is authorized under section 2525(d) and a subsequent order approving the surveillance is not obtained, the judge shall cause to be served on any United States person named in the application and on such other United States persons subject to electronic surveillance as the judge may determine in his discretion it is in the interest of justice to serve, notice of—

"(1) the fact of the application;

"(2) the period of the surveillance; and

"(3) the fact that during the period information was or was not obtained.

On ex parte showing of good cause to the judge the serving of the notice required by this subsection may be postponed or suspended for a period not to exceed ninety days. Thereafter, on a further ex parte showing of good cause, the court shall forego ordering the serving of the notice required under this subsection.

"(g) In circumstances involving the unintentional acquisition, by an electronic, mechanical, or other surveillance device of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and where both the sender and all intended recipients are located within the United States, such contents shall be destroyed upon recognition, except with the approval of the Attorney General where the contents indicate a threat of death or serious bodily harm to any person.

"§ 2527. Report of electronic surveillance

"In April of each year, the Attorney General shall report to the Administrative Office of the United States Courts and shall transmit to Congress with respect to the preceding calendar year—

"(1) the total number of applications made for orders and extensions of orders approving electronic surveillance; and

"(2) the total number of such orders and extensions either granted, modified, or denied.

"§ 2528. Congressional oversight

"(a) On a semiannual basis the Attorney General shall fully inform the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence concerning all electronic surveillance under this chapter. Nothing in this chapter shall be deemed to limit the authority and responsibility of the appropriate committees of each House of Congress to obtain such additional information as they may need to carry out their respective functions and duties.

"(b) On or before one year after the effective date of this chapter, and on the same day each year thereafter, the Select Committee on Intelligence of the United States Senate shall report to the Senate, concerning the implementation of this chapter. Said reports shall include but not be limited to an analysis and recommendations concerning whether this chapter should be (1) amended, (2) repealed, or (3) permitted to continue in effect without amendment."

SEC. 3. The provisions of this Act and the amendment made hereby shall become effective upon enactment: *Provided*, That any electronic surveillance approved by the Attorney General to gather foreign intelligence information shall not be deemed unlawful for failure to follow the procedures of chapter 120, title 18, United States Code, if that surveillance is terminated or an order approving that surveillance is obtained under this chapter within ninety days following the designation of the first judge pursuant to section 2523 of chapter 120, title 18, United States Code.

SEC. 4. Chapter 119 of title 18, United States Code, is amended as follows:

(a) Section 2511(1) is amended—

(1) by inserting "or chapter 120 or with respect to techniques used by law enforcement officers not involving the interception of wire or oral communications as otherwise authorized by a search warrant or order of a court of competent jurisdiction," immediately after "chapter" in the first sentence;

(2) by inserting a comma and "or, under color of law, willfully engages in any other form of electronic surveillance as defined in chapter 120" immediately before the semicolon in paragraph (a);

(3) by inserting "or information obtained under color of law by any other form of electronic surveillance as defined in chapter 120" immediately after "contents of any wire or oral communication" in paragraph (c);

(4) by inserting "or any other form of electronic surveillance, as defined in chapter 120," immediately before "in violation" in paragraph (c);

"(5) by inserting "or information obtained under color of law by any other form of electronic surveillance as defined in chapter 120" immediately after "any wire or oral communication" in paragraph (d); and

(6) by inserting "or any other form of electronic surveillance, as defined in chapter 120," immediately before "in violation" in paragraph (d).

(b)(1) Section 2511(2)(a)(i) is amended by inserting the words "or radio communication" after the words "wire communication" and by inserting the words "or otherwise acquire" after the word "intercept".

(2) Section 2511(2)(a)(ii) is amended by inserting the words "or chapter 120" after the second appearance of the word "chapter," and by striking the period at the end thereof and adding the following: "or engage in electronic surveillance, as defined in chapter 120: *Provided, however*, That before the information, facilities, or technical assistance may be provided, the investigative or law enforcement officer shall furnish to the officer, employee, or agent of the carrier either—

"(1) an order signed by the authorizing judge certifying that a court order directing such assistance has been issued; or

"(2) in the case of an emergency interception or electronic surveillance as provided for in section 2518(7) of this chapter or section 2525(d) of chapter 120, a certification under oath by the investigative or law enforcement officer that the applicable statutory requirements have been met,

and setting forth the period of time for which the electronic surveillance is authorized and describing the facilities from which the communication is to be acquired. Any violation of this subsection by a communication common carrier or an officer, employee, or agency thereof, shall render the carrier liable for the civil damages provided for in section 2520. No communication common carrier or officer, employee, or agent thereof shall disclose the existence of any interception under this chapter or electronic surveillance, as defined in chapter 120, with respect to which the common carrier has been furnished either an order or certification under this subparagraph, except as may otherwise be lawfully ordered.".

(c)(1) Section 2511(2)(b) is amended by inserting the words "or otherwise engage in electronic surveillance, as defined in chapter 120," after the word "radio".

(2) Section 2511 (2)(c) is amended by inserting the words "or engage in electronic surveillance, as defined in chapter 120," after the words "oral communication" and by inserting the words "or such surveillance" after the last word in the paragraph and before the period.

(3) Section 2511(2) is amended by adding at the end of the section the following provisions:

"(e) Notwithstanding any other provision of this title or section 605 or 606 of the Communications Act of 1934, it shall not be unlawful for an officer, employee, or agent of the United States in the normal course of his official duty under procedures approved by the Attorney General to conduct electronic surveillance as defined in section 2521 (b)(6) of chapter 120 without a court order for the sole purpose of:

"(i) testing the capability of electronic equipment, provided that no particular United States person shall be intentionally targeted for testing purposes without his consent, the test period shall be limited in extent and duration to that necessary to determine the capability of the equipment, that the content of any communication acquired under this paragraph shall be retained and used only for the purpose of determining the capability of such equipment, shall be disclosed only to the persons conducting the test, and shall be destroyed upon completion of the testing, and that the test may exceed ninety days only with the prior approval of the Attorney General; or

"(ii) determining the existence and capability of electronic surveillance equipment being used unlawfully, provided that no particular United States person shall be intentionally targeted for such purposes without his consent, that such electronic surveillance shall be limited in extent and duration to that necessary to determine the existence and capability of such equipment, and that any information acquired by such surveillance shall be used only to enforce this chapter or section 605 of the Communications Act of 1934 or to protect information from unlawful electronic surveillance.

"(f) Nothing contained in this chapter, or section 605 of the Communications Act of 1934 (47 U.S.C. 605) shall be deemed to affect the acquisition by the United States Government of foreign intelligence information from international or foreign communications by a means other than electronic surveillance as defined in section 2521(b)(6) of this title; and the procedures in this chapter and chapter 120 of this title, shall be the exclusive means by which electronic surveillance, as defined in section 2521(b)(6) of chapter 120, and the interception of domestic wire and oral communications may be conducted.".

(d) Section 2511(3) is repealed.

(e) Section 2515 is amended by inserting the words "or electronic surveillance, as defined in chapter 120, has been conducted" after the word "intercepted", by inserting the words "or other information obtained from electronic surveillance, as defined in chapter 120," after the second appearance of the word "communication", and by inserting "or chapter 120" after the final appearance of the word "chapter".

(f) Section 2518(1) is amended by inserting the words "under this chapter" after the word "communication".

(g) Section 2518(4) is amended by inserting the words "under this chapter" after both appearances of the words "wire or oral communication".

(h) Section 2518(9) is amended by striking the word "intercepted" and inserting the words "intercepted pursuant to this chapter" after the word "communication".

(i) Section 2518(10) is amended by striking the word "intercepted" and inserting the words "intercepted pursuant to this chapter" after the first appearance of the word "communication".

(j) Section 2519(3) is amended by inserting the words "pursuant to this chapter" after the words "wire or oral communications" and after the words "granted or denied".

(k) Section 2520 is amended by deleting all below subsection (2) and inserting in lieu thereof: "Any person other than a foreign power or an agent of a foreign power as defined in sections 2521(b)(1) and 2521(b)(2)(A) of chapter 120, who has been subject to electronic surveillance, as defined in chapter 120, or whose wire or oral communication has been intercepted, or about whom information has been disclosed or used, in violation of this chapter, shall (1) have a civil cause of action against any person who so acted in violation of this chapter and".

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

(Later the following occurred:)

Mr. METZENBAUM. Mr. President, in connection with the last vote on S. 1566, I failed to vote on that measure because I was walking in the door when the vote was being announced.

I wish to announce at this time that had I been present I would have voted "aye." It is a measure on which I have spent a good deal of time and in which I have a tremendous interest. I think it is good legislation. I ask unanimous consent that my remarks in connection with the measure be carried immediately following the vote.

Mr. BAYH. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Indiana.

Mr. BAYH. I would just like to say a word in support of the statement of the Senator from Ohio. He has been one of the long-time advocates of providing additional protection in this area, and without his help and assistance it would have been much more difficult than was otherwise the case to move this legislation along as rapidly as it was able to be moved along.

Mr. METZENBAUM. I thank the Senator from Indiana.

(Conclusion of proceedings which occurred later.)

Mr. KENNEDY. Mr. President, I wish to acknowledge the excellent work that was done by the staffs of the Judiciary Committee and the Intelligence Committee, as well as the Department of Justice and the American Civil Liberties Union. The work of the following people was invaluable to the fashioning and the shaping of this measure: Ira Shapiro, Mike Mullen, Glen Feldman, Irene Emsullem, Eric Hultman, Herman Schwartz, and Mike Klipper. From the Department of Justice: Frederick Baron, John Hotis, Newell Squires, and Doug Marvin. And, from the ACLU: John Shuttuch, and Jerry Berman.

I especially wish to commend my administrative assistant, Ken Feinberg, who made a very special contribution to this entire legislative process.

Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of S. 1566.

The PRESIDING OFFICER (Mr. ZORINSKY). Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I simply wish to say that I think this is an important bill. I congratulate the distinguished Senator from Massachusetts for his leadership in this bill and commend the able Senator from Utah (Mr. GARN) for his good work on this bill. Also, I join with Senator KENNEDY in commending the majority and minority staff for the splendid work they did in connection with it.

Mr. ROBERT C. BYRD. Mr. President, I wish to compliment the distinguished Senator from Massachusetts (Mr. KENNEDY) for his managership of this important legislation. He has demonstrated on this occasion as he has on so many occasions complete knowledge and complete grasp of the issues, and he has done a commendable and outstanding job.

Also, Mr. President, I wish to commend the ranking minority of the committee (Mr. THURMOND) for his able leadership in joining with Mr. KENNEDY in managing this bill.

I think they are both to be commended and the Senate is in their debt.

Mr. President, I commend Senator KENNEDY and Senator THURMOND, the distinguished managers of S. 1566 on behalf of the Judiciary Committee, and Senator BAYH and Senator GARN, the distinguished managers on behalf of the Intelligence Committee, on what has been accomplished here today. Few issues have been fraught with more difficulty or controversy than the question of electronic surveillance for foreign intelligence purposes. The effort to draw a proper balance between the rights of individuals to be free from unwarranted surveillance and the right of this Nation as a whole to protect itself from foreign intelligence activities has been one of the most challenging that we have faced—and one that has greatly concerned the people of the country.

Thanks to the efforts of the members of the Judiciary and Intelligence Committees—and particularly to the efforts of these four Senators—that balance has been struck. For the Foreign Intelligence Surveillance Act, which the Senate has just now passed overwhelmingly, represents that necessary compromise between individual rights and the rights of the people as a whole that assures the protection of both interests and has made this country the great democracy that it now is and will always be.

The people of the country owe Senators KENNEDY, BAYH, THURMOND, and GARN a profound debt of gratitude for their long and arduous labors in bringing about the enactment of this bill.

Mr. BAYH. Mr. President, I wish the RECORD to show my special commendation for the members of the Intelligence Committee staff. This was a joint effort, as the Senator knows, and without the help of Mr. Miller, Mr. Eisenhower, Mr. Taylor, Mr. Epstein, Mr. Raffel, Mr. Levine, Mr. Gitenstein, Mr. Shulsky, Mr. Codevilla, Mr. Norton, Mr. Bushong, Mr. Evans, Mr. Shaw, Mr. Ford, Mr. Ricks, Mr. Elliff, and Nancy Brooks—who I think spent until the wee hours of the night putting all this together—and also Mr. Tom Connaughton, my personal staff, we would not have accomplished what we have, and we owe them a debt of gratitude.

● Mr. MUSKIE. Mr. President, the adoption today of S. 1566 represents a landmark achievement in congressional efforts to strike a working balance between the legitimate need to collect national security intelligence and the individual rights of citizens in a democratic society.

Many Members of the Senate have worked for several years to bring about the passage of this important legislation. Particular credit is due to the untiring leadership and dedication of Senator KENNEDY and Senator BAYH representing the work of the Judiciary and Intelligence Committees. Their judgment and patience have prevailed over a long period of time and have advanced the protection of civil liberties for all Americans.

Many other Members, however, played vital roles in the development of these procedural safeguards including the late Senator Philip Hart of Michigan, Senator GAYLORD NELSON of Wisconsin, former Senator Sam J. Ervin, Jr., Senator JAMES ABOUREZK of South Dakota, and former Senator John Tunney of California.

In a democratic society citizens must be ever vigilant to protect against government infringement of their liberties. As we have seen all too clearly in recent years, democracy is a fragile system which can be endangered as surely by

citizen neglect as by government despotism.

Lord Acton's maxim that "power corrupts and absolute power corrupts absolutely" should serve as a constant warning against the common tendency of those who govern to justify the use of ignoble means to achieve noble objectives.

The means by which government officials seek to achieve objectives, whether it be the protection of the nation from foreign attack or the distribution of the Nation's health, will in the long run determine the success or failure of our experiment in self-government.

I applaud the work of the Senators who have brought forth this major victory for it is yet another affirmation of success this country has had in protecting the liberties of its citizens.●

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond 30 minutes with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVAL

A message from the President of the United States stated that on April 17, 1978, he approved and signed the following joint resolution:

S.J. Res. 124. A joint resolution to authorize the President to issue a proclamation designating the week beginning on April 16 through April 22, 1978, as "National Oceans Week."

COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC-3399. A communication from the Secretary of Agriculture, transmitting, pursuant to law, a report covering the activities of the Rural Electrification Administration for fiscal year 1977; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3400. A communication from the Assistant Secretary of Defense, reporting, pursuant to law, the intent to obligate $1.6 million of funds available in the Marine Corps Stock Fund for war reserve stocks; to the Committee on Appropriations.

EC-3401. A communication from the Director, Legislative liaison, reporting, pursuant to law, that the Air Force recycling programs have been initiated in full compliance with the Environmental Protection Agency's criteria; to the Committee on Armed Services.

EC-3402. A communication from the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics), reporting, pursuant to law, on the adequacy of pays and allowances of the uniformed services; to the Committee on Armed Services.

EC-3403. A communication from the Assistant Secretary of the Army (Installations, Logistics, and Financial Management), transmitting a draft of proposed legislation to amend section 2575 of title 10, United States Code, to provide for more efficient disposal of lost, abandoned or unclaimed personal property that comes into the custody or control of military departments; to the Committee on Armed Services.

EC-3404. A communication from the Deputy Assistant Secretary of Defense, transmitting, pursuant to law, a statistical summary of reports received by OSD pursuant to section 410, Public Law 91-121, together with the reports; to the Committee on Armed Services.

EC-3405. A communication from the Secretary of Housing and Urban Development transmitting a draft of proposed legislation authorizing appropriations for fiscal years 1979 and 1980 for the section 312 rehabilitation loan program; to the Committee on Banking, Housing, and Urban Affairs.

EC-3406. A communication from the Secretary of the Treasury, transmitting a draft of proposed legislation to change the size, weight and design of the one-dollar coin, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

EC-3407. A communication from the Director, National Park Service, transmitting for the information of the Senate, a document entitled "Access National Parks," a handbook of accessibility for handicapped visitors to the areas of the national park system; to the Committee on Energy and Natural Resources.

EC-3408. A communication from the Secretary of Energy, transmitting, pursuant to law, an annual report on the weatherization assistance program; to the Committee on Energy and Natural Resources.

EC-3409. A communication from the Deputy Assistant Secretary of the Interior, reporting, that the Secretary of the Interior has determined that certain lands in the States of Nevada, Idaho, and Colorado are considered as not suitable for disposal under the provisions of the Unintentional Trespass Act (UTA) of September 26, 1968 (43 U.S.C. 1431); to the Committee on Energy and Natural Resources.

EC-3410. A communication from the Secretary of the Treasury, transmitting a draft of proposed legislation to authorize a supplementary fiscal assistance program of payments to local governments, and for other purposes; to the Committee on Finance.

EC-3411. A communication from the Director, National Science Foundation, reporting, pursuant to law, a planned addition to the NSF system of records; to the Committee on Governmental Affairs.

EC-3412. A communication from the Deputy Under Secretary of State for Management, transmitting, pursuant to law, its report of two new systems of records; to the Committee on Governmental Affairs.

EC-3413. A communication from the Administrative Director, U.S. Arms Control and Disarmament Agency, transmitting, pursuant to law, a report on a new system of records that the agency proposes to establish; to the Committee on Governmental Affairs.

EC-3414. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The Federal Information Processing Standards Program; Many Potential Benefits, Little Progress, and Many Problems," April 19, 1978; to the Committee on Governmental Affairs.

EC-3415. A secret communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the contingency plans for evacuating U.S. civilians from selected foreign areas and suggests several ways to improve these plans; to the Committee on Governmental Affairs.

EC-3416. A communication from the Assistant Secretary for Education, Department of Health, Education, and Welfare, transmitting, pursuant to law, the third annual report of the Advisory Council on Education Statistics; to the Committee on Human Resources.

EC-3417. A communication for the Secretary of Labor, transmitting proposed amendments to the Comprehensive Employment and Training Act of 1973 (CETA); to the Committee on Human Resources.

EC-3418. A communication from the Chairman, National Endowment for the Arts, transmitting, pursuant to law, a report on compliance with the Freedom of Information Act; to the Committee on the Judiciary.

EC-3419. A communication from the Acting Deputy Attorney General, transmitting, pursuant to law, a report on compliance with the Freedom of Information Act; to the Committee on the Judiciary.

EC-3420. A communication from the Administrator, Veterans' Administration, reporting, pursuant to law, on the need for special pay agreements; to the Committee on Veterans' Affairs.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions, which were referred as indicated:

POM-598. A resolution adopted by the legislature of the State of Hawaii; to the Committee on Agriculture, Nutrition, and Forestry:

"HOUSE RESOLUTION

"Whereas, the United States Department of Agriculture (USDA) is the Federal agency responsible for and authorized to implement federally mandated agriculture related predeparture inspection requirements at the various airports in the State of Hawaii for aircraft destined for airports located within the continental United States; and

"Whereas, major pre-departure inspection programs and activities within the aegis of the USDA include inspection of the aircraft itself, passengers, luggage, and cargo; and

"Whereas, the sole, if not key objective of such pre-departure inspection activities, is the prevention of the entry of pests harmful to agricultural production in the continental United States; and

"Whereas, official statistics indicate that nearly 21 million passengers passed through the airports of the State of Hawaii in 1977 of which total, 3,608,138 passengers were destined for the continental United States; and

"Whereas, the Hawaii State House of Representatives finds that the USDA lacks sufficient resources, namely, personnel and funds to adequately perform the pre-departure inspection requirements, particularly as they relate to luggage inspection at the major airports on the Neighbor Islands; and

"Whereas, as a result of the lack of adequate USDA resources, the State of Hawaii through the "Airport Special Fund", is absorbing the costs for the payment of services of State of Hawaii inspectors performing federally mandated inspection activities at Hilo Airport, Kahului Airport, Ke-ahole Air-

port, and Lihue Airport, all located on the Neighbor Islands; and

"Whereas, experience by the State of Hawaii has clearly documented the feasibility of effectively detecting and controlling the various target pests, principal among which are those generally classified as a fruit fly, through existing luggage inspection and closely allied procedures; and

"Whereas, informed experts have voiced the firm opinion that strengthened inspection activities at the Neighbor Island airports will serve to achieve the principal objective of curtailing pest entry into the continental United States without attendant inconvenience to passengers or the effective and efficient movement of passengers through and within the State's airport system; now, therefore,

"Be it resolved by the House of Representatives of the Ninth Legislature of the State of Hawaii, Regular Session of 1978, that Hawaii's delegation to the Congress of the United States is respectfully urged to introduce and actively support passage of legislation so vitally needed to insure adequate compliance with federally mandated pre-departure inspection requirements at the Neighbor Island airports in the State of Hawaii; and

"Be it further resloved that certified copies of this Resolution be transmitted to each member of Hawaii's delegation to the Congress of the United States, the United States Secretary of Agriculture, the President Pro Tempore of the United States Senate, the Speaker of the United States House of Representatives, the Governor of Hawaii, the Chairperson of the Hawaii State Board of Agriculture, the Director of the Hawaii State Department of Transportation, and to the Mayors of the counties of Kauai, Maui, and Hawaii of the State of Hawaii."

POM-599. A resolution adopted by the National Cowboy Hall of Fame and Western Heritage Center, relative to the Metric Conversion Act; to the Committee on Commerce, Science, and Transportation.

POM-600. A resolution adopted by the Colorado Commission on Indian Affairs, relating to Native Americans; to the Select Committee on Indian Affairs.

"PREPAID HEALTH PLANS AND HEALTH MAINTENANCE ORGANIZATIONS" —SPECIAL REPORT OF A COMMITTEE (REPT. NO. 95-749)

● Mr. JACKSON. Mr. President, I file today a report of the Committee on Governmental Affairs prepared by its Permanent Subcommittee on Investigations on prepaid health plans (PHP's) and health maintenance organizations (HMO's). The report is the result of a more than 3-year investigation and review of the performance of PHP's in California receiving funds from the medicaid program and the Federal health maintenance organization program.

The inquiry was begun following wide publicity given alleged problems surrounding the prepaid health plans of the California medicaid program.

The State of California implemented in 1972 an alternative form of delivering, organizing, and financing health care services to beneficiaries of Medi-Cal, the State's medicaid program. Program costs in California had risen rapidly and continuously under the old system of paying physicians, hospitals, and other providers fees for their services.

PHP's are comparable to HMO's. Both are private entities—primarily corporations—which agree to provide a broad range of health care services to groups of individuals for a fixed monthly rate per individual or family. This is known as a capitation payment. These enterprises either employ or contract with physicians and other providers of health services. Similarly, they either own or contract with health care facilities. The PHP/HMO approach envisions that by grouping physicians togther, often in one medical center, comprehensive health care can be made avialble at reasonable cost and that the quality of care to patients can be enhanced through physician peer group pressure.

In theory, the HMO's aim is to provide enrollees with preventive medical services, thereby reducing hospitalization and the resulting high costs. In a properly administered HMO, persons who need treatment receive full care. The incentive exists to keep patients healthy and to detect and treat illnesses in their early stages so they will not need more expensive care. The HMO's fixed monthly income forms a ceiling under which administrators agree through contracts to provide for the health care needs of the people they serve.

In short, there is no financial incentive to provide unnecessary medical services, whereas in the fee-for-service system, there is a financial incentive to provide patients with more services than they need, because medical providers are paid for each service.

The decision in 1972 by California to provide health care services to its medicaid beneficiaries through prepaid plans was followed by passage by the Congress of the HMO Development Act of 1973 to stimulate the growth of prepaid systems.

Public hearings on PHP's and HMO's were held by the subcommittee. Senator PERCY and I said at the opening of our inquiry that the subcommittee hoped to learn from the mistakes of California's PHP program so that the same errors would not be made in other State medicaid programs and in the new Federal HMO development program. I said then and I still believe that the HMO concept is a "good idea that should not be abandoned, because men without consciences, profiteers, and scam artists took the initiative in California from those with good intentions."

Senator PERCY noted that the intention of Congress in passing the HMO Development Act in 1973 was "to test this health care delivery system nationwide. Our thinking was and is that such a one-step complete health delivery system based on preventive care might be ready for implementation when national health insurance becomes law."

The report which is being filed today summarizes information obtained by the subcommittee evidencing: Fraud and abuse of the California prepaid health plan program; failures by the State government in program management; inadequacies in Federal oversight of the California program; and questions concerning the adequacy of the present Federal program to encourage the development of health maintenance organizations across the Nation.

I would like to express my appreciation to Senator SAM NUNN, the subcommittee vice chairman, for his fine work throughout the inquiry and for the extraordinary support and assistance of Senator CHARLES H. PERCY, the ranking minority member.●

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. RIBICOFF, from the Committee on Governmental Affairs, without amendment, unfavorably:

S. Res. 404. A resolution disapproving reorganization plan numbered 1 of 1978 (Rept. No. 95-750).

By Mr. ALLEN, from the Committee on the Judiciary: separation of power annual report (Rept. No. 95-751).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. JACKSON (by request):

S. 2955. A bill to modify the authority of the Government Comptrollers for Guam and the Virgin Islands, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. JAVITS (for himself, Mr. MOYNIHAN, Mr. BAYH, Mr. BROOKE, Mr. CLARK, Mr. DURKIN, Mr. HUDDLESTON, Mrs. HUMPHREY, Mr. RIBICOFF, Mr. RIEGEL, Mr. KENNEDY, and Mr. CASE):

S. 2956. A bill to amend section 1682A of title 38, United States Code, to eliminate the State matching requirement under such section in connection with the program of accelerated payment of educational assistance allowances provided for in such section; to the Committee on Veterans' Affairs.

By Mr. MATHIAS:

S. 2957. A bill to provide for a coordinated national policy on stable economic growth; to the Committee on Governmental Affairs.

S. 2958. A bill to encourage investment by private industry in urban areas through use of the investment tax credit; to the Committee on Finance.

S. 2959. A bill to amend the Internal Revenue Code of 1954 to provide a special deduction for the employment of unemployed residents of urban areas by businesses locating in those areas; to the Committee on Finance.

S. 2960. A bill to amend the Internal Revenue Code of 1954 to allow the tax-exempt treatment allowed to certain industrial development bonds to bonds the proceeds of which are to be used within economically distressed cities, and to allow national banks to underwrite these bonds; to the Committee on Finance.

S. 2961. A bill to amend section 2687 of title 10, United States Code, to require notification of local officials, as well as Congress, before the closure, realignment, establishment, or expansion of a military installation may be carried out and to change the period of time which must elapse after notification before such action may be carried out; to the Committee on Armed Services.

S. 2962. A bill to provide surplus federal property for economic development purposes; to the Committee on Governmental Affairs.

S. 2963. A bill to provide financial assistance to State educational agencies to help control violence in the schools of local educational agencies, and for other purposes; to the Committee on Human Resources.

By Mr. ANDERSON:

S. 2964. A bill to amend section 5197 of the Revised Statutes to limit the rate of interest a national bank may charge its out of State customers; to the Committee on Banking, Housing, and Urban Affairs.

S. 2965. A bill to provide for more equitable distribution among the States of military and civilian personnel of the Department of Defense; to the Committee on Armed Services.

S. 2966. A bill to amend the Internal Revenue Code of 1954 to increase the investment tax credit for qualified farm property to 15 percent, effective as of January 1, 1976; to the Committee on Finance.

By Mr. CHILES:

S. 2967. A bill to amend the older Americans Act of 1965 to provide support for development of comprehensive systems of community long-term care, and for other purposes; to the Committee on Human Resources.

By Mr. CLARK (for himself, Mr. MORGAN and Mr. CULVER):

S. 2968. A bill to strengthen the economy of the United States through increased sales abroad of American farm products; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. CHURCH (for himself, Mr. KENNEDY, Mr. CHILES, Mr. WILLIAMS, Mr. CLARK, Mrs. HUMPHREY, Mr. PELL, Mr. RANDOLPH, Mr. MCINTYRE, Mr. ABOUREZK, Mr. BROOKE, Mr. CANNON, Mr. MARK O. HATFIELD, Mr. BAYH, and Mr. MCGOVERN):

S. 2969. A bill to amend the Older Americans Act of 1965 to provide for improved programs for the elderly, and for other purposes; to the Committee on Human Resources.

By Mr. PERCY:

S. 2970. A bill to promote commercial motor vehicle safety, to prevent injury to commercial motor vehicle operators, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. RIBICOFF (for himself, Mr. PERCY, Mr. JAVITS, Mr. KENNEDY, Mr. CLARK, and Mr. STAFFORD):

S. 2971. A bill to require public disclosure of certain lobbying activities to influence issues before the Congress and the executive branch, and for other purposes; to the Committee on Governmental Affairs.

By Mr. BARTLETT:

S.J. Res. 128. A joint resolution designating July 1, 1978, as "Free Enterprise Day." Considered and passed.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. JACKSON (by request):

S. 2955. A bill to modify the authority of the Government Comptrollers for Guam and the Virgin Islands, and for other purposes; to the Committee on Energy and Natural Resources.

GOVERNMENT COMPTROLLERS FOR GUAM AND THE VIRGIN ISLANDS

● Mr. JACKSON. Mr. President, by request, I send to the desk for appropriate reference a bill to modify the authority of the Government Comptrollers for Guam and the Virgin Islands, and for other purposes.

Mr. President, this draft legislation was submitted and recommended by the Department of the Interior, and I ask unanimous consent that the executive communication accompanying the proposal from the Under Secretary of the Interior be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C., *April 10, 1978.*

Hon. WALTER F. MONDALE,
President, U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed herewith is a proposed bill "To modify the authority of the Government Comptrollers for Guam and the Virgin Islands, and for other purposes.".

We recommend that the bill be referred to the appropriate Committee for consideration, and that it be enacted.

The proposed bill would effect two principal changes in existing law. It would first impose upon the Governors of Guam, the Virgin Islands, and the Northern Mariana Islands, and the High Commissioner of the Trust Territory of the Pacific Islands, the responsibility to respond to findings made by Government Comptrollers (a) as to territorial government programs that need improvement with respect to financial management, and (b) as to failures to collect amounts due the government, and expenditures of funds or uses of property that are irregular or not pursuant to law.

Secondly, the bill would authorize the Comptrollers to take enforceable exception to actions of certifying officers, an authority they do not now have but which they must have in order to discharge their responsibilities effectively.

Government Comptrollers have served in the territories for many years, from 1954 in the Virgin Islands and from 1968 in Guam. Pursuant to a 1973 statute (Public Law, 93–111, 87 Stat. 354), the Government Comptroller for Guam performs his duties with respect to the Trust Territory of the Pacific Islands, as well. This includes the Government of the Northern Mariana Islands, which will constitute a separate governmental entity in January 1978. Because the Northern Marianas will remain legally a part of the Trust Territory until termination of the Trusteeship Agreement, the authority of the Guam Comptroller will extend to the Northern Marianas during at least the immediate future. However in order to make the Guam Comptroller's authority clear, we have dealt explicitly with the matter in section 6 of the proposed bill.

The Comptroller's functions have been discharged with varying degrees of effectiveness over the years, but it is probably accurate to state that neither the Comptrollers nor this Department have ever been entirely satisfied as to the role they have played. The territorial Governors have often complained that the Comptrollers have too rarely served as constructive helpers. At the same time, the Comptrollers have felt frustration over the fact that they often seem to labor for love alone, for their recommendations are frequently filed away and forgotten, their findings as to irregularities sometimes ignored.

It is our hope that many of the difficulties of the past may be overcome with enactment of this proposed bill, plus implementation of a new policy of this Department concerning assistance to be offered by the Comptrollers.

We intend, first, to require the Comptrollers to expand their activitives to include assistance to the territorial governments in the broad areas of financial management. All of the territories have in recent months requested our help in this area. They need aid in establishing accounting systems, in training personnel, and in utilizing the sophisticated equipment that has been purchased but that is too often underutilized now. We intend to respond to these requests by developing with the Comptrollers' Offices an expertise in financial management that will permit us to give such technical assistance. Although this can, we believe, be accomplished under existing law, we have added language that will make this authority explicit.

We do not intend, however, to abandon the Comptrollers' traditional auditing function, but would hope to redirect that auditing so as to assist in improving the functioning of the territorial governments rather than merely calling attention to defects without providing aid in correcting them. We intend to insure that the level of auditing concerns matters of consequence, and that the effect of the audit is helpful, not solely critical. As a territorial governor recently stated to us, the Comptrollers should be "a partner, not an adversary".

At the same time, anxious as we are that the Comptrollers and the Governors develop and maintain a harmonious relationship, we believe that the Comptrollers must be vested with somewhat greater authority than they now possess. The Comptrollers' positions were created to insure that the very large amounts of Federal money that flow to the territories and the Trust Territory are in fact spent in the manner contemplated by the Congress. To be sure that this is so, we believe that the Comptrollers should be guaranteed a timely response to their recommendations, and that they should be authorized to take exceptions. The first of these objectives would be met by sections 1, 3, 5, and 6 of the proposed bill.

Existing law provides in each case that the Comptroller must call to the attention of the chief executive "all failures to collect amounts due the government, and expenditures of funds or uses of property which are irregular or not pursuant to law". The proposed bill would require the chief executive to respond within 45 days of his receipt of the Comptroller's report that calls attention to such matters. The chief executive would either, as the bill provides, have to outline the corrective action proposed to be taken and the compliance efforts to be used; or would advise the Comptroller that he does not agree with the report, at which time the chief executive could appeal the matter to the Secretary of the Interior. In the absence of an appeal, the Comptroller's decisions would be final. In that event, unless the matter were satisfactorily resolved between the Governor and the Comptroller, the Comptroller will be able to bring the issue to the Secretary of the Interior, who then can take whatever further action may be appropriate.

As to the proposed authority on the part of the Comptrollers to take exceptions, we would expect that this authority would be exercised rarely, but its mere existence is likely to be salutary. The authority herein contemplated is comparable to that exercised by the General Accounting Office, and we think it is appropriate for the territorial Comptrollers as well.

The proposed bill does not deal with American Samoa, because the Government of American Samoa has not been created by the Congress through enactment of organic legislation (as in the case of Guam and the Virgin Islands), but instead through a Constitution locally drafted and ratified, and thereafter approved by the Secretary of the Interior in the exercise of his authority with respect to the territory (48 U.S.C. 1661(c), Ex. Order No. 10264, June 29, 1951).

The Secretary of the Interior, by means of Secretarial Order No. 3009, issued in September 1977, has created the office of Government Comptroller for American Samoa. The authority granted to that Comptroller is comparable to that we propose to grant to the Comptrollers for Guam and the Virgin Islands.

We are undertaking to create in our Office of Territorial Affairs a small unit that will provide oversight and guidance to the Comptrollers. Part of the ineffectiveness of Comptrollers' activities in the past is, we believe, attributable to imperfect supervi-

sion and aid from this Department. We mean to correct that.

The final section of the proposed bill would vest in the Secretary of the Interior the authority to provide technical assistance in any matter within the responsibilities of the territorial governments upon the request of their chief executives. While the Secretary has authority under various statutes to provide certain kinds of aid to the territories, we believe that the provision of such aid can be expedited and facilitated by the general authorization we have provided in section 8.

The Office of Management and Budget has advised that there is no objection to the presentation of this draft bill from the standpoint of the Administration's program.

Sincerely,

JAMES A. JOSEPH,
Under Secretary.●

By Mr. JAVITS (for himself, Mr. MOYNIHAN, Mr. BAYH, Mr. BROOKE, Mr. CLARK, Mr. DURKIN, Mr. HUDDLESTON, Mrs. HUMPHREY, Mr. RIBICOFF, Mr. RIEGLE, Mr. KENNEDY, and Mr. CASE):

S. 2956. A bill to amend section 1682A of title 38, United States Code, to eliminate the State matching requirement under such section in connection with the program of accelerated payment of educational assistance allowances provided for in such section; to the Committee on Veterans' Affairs.

ELIMINATE STATE MATCHING REQUIREMENT FOR GI EDUCATIONAL ALLOWANCES

Mr. JAVITS. Mr. President, today I join with my distinguished colleague, Senator MOYNIHAN, in introducing legislation which will remove the State matching requirement from the tuition acceleration provision of Public Law 95-202, the GI Bill Improvement Act of 1977.

We are joined in this effort by Senators BAYH, BROOKE, CLARK, DURKIN, HUDDLESTON, HUMPHREY, RIBICOFF, and RIEGLE.

Our legislation is based upon the tuition acceleration provision passed unanimously by the Senate last October 19, one which would have substantially assisted veterans to utilize their education benefits in educational institutions with high tuition charges. The GI Bill Improvement Act, as initially passed by the Senate in S. 457, included a provision which would allow acceleration of a veteran's educational entitlement to pay 66⅔ percent of tuition costs above $700. Had the Senate position carried, veterans attending higher cost institutions would have been able to receive a greater amount of monthly GI bill educational assistance by utilizing more quickly portions of their 45 months total entitlement.

GI BILL STATE MATCH

However, the House added to the GI bill acceleration provisions a requirement that the States match the Federal contribution. The Federal share was thus reduced to a maximum of 33⅓ percent of a veteran's tuition costs above $700, to be paid only if the State in which the veteran's educational institution is located provides an equal match of State funds for the accelerated GI bill entitlement.

Mr. President, we perceive two basic problems with these acceleration provisions included in Public Law 95-202, one philosophical and one pragmatic, which necessitate amendment of the GI Bill Improvement Act:

GI BILL NOT A STATE PROGRAM

First, the history of veterans benefits completely belies the concept of making GI bill assistance into a State matching program. Should veterans benefits for serving our country depend upon home State ability or, more importantly, willingness, to pay for GI bill benefits? We believe not. It is extremely unwise for Congress to so restrict GI bill entitlements earned by those who have served in our Nation's Armed Forces.

Second, to couple a veteran's ability to accelerate his education entitlement to assist with high tuition costs—which was the Senate's intent in its passage of S. 457—with the requirement that States match Federal dollars, essentially results in little or no help to the veteran who wishes to accelerate. Few, if any, States can afford to meet current costs of higher education—much less provide additional appropriations to match Federal dollars for veterans educational benefits. Since the State must match for the veteran to receive Federal assistance, the veteran who attends school in a State which cannot provide matching funds is left out in the cold as of today, according to the Veterans' Administration, not a single State in the Nation has put up the first dollar to implement this law.

Moreover, if a State chooses to match, but at a proportion less than the 33⅓ percent level, a veteran who accelerates will receive a much smaller entitlement than that intended by the Senate in its passage of S. 457. In this sense, it is the State which determines whether or not the veteran who wishes to accelerate receives Federal GI bill education assistance to which he or she is entitled.

Furthermore, Mr. President, incorporation in the GI bill of a State matching program entails unnecessary duplication, by States, of administrative functions currently carried out by the Veterans' Administration. Regulations proposed by the Veterans' Administration to conform to the new State matching program indicate that States must undertake additional administrative burdens, including State definition of "educational institution," to implement the matching program. The State matching program clearly results in additional administrative burdens on States while violating the historic intent The GI bill has a national, not a State, equitable benefits nationwide to those who have served in our Armed Forces. The GI bill has a national, not a State, purpose, and to chip away at such a national program in this manner is a grave mistake.

REMOVE THE STATE MATCH

The bill which we offer tody would simply remove the State matching requirement of the tuition acceleration provision in Public Law 95-202 and return the percentage of costs which may be reimbursed by the Federal Government through acceleration to 66⅔ percent of tuition above $700—to wit, a return to the Senate position in its unanimous passage of S. 457.

Mr. President, I am pleased that the Jewish War Veterans of the United States has endorsed our proposal. It is my hope that other veterans organizations will carefully review this legislation and will offer their support as well, for improved educational opportunities for our Nation's Vietnam veterans. Mr. President, I ask unanimous consent that the letter from the Jewish War Veterans of the United States indicating their support for this proposal be printed at the end of my remarks.

We firmly believe that this bill will permit the acceleration provisions to assist those Vietnam veterans who have earned, with their honorable service, GI benefits bestowed by a grateful Nation.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 2956

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1682A (b) of title 38, United States Code, is amended by—

(1) amending clause (6) to read as follows: "(6) such application was filed with the Administrator within 180 days after the date on which the degree, diploma, or certificate described in clause (5) of this subsection has been awarded to such veteran; and";

(2) striking out the semicolon and the word "and" at the end of clause (7) and inserting in lieu thereof a period; and

(3) striking out all of clause (8).

(b) The first sentence of section 1682A (c) of such title is amended by striking out "and matching amounts paid to the Administrator by a State or local governmental unit, as described in subsection (b)(8) of this section,".

(c) Section 1682A (d) of such title is amended by—

(1) striking out "33⅓ per centum" in clause (2) and inserting in lieu thereof "66⅔ per centum";

(2) inserting "or" at the end of clause (2);

(3) striking out "33⅓ per centum" in clause (3) and inserting in lieu thereof "66⅔ per centum"; and

(4) striking out the comma after "$700" in clause (3) and all that follows down through the word "amount" in clause (4).

JEWISH WAR VETERANS
OF THE UNITED STATES OF AMERICA,
Washington, D.C., April 11, 1978.

Hon. JACOB K. JAVITS,
U.S. Senate,
Senate Office Building,
Washington, D.C.

DEAR SENATOR JAVITS: Thank you for forwarding to me for my review a copy of your proposed bill to amend the G.I. Bill Improvement Act of 1977 (P.L. 95-202). Your support of such legislation is most appreciated by our organization.

The Jewish War Veterans of the United States of America has long championed any federal legislation which will alleviate the economic situation confronting our Vietnam veterans. Removal of the state match requirement from P.L. 95-202 will most assuredly correct both philosophical and pragmatic defects in the bill. We agree most assuredly that veterans benefits should not

depend on the home state's capability or willingness to pay for G.I. Bill entitlements. We are especially aware that in the economic climate today it is highly unlikely that the states individually can afford to meet the educational assistance to our nation's veterans. I am, therefore, most pleased to offer you my personal, as well as our organization's professional thanks for your part in this legislation.

Our best wishes.

Sincerely,

IRWIN R. ZIFF,
National Executive Director.

Mr. MOYNIHAN. Mr. President, last fall the Congress passed and the President signed into law the GI Bill Improvement Act of 1977, now Public Law 95-202. The preeminent feature of that act—in the form of the accelerated payments provision—was its recognition for the first time in a quarter century that the benefit conferred equally on all veterans is an opportunity for education, not a monthly check. The monthly payment was a means devised by Congress in 1952 to overcome certain abuses while enabling veterans to reach after that opportunity, to seek an education wherever their aspirations, qualifications, and means pointed them. Two difficulties arose, however, with the introduction of the monthly payment: set funds go further—substantially further, we find—in some places than in others; and many, perhaps most, around the country eventually came to view the equal benefit of the GI bill in terms of the monthly payment rather than as what it was intended to be and remains, an opportunity to seek an education.

Last fall, Congress came close to correcting both these fallacies. Indeed, the Senate on October 19 unanimously passed the GI Bill Improvement Act with an accelerated payments provision which addressed the problems directly. The provision allowed veterans in high cost schools to accelerate the use of a portion of their entitlement to help meet costs. This single provision struck down any misconception of the actual benefit conferred on veterans by taking a significant step toward more equitably assisting veterans in their pursuit of an education.

Then the accelerated payments provision itself was struck down—not formally, of course, but in fact. The other body added the requirement that before a veteran could make use of his entitlement by accelerating it, the State in which his school is located must contribute something toward his tuition costs—not, I might add, by means of any mechanism in use by any State to assist its veterans, but by means of a cash transfer from the State to the Veterans' Administration's Education Loan Fund. Only if a veteran's State can and will contribute in this way, and only in an amount matching the State's contribution, is a veteran allowed to make accelerated use of his own entitlement.

Mr. President, this is folly. We have a law which we thought was to return us to the GI bill's original principle of providing suitable assistance toward an equal opportunity for education. We find instead a law which introduces the wholly new principle of the subservience of a veteran's educational benefits to State action. We must reject this principle. It is unwise theoretically and practically.

Our veterans performed Federal service. Their educational entitlement is federally determined and funded. It has been so for 30 years. No one is suggesting, I trust, that we return to a view of our active duty forces as militamen. Yet the State matching measure suggests just so much—a conceptual boondoggle. Actually, the term "State matching" is a misnomer. It should read "Federal matching," for the requirement is that the Federal Government match the State government's contributions.

I wonder if anyone undertook last fall, during the late-night session at which this prize addition to the acceleration provision was attached, to consider the several States' ability and willingness to provide the funds necessary for a meaningful acceleration program. I take it that no one did—how could they when this requirement was added to the act in such a hasty manner? There were no hearings. There could be no studies since the notion was unprecedented. What we have in this matching requirement, Mr. President, is something added without consideration, at the last minute—almost, it seemed at the time, as a taunt in the face of those who could not overcome it without sacrificing the entire act—and with the effect of defeating the principle laid down in 1944 of a national debt owed for national military service.

What, then, practically speaking, does the new law require of States? New York, as I understand it, would be forced this next year to pay between $1 and 2 million to the Veterans' Administration if it wished its veterans to be able to accelerate their entitlement as intended by the authors of the acceleration provision. Let us put this into context.

New York provides one of the Nation's most generous college scholarship programs in its "Tuition Assistance Program," which is open to veterans. This program will cost New Yorkers about $240 million this year. New York just last week enacted an entirely new tuition tax and savings plan package to even further assist New York families and students, including veterans, to meet education expenses. It is expected that this new program will cost New Yorkers another $25 million this fiscal year, and more still in coming years. It is of interest that New York State's overall expenditures on higher education will total approximately $1.4 billion this year. Yet nothing New York State provides qualifies as its contribution under the new State matching requirement.

New Yorkers are asked to pay another few million dollars, and as much as $7 to $9 million per year by the early 1980's, to the Washington bureaucracy so that New York veterans can use their own Federal entitlement at a fairer rate. We New Yorkers value education highly. And it might be that the New York legislature will see fit to appropriate such funds for Washington's use. It surely would not be the first time, or the last I am afraid, that New York was asked to foot strictly Federal obligations. But it would be wrong, once again. Indeed, I am led to wonder how those veterans will fare who, like New York veterans, face high tuition costs but whose States have been unable to provide as much aid to education as they would like. Mr. President, if the Congress honors the obligation it took upon itself 34 years ago to provide all veterans with an equal opportunity for an education, the Congress must reject this so-called State matching requirement.

Last fall my distinguished senior colleague from New York and I presented uncontested figures to show that the GI bill since 1952 has worked a disproportionate benefit to veterans in this country. All the figures attest to this fact. The latest figures make the point again. In the fall of 1977, California had 61 percent more Vietnam veterans than New York; yet the number of those veterans in training in California exceeded those in New York by 167 percent. The chapter 34 payments made to California veterans during fiscal year 1977 were 233 percent greater than those paid to New York veterans. I will repeat what I said last fall: No one intended that such an imbalance exist, but the ineluctable movement of the GI bill since 1952 has been toward this increasing imbalance.

I suggest, Mr. President, that the Congress, in the haste of some Members of the other body to cut costs, has lost sight once again of the principle behind the GI bill, and will very soon through this tomfoolery have lost the chance to introduce hundreds of thousands of Vietnam veterans to a more equal opportunity for an education. I, for one, had thought last fall that we had overcome our quarter century old theoretical misconception of the benefit conferred by the GI bill and in fact had moved by enacting the acceleration provision toward addressing the practical problem of veterans' differing education costs. Now I find we have stumbled onto a new theoretical problem and are as far as ever from truly equitable assistance to Vietnam veterans. And all this in the face of the fact that most Vietnam veterans in training will be beyond their entitlement period in a few years. There are now 1.4 million of these veterans in training. By 1983 there will be between 350,000 and 500,000 in training.

We must act now; the sooner the better. The State matching requirement should be stricken from the law, and the accelerated payments provision thereby be allowed to work its intended benefit. No one claims that the massive inequity in GI bill benefits since 1952 will be righted by this one provision. What is at stake is the recognition of the inequity and at least some movement toward righting the wrong. We owe Vietnam veterans that much right now.

A NEW URBAN APPROACH—ACT ONE

● Mr. MATHIAS. Mr. President, today I am introducing several bills of a legislative package that attacks some of the most prominent urban problems this Nation faces.

The seven bills which I now present to the Senate direct Federal support to our

most distressed major cities and redress regional economic imbalances which, in many cases, have been exacerbated by Federal policies.

Later I will introduce legislation to expand housing opportunity and to combat hardcore unemployment.

My bills, briefly described, are as follows:

1. Economic Growth Management Council:

Establishes a Cabinet-level Council of federal department heads, business and labor. The Council would monitor regional growth rates and adjust federal spending, contracting, leasing, and locational policies to promote balanced growth. It would also provide technical assistance to cities, states, and regions experiencing either "booms" or "busts".

2. Urban Investment Tax Credit:

Provides a 12 percent investment tax credit for business and industry locating in or remodeling existing facilities in cities of 100,000 or more population which have had an unemployment rate of 6.5 percent or greater for any three out of the twelve months preceding enactment.

3. Urban Employment Incentive Act:

Employers can claim a tax deduction for three years of up to 25 percent of the salary of newly-hired, previously unemployed workers. Applies only to employers located in larger cities (100,000 or more population) with a labor surplus (6.5 percent unemployment rate or greater for any three out of the preceding twelve months).

4. Industrial Revenue Bonds:

Increases the tax-exempt borrowing limit for cities of over 100,000 population to $50 million. This legislation would reduce cities' borrowing costs for industrial development projects and make such bonds more attractive to investors because the interest on the bonds would be exempt from federal income tax.

5. Recycling Federal Surplus Property:

Provides a 50 percent write-down to cities and other communities for federal surplus real estate which they buy. The community would have the right of first refusal before GSA could offer the property to other federal departments.

6. Military Base Closures/Relocations:

Requires the Defense Department to notify local officials 60 days prior to an action it proposes to take. The bill gives local officials a chance to plan for both moves in and out.

7. Safe Schools Act:

Attacks the number one problem in American schools—violence and disruption. A newly published HEW study of school violence reports that urban schools are most seriously affected. This bill would concentrate money on those schools, enabling them to establish programs that focus compassionately and with understanding on the offenders—the maladjusted youth who comprise a small part of the school population, but who cause the bulk of the disruption.

Mr. President, these bills represent a realistic, balanced and achievable approach to finding answers to the problems facing American cities. In developing them, over the past year and a half, I have consulted with a broad range of experts in urban affairs. Their perceptive comments are reflected in these bills.

Significant changes are taking place in the nature of our economy and in the distribution of economic activity. Some regions of our Nation are experiencing economic and population "booms" reminiscent of the gold rush days; others are on the skids with declining industry and population. My bills avoid the mistake of favoring one region over another. They address the "boom" and the "bust" communities.

Mr. President, during the next few weeks, I expect to introduce legislation addressing other urban questions. My additional bills will promote maintenance, repair, and insulation of rental homes and apartments; a "job shop" program for training unskilled and unemployed youth in home rehabilitation skills; a seaport development program for revitalizing underutilized port storage and warehouse facilities; a low-interest downpayment loan program for first-time homebuyers, and a program to assist towns and cities with populations of less than 100,000.●

By Mr. MATHIAS:

S. 2957. A bill to provide for a coordinated national policy on stable economic growth; to the Committee on Governmental Affairs.

GROWTH MANAGEMENT COUNCIL

● Mr. MATHIAS. Mr. President, despite encouraging signs of recovery, the health of the Nation's economy continues as the object of intense scrutiny and debate. All the experts agree that the debate should address two particularly troublesome points: the slow rate of capital formation and uneven growth rates of both economic sectors and geographic regions.

Some regions of the country are growing while others experience economic stagnation and decline. Some major industries are relocating out of the so-called "Frostbelt" of the Northeast and Great Lakes regions to the warmer climes of the Southern and Southwestern "Sunbelt." The problem has been portrayed by the popular press as a "Second War Between the States? But I think that is too simple a picture which overlooks the particular ups and downs of individual local economies. A growing number of authorities recognize that this is not a phenomenon which can be neatly categorized by geographic region or State. Even within those regions, there is no uniform pattern of economic performance. Some cities boom and others decline, irrespective of the region in which they are located.

Frankly, I think it counterproductive for us to continue to describe the differing growth rates, Federal spending patterns, local tax efforts, and population shifts in terms that imply that certain regions or States are "winning" or "losings."

The Governor of Georgia, George Busbee, put it well in an address to the Southern Growth Policies Board:

Since 1865 we have know as a nation that none of our regions can have an independent political destiny . . . and I don't believe any region should aspire to or attempt to have an independent economic destiny.

In principle . . . we are as much "one nation" economically as we are "one nation" politically.

But the facts of the matter are that "economic equity" is as elusive . . . as difficult to establish and maintain as political justice.

What we should be concerned with is the total economy, the inflation which continues to plague it, and the high unemployment rates. And we should focus on the trouble spots—those sectors of the economy which are changing or slowing down; those areas where unemployment is the most intractable; those microeconomies which act as a drag on our national growth and prosperity. And we must have the foresight to recognize a new opportunity, idea, or technology when it comes along, and to nourish it and make use of it.

Federal policy and practices have played an increasingly influential role in the course taken by our Nation's economy. Federal decisions in facility location and relocation, construction, leasing, procurement, grants, and loans in many cases determine whether a town lives or dies economically.

In the past, particularly during the depression, a number of Federal policies were consciously promoted to invigorate the predominantly agricultural economy of the South and Southwest of our country. Whenever possible, we tried to locate our military bases there. We even created a major public utility project—the Tennessee Valley Authority. And to a great extent those policies succeeded in bringing industry, people, and rising incomes to the South and Southwest.

Now we find that other regions, which had been doing quite well without any particular Federal policy, are beginning to feel left out.

As Ralph Widner of the Academy for Contemporary Problems noted recently,

Much of what we're calling a problem, we've been trying to do for 40 years, develop Western resources, bring the South up to parity with the North. Now we're wringing our hands over it.

The fact is that ours is an economy of interdependent local and regional economies and economic sectors. When these sectors become seriously imbalanced due to sudden spurts of growth in certain sections or prolonged high unemployment in others, the stability of our entire economy is threatened.

For all of these reasons, it is useful and appropriate to bring together those most involved in our national economy to focus on both the big picture and the microeconomies with special needs. The bill I am introducing today would do this.

It establishes a cabinet-level Council of 27 composed of the Secretaries of major departments involved in Federal spending as well as representatives of business and labor. The purpose of the Council is to monitor the trends in the economy at the national, regional, State, and local level and to take corrective action when needed to avoid sharp swings in economic activity that put a strain on particular parts of the economy or regions of the country.

The Council would serve as a forum where the main actors could share their research and perceptions of economic trends. Federal departments and agencies would tell the Council when they proposed to take any major Federal action which could require adjustments at the local, State, or regional level. Such major Federal action could mean a military base closure or relocation, the termination of a major contract for air-

craft production, the proposed leasing of office space for several hundred Federal employees or the awarding of a mass transportation grant to build a subway in a metropolitan area.

It could also mean the proposed construction of a veterans' hospital, the proposed closing of a local airport, or the awarding of a contract for research into new energy technology to a company, firm, or university.

The Council would evaluate such proposed major actions to determine whether they would substantially affect the community and surrounding region. The mayors, Governors, and businesses likely to be affected also would be consulted to determine their contingency plans. In other words, the Council is supposed to keep everyone informed of proposed major Federal actions to avoid surprises, and provide technical assistance to communities when needed. In a sense, it is a form of emergency preparedness.

The Council is also charged with developing and recommending to the President and the Congress a national economic growth policy, to be updated annually.

Mr. President, I believe we in the Federal Government need to bring some order to how we spend money, locate installations, and lease space. Our activities play a significant role in determining the direction of the economy. We must begin to plan them better.

This proposal is not aimed at instituting national economic planning with established 5-year goals as is done in several Western European countries. Rather, I see the Council as a forum for beginning a necessary dialog about our economy, how and where it is growing, what role we each play in it, and how we can play our role better. The Council will not promulgate new, complex Federal regulations, for ours is basically a free economy. Rather, it will monitor the directions of the public sector of our economy, and coordinate the Governments' role in promoting ordered growth.

I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2957

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Economic Growth Management Assistance Act".

FINDINGS

SEC. 2. The Congress finds and declares that—

(1) there is a disparity in growth rates between cities and suburbs and between the various States and regions of the Nation;

(2) this disparity may cause severe economic and population dislocations among localities, States, and regions, thereby impeding the stable growth of the Nation's economy;

(3) certain urban areas, particularly core cities, are experiencing a decline in the growth of key sectors of their economies, a declining tax base, and an increasing population of dependent individuals;

(4) Other urban areas are experiencing unprecedented growth of their population, tax bases, and sectors of their economies;

(5) the rate and composition of growth of different urban areas is exerting growing demands on the natural environment, resources, public services, capital improvements, and tax base of such areas;

(6) the United States Government has made substantial commitments of money and manpower in the economic, scientific, social, and technologic fields through Federal leasing, contracts, direct employment, and location of facilities throughout the Nation. Those Federal spending and locational policies are directly related to differing rates of growth between and among urban areas, States, and regions of the Nation.

STATEMENT OF POLICY

SEC. 3. (a) It is the policy of the Congress to insure a stable economic growth rate for the Natien in a manner which equalizes regional and urban growth rates.

(b) The Congress, the Federal government, State and local governments, and all citizens have a responsibility to conserve our environment through prudent management of existing resources and the development of new resources, both natural and man-made.

(c) It is the purpose of this Act to provide the means through which the United States can promote an orderly and stable rate of economic growth for the Nation which will minimize economic and population dislocations among urban areas, States, and regions of the Nation; assure that dislocations do not compound recessionary trends which may be present in those areas; and encourage capital formation in the private sector.

DEFINITIONS

SEC. 4. As used in this Act, the term—

(1) "Federal agency" has the same meaning as provided under section 551(1) of title 5, United States Code.

(2) "Person" means any corporation, firm, partnership, association, individual, or other entity.

(3) "Federal contract" means any contract entered into between a person and a Federal agency to furnish material or services to such agency in an aggregate amount of $5,000 or more."

(4) "Federal contractor" means any person determined by the Secretary of Labor to employ not less than 5 per centum of the local labor force as determined by the Secretary in the furnishing of material or services pursuant to the terms of a Federal contract, or as a subcontractor thereunder, and for whom such contract or contracts, including any under negotiation, represents more than 20 per centum of the total production of each specific plant or productive unit of such person's business with respect to which the Secretary of Labor is able to reasonably relate an identifiable local labor force.

(5) "Facility" means any plant or other establishment (or part thereof) engaged in the production, repair, modification, maintenance, storage, or handling of material or goods for sale or lease to the Federal Government or any building or real property owned or leased by the Federal Government.

(6) "State" means any State of the United States of America, including the District of Columbia, the Commonwealth of Puerto Rico, and any other territory or possession of the United States.

(7) "State agency" means the agency of a State which administers its unemployment compensation law, approved by the Secretary of Labor under section 3304 of the Internal Revenue Code of 1954.

(8) "Substantially and seriously affected" means, with respect to any local or State government or region of the Nation or contractor or other business, as the case may be, abnormally high or low growth rates, severe unemployment severe reduction in tax base, loss of critical sectors of their economies, or severe demands on publicly provided services.

ESTABLISHMENT

SEC. 5. (a) There is hereby established in the Executive Office of the President an Economic Growth Policy and Management Assistance Council (hereinafter referred to as the "Council") which shall be composed of—

(1) the Secretary of Defense;

(2) the Secretary of Agriculture;

(3) the Secretary of the Interior;

(4) the Secretary of Commerce;

(5) the Secretary of Health, Education, and Welfare;

(6) the Secretary of Housing and Urban Development;

(7) the Secretary of Transportation;

(8) the Secretary of Energy;

(9) the Special Representative for Trade Negotiations;

(10 the Administrator of the National Aeronautics and Space Administration;

(11) the Chairman of the Council of Economic Advisors, who shall be Chairman of the Council (hereinafter referred to as the "Chairman");

(12) the Director of the United States Arms Control and Disarmament Agency;

(13) the Assistant to the President for Domestic Affairs and Policy;

(14) seven representatives of the business sector of the economy appointed by the President; and

(15) seven representatives of the labor sector of the economy appointed by the President.

(b) The Chairman of the Council of Economic Advisors shall preside over meetings of the Council and he shall designate a member of the Council to preside in his absence.

(c) The Council may invite additional individuals to serve as members, either on a temporary or permanent basis, except that the membership of the Council shall not exceed thirty members at any time.

(d) (1) An Office of Economic Growth Policy and Management Assistance (hereinafter referred to as the "Office") shall be established within the Executive Office of the President to provide staff support for the Council. The Office shall be headed by an Executive Secretary who shall be appointed by the Chairman and who shall be compensated at the rate provided for grade GS–18 of the General Schedule under section 5332 of title 5, United States Code. It shall be the duty of the Office, at the request of the Council, to assist communities, States, and regional organizations with economic growth planning, management, and execution, and to carry out such other duties as the Council may prescribe.

(2) The Council may appoint and fix the compensation of such additional personnel as it deems advisable. The Council may procure temporary and intermittent services to the same extent as authorized by section 3109 of title 5, United States Code.

(3) The Council is authorized to secure directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality of the United States, information, suggestions, estimates, and statistics to carry out the provisions of this Act. Each such entity is authorized and directed to furnish such information, suggestions, estimates, and statistics directly to the Council upon request made by the Chairman.

(c) Members of the Council who are officers or employees of the Federal Government shall receive no additional compensation for their activities as members of the Commission. Other Members appointed to the Council shall receive compensation at a rate of not to exceed $135 per diem when engaged in the performance of the duties of the Council. While away from their homes or regular places of business in the performance of services for the Council, members of the Council shall be allowed expenses, including per diem in lieu of subsistence, in

the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703(b) of title 5, United States Code.

DUTIES

SEC. 6. It shall be the duty of the Council to—

(1) Ensure a stable economic growth rate for the Nation.

(2) Monitor and evaluate the impact of Federal spending, contracting, leasing, construction, and facility location and relocation on local, State, and regional economies.

(3) Identify local, State, and regional economies which are experiencing above or below average economic growth or decline or are demonstrating trends toward abnormal growth or decline which could lead to severe disruptions in the national economy. Such economies so identified shall be identified as "substantially or seriously affected," as described in section 10.

(4) Identify what, if any, relationship Federal spending, contracting, leasing, construction, and facility location and relocations have had in the past, are having, and could have in the future on those trends in local, State, and regional economies.

(5) Develop a national economic growth policy based on the foregoing data analysis and the impact statements required under section 8.

(6) Recommend to the President and Congress ways the Federal Government can promote economic growth and ameliorate economic decline in local, State, and regional economies, with particular attention to labor surplus areas as defined by the Bureau of Labor Statistics. The national economic growth policy shall be reviewed by the Council and updated annually. The annually updated policy shall be recommended to the President and the Congress by February 1 of each year. Such policy shall identify priority national requirements for various sectors of the economy and shall take into consideration such subjects as renewable energy sources; energy efficiency; neighborhood revitalization; new technology for housing production and rehabilitation; new communications technology; mass transportation; preventive health care; education; basic and applied scientific research; environmental protection and enhancement; space exploration; and agricultural and forestry technology.

(7) Consult with the mayors of cities, Governors of States, and regional governmental planning organizations to encourage appropriate studies and action at the local, State, and regional level with regard to economic growth and management.

(8) Consult with trade, industry, business, labor, and professional organizations to encourage and enlist their expertise for a coordinated effort to improve the conditions for capital formation, new business ventures, expanded employment opportunities, and general growth and management of the economy.

(9) Develop guidelines to determine if a community, State, or region is substantially or seriously affected.

(10) Develop and coordinate policies and programs to be carried out by Federal agencies to facilitate stable economic growth of the Nation. Such actions shall include reorienting existing Federal policies, programs, leases, contracts, and locations.

(11) Assist communities, States, regions, and industries which may be substantially and seriously affected through the programs of the Federal Government.

(12) Collect and disseminate to substantially and seriously affected Federal contractors information useful to them in expanding, converting, and rehabilitating their businesses.

(13) Perform the duties imposed upon the Council by this Act, and promulgate such regulations as may be necessary to carry out the provisions of this Act.

REVIEW OF FEDERAL ACTIONS

SEC. 7. (a) It shall be the duty of the Council to review plans and proposals by Federal agencies which involve major new spending, as defined by the Council and with public notice thereof, in a particular city, State, or region, or which involve—

(1) the closure cr relocation of a Federal facility;

(2) the relocation or reduction of Federal personnel; or

(3) the reduction or elimination of a Federal contract,

the effect of which would be a significant disruption to the city, State or regional economy involved.

(b) The Council shall determine whether such plan or proposal conforms to the policy and requirements of this Act and those adopted by the Council.

(c) The Council shall further ensure that the proposing Federal agency has notified the affected city, State, and regional governmental planning organization as well as the industries or businesses likely to benefit or be harmed by such Federal action.

(d) The Council's review of such planned or proposed Federal action shall evaluate the impact of such Federal action on—

(1) the economy of the city, State, and region directly and substantially affected;

(2) the operations of the proposing Federal agency in terms of achieving overall Federal agency goals; and

(3) the policy and goals of this Act and those adopted by the Council pursuant to this Act.

(e) The Council shall consult with substantially and seriously affected cities, States, and regional governmental planning crganizations likely to be affected by the proposed or planned Federal action in preparing its review of such action. The Council shall make its review of the planned or proposed Federal action available to the affected Federal agency; the affected cities, States, and regional governmental planning organizations; and the affected industries and businesses.

IMPACT STATEMENT

SEC. 8. At the end of each fiscal year each Federal agency shall prepare an impact statement on the effects of its spending, leasing, locations and relocations of Federal facilities or personnel; reductions, eliminations or increases of its loan, grant, and contract programs; and closures of its facilities on the local, State, and regional economies of the Nation. Such impact statement shall include an analysis of the foregoing elements during the immediately preceding fiscal year, and projections with respect to such elements for the next fiscal year. Such impact statements shall measure changes in employment, output, prices, profits, and population. The Council shall determine any additional indicators which shall be used by one or more such reporting Federal agencies. The impact statements shall be prepared for the Council and made available to the Congress and the public in a timely manner at the end of each fiscal year.

ANNUAL REPORT

SEC. 9. The Council shall annually prepare and publish a written report concerning its activities pursuant to this Act. Such report shall incorporate information from the impact statements required under section 8 of this Act submitted to the Council. Such report shall contain—

(1) an analysis of trends in the economies of localities, States, and regions;

(2) economic growth opportunities likely to result from the execution of planned or proposed Federal actions reviewed by it pursuant to this Act; and

(3) the long-range and short-range impact to the national economy of possible overproduction or underproduction of key sectors of the economy.

SUBSTANTIALLY AFFECTED COMMUNITIES

SEC. 10. The Council shall determine and make available to Federal agencies the names of substantially or seriously affected cities, States, and regions. Communities not included may petition the Council to be so designated. The Council shall make a determination on such petitions within ninety days of their receipt. Federal agencies are to take into consideration the impact of their spending, locational, leasing, and contracting policies and practices on such substantially or seriously affected cities, States, and regions. Such agencies shall make such changes and adjustments in their spending, locational, leasing, and contracting policies and practices so as to avoid intensifying any negative economic trends of those substantially or seriously affected communities identified by the Council.

EMPLOYMENT ASSISTANCE

SEC. 11. The Secretary of Labor shall make available to the maximum extent feasible employment training and retraining through the programs of the Department of Labor to substantially and seriously affected cities, States, regions, industries, and businesses. The Secretary shall establish, in cooperation with State agencies, employment referral and training assistance to employees displaced from their jobs as a direct result of Federal action.

MANAGEMENT AND ECONOMIC ADJUSTMENT ASSISTANCE

SEC. 12. (a) The Secretary of Commerce shall make available to the maximum extent feasible technical assistance and economic adjustment assistance to substantially and seriously affected cities, States, regions, industries, and businesses. The Secretary shall make particular use of the programs of the Economic Development Administration and Small Business Administration of the Department of Commerce in carrying out the provisions of this section.

(b) The Secretary of Defense shall make available to the maximum extent feasible technical assistance and economic adjustment assistance to substantially and seriously affected cities, States, regions, industries, and businesses. The Secretary shall make particular use of the programs of the Office of Economic Adjustment in carrying out the provisions of this section.

AUTHORIZATION OF APPROPRIATIONS

SEC. 13. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.●

By Mr. MATHIAS:

S. 2958. A bill to encourage investment by private industry in urban areas through use of the investment tax credit; to the Committee on Finance.

URBAN MANAGEMENT TAX CREDIT

● Mr. MATHIAS. Mr. President, I send to the desk a bill entitled, "The Urban Investment Tax Credit Act of 1978". The purpose of this bill is to provide a Federal "carrot" in the form of an increased tax credit, to businesses that build or remodel factories in American cities.

Current law provides a 10-percent tax credit. While this incentive has helped our cities to a degree, I am convinced that we must sweeten the inducement. My bill increases the tax credit to 12 percent for investments in cities with a population of 100,000 or more. My bill also makes what I think are two other very important changes in current law.

First, it will limit the increased tax credit to those cities with high unemployment. To be eligible, the city must have had an unemployment rate of 6.5 percent or more for any 3 out of the 12 months prior to enactment of this bill. Eligible enterprises are those engaged in retail manufacturing and processing, distribution of personal property, sale of retail goods and services, basic and applied research, and building construction.

Second, it expands eligibility for the tax credit to investment for rehabilitation and modernization. As my colleagues know, the current law limits the tax credit to new construction.

All the other tax credit features of the existing law—such as the section 167 rapid depreciation of property and the 3-year carryback and 7-year carry forward provisions for unused credits—would also be available to such investors.

The purpose of my bill is to focus our attention on those cities that most desperately need help now. The erosion of their tax base due to the flight of both families and businesses has devastated many of our formerly solid and prosperous cities. Those who have been left behind are least able to fend for themselves and often make the greatest service demands on our cities. They are known as the dependent population. They are usually too young or too old to work and therefore rely on others to support them.

Similarly, many of the manufacturing plants and businesses left behind in the city are also in certain respects "dependent." They are the older plant facilities in need of updating, remodeling, and, in some cases, diversification. Many companies that operate in older plants, however, lack the capital or the incentive to make the changes necessary to keep up with the times. The increased investment tax credit will draw new capital into the urban factories where it is needed. We want to keep businesses where the people are.

At the same time we want to bring in new businesses. And we want to entice the larger "footloose" industries into the cities with a labor surplus. Obviously, labor is one of the vital ingredients in a successful business venture.

We have been aware for almost 20 years now that some of our cities, particularly the larger, older ones, were showing signs of age.

Since the recession of 1973, many of our larger cities have suffered from long-term unemployment, and sources of venture capital for new and remodeled businesses have dried up. Without this steady flow of capital into their local economies, many cities began to stagnate.

We must now reverse those trends. This is not a problem that will go away if we ignore it. It requires the full and unified force of Federal, State, and local effort.

Cities are the lifeblood of our national economy. They represent an enormous amount of capital investment by the private as well as public sector. My bill recognizes the absolutely essential role private entrepreneurs and private capital play in the economic development and stability of cities.

As we look at the historical development and growth of American cities, we see that, with the exception of the Nation's Capital, cities came into being through private initiative. They were strategically located centers of trade that expanded to provide such other basic amenities as convenient and comfortable housing and a rich cultural life.

As population grew, the role of the government in providing city services also grew. City governments took on the responsibilities for sanitation, fire and police protection, education, health, and welfare. The public sector grew to the point where it constituted over one-third of national economic activity. The past 15 years have witnessed significant growth of government at the local and State level as their responsibilities to provide more services grew.

But the cities cannot long survive by growth of their own governments. That growth must be balanced by growth of the private sector. My bill will encourage that growth.

From the point of view of the businessman with capital available to start, expand, or remodel a business, there are some very important features of cities which make them attractive locations. First of all, cities are more efficient than the suburban sprawl which frequently surrounds them.

The Real Estate Research Corp. in its study titled "The Costs of Sprawl" documented the higher cost of low-density growth. When a 100-acre industrial park or office campus in the suburbs replaces valuable farmland, not only is the farm lost but an important feature of suburban living is also lost. That same 100-acre development could have been accommodated downtown in a single office building or within industrially zoned land in the city, close to people, transportation, and suppliers.

Suburbanization and sprawl is eating up the countryside at an alarming rate. In the process, the very attributes of country life are being destroyed. Once lost, such scenic and natural resources can rarely be regained and all of us share that loss—city dweller, suburbanite, and rural resident alike.

Cities are energy efficient. Because of their density they consume less energy, and men and women waste less time getting to work. Heating, lighting, and plumbing of buildings are more efficient. Their convenient location provides for a variety of other economic activities. All of these features add up to less cost to do business. The Task Force on Municipalities of the Business Roundtable put it succinctly in its final report:

> It is simply good business to maintain and strengthen the essential infrastructure and the mass markets that exist in the metropolitan areas of our country.

Our continued national growth depends on the economic health and vitality of the Nation's cities. They are the Nation's economic lifeblood. If part of that vital system begins to falter, the entire national economy suffers.

Local economies are all interdependent parts of the national economic fabric. As the Governor of New York State observed:

> There is hardly a product of the California acreage in the San Joaquin Valley that does not find its way to a table in New York. . . . We are a major population area—we have twenty-five percent of the nation's people. We are the country's best customers.

And as Henry Schecter, director of AFL-CIO Department of Urban Affairs, noted:

> The importance of urban recovery becomes clearer when the many and varied costs to the nation of economic decline and the associated unemployment are calculated: the loss of goods and services, the decline in the purchasing power required to raise family living standards and support the economic growth of the country, the revenue lost from taxes, the costs of providing welfare and unemployment assistance and the costs of underutilizing human resources.

I think the message is clear. It is in everyone's best interest to revitalize our cities. They are the cradle of our civilization and the source of our prosperity.

My colleagues will notice that this bill does not address specific cities or regions of the country. Rather it targets those cities with the worst unemployment, without regard to location. City decline knows no regional boundaries.

For example, I have looked at the 161 cities with populations of 100,000 or more. Based on unemployment statistics for calendar year 1977, and using the 6.5-percent unemployment figure for any 3 months, a total of 106 cities in 32 States would be eligible for this tax credit treatment. The cities are geographically dispersed throughout the Nation from such diverse States as Alaska, Colorado, Kansas, Minnesota, New York, New Jersey, New Mexico, Louisiana, and Georgia. Other cities in other States may become eligible. I want to emphasize that this bill is not intended to help only so-called Frostbelt cities. It is aimed at economic problems where they are found. And that takes in all regions of the country.

I am not under the illusion that this bill is a comprehensive cure-all for ailing city economies. But I do think it is a tool which has proved its usefulness as an investment incentive. It is now time to target that incentive more carefully.

I think this bill will help many cities start back on the road to recovery. I ask unanimous consent that the text of this bill be included in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2958

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Urban Investment Tax Credit Act of 1978".

PURPOSE AND POLICY

SEC. 2. It is the purpose of this Act to encourage private investment in the Nation's cities by creating incentives for private industry to come into being, remodel, or expand within those cities. It is intended that

investment by the private sector in plant facilities, equipment, and new jobs shall be encouraged by means of the investment tax credit. The Congress finds it in the national interest of economic growth to sustain and encourage growth of the local economic base of our Nation's cities.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "Secretary" means the Secretary of the Treasury or his delegate.

(2) The term "city" means an incorporated area which in the most recent census conducted by the Commerce Department was determined to have a population of 100,000 or more and which during the 12-month period prior to the date of the enactment of this Act had an unemployment rate, as determined by the Bureau of Labor Statistics, of 6.5 percent or more during any 3 months of that period.

(3) The term "person" means an individual, a trust, estate, partnership, association, company, or corporation.

(4) The term "qualified enterprise" means any of the following types of business engaged in by any person in a qualified facility:

(A) The manufacture, production, processing, or assembling of personal property—

(i) for sale to customers in the ordinary course of business; or

(ii) for use in such person's business.

(B) The distribution of personal property as principal or agent including, but not limited to, the sale, leasing, storage, handling, and transportation thereof.

(C) The retail sale of any goods or services (including services of a personal, physical, or social nature).

(D) Research in basic or applied sciences including the discovery, invention, testing, and demonstration of new technology.

(E) The construction of any building in a city as contractor for, or for sale to, any customer, but only in the case of a person engaged in the business of constructing such buildings as a contractor for, or for sale to, customers.

The term "industrial or commercial enterprise" shall not include the activities of selling, leasing, or renting out of real property including the selling, leasing, or renting of a factory, workshop, office, warehouse, sales outlet, apartment house, hotel, motel, or other residence, or the lending of money or extending of credit.

(5) The term "qualified facility" means any new or existing fixed place of business in which a qualified enterprise is wholly or partly carried on including, but not limited to—

(A) a place of management or office,

(B) a factory, plant, or other workshop,

(C) a warehouse or sales outlet,

(D) a center for the transportation, shipping, or handling of property,

(E) a place of management for and any city building or construction point,

(F) a store or other premises used for retail sales, or

(G) a place for research activities.

(6) The term "qualified jobs" means new employment positions which did not exist prior to the time of requesting certification from the Secretary either at the qualified facility or in any other part of a qualified enterprise operated by the person receiving a certificate of eligibility or employment positions which would not be retained but for such certification.

CERTIFICATION OF ELIGIBILITY

SEC. 4. (a) The Secretary, after consultation with the Secretary of Labor and the Secretary of Commerce, shall issue an annual certificate of eligibility for benefits under this Act to any person who is engaged in, or who desires to engage in, a qualified enterprise in a qualified facility located, or to be located, in a city, if—

(1) the governing body of the city has given written notice to the Secretary that it wishes to participate in the program provided for in this Act to encourage the creation or remodelling of plant facilities and equipment in such city.

(2) the person to whom the certificate for such enterprise is to be issued agrees, in such form and manner as the Secretary may prescribe—

(A) in the case of an enterprise not then having a qualified facility located in the city, to establish, within such period of time as the city may require, such facility (conforming to standards prescribed by the Secretary under subsection (e) of this section),

(B) to provide, in connection with the operations at such facility located, or to be located, in such city, qualified jobs,

(C) to pay wages to persons employed in connection with the operations at any such facility at rates not less than the minimum wages determined by the Secretary of Labor under section I(b) of the Act of June 30, 1936 (popularly known as the Walsh-Healey Act), as amended (41 U.S.C. 35(b)), to be the prevailing minimum wages for persons employed in similar work in the city in which any such facility is located, and

(D) to maintain records listing the names and residences of all full-time employees at such facility for which the certificate is being issued, the date on which they were hired, their employment and economic situation at the time of hiring, and any other information required by the Secretary; and in the case of a qualified facility which is to be part of a qualified enterprise also conducted by such person at other locations, or which is to be conducted by a person also engaged in other such enterprises, to maintain records showing the portion of such person's taxable income or net operating losses allocable to the facility for which the certificate is being issued as if it were conducted by a separate entity under regulations adopted by the Secretary under section 482 of the Internal Revenue Code of 1954, modified as may be necessary to fulfill the purposes of this Act; and

(3) the Secretary determines that the expected benefits to the tax base, employment, and to other aspects of the economic and social welfare of such city warrant the granting of the income tax incentives under this Act as to the capital investment in such facility.

(b) The Secretary shall issue a separate certificate of eligibility with respect to each facility which meets the requirements of subsection (a) regardless of whether such facility is operated by any person as part of a single enterprise.

(c) The Secretary shall issue a certificate of eligibility for benefits under this Act to any person who is a successor in interest to any person operating a qualified enterprise which has established a qualified facility in a city and with respect to which facility a certificate of eligibility was issued under subsection (a) if such person agrees to continue to use the facility as a qualified facility and to conform to the requirements of subparagraphs (B) and (C) of subsection (a)(2).

(d) The Secretary shall terminate a certificate of eligibility issued to any person under this section operating a qualified facility whenever he determines, after an appropriate hearing, that the person to whom such certificate was issued has failed, after due notice and a reasonable opportunity has been given to correct the failure at such facility, to carry out its agreements under this section.

REPORTS

SEC. 5. (a) The Secretary may by regulation require any person to whom a certificate of eligibility is issued under section 4 to file such reports from time to time as he may deem necessary in order to carry out his functions under this Act.

(b) Whoever, in any report required to be filed under this section knowingly makes a false statement of a material fact, shall be fined not more than $————, or imprisoned for not more than ———— years, or both.

INCOME TAX CREDIT FOR INVESTMENT IN DEPRECIABLE PROPERTY IN ELIGIBLE CITIES

SEC. . (a) Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting after section 44B the following new section:

"SEC. 44C. INVESTMENT IN CERTAIN DEPRECIABLE PROPERTY IN ELIGIBLE CITIES

"(a) GENERAL RULE.—There shall be allowed, as a credit against the tax imposed by this chapter, the amount determined under subpart E of this part.

"(b) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this section and subpart E.".

(b) Part IV of subchapter A of chapter 1 of such Code (relating to credits against tax) is amended by adding at the end thereof the following new subpart:

"Subpart E—Rules for Computing Credit for Investment in Certain Depreciable Property in Eligible Cities

"Sec. 54. Amount of Credit.

"Sec. 55. Certain Dispositions, etc. of Section 44C Property.

"Sec. 55A. Definitions; Special Rules.

"SEC. 54. AMOUNT OF CREDIT

"(a) Determination of Amounts.—

"(1) General rule.—The amount of the credit allowed by section 44C for the taxable year shall be equal to—

"(A) 12 percent of the qualified expenditures (as defined in section 55A(b)) made during the taxable year in regard to section 44C real property (as defined in section 55A(a)(3)), and

"(B) 12 percent of the qualified expenditures (as defined in section 55A(b)) made during the taxable year in regard to section 44C personal property (as defined in section 55A(a)(4)).

"(2) Limitation.—Notwithstanding paragraph (1), the credit allowed by section 44C for the taxable year shall not exceed the taxpayer's liability for tax for such year.

"(3) Liability for tax.—For purposes of this section, the liability for tax for the taxable year shall be the tax imposed by this chapter for such year, reduced by the sum of the credits allowable under—

"(A) section 33 (relating to foreign tax credit),

"(B) section 37 (relating to credit for the elderly),

"(C) section 38 (relating to investment in certain depreciable property),

"(D) section 40 (relating to expenses of work incentive programs),

"(E) section 41 (relating to contributions to candidates for public office),

"(F) section 42 (relating to general tax credit),

"(G) section 44A (relating to expenses for household and dependent care services necessary for gainful employment), and

"(11) section 44B (relating to credit for employment of certain new employees).

For purposes of this paragraph, any tax imposed for the taxable year by section 56 (relating to minimum tax for tax preferences), section 72(m)(5)(B) (relating to 10 percent tax on premature distributions to owner-employees), section 408(f) (relating to additional tax on income from certain retirement accounts), section 402(e) (relating to tax on lump-sum distributions), section 531 (relating to accumulated earnings tax), section 541 (relating to personal holding com-

pany tax), or section 1378 (relating to tax on certain capital gains of subchapter S corporations), and any additional tax imposed for the taxable year by section 1351(d)(1) relating to recoveries of foreign expropriation losses), shall not be considered tax imposed by this chapter for such year.

"(b) Carryback and Carryover of Unused Credits.—

"(1) ALLOWANCE OF CREDIT.—If the amount of the credit determined under subsection (a)(1) for any taxable year exceeds the taxpayer's liability for tax for such taxable year (hereafter in this subsection referred to as the 'unused credit year'), such excess shall be—

"(A) a section 44C credit carryback to each of the 3 taxable years preceding the unused credit year, and

"(B) a section 44C credit carryover to each of the 7 taxable years following the unused credit year,

and shall be added to the amount allowable as a credit by section 44C for such years, except that such excess may be a carryback only to a taxable year ending after the date of the enactment of the Urban Investment Tax Credit Act of 1978. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 10 taxable years to which (by reason of subparagraphs (A) and (B)) such credit may be carried and then to each of the other 9 taxable years to the extent that, because of the limitation contained in paragraph (2), such unused credit may not be added for a prior taxable year to which such unused credit may be carried.

"(2) LIMITATION.—The amount of the unused credit which may be added under paragraph (1) for any preceding or succeeding taxable year shall not exceed the amount by which the taxpayer's liability for tax for such taxable year exceeds the sum of—

"(A) the credit allowed under subsection (a)(1) for such taxable year, and

"(B) the amounts which, by reason of this subsection, are added to the amount allowable for such taxable year and are attributable to taxable years preceding the unused credit year.

"SEC. 55. CERTAIN DISPOSITIONS, ETC. OF SECTION 44C PROPERTY.

"(a) GENERAL RULE.—Under regulations prescribed by the Secretary—

"(1) EARLY DISPOSITION.—If section 44C property (as defined in section 55A(a)(2)) is disposed of, or otherwise ceases to qualify as section 44C property with respect to the taxpayer, the tax under this chapter for the taxable year in which the disposition occurs shall be increased by an amount equal to the credits allowed under section 44C for prior taxable years for qualified expenditures (as defined in section 55A(b)) which were made—

"(A) in the case of section 44C real property (as defined in section 55A(a)(3)) within 10 years before the date of the disposition, or

"(B) in the case of section 44C personal property (as defined in section 55A(a)(4)) within 4 years before the date of the disposition.

This paragraph shall not apply to any qualified expenditures with respect to which there has been an increase of tax under paragraph (2).

"(2) TERMINATION OF CERTIFICATE.—If the section 44C certificate (as defined in section 55A(a)(1)) is terminated under section 4(d) of the Urban Investment Tax Credit Act of 1978 with respect to a section 44C facility (as defined in section 55A(a)(5)) of the taxpayer—

"(A) the taxpayer's tax under this chapter for the taxable year in which the termination occurs shall be increased by an amount equal to the credits allowed under section 44C for prior taxable years for qualified expenditures which were made in accordance with section 55A(b)(3) within 3 years before the date of the termination with respect to all section 44C property used at, or in connection with, such facility, and

"(B) the taxpayer's gross income for the taxable year in which the termination occurs shall be increased by an amount equal to the deductions allowed to the taxpayer under section 192 in such taxable year and the 2 preceding taxable years with respect to employees employed at, or in connection with, such facility.

"(3) CARRYBACKS AND CARRYOVERS ADJUSTED.—In the case of any disposition described in paragraph (1), or any termination described in paragraph (2), the carrybacks and carryovers under section 54(b) shall be adjusted.

"(b) SECTION NOT TO APPLY IN CERTAIN CASES.—Subsection (a) shall not apply to—

"(1) a disposition by reason of death,

"(2) a disposition to which section 381(a) applies,

"(3) a disposition necessitated by the cessation of the operation of a section 44C facility where the Secretary certifies that such cessation results from economic factors beyond the control of the section 44C business (as defined in section 55A(a)(6)), or

"(4) a disposition on account of the destruction or damage of section 44C property by fire, storm, shipwreck, or other casualty, or by reason of its theft.

For purposes of subsection (a), property shall not be treated as ceasing to be section 44C property with respect to the taxpayer by reason of a mere change in the form of conducting the section 44C business so long as the property is retained in such business as section 44C property and the taxpayer retains a substantial interest in such business.

"SEC. 55A. DEFINITIONS; SPECIAL RULES.

"(a) SECTION 44C CERTIFICATE, ETC.—For purposes of this chapter—

"(1) SECTION 44C CERTIFICATE.—The term 'section 44C certificate' means a certificate of eligibility issued by the Secretary under section 4 of the Urban Investment Tax Credit Act of 1978.

"(2) SECTION 44C PROPERTY.—The term 'section 44C property' means property which, in regard to a taxpayer conducting a section 44C business—

"(A) is of a character which is subject to the allowance for depreciation provided in section 167 and which is not property of a kind which would properly be includible in the inventory of the taxpayer if on hand at close of the taxable year and which is not property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business,

"(B) will be used by such taxpayer—

"(i) as a section 44C facility,

"(ii) as an integral part of, or in the operation of, any such facility, or

"(iii) in furnishing transportation, communications, electrical energy, gas, water, or sewerage disposal primarily to any such facility, and

"(C) has at the time it is first used by such taxpayer after such taxpayer has been issued a section 44C certificate in regard to the section 44C facility at, or in connection with which, such property is used, a useful life of at least

"(1)4 years in the case of section 44C personal property, or

"(ii) 10 years in the case of section 44C real property.

Property shall not be treated as section 44C property if, after its acquisition by the taxpayer, it is used by a person who used such property before such acquisition (or by a person who bears a relationship described in section 179(d)(2)(A) or (B) to a person who used such property before such acquisition).

"(3) SECTION 44C REAL PROPERTY.—The term 'section 44C real property' means section 44C property which is section 1250 property (within the meaning of section 1250(c)).

"(4) SECTION 44C PERSONAL PROPERTY.—The term 'section 44C personal property' means section 40 property which is section 1245 property (within the meaning of section 1245(a)).

"(5) SECTION 44C FACILITY.—The term 'section 44C facility' means a qualified facility (as defined in section 3(5) of the Urban Investment Tax Credit Act of 1978) which is specified by the Secretary in section 44C certificate.

"(6) SECTION 44C BUSINESS.—The term 'section 44C business' means a qualified enterprise (as defined in section 3(4) of the Urban Investment Tax Credit Act of 1978) with respect to which a section 44C certificate has been issued which has not been terminated under section 4(d) of such Act.

"(b) QUALIFIED EXPENDITURES.—

"(1) IN GENERAL.—The term 'qualified expenditures' means, with respect to each taxable year, expenditures by the taxpayer—

"(A) properly chargeable to capital account,

"(B) paid or accrued for—

"(i) the manufacture, production, construction, or erection of section 44C property,

"(ii) the acquisition of section 44C property by a purchase (as defined in section 179(d)(2) and subsection (c) of this section), or

"(iii) the reconstruction, permanent improvement, or betterment of section 44C property, and

"(C) made during the 10-year period beginning with the date on which a section 44C certificate is first issued to any person with respect to the section 44C facility at, or in connection with which, such property is used.

"(2) LIMITATION.—Expenditures in regard to section 44C real property shall be treated as qualified expenditures only if the construction, erection, acquisition, reconstruction, permanent improvement, or betterment for which such expenditures are made, conforms to the standards prescribed under section 4(e) of the Urban Investment Tax Credit Act of 1978.

"(3) YEAR OF QUALIFIED EXPENDITURES.—All qualified expenditures shall be deemed made in the taxable year in which—

"(A) in the case of qualified expenditures for the manufacture, production, construction, erection, or acquisition by purchase of section 44C property, the section 44C property is placed in service, and

"(B) in the case of qualified expenditures for the reconstruction, permanent improvement, or betterment of section 44C property, the section 44C property as reconstructed, improved, or bettered as a result of a qualified expenditure is placed in service.

For purposes of this paragraph, any manufactured, produced, constructed, erected, or acquired section 44C property, or any reconstructed, improved, or bettered section 44C property, shall be deemed placed in service in the taxable year in which such manufactured, produced, constructed, erected, or acquired section 44C property, or such section 44C property as reconstructed, improved, or bettered, first becomes subject to depreciation by a taxpayer computing depreciation on a daily basis.

"(4) REPLACEMENT PROPERTY.—If section 44C property is manufactured, produced, constructed, erected, reconstructed, or acquired to replace property which was destroyed or damaged by fire, storm, shipwreck, or other casualty, or was stolen, the qualified expenditures with respect to such section 44C property which would (but for this paragraph) be taken into account for purposes of section 54(a) shall be reduced by an amount equal to the amount received by the taxpayer

as compensation, by insurance or otherwise, for the property so destroyed, damaged, or stolen, or to the adjusted basis of such property, whichever is the lesser.

"(c) CERTAIN LEASE PROPERTY.—A person who is a lessor of property, which in the hands of the lessee constitutes section 44C property, may (at such time, in such manner, and subject to such conditions as provided by regulations prescribed by the Secretary) elect with respect to any section 44C property, as to which no prior credit under section 44C has previously been taken, to treat the lessee as having purchased such property for an amount equal to—

"(1) except as provided in paragraph (2), the fair market value of such property, or

"(2) if such property is leased by a corporation which is a member of a controlled group (within the meaning of section 1563 (a)) to another corporation which is a member of the same controlled group, the basis of such property to the lessor.

If a lessor makes the election provided by this subsection with respect to any property, the lessee shall be treated for all purposes of this subpart as having acquired such property. For purposes of subsection (a)(2)(C), the useful life of the property to the lessee shall be deemed to be the useful life over which the lessee is permitted to depreciate or amortize the property.

"(d) SUBCHAPTER S CORPORATION.—In the case of an electing small business corporation (as defined in section 1371)—

"(1) the qualified expenditures for each taxable year shall be apportioned pro rata among the persons who are shareholders of such corporation on the last day of such taxable year, and

"(2) any person to whom any expenditures have been apportioned under paragraph (1) shall be treated (for purposes of this subpart) as the taxpayer with respect to such expenditures, and such expenditures shall not (by reason of such apportionment) lose their character as qualified expenditures.

"(e) ESTATES AND TRUSTS.—In the case of an estate or trust—

"(1) the qualified expenditures for any taxable year shall be apportioned between the estate or trust and the beneficiaries on the basis of the income of the estate or trust allocable to each, and

"(2) any beneficiary to whom any expenditures have been apportioned under paragraph (1) shall be treated (for purposes of this subpart) as the taxpayer with respect to such expenditures, and such expenditures shall not (by reason of such apportionment) lose their character as qualified expenditures.

"(f) CROSS REFERENCE.—For application of this subpart to certain acquiring corporations, see section 381(c)(26).".

(c) Section 48(a) of such Code (relating to definition of section 38 property) is amended by adding at the end thereof the following new paragraph:

"(9) SECTION 44C PROPERTY.—Any property which is section 44C property (as defined in section 55A(a)(2)) shall not be treated as section 38 property to the extent that the expenditures for the manufacture, production, construction, erection, reconstruction, permanent improvement, betterment, or acquisition of such property constitute qualified expenditures (as defined in section 55A(b)).".

(d) Section 381(c) of such Code (relating to carryovers and certain corporate acquisitions) is amended by adding at the end thereof the following new paragraph:

"(27) CREDIT UNDER SECTION 44C FOR INVESTMENT IN CERTAIN DEPRECIABLE PROPERTY IN ELIGIBLE CITIES.—The acquiring corporation shall take into account (to the extent proper to carry out the purposes of this section and section 44C, and under such regulations as may be prescribed by the Secretary) the items to be taken into account for purposes of section 44C in respect to the distributor or transferor corporation.".

(e)(1) The table of subparts for part IV of subchapter A of chapter 1 of such Code is amended by adding at the end thereof the following new item:

"Subpart E. Rules for Computing Credit for Investment in Certain Depreciable Property in Eligible Cities.".

(2) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting after the item relating to section 44B the following:

"Sec. 44C. Investment in certain depreciable property in eligible cities.".

DEPRECIATION DEDUCTION

SEC. 6. Section 167 of the Internal Revenue Code of 1954 (relating to depreciation) is amended by adding at the end thereof the following new subsection:

"(q) SECTION 44C PROPERTY.—

"(1) USEFUL LIFE.—At the election of the taxpayer—

"(A) the useful life of any property which is section 44C property (as defined in section 55A(a)(2)) shall, for purposes of this section, be 66⅔ percent of the useful life of such property determined without regard to this paragraph; and,

"(B) the guideline class lives prescribed by the Secretary which are applicable to any property which is section 44C property shall, for purposes of this section, be 66⅔ percent of the guideline class lives applicable to such property determined without regard to this paragraph.

An election under this paragraph shall be made at such time and in such manner as the Secretary prescribes by regulations.

"(2) NEAREST FULL YEAR.—If the useful life or guideline class life of any property, as determined under this section without regard to this subsection, includes a fraction of a year, such useful life shall be deemed the nearest full year.

"(3) RESERVE RATIO TEST.—In justifying class lives used for purposes of the deduction allowed by this section under the reserve ratio test prescribed by the Secretary, a taxpayer who makes an election under paragraph (1)(B) shall, for all purposes, be deemed to have utilized class lives equal to 150 percent of those applicable determined without regard to this subsection.

"(4) SALVAGE VALUE.—In determining the salvage value of section 44C property, subject to an election under paragraph (1)(A) and (B), the useful life of the property shall be deemed that life which would be applicable without regard to paragraph (1)(A) and (B).

"(5) EXCEPTION.—No election may be made under paragraph (1) with respect to any section 44C property which is placed in service after the expiration of the 10-year period beginning on the date on which a section 44C certificate (as defined in section 55A(a)(1)) is first issued to any person for the section 44C facility (as defined in section 55A(a)(5)) at, or in connection with which, such section 44C property is used.".

NET OPERATING LOSS CARRYOVERS

SEC. 7. Section 172 of the Internal Revenue Code of 1954 (relating to net operating loss deduction) is amended—

(1) by striking out "(E) and (F)" in the second sentence of subparagraph (B) of subsection (b)(1) thereof and inserting in lieu thereof "(E), (F), and (H)";

(2) by adding at the end of subsection (b)(1) thereof the following new subparagraph:

"(H) The portion of a net operating loss for any taxable year to which (under subsection (i)) this subparagraph applies which is allocable to the operation of a section 44C business (as defined in section 55A(a)(6)) through a section 44C facility (as defined in section 55A(a)(5)) shall be a net operating loss carryover to each of the 9 taxable years following the taxable year of such loss. The determination as to the portion of a taxpayer's net operating loss allocable to the operation of a qualified facility by a section 44C business shall be made in accordance with regulations promulgated by the Secretary under section 4(a)(2)(D) of the Urban Investment Tax Credit Act of 1978."; and

(3) by redesignating subsection (i) as (j) and inserting after subsection (h) the following new subsection:

"(i) CARRYOVER OF NET OPERATING LOSSES OF CERTIFIED BUSINESSES.—Subsection (b)(1)(H) shall apply, with respect to the operation of such section 44C facility, only to a net operating loss for (A) the taxable year in which the operation of such facility is begun by any section 44C business under a section 44C certificate (as defined in section 55A(a)(1)), or (B) any of the 9 succeeding taxable years.".●

By Mr. MATHIAS:

S. 2959. A bill to amend the Internal Revenue Code of 1954 to provide a special deduction for the employment of unemployed residents of urban areas by businesses locating in those areas; to the Committee on Finance.

URBAN EMPLOYMENT INCENTIVE ACT OF 1978

● Mr. MATHIAS. Mr. President, the bill I am introducing today provides a great incentive to employers to create new jobs so they can hire the unemployed. It also acts as an incentive for employers to remain or to locate in cities experiencing sustained high unemployment.

My bill provides an employer a 3-year tax deduction of 25 percent of the cost of wages paid to new workers who had previously been unemployed. This deduction applies to businesses located in cities of 100,000 population or more which have had an unemployment rate of 6.5 percent or greater for any 3 out of the 12 months preceding enactment of this legislation.

Those employers eligible to take a deduction for one-fourth of the wages paid include those engaged in: Manufacturing, retailing, provision of personal, physical, or social services, basic or applied research, and building construction.

Such employers may deduct 25 percent of their wage costs for employees who: Have resided in the eligible city for 6 months or more, and were unemployed for a minimum of 30 days out of the 6 months preceding their employment.

Lastly, such employment must be new employment—in other words, the employer must create new jobs that did not exist prior to enactment of this legislation.

Mr. President, I think this bill provides a tremendous incentive to hire the unemployed in areas where unemployment is most severe, yet it relies on the private sector to create jobs that will be productive and long term in nature. I am convinced, therefore, that my bill offers a realistic chance of getting unemployment down below a 4-percent level and keeping it there.

I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2959

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) part VI of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to itemized deductions for individuals and corporations) is amended by adding at the end thereof the following new section:

"SEC. 193. SPECIAL DEDUCTION FOR CERTAIN BUSINESSES OPERATING IN CITIES.

"(a) General Rule.—In addition to any amounts allowable as a deduction under section 162 for the taxable year, there shall be allowed to any person engaged in a qualified business as a reduction an amount equal to 25 percent of the wages (within the meaning of section 3401(a)) paid or incurred during the taxable year to employees each of whom—

"(1) is employed in a qualified job,

"(2) at the time such employment commenced—

"(A) resided for 6 months or more in the city in which the qualified facility at or from which his services as an employee are performed is located, and

"(B) was unemployed for a period of 30 days or more during the 6-month period prior to the date on which such employment commenced; and

"(3) during the period for which the wages are paid or incurred, performed substantially all of his service as an employee—

"(A) at a qualified facility in which a qualified business is conducted, or

"(B) by furnishing transportation, communications, electrical energy, gas, water, or sewage disposal primarily in connection with such facility.

"(b) Limitations.—Subsection (a) shall apply, with respect to employees at any qualified facility, only to wages paid or incurred during the 3-year period beginning on the date for which the facility is first certified as a qualified facility by the Secretary under subsection (c).

"(c) Definitions.—For purposes of this section—

"(1) City.—The term 'city' means an incorporated area which in the most recent census conducted by the Commerce Department was determined to have a population of 100,000 or more and which during the 12-month period prior to the date of the enactment of this Act had an unemployment rate, as determined by the Bureau of Labor Statistics, of 6.5 percent, or more during any 3 months of that period.

"(2) Qualified business.—The term 'qualified business' means—

"(A) the manufacture, production, processing, or assembling of personal property—

"(i) for sale to customers in the ordinary course of business, or

"(ii) for use in business;

"(B) the distribution of personal property as principal or agent including, but not limited to, the sale, leasing, storage, handling, and transportation thereof.

"(C) the retail sale of any goods or services (including services of a personal, physical, or social nature);

"(D) research in basic or applied sciences including the discovery, invention, testing, and demonstration of new technology; and

"(E) the construction of any building in a city as contractor for, or for sale to, any other person.

Notwithstanding the preceding sentence, the term 'qualified business' does not include the activities of selling, leasing, or renting out real property or the lending of money or extending of credit.

"(3) Qualified facility.—The term 'qualified facility means any place at which a qualified enterprise is wholly or partly carried on including, but not limited to—

"(A) an office,

"(B) a factory, plant, or other workshop,

"(C) a warehouse or sales outlet,

"(D) a center for the transportation, shipping, or handling of property,

"(E) an office or other location for, and the site of, any construction,

"(F) a store or other premises used for retail sales, or

"(G) a place for research activities.

"(4) Qualified jobs.—The term 'qualified jobs' means new employment positions which did not exist prior to the time of requesting certification from the Secretary either at the qualified facility or in any other part of a qualified enterprise operated by the person receiving a certificate of eligibility, or employment positions which would not be retained but for such certification.

"(d) Certification of Eligibility.—

"(1) In general.—The Secretary, after consultation with the Secretary of Labor and the Secretary of Commerce, shall issue a certificate of eligibility for benefits under this section to any person who is engaged in, or who desires to engage in, a qualified business in a qualified facility located, or to be located, in a city, if—

"(A) the governing body of the city has given written notice to the Secretary that it wishes to participate in the program provided for in this section to encourage the creation of new employment opportunities in such city,

"(B) the person to whom the certificate for such business is to be issued agrees, in such form and manner as the Secretary may prescribe—

"(i) in the case of a business not then having a qualified facility located in the city, to establish, within such period of time as the city may require, such facility (conforming to standards prescribed by the Secretary under subparagraph (E));

"(ii) to provide qualified jobs in connection with the operations at such facility;

"(iii) to pay wages to persons employed in connection with the operations as such facility at rates not less than the minimum wages determined by the Secretary of Labor to be the prevailing minimum wages for persons employed in similar work in the city in which such facility is located; and

"(iv) to maintain records listing the names and residences of all full-time employees at such facility for which the certificate is being issued, the date on which they were hired, their employment and economic situation at the time of hiring, and any other information required by the Secretary, and, in the case of a qualified facility which is to be part of a qualified enterprise also conducted by such person at other locations or which is to be conducted by a person also engaged in other such enterprises, to maintain records showing the portion of such person's taxable income or net operating losses allocable to the facility for which the certificate is being issued as if it were conducted as a separate entity in accordance with regulations prescribed under section 482; and

"(C) the Secretary determines that the expected benefits to employment and to other aspects of the economic and social welfare of such city warrant certification under this section.

"(2) Separate certification.—The Secretary shall issue a separate certificate of eligibility with respect to each facility which meets the requirements of paragraph (1) regardless of whether such facility is operated by any person as part of a single enterprise.

"(3) Certification of successor in interest.—The Secretary shall issue a certificate of eligibility for benefits under this section to any successor in interest to any person holding a certificate of eligibility, if such person agrees to continue to use the facility with respect to which the certificate is issued as a qualified facility and to conform to the requirements of clauses (i) and (ii) of paragraph (1)(B).

"(4) Termination of Certification.—The Secretary shall terminate a certificate of eligibility issued to any person operating a qualified facility whenever he determines, after an appropriate hearing, that the person to whom such certificate was issued has failed, after due notice and a reasonable opportunity to correct the failure at such facility, to carry out its agreements under this subsection.".

(b) The table of sections for such part is amended by adding at the end thereof the following new items:

"Sec. 193. Special deduction for businesses operating in cities.".

SEC. 2. The amendments made by the first section of this Act shall apply with respect to wages paid after September 30, 1978, in taxable years beginning after such date.

By Mr. MATHIAS:

S. 2960. A bill to amend the Internal Revenue Code of 1954 to allow the tax-exempt treatment allowed to certain industrial development bonds to bonds the proceeds of which are to be used within economically distressed cities, and to allow national banks to underwrite these bonds; to the Committee on Finance.

ECONOMIC DEVELOPMENT REVENUE BOND ACT OF 1978

● Mr. MATHIAS. Mr. President, the Economic Development Revenue Bond Act, which I am introducing today, will be a helpful tool for cities in need of economic revitalization. Under current law, investors receive a Federal income tax exemption for all interest derived from such revenue bonds up to a total investment of $5 million. My bill would increase this investment ceiling to $50 million for cities whose population exceeds 100,000 if the city has had an unemployment rate of 6.5 percent or greater for any 3 of the preceding 12 months.

At present, any State or area designated as an "economic development area" pursuant to the Public Works and Economic Development Act of 1695, can issue up to $5 million in industrial revenue bonds to finance the construction of new plants and industries, public and private, within their jurisdictions.

While I support the concept underlying the act of 1965, it has had unforeseen and undesirable effects on both our cities and the surrounding countryside. Jurisdictions designated "economic development areas" under the act encompass exceedingly large geographic areas. As a result, the act promotes metropolitan sprawl. All too often industries seek out inexpensive land in remote areas, often on formerly productive farmland. Such facilities, while providing new employment opportunities, are not always in locations convenient to those who need jobs. Many urban workers have lost their jobs as a result of industry's move to the suburbs, because they live too far away to make the costly journey to work in such remote areas.

The act of 1965 also resulted in many jurisdiction's pirating the companies of other jurisdictions. This does nothing to increase overall economic growth, or the formation and investment of new capital. It simply disperses existing economic activity at considerable cost in terms of lost agricultural land, lost jobs, and abandonment, rather than modernization, of older plant facilities. Eventually the new outlying office or factory acts as

a magnet to attract residential development which in turn eats up more valuable farmland.

Simply stated, the act of 1965 has these undesirable side effects:

It requires new and duplicative public expenditures for sewage, utilities, highways, schools, and public safety.

It contributes to the flight of industry from the cities, where the physical plant is already in place to handle industry's requirements.

It contributes to urban unemployment.

It squanders farmland, raises the taxes of our beleaguered farmers and exerts almost irresistible pressures on them to sell their land for further development, both residential and industrial.

In short, the act encourages inefficient and irrational use of our resources.

My bill would help reverse this trend and make our larger cities competitive again. They have land, existing facilities, and workers. But they need help. By increasing the tax exemption for development bonds to $50 million for cities of 100,000 or more with high unemployment, the cities would again become attractive to large employers.

Because the interest derived from such bonds is exempt from Federal taxation, the city can offer them to investors at significantly lower interest rates than conventional taxable bonds which currently carry interest rates of 10 to 11 percent. Under the provisions of this bill, the interest rate could be held at 7 or 7½ percent on such bonds. This would save the city a substantial amount in borrowing costs.

In his perceptive analysis of the problems of center cities, entitled "To Save Our Cities," my colleague Congressman HENRY S. REUSS made the following observation and suggestion:

[T]he economic importance of providing jobs for central city residents, and the social desirability of encouraging workplaces within walking or easy commuting distance of workers' residences, demands that every possibility be explored.

Recent widespread abandonment in many central cities has created acres of rubble or empty buildings. Smaller, human-scale in-city plants, preferably extensions of existing industries, may once again be feasible. . . .

To attract plants to these areas, state and local governments could assemble the land through tax foreclosures or eminent domain, and offer local tax concessions. They could then, with Federal assistance, clear the land and provide utilities and transport. Much of the newly vacated urban land is adjacent to railroads or interstate highways. The result could be a form of urban renewal free of the widespread and lamentable people removal which plagued the program in the past. . .

At present, the investment tax credit and tax-free municipal industrial revenue bonds encourage a firm to build costly new plant and equipment in an area with no unemployment problems, rather than in a central city that may have a 30 percent jobless rate. The Federal tax exemption for municipal industrial revenue bonds ought to be restricted to areas of high unemployment, and a greater investment tax credit for investment should be allowed in such areas.

My bill deals with the industrial revenue bond issue addressed by Congressman REUSS. Another bill, which I will also introduce, the Urban Investment Tax Credit Act of 1978, addresses the second issue he raises.

Mr. President, our Nation's cities are in trouble. Their infrastructure and physical plants are aging. As things stand now, they cannot attract the industries and employers necessary to provide a tax base adequate to their survival.

A continuing infusion of new capital is needed to restore the economic health of those cities and their residents. This bill provides an inducement that will attract new and much-needed investment.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2960

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Economically Distressed Cities Revenue Bond Act of 1978".

SEC. 2. LIMITATION OF TAX-EXEMPT BOND ISSUES.

(a) IN GENERAL.—Subsection (b) of section 103 of the Internal Revenue Code of 1954 (relating to industrial development bonds) is amended by redesignating paragraph (7) as (8), and inserting after paragraph (6) the following new paragraph:

"(7) CERTAIN ECONOMICALLY DISTRESSED CITY DEVELOPMENT BOND ISSUES.—

"(A) EXEMPTION.—Paragraph (1) shall not apply to any obligation issued as part of an issue the aggregate authorized face amount of which is $50,000,000 or less and substantially all of the proceeds of which are to be used—

"(i) For the acquisition, construction, reconstruction, or improvement of land which is located within an economically distressed city or of property which is of a character subject to the allowance for depreciation and which is to be used predominantly at a location within an economically distressed city, or

"(ii) to redeem part or all of a prior issue which was issued for purposes described in clause (i) of this subparagraph.

"(B) CERTAIN PRIOR ISSUES TAKEN INTO ACCOUNT.—If—

"(i) the proceeds of two or more issues of obligations (whether or not the issuer of each such issue is the same) are or will be used primarily with respect to facilities the principal user of which is or will be the same person or two or more related persons, and

"(ii) with respect to each issue, subparagraph (A) would apply (but for this subparagraph), or paragraph (4), (5), or (6) of this subsection would apply,

then, for purposes of subparagraph (A), in determining the aggregate face amount of any later issue there shall be taken into account the face amount of obligations issued under all prior such issues and outstanding at the time of such later issue (not including as outstanding any obligation which is to be redeemed from the proceeds of the later issue).

"(c) economically distressed city. * * * of this paragraph, the term 'economically distressed city' means a city with a population of at least 100,000 the unemployment rate within which, for any 3 consecutive months of the 12 month period preceding the date of issuance of the obligations, was 6.5 percent or greater.".

(b) Conforming Amendment.—Paragraph (8) of section 103(b) of such Code (as redesignated by subsection (a)) is amended by striking out "(4), (5), and (6)" and inserting in lieu thereof "(4), (5), (6), and (7)".

SEC. 3. UNDERWRITING BY NATIONAL BANKS

The seventh paragraph of section 5136 of the Revised Statutes (12 U.S.C. 24) is amended by inserting at the end thereof the following new sentence: "The limitations and restrictions herein contained as to dealing in and underwriting investment securities shall not apply to industrial development bands (as defined in section 103(b)(2) of the Internal Revenue Code of 1954) to which paragraph (7) of section 103(b) of such code applies.".

SEC. 4. EFFECTIVE DATE.

The amendments made by section 2 of this Act shall apply to taxable years ending after the date of the enactment of this Act, but only with respect to obligations issued after such date.●

By Mr. MATHIAS:

S. 2961. A bill to amend section 2687 of title 10, United States Code, to require notification of local officials, as well as Congress, before the closure, realinement, and establishment, or expansion of a military installation may be carried out and to change the period of time which must elapse after notification before such action may be carried out; to the Committee on Armed Services.

MILITARY BASE CLOSURES AND REALINEMENTS

● Mr. MATHIAS. Mr. President, I send to the desk a bill requiring the Defense Department to notify local officials, local and regional planning authorities, as well as Congress, of proposed military base closures or realinements.

At present, the Defense Department is only required to notify the Armed Services Committees of the House and Senate prior to closing, relocating, or realining a military facility. I might say the Department has not been especially conscientious about fulfilling even that obligation.

Section 612 of the existing law, Public Law 95–82—requires notification to the Armed Services Committee 60 days prior to an action's taking place. The law states that "no irrevocable action should be taken" during the 60-day period. Yet, when the Defense Department proposed a consolidation of the Defense Mapping Agency in my home State of Maryland, we in the Congress were not notified until the day before the August recess, effectively cutting in half the time available to review this action.

Even more disturbing is the fact that citizens and many local officials first learned of this proposed realinement, as I did, from the news media. I am sure my colleagues have encountered similar examples of lack of communication involving their own States.

I, of course, realize that realinements, base closings, and consolidations of agencies are inevitable if we are to streamline our Government. What we must protect against is inconsiderate treatment of the employees, and insensitivity to local community interests.

Experience has taught that military realinements and consolidations entail considerable hardship to the employees involved. In the State of Maryland, we have had more than our share of pain-

ful lessons on this score. Between March 1975 and March 1977, we had seven major realinements. Military reductions and relocations were made at Fort Ritchie in Frederick, at the Naval Ship Engineering Center in Hyattsville, at the Naval Oceanographic Office in Suitland, at Aberdeen/Edgewood in Harford County, Fort Meade in Anne Arundel County, Harry Diamond Laboratories in Adelphi, and at Andrews Air Force Base.

Mr. President, these reorganizations seriously affected the lives of 940 military personnel and 3,553 civilian employees. The displacement of 4,500 human beings, in many cases at a moment's notice, constitutes a pretty serious problem. It affects employees and it affects the economies of local communities. I believe my colleagues would agree that great harm has been done by these displacing operations. Many of their adverse effects have yet to be fully elevated. For this reason, I am particularly concerned that section 612 be properly implemented as mandated by law.

In addition to the men and women, towns and counties need to be prepared for sudden economic changes brought about by major realinements. The Department of Defense has an Office of Economic Adjustment which provides technical assistance to those communities in just such situations. I would hope that, in view of the genuine concerns that have prompted me to introduce this bill, the Department will upgrade the Office of Economic Adjustment and aggressively offer its services to those towns and counties in need.

I ask that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2961

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 2687 of title 10, United States Code, is amended as follows:

(1) The catchline is amended to read as follows: "Base closures, realignments, establishments, and expansions".

(2) Subsection (a) is amended by—

(A) amending clause (2) to read as follows:

"(2) any realignment with respect to any military installation involving a reduction by more than one thousand, or by more than 50 percent, in the number of civilian or military personnel (or a combination of such personnel) authorized to be employed at or assigned to such military installation at the time the Secretary of Defense or the Secretary of the military department concerned notifies the Congress under subsection (b)(1) that such installation is a

* * * * *

(B) adding after clause (3) the following new clauses:

"(4) the establishment of a new military installation, or

"(5) the expansion of any military installation involving an increase by more than one thousand, or by more than 50 percent, in the number of civilian or military personnel (or a combination of such personnel) authorized to be employed at or assigned to such military installation at the time the Secretary of Defense or the Secretary of the military department concerned notifies the Congress under subsection (b)(1) that such installation is a candidate for expansion,".

(3) Subsection (b) is amended by striking out "closure of, or a realignment with respect to" and inserting in lieu thereof "closure of, realignment with respect to, establishment of, or expansion of,".

(4) Subsection (b) is further amended by amending clause (1) to read as follows:

"(1) the Secretary of Defense or the Secretary of the military department concerned publicly announces, and notifies in writing the Committees on Armed Services of the Senate and House of Representatives, each unit of local government, and each local and regional public planning authority in any area which would be directly affected by such closure, realignment, establishment, or expansion;".

(5) Subsection (b) is further amended by striking out "closure or realignment" in clauses (2) and (3) and inserting in lieu thereof "closure, realignment, establishment, or expansion".

(6) Subsection (b) is further amended by striking out "sixty days" in clause (4) and inserting in lieu thereof "60 days of continuous session of Congress".

(7) Subsection (b) is further amended by adding at the end thereof a new sentence as follows:

"For purposes of clause (4), the continuity of a session of Congress is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the 60-day period.".

(8) Subsection (c) is amended to read as follows:

"(c) This section shall not apply to the closure, realignment, establishment, or expansion of any military installation if the President certifies to the Congress that such closure, realignment, establishment, or expansion must be implemented for reasons of national security or a military emergency.".

(9) Paragraph (1) of subsection (d) is amended by inserting ", or to be located" after "is located".

(b) The table of sections at the beginning of chapter 159 of title 10, United States Code, is amended by striking out the item relating to section 2687 and inserting in lieu thereof the following:

"2687. Base closures, realignments, establishments, and expansions.".

SEC. 2. The amendments made by the first section of this Act shall apply to the closure of any military installation, the realignment with respect to any military installation, or the establishment or expansion of any military installation which is first publicly announced on or after the date of enactment of this Act.●

By Mr. MATHIAS:

S. 2962. A bill to provide surplus Federal Property for economic development purposes; to the Committee on Governmental Affairs.

SURPLUS FEDERAL PROPERTY

● Mr. MATHIAS. Mr. President, the bill I am introducing today will be a useful economic rejuvenation and recycling tool for State and local governments. It permits the transfer of surplus Federal land and buildings to State and local jurisdictions at 50 percent of the estimated fair market value. Such property would be offered to local or State governments that experience severe unemployment or other economic disruption as a result of the closure, relocation, or reduction of activities at that Federal facility.

The bill presents a unique opportunity to cities, towns, and States to turn bad fortune into better fortune. I am sure many of my colleagues are all too familiar, as am I, with the shock waves that run through a community when it is told that a Federal facility is closing or relocating. Often such an installment is a major employer and the backbone of the local economy. I myself and officials of Prince Georges County were shocked and disbelieving 2 years ago when we were summarily informed by the Navy that the Naval Oceanographic Office was relocating its 3,000 employees and their families out of Maryland.

This relocation was nowhere near the scale of the closure of such major installations as the Brooklyn Navy Yard or the Newport, R.I., Naval Base, but each of the communities involved suffered severe long-term effects. Each locality had to scramble to recoup from such a devastating action.

One way of easing the financial shock of Federal relocations or reductions would be to make available to the local community the land and facilities left in the wake of such moves. The local jurisdiction could then recycle the property for high priority local purposes. A major roadblock to such recycling, however, is the inability of States and localities to pay the full price for such property. They just cannot afford it.

Yet, when they have been able to purchase, swap, or otherwise negotiate the transfer of surplus Federal property, there have been remarkable success stories. In Baltimore for example, thanks to local leadership and ingenuity, the Fort Holabird site is being converted to a major industrial park. Such redevelopment will add significantly to Baltimore's tax base and to its job market.

The Fort Holabird story goes back several years. In 1970, the Defense Department closed the 226-acre facility. I became concerned that this site was lying idle, contributing nothing to Baltimore's tax base or its employment situation.

As a result, I helped establish a Commission of local officials, citizens, and business and labor leaders to determine the best use for this surplus Federal site. In June of 1974, the Commission recommended that the site be developed as an industrial-recreational complex.

On October 19, 1977, the General Services Administration conveyed 179 acres to Baltimore to be used as an industrial park. This industrial park will provide jobs for thousands of men and women as well as adding an estimated $2.5 million annually to the city's tax revenues. The sale price to the city was $4.6 million, a substantial sum for the city.

The remaining 47 acres have been transferred to the Bureau of Outdoor Recreation for park and recreation uses. I am proud to have played a part recycling this surplus Federal land and buildings for economic development.

In Washington, D.C., we find another example. A small cluster of World War II military housing had become obsolete and had been abandoned. A property transfer was engineered between the General Services Administration and the District government. Now the property is being offered to a private

developer who will build a much needed shopping center to serve the surrounding residential community.

Such success stories could become a pattern of urban economic rejuvenation. We only need to cut the price of the property enough to make it attractive to the local authorities and then give them the right of first refusal.

This legislation will do just that. I think it is a simple concept that makes good sense. I hope my colleagues will agree.

At this point, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2962

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 203(k) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 484(k)), is further amended

(1) by redesignating paragraph (4) as paragraph (5);

(2) by inserting at the end of paragraph (3) the following:

"(4)(A) Under such regulations as he may prescribe and after transmittal of the statement required by subparagraph (F), the Administrator is authorized, in his discretion, to sell or lease to any State or political subdivision thereof, or to any agency or instrumentality of such State or subdivision, such surplus real property, including buildings, fixtures, and equipment situated thereon, as is available under subparagraph (D) and determined by the Secretary of Commerce under subparagraph (E) to be required by such State, subdivision, agency, or instrumentality to conduct an economic development program.

"(B) The price of property transferred under this paragraph shall be an amount equal to 50 per centum of the estimated fair market value of such property as determined by the Administrator. The instrument of transfer of any surplus real property disposed of under the provisions of this paragraph—

"(i) shall provide that all such property shall be used and maintained in accordance with the plan submitted to the Secretary of Commerce under subparagraph (D), and that in the event the property ceases to be so used and maintained, all or any portion of the property shall, in its then existing condition, at the option of the United States, revert to the United States; and

'(ii) may contain such additional terms, conditions, reservations, and restrictions as may be determined by the Administrator to be necessary to safeguard the interests of the United States.

"(C) The Administrator, in consultation with the Secretary of Commerce, is authorized and directed—

"(i) to determine and enforce compliance with the terms, conditions, reservations, and restrictions, contained in any instrument by which such transfer was made;

"(ii) to reform, correct, or amend any such instrument by the execution of a corrective, reformative, or amendatory instrument where necessary to correct such instrument or to conform such transfer to the requirements of applicable law; and

"(iii) to (I) giant releases from any of the terms, conditions, reservations, and restrictions contained in, and (II) convey, quitclaim, or release to the transferee or other eligible user any right or interest reserved to the United States by any instrument by which such transfer was made, if he determines that the property so transferred no longer serves the purpose for which it was transferred, or that such release, conveyance, or quitclaim deed will not prevent accomplishment of the purpose for which such property was so transferred: except that any such release, conveyance or quitclaim deed may be granted on, or made subject to, such terms and conditions as he shall deem necessary to protect or advance the interests of the United States.

"(D) Real property available for distribution under this paragraph shall be Federal property which has become surplus as a consequence of an action of a Federal agency closing or substantially reducing activities at a Federal facility or installation if such reduction is certified by the Administrator, after consultation with the Secretary of Labor, as a reduction which is causing or is likely to cause serious economic or social disruption, including substantial unemployment, within the immediate or general vicinity of such facility or installation.

"(E) Any conveyance of property under this paragraph shall be made only after the Secretary of Commerce notifies the Administrator that he (i) has received and approved a plan submitted by a State or subdivision thereof within which property available under subparagraph (D) is located, or by an agency or instrumentality of such State or subdivision, containing such information and assurances as the Secretary shall by regulation require to assure utilization of such property for an economic development program, and (ii) has determined that the attempt to dispose of such property at the estimated fair market value by the Administrator would prevent, discourage, or seriously delay the use of such property for economically and socially productive purposes.

"(F) The Administrator shall, prior to making any transfer under this paragraph, transmit an explanatory statement to the appropriate committees of the Congress as to the circumstances of each such transfer. Each such statement shall be transmitted to the committees in advance of such disposal and a copy thereof preserved in the files of the Administrator."; and

(3) by striking out subparagraph (D) of paragraphs (1) and (2) and subparagraph (C) of paragraph (3), and by adding at the end of the paragraph redesignated (by paragraph (2) hereof) as paragraph (5) the following new paragraph:

"(6) As used in this subsection, the term 'State' includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa.".

(b) Section 203(o) of such Act (40 U.S.C. 484(o)) is amended—

(1) by inserting after "subsection (j)" the following: "or with respect to real property disposed of under paragraph (3) or (4) of subsection (k)"; and

(2) by inserting immediately before "subsection (k)" the following: "paragraph (1) or (2) of".●

By MR. MATHIAS:

S. 2963. A bill to provide financial assistance to State educational agencies to help control violence in the schools of local educational agencies, and for other purposes; to the Committee on Human Resources.

SAFE SCHOOLS ACT

● Mr. MATHIAS. Mr. President, if our cities are to survive we must make them livable for families. That means they must have safe schools and good schools.

Violence and disruption are the No. 1 problem in American schools. Urban schools suffer disproportionately, according to the recent comprehensive study conducted by the National Institute of Education titled "Violent Schools—Safe Schools, the Safe School Study Report to the Congress." That report declared:

Urban schools tend to have higher crime rates than those in other areas, and with few exceptions, security devices, security personnel, and disciplinary procedures are most heavily concentrated in urban schools, especially in the largest cities. Yet the principals in these schools are much more likely than those in other areas to report that they receive little or no support from their school boards and central administrations in the handling of discipline problems. These findings suggest a reliance on technical measures not adequately supported by political leadership. In the absence of effective school governance, which such leadership can help to provide, reliance on technical measures can result in a continuing battle between disaffected students and beleaguered security forces, each trying to outwit the other.

This report reconfirms what I have been told over and over again by schoolteachers, principals, and local administrators with whom I have spoken in the past few years. We need to make urban schools safe in order to make them effecective and we have to reinforce the efforts of local schools to use compassion and understanding, as well as solid leadership, in order to get at the violence problem.

I am introducing, as a critical part of my program for cities, a bill which uses all we have learned and all the experience of local educators to eliminate the need for barred windows and security guards in city schools. It will provide money to schools depending on the extent of their violence problem. It will concentrate the money where it is most needed. It will draw on the experience of all our Federal model programs, making permanent those which have had the greatest success. It will take the advice of local administrators and teachers as to which programs were most successful. It will draw on the findings of the NIE study, which takes a sober and balanced look at the incidence of violence, the victims, and the offenders offers usable explanations, and draws important conclusions.

This report concludes that no single cause has given rise to the increase in violence. We cannot blame it on excessive permissiveness alone, or racial tension alone, or academic failure or economic disadvantages or even television. We can blame it on all of those things to a degree, as well as on some other things we have not been thinking about so clearly like ineffective school administration, teachers who do not relate lessons to their students' emerging values, and an absence of clearly defined norms for discipline. Other causes are difficult to identify, but derive in large part from impersonality of our cities, our vagabond ways, and the predictable failure of mass education to allow for eccentricity, diversity and human flaws. We should do all we can to try to eliminate such failures, but right now we have to meet head-on the fact that violence in our schools is disrupting the education of all students—not just those who for whatever reason are the cause of the problem.

The school administrators in Maryland have indicated to me what they

feel is the logical focal point in this syndrome—the offenders. Violent incidents are obviously not caused by all students. There is an isolated number of students that the experts call chronically maladjusted. They are responsible for the bulk of the problem. They are identified early, usually before they reach junior high school, and consistently run into difficulty with their fellow students, the teachers and the school administration. The principals and teachers with whom I have spoken feel that the students who are suspended more than one time are responsible for the bulk of the breaches of discipline.

Before rushing off pellmell in an effort to reach those chronic offenders, we must consider the experience of the teachers and principals in dealing with those students. They tell me that they can be "reached" with attention, compassion, and firm, yet reasonable discipline. The frustration enters when they recognize the antidote, but lack the wherewithal to apply it. In some cases, the teachers teach large classes and cannot devote enough time to the student with a disciplinary failing. In other cases, they may be inadequately trained for the task.

The administrators have had experience with short-lived programs that were extremely successful, but were not sustained because of a lack of funds. They believe that no single program could solve all these cases, but that they have seen enough of a variety of programs in force at one time or another, that could handle most of the chronically maladjusted students. They feel that permanent approaches to the problem, sufficiently supported over the long haul, could eliminate the crisis.

For example, in the Baltimore school system they have tried peer counseling with great success. They have learned that more permanent adult counselors would provide further help for these students. They have had success with highly disciplined classes at low student-teacher ratios. The problem is that they can never sustain these successes on a broad front, because the experimental programs end prematurely.

I am introducing today the Safe Schools Act of 1978 which is designed to supply the States with enough money to establish a continuing and broad-range of programs designed to address the problem. In order to be granted money for this purpose, the States will be required to establish permanent programs, and they will be required to match the funds on a 50–50 ratio. The amount of money they receive will be based on a count of the chronically maladjusted students identified within the system and served by a program. In order to guard against abuse, the Secretary of Health, Education, and Welfare will be mandated to arrive at a definition of "chronically maladjusted" for purposes of the bill. He will rely on policy guidelines that isolate these students by repeated suspensions as a result of violence or other gross breaches of discipline.

The purpose of this bill is to offer all students the environment they need as individuals to become productive and participating members of the school communities. If they do so in school, they will have a good chance of doing so in life. Programs must be based on the best and latest educational research. To emphasize this approach, my bill would require that no unnecessary use of individual names be used in the counting and verification of spending. The bill requires that all individual records referring to these students be destroyed when the student leaves either the program or the school system which counted him. No record can follow the student from school to school or from school to a job.

In addition, the Office of Civil Rights is mandated to follow this scheme closely to insure adherence to individual civil rights and liberties.

We have tried many oblique approaches to this problem in the past—programs for the disadvantaged and for the learning disabled, programs to teach racial harmony and to establish elaborate security measures. I think that the missing piece to this puzzle can be provided with this bill to reach the offenders directly. They are, in fact, the real victims of violence and disruption in schools, for they never learn to cope with the social pressures that lead them to this end.

I have suggested that $50 million be authorized for this purpose. This is a relatively modest sum, but I believe that it need not be an expensive proposition. The important thing is that the money be clearly directed to this one purpose and that it sustain approaches which will become an integral and ongoing part of the schools across the Nation.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2963

Be is enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Safe Schools Act".

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act to provide financial assistance to State educational agencies in order to enable local educational agencies to provide services and activities to chronically maladjusted students and thereby reduce the incidence of violence in the schools of local educational agencies.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "Commissioner" means the Commissioner of Education.

(2) The term "chronically maladjusted student" means any child who—

(A) has attained 5 years of age but not 18 years of age;

(B) is enrolled in a school providing elementary or secondary education of a local educational agency; and

(C)(1) has committed more than one violent act while in attendance at a school of such agency; or

(ii) has consistently committed violations of discipline resulting in more than one suspension from a school of such agency.

(3) The term "elementary school" means a day or residential school which provides elementary education, as determined under State law.

(4) The term "local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools of a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as recognized in a State as an administrative agency for its public elementary or secondary schools. Such term also includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(5) The term "secondary school" means a day or residential school which provides secondary education, as determined under State law.

(6) The term "State" includes in addition to the several States of the Union, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(7) The term "State educational agency" means the State board of education or other agency or officer primarily responsible for the State supervision of public elementary or secondary schools, or if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

AUTHORIZATION

SEC. 4. (a) The Commissioner shall, in accordance with the provisions of this Act, make payments to State educational agencies for the fiscal year 1979 and for each of the four succeeding fiscal years in order to enable local educational agencies of each such State to provide services and activities designed to rehabilitate chronically maladjusted students in the schools of the local educational agencies.

(b) There are authorized to be appropriated $200,000,000 for the fiscal year 1979, and for each of the four succeeding fiscal years, to carry out the provisions of this Act.

ALLOTMENT OF FUNDS

SEC. 5. (a) (1) From the funds appropriated pursuant to section 4, the Commissioner shall allot not more than 1 per centum among Guam, American Samoa, the Virgin Islands and the Trust Territory of the Pacific Islands according to their respective needs.

(2) From the remainder of such funds the Commissioner shall allot to each State an amount which bears the same ratio to such remainder as the number of chronically maladjusted students enrolled in the schools of the local educational agencies in that State in the fiscal year preceding the fiscal year for which the determination is made bears to the number of such students in all States. For the purposes of this subsection, the term "State" does not include Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(3) (A) Not later than —— days after the date of enactment of this Act, the Commissioner shall prepare and publish criteria to be used by local educational agencies in each State to determine the number of chronically maladjusted students in the schools of such agencies for the purpose of this Act.

(B) The provisions of section 431 of the General Education Provisions Act shall not apply to the criteria established under subparagraph (A) of this paragraph.

(b) The portion of any State's allotment under subsection (a) for a fiscal year which the Commissioner determines will not be required, for the period such allotment is available, for carrying out the purposes of this Act shall be available for reallotment from time to time on such date during such period as the Commissioner may fix, to other States in proportion to the original allotment to such States under subsection (a) for such year, but with such proportionate amount for any of such other States being reduced to the extent it exceeds the sum which the Commissioner estimates will be

needed in such State and will be used for such period for carrying out applications approved under this Act, and the total of such reduction shall be similarly reallotted among the States whose proportionate amounts are not so reduced. Any amount reallotted to a State under this subsection during a year shall be deemed part of its allotment under subsection (a) for such year.

USE OF FUNDS

SEC. 6. (a) Payments under this Act to any State may be used by local educational agencies of the States only for services and activities designed to rehabilitate chronically maladjusted students in the schools of such agencies.

(b)(1) No payment may be made under this Act unless at least two of each three programs of services and activities referred to in subsection (a) to be carried out by each local educational agency in that State are contained in the list required to be prepared by paragraph (2) of this subsection.

(2)(A) The Commissioner shall prepare and publish, as soon as possible after the date of enactment of this Act, a list of programs of services and activities which show great promise of rehabilitating chronically maladjusted students, based upon studies, surveys and research conducted by the Office of Education or the National Institute of Education. The Commissioner shall revise the list required by this subparagraph annually, and shall give special attention to new studies, surveys, and research as well as experience with programs assisted under this Act.

(B) The provisions of section 431 of the General Education Provisions Act shall not apply to the requirement set forth in subparagraph (A) of this paragraph.

ASSURANCES FROM STATES

SEC. 7. (a) Any State desiring to participate in the program authorized by this Act shall submit through its State educational agency to the Commissioner an application, in such detail as the Commissioner deems necessary. Each such application shall provide satisfactory assurance—

(1) that payments made under this Act will be used only for programs of services and activities which are in accordance with the provisions of section 6;

(2) that the determination of the number of chronically maladjusted students for each local educational agency within the State conforms to the criteria established by the Commissioner under section 5(a)(3);

(3) that such fiscal control and fund accounting procedures will be adopted as may be necessary to assure proper disbursement of, and accounting for, Federal funds paid to the State (including such funds paid by the State to local aducational agencies) under this Act; and

(4) that the State educational agency will make to the Commissioner such reasonable reports as may be necessary to enable the Commissioner to perform his duties under this Act (including such reports as the Commissioner may require to determine the amounts which local educational agencies of that State are to receive for any fiscal year), and assurance that such agency will keep such records and afford such access thereto as the Commissioner may find reasonably necessary to assure the correctness and verification of such reports.

(b) The Commissioner shall approve an application which meets the requirements of subsection (a), and he shall not finally disapprove an application except after reasonable notice and opportunity for a hearing to the State educational agency.

APPLICATIONS

SEC. 8. (a) A local educational agency may receive a payment under this Act for any fiscal year only upon an application therefor approved by the appropriate State educational agency upon its determination (consistent with criteria established by the Commissioner) that—

(1) the payments made under this Act will be used solely for programs of services and activities designed to rehabilitate chronically maladjusted students in accordance with the provisions of section 6;

(2) the programs assisted under this Act will be conducted at the schools of the local educational agency for a period of at least four years;

(3) each student who is counted for the purpose of the determination under section 5(a)(2) is to be served in one of the programs assisted under this Act;

(4) the local educational agency will employ every means available to protect the privacy of individual chronically maladjusted students, and their families;

(5) the local educational agency will pay from non-Federal sources the remaining costs of carrying out the application;

(6) the local educational agency will, in using assistance provided by this Act, conduct any such program of services or activities in cooperation with the families of the chronically maladjusted students to be served;

(7) effective procedures will be adopted for evaluating the effectiveness of the programs assisted under this Act;

(8) fiscal control and fund accounting procedures will be established as may be necessary to insure the proper disposal of, and accounting for Federal funds paid to the local educational agency under this Act; and

(9) reasonable reports will be furnished in such form and containing such information as may be reasonably necessary, and such record will be kept and access furnished thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

(b) The State educational agency shall not finally disapprove in whole or in part any application for funds under this Act without first affording the local educational agency submitting the application reasonable notice and opportunity for a hearing.

PAYMENTS

SEC. 9. (a)(1) From the amounts allotted to each State under section 5, the Commissioner shall pay to that State an amount equal to the Federal share of the cost of carrying out all applications of local educational agencies within that State approved under section 8.

(2) From the funds paid to it pursuant to paragraph (1), each State educational agency shall distribute to each local educational agency of that State which has an application approved under section 8 the amount equal to the Federal share of the cost of carrying out the approved application.

(b) The Federal share of the cost of carrying out an application of a local educational agency shall be 50 percent for each fiscal year.

(c)(1) The Commissioner is authorized to pay to each State amounts equal to the amounts expended by it for the proper and efficient performance of its duties under this Act (including technical assistance for evaluations), except that the total of such payments in any fiscal year shall not exceed $50,000, or $5,000 in the case of Guam, American Samoa, the Virgin Islands, or the Trust Territory of the Pacific Islands.

(2) There are authorized to be appropriated such sums as may be necesary to carry out the provisions of this subsection.

WITHHOLDING

SEC. 10. Whenever the Commissioner after giving reasonable notice and opportunity for a hearing to any State educational agency, finds that there is a failure to meet the requirements of this Act, the Commissioner shall notify that agency that further payments will not be made to the agency under this Act, or at his discretion that the State educational agency shall not make further payments under this Act to specified local educational agencies (whose actions cause or are involved in such failure) until he is satisfied that there is no longer any such failure to comply. Until he is so satisfied no further payment shall be made to the State educational agency under this Act, or payment by the State educational agency under this Act shall be limited to local educational agencies whose atcions did not cause or were not involved in the failure, as the case may be.

ADMINISTRATION

SEC. 11. Unless otherwise inconsistent with the provisions of this Act, the provisions of the General Education Provisions Act shall apply to the program authorized by this Act.●

By Mr. ANDERSON:

S. 2964. A bill to amend section 5197 of the Revised Statutes to limit the rate of interest a national bank may charge its out of State customers; to the Committee on Banking, Housing, and Urban Affairs.

CREDIT CARD INTEREST RATE PROTECTION ACT

● Mr. ANDERSON. Mr. President, in recent years Americans have become increasingly dependent on the use of credit cards in their personal and business transactions. Credit cards are convenient and simple to use, and make the carrying of large sums of cash unnecessary.

Banks and savings associations generally charge an annual fee for the use of a credit card, and assess a rate of interest on a customer's unpaid balance. The rate of interest allowed is determined by State law, and varies considerably from State to State.

In Minnesota, the legislature has set an interest rate ceiling of 12 percent per annum for credit card issuers. Other States have maximum rates as high as 18 percent. Under current Federal law, an association may charge interest at the rate allowed by the laws of the State, territory or district where the association is located. (12 U.S.C. 85). Specifically, several court decisions have concluded that out-of-State banks may charge Minnesota credit card customers the higher rate allowed by the State where the bank is located.

Mr. President, the result of that is an association in Nebraska, for instance, which allows an 18 percent interest rate, can solicit credit card customers in Minnesota and charge them the higher 18 percent rate. The State legislature of one State can effectively set the interest rate for the entire Nation. It is possible, for example, that a State could set a maximum of 24 percent or more on credit card accounts. Then this high rate could be charged residents of other States who were persuaded to establish credit card accounts with associations in the high rate State.

I do not believe that the congressional intent in regulating national bank interest rates was to allow a credit card provider in one State to charge more than the rate allowed by the customer's State. Rather, the purpose of section 85 of the National Bank Act was to prohibit States from discriminating against national banks in favor of local financial institutions.

Moreover, I believe that the elected representatives of a State should be able to regulate the effective interest rates charged its State residents. With the increasing usage of credit cards, it is important that customers have protection from excessive rates of interest. State regulation assures more direct political control of the interest rate ceiling.

Mr. President, to help alleviate the problem, I am introducing legislation which would prohibit out-of-State associations from charging interest rates on credit card accounts higher than the ceiling in the customer's State. Thus each State will determine the maximum allowable rate of interest for credit card customers who live within its borders.

Mr. President, I ask unanimous consent that the text of S. 2964 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2964

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5197 of the Revised Statutes (12 U.S.C. 85) is amended by adding at the end thereof the following: "Notwithstanding any other provision of this section, an association may not take, receive, reserve, or charge a credit card customer who is a resident of a State other than the State in which the association is located a rate of interest on credit extended by the use of such card which exceeds the rate which a bank organized under the laws of that other State may charge such a customer.".●

By Mr. ANDERSON:

S. 2965. A bill to provide for more equitable distribution among the States of military and civilian personnel of the Department of Defense; to the Committee on Armed Services.

● Mr. ANDERSON. Mr. President, for some time I have been concerned about the disparity in the spending of Federal defense funds among various regions of the Nation. An examination of the current pattern of military base location and Department of Defense employment leads to the conclusion that there is an unwritten, but implicit, policy of geographic discrimination against the Northeast and Midwest regions.

The 16 States of the Northeast-Midwest regions encompass 45 percent of the Nation's population and provide about one-half of the Federal taxes. But, these same States receive less than 10 percent of the military construction budget, have less than 20 percent of the bases, and 16 percent of DOD personnel. It is clear that the Nation's largest employer has been guilty of ignoring the economic contributions and needs of the Northeast-Midwest regions.

Mr. President, the inattention of DOD to the Northeast-Midwest area has a deleterious impact on the military image in the affected States. The inability to see any visible military presence and the resentment engendered by the DOD's prejudice against the Northeast-Midwest damages the public standing of our Defense Establishment. In my judgment, the best interest of the country and the DOD would be to administratively assure a reasonable geographic balance in military installations and personnel. At a minimum, the DOD should have assured that there was at least one major DOD activity in every State. However, such has not been the policy and the DOD is now reaping the fruits of sectional resentments and bitterness resulting from its hostility to the economic fate of the Northeast-Midwest.

Mr. President, the Congress is not institutionally designed to concern itself with executive decisions on base location and personnel assignment. It would be a mistake, I believe, for the Congress to attempt to take major responsibility for deciding where DOD activities will be located.

But, I believe, the Congress can insist that the Department of Defense end its policy of geographic discrimination and that the DOD meet certain minimum goals in assuring equitable geographic treatment.

Mr. President, I am introducing a bill today which deals with this problem. I invite my colleagues to join me in support of a bill that would correct the current imbalance in our national policy on defense expenditures.

S. 2965 states that it is the policy of the Government that there will be an equitable distribution of military and civilian personnel of the DOD among the several States. It requires the DOD to initiate a program to assure that the policy is carried out. The legislation further requires that the Secretary of Defense establish a goal of permanently assigning a combined total of at least 1,000 military and civilian personnel of the DOD within each State by not later than September 30, 1988. In meeting this requirement the bill directs that the DOD give first consideration in locating any new or transferred DOD activities to sites within States which do not meet the 1,000 minimum requirement. In addition, the bill prohibits the DOD from reducing total DOD employment in any State below 1,000.

The bill gives the President the opportunity to disregard the requirements of the act if military necessity requires it or if gross economic inefficiency would result from following the act's requirements. But, in such cases the President is required to notify Congress as to the reasons why geographic equity is being disregarded.

S. 2965 requires that geographic equity be a consideration in locating some of the many thousands of DOD activities which are not bound to one type of location by military necessity. With a total military and civilian employment of over two million, the minimal requirements of this bill can easily be achieved.

Mr. President, I request unanimous consent that the text of S. 2965 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2965

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds that as a matter of policy the Department of Defense should initiate and carry out a program providing for a more equitable distribution of military and civilian personnel of the Department of Defense among the several States so long as such program is not incompatible with the military missions of the armed forces or will not result in gross economic inefficiency for the Department of Defense.

SEC. 2. On and after the date of enactment of the Act, the Secretary of Defense shall initiate and carry out a program providing for a more equitable distribution of the military and civilian personnel of the Department of Defense among the several States to the extent that the implementation of such program is not incompatible with the military missions of the armed forces or will not result in a gross economic inefficiency on the part of the Department of Defense.

SEC. 3. (a) In carrying out the policy expressed in the first section and the program described in section 2, the Secretary of Defense shall establish a goal of permanently assigning a combined total of at least 1,000 military and civilian personnel of the Department of Defense within each State by not later than September 30, 1988. To the maximum extent practicable such goal shall be achieved through transfers and relocations of existing personnel and facilities and not through the establishment of installations which would necessitate an increase in the total number of military and civilian personnel.

(b) Whenever any new program is created or established by the Department of Defense or any existing program or activity of such department is to be relocated, the Secretary of Defense shall locate such new program or relocate such existing program or activity to a State in which there is currently less than a combined total of 1,000 military and civilian personnel of the Department of Defense. If the Secretary of Defense determines that the location of any such new program in, or the relocation of any such existing program or activity to, a State in which there is currently less than a combined total of 1,000 military and civilian personnel of the Department of Defense is inadvisable because of military necessity or because such action would result in gross economic inefficiency, the Secretary may locate such program or activity elsewhere, but only if the President notifies the Congress in writing of the military necessity or the gross economic inefficiency which makes the location of the program or activity in such States inadvisable.

SEC. 4. In no case may the total combined number of military and civilian personnel of the Department of Defense permanently assigned or employed in any State be reduced (1) below 1,000, or (2) below the then current total, permanently assigned or employed in such State by the Department of Defense if such total is less than 1,000, unless the President notifies the Congress in writing that such reduction is necessary because of military necessity or is necessary in order to avoid gross economic inefficiency. The foregoing shall not prohibit (A) temporary reductions of percent or less in the number of personnel at any location, or (B) any permanent reduction of less than 10 percent in the number of personnel when a reduction is necessary for good management purposes.

SEC. 5. As used in this Act, the term State includes the District of Columbia.●

By Mr. ANDERSON:

S. 2966. A bill to amend the Internal Revenue Code of 1954 to increase the investment tax credit for qualified farm property to 15 percent, effective as of January 1, 1976; to the Committee on Finance.

AGRICULTURE INVESTMENT TAX CREDIT

● Mr. ANDERSON. Mr. President, for the last few months the Halls of Congress have been filled with dedicated and concerned family farmers attempting to find an open ear to listen to their problems as well as to their suggestions about what our Government might do to help solve those problems. Due to ever-increasing costs of production and drastically low prices for the goods they produce, many of our family farmers are faced with bankruptcy and shattered dreams in the months ahead.

I believe America's family farmers found the open ear they were looking for in the U.S. Senate. As a result of numerous meetings with farmers and hearings on the many problems within our Nation's agricultural economy, this body passed a very good emergency farm bill designed to raise crop prices to a reasonable level, reduce the temporary surplus, and give our family farmers the hope they needed to pull through this year and carry on their tradition of abundant production of food and fiber in the years ahead. I am very disappointed in the vote by the House of Representatives that defeated the emergency farm bill. I think the family farmer has been shortchanged in terms of price and feel the Senate bill was a realistic effort to give them a better price.

The very fact that the Senate recognized the need for emergency farm legislation has taught all of us a very valuable lesson. Our Nation must reevaluate its long-term farm policy. We must develop and initiate a program aimed at creating stability in America's agricultural industry. This change is needed not only to assure the future of the family farm, but also to guarantee the American consumer the food and fiber he wants and needs at a reasonable price.

The legislation I am introducing today should be an integral part of any long-term farm policy. This bill amends the Internal Revenue Code of 1954 to allow for an increase in the investment tax credit for qualified farm property from 10 to 15 percent.

Under the present law, an investment credit is made available for most types of property used in a trade or business, including the business of farming. This investment credit allows a farmer to recover, through reduced tax liability, a percentage of his equipment and other property used in his farming business. The increased rate which my bill calls for would be available for equipment and qualifying property placed in service for farming purposes including agriculture, horticulture, animal husbandry, and timber-raising activity. This new 15-percent investment credit would be effective for tax years after December 31, 1975.

We have all heard the horror stories of family farmer battles with inflation. This is particularly true for farm machinery and related costs that have skyrocketed in the past 6 or 7 years. The total value of shipments from manufacturers of farm machinery in use in the United States has increased from $2.9 billion in 1970 to $7.5 billion in 1976. The large-capacity combine that cost the farmer $18,000 in 1971 has now more than doubled to over $45,000. Similar stories can be told for the prices of tractors, trucks, and every other piece of equipment necessary for the production of the food and fiber we all depend on.

The legislation I am introducing is designed to help the family farmer win his seemingly unending battle with inflation. My bill is a needed response to the lesson we have all learned in the last few months. The loss of thousands of family farms has been the price we as a nation have paid to learn the value of a stable farm policy. I only wish the price for learning this lesson had not been so dear.

Mr. President, I ask unanimous consent that the text of S. 2966 be printed in the RECORD.

The being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2966

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (2) of section 46(a) of the Internal Revenue Code of 1954 (relating to amount of credit for current taxable year) is amended to read as follows:

"(2) Amount of credit.—

"(A) In general.—The amount of the credit determined under this paragraph for the taxable year shall be an amount equal to the sum of the following percentages of the qualified investment (as determined under subsections (c) and (d));

"(i) the regular percentage, December 31, 1980, an additional percentage (not in excess of one-half of 1 percent) which results in an amount equal to the amount determined under section 301(e) of the Tax Reduction Act of 1975.

This subparagraph shall apply to a corporation only if it meets the requirements of section 301 (d) of the Tax Reduction Act of 1975 and only if it elects (at such times, in such form, and in such manner as the Secretary prescribes) to have this subparagraph apply."

(b) Section 48 of the Internal Revenue Code of 1954 (relating to definitions; special rules) is amended by redesignating subsection (l) as subsection (o) and by inserting after subsection (k) the following new subsections:

"(l) Qualified Farm Property Defined.—For purposes of this subpart, the term 'qualified farm property' means property—

"(1) which is placed in service, primarily for farming purposes, on or in connection with a farm; and

"(2) (A) the construction, reconstruction, or erection of which is completed by the taxpayer after December 31, 1975, or

"(B) which is acquired after such date, if the use of such property by the taxpayer commences after such date.

"(m) Farm; Farming Purposes Defined.—For purposes of this subpart—

"(1) Farm.—The term 'farm' has the meaning given such term by section 6420 (c)(2).

"(2) Farming purposes.—The term 'farming purposes' means any purpose—

"(A) in connection with cultivating the soil, or in connection with raising or harvesting any agricultural or horticultural commodity (including the raising, shearing, feeding, caring for, training, and management of livestock, bees, poultry, and fur-bearing animals and wildlife);

"(B) in handling, drying, packing, grading, or storing any agricultural or horticultural commodity in the unmanufactured state of such commodity;

"(C) in connection with—

"(i) the planting, cultivating, caring for, or cutting of trees, or

"(ii) the preparation (other than milling) of trees for market, incidental to farming operations; or

"(D) in connection with the operation, management, conservation, improvement, or maintenance of a farm and tools and equipment of such farm.

"(n) Application of Certain Transitional Rules.—Where the application of any provision of subsection (1) of this section or subsection (a)(2) or (c)(3) of section 46 is expressed in terms of a period, such provision shall apply only to—

"(1) property to which section 46(d) does not apply, the construction, reconstruction, or erection of which is completed by the taxpayer on or after the first day of such period, but only to the extent of the basis thereof attributable to the construction, reconstruction, or erection during such period.

"(2) property to which section 46(d) does not apply, acquired by the taxpayer during such period and placed in service by the taxpayer during such period, and

"(3) property to which section 46(d) applies, but only to the extent of the qualified investment (as determined under subsections (c) and (d) of section 46) with respect to qualified progress expenditures made during such period."

(c) Subparagraph (A) of section 46(c)(3) of the Internal Revenue Code of 1954 (relating to public utility property) is amended to read as follows:

"(A) For the period beginning on January 1, 1981, in the case of any property which is public utility property, the amount of the qualified investment shall be 4/7ths of the amount determined under paragraph (1)."

(d) The amendments made by this section shall apply to taxable years ending after December 31, 1975.●

By Mr. CHILES:

S. 2967. A bill to amend the Older Americans Act of 1965 to provide support for development of comprehensive systems of community long-term care, and for other purposes; to the Committee on Human Resources.

SPECIAL PROJECTS IN LONG-TERM CARE

● Mr. CHILES. Mr. President, today I am introducing a bill to amend the Older Americans Act of 1965 to provide support for development of special projects in comprehensive long-term care, to mandate a national study of manpower needs in community-based long-term care, and to strengthen the role of the Administration on Aging in the development of long-term care policy.

The bill would provide a special authorization for community long-term care projects, with an emphasis on the development of broad-range coordinated continuums of care.

Too often noninstitutional long-term care services are available only on a piecemeal basis: Skilled home nursing may be available, but not equally needed maintenance support, such as homemaker or chore services. Or perhaps, after a period of illness or hospitalization, an older American living with relatives may simply need a place to spend time during the day while children are at work and grandchildren are in school—or could manage at home with a midday meal delivered by someone who

could also check to make sure there were no problems.

There are now a number of different funding sources for the individual services which can make up a broad-based continuum of care, although they are not as widespread as they need to be to fully meet the need. The needed services are not often all present in the same community, however. If they are in place, they are rarely fully coordinated with each other so that support needed by a single person at different times can be efficiently determined and met.

The bill I am offering today would greatly expand the capabilities of State governments to move ahead and focus attention on a consolidated approach to community long term care.

The bill would also offer incentives to States to direct attention to the development of adequate standards for home care, an area which testimony before the Special Committee on Aging has indicated is of primary importance.

I was pleased to note, just last week, that the Health Care Financing Administration announced the availability of $6 million to fund 1-year planning grants for research including some experimental projects to test alternative systems of long term care.

A commitment to do this was made by the Health Care Financing Administration during recent Committee on Aging hearings, and I am glad to see that some money is being made available. The amount available for this important research, however, will not allow the widespread attention which must be given to long term care development by States now. Nor is it directed toward development of operational programs.

The bill I introduce today would provide this needed emphasis, including both program development and training of service personnel, and would supplement and complement the activities of the Health Care Financing Administration.

It is my intention that it would also encourage closer working relationships between the Administration on Aging and the health divisions within the Department of Health, Education, and Welfare, as the Commissioner on Aging would be required to seek their involvement in the implementation of this provision.

We need to speed up the process of developing genuine, community-based care and support systems for older Americans. Enacting this bill as an amendment to the Older Americans Act this year will accomplish this goal, and I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2967

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. That section 101(8) of the Older Americans Act of 1965 (hereinafter referred to as "the Act") is amended by inserting after "provide" the following: "a choice in supported living arrangements and".

SEC. 2. Section 202 of the Act is amended by redesignating subsection (b), and all references thereto, as subsection (c) and by inserting after subsection (a) the following new subsection:

"(b) In order to strengthen the involvement of the Administration on Aging in the development of policy alternatives in long-term care and insure that the development of community alternatives are given priority attention, the Commissioner shall—

"(1) develop planning linkages with local health systems agencies (as defined under the National Health Planning and Resources Development Act of 1974),

"(2) participate in all interdepartmental activities which concern issues of institutional and non-institutional long-term care services development; and

"(3) review and comment on all departmental regulations and policies regarding community health and social service development for the elderly."

Sec. 3. Section 205 of the Act is amended by adding at the end thereof the following new subsection:

"(j) The Council shall undertake a special study to make a full assessment of the adequacy of current manpower supplies and training in the non-institutional long-term care field and the adequacy of current programs in the non-institutional long-term care field. The Council shall recommend to the Congress, within 2 years after the date of enactment of this subsection, goals to be met to meet manpower needs and program development in the non-institutional long-term care field.".

SEC. 4. Title III of the Act is amended by adding at the end thereof the following new section:

"SPECIAL PROJECTS IN COMPREHENSIVE LONG-TERM CARE

"SEC 310. (a)(1) The Commissioner is authorized to make grants to selected State agencies designated under section 304(a)(1), selected area agencies on aging designated under section 304(a)(2)(A), and other public agencies and private nonprofit organizations, associations, and groups to support the development of comprehensive, coordinated systems of community long-term care for older persons.

"(2) A grant under this section may be made to pay part or all of the estimated cost of a program (including start-up cost) for a period of not more than three years, except that no funds may be used to pay for direct services which are eligible for reimbursement under title XVIII, title XIX, or title XX of the Social Security Act.

"(3) A grant made under this section shall be used for the development of programs which provide a full continuum of services designed to support alternatives to institutional living, such services may include but are not limited to—

"(A) adult day health;

"(B) individual assessment of need, service plan development, monitoring and evaluation of service effectiveness;

"(C) supported living in public and private, nonprofit housing;

"(D) family respite services;

"(E) preventive health services;

"(F) home health, homemaker and other rehabilitative and maintenance in-home services;

"(G) geriatric health maintenance organizations; and

"(H) other services which the Commissioner determines are appropriate.

"(4) A grant under this section may be used to encourage the development of manpower training programs designed to further the purposes described in paragraph (3).

"(b)(1) In making grants under this section preference shall be given to applicants which demonstrate that (A) adequate State standards have been developed to ensure the quality of services provided; (B) the State has made a commitment to carry out the program assisted under this section with the State agency responsible for the administration of title XIX of the Social Security Act or title XX of the Social Security Act, or both such agencies; and (C) the State will develop plans to finance from non-Federal funds the comprehensive program assisted under this section.

"(2) State agencies assisted under this section shall establish procedures for evaluating the program assisted under this section, with respect to the benefits accruing to persons receiving assistance, the feasibility of the administrative model used for comprehensive coordination of services, and the comparative costs of services provided.

"(c) The Commissioner shall seek to involve appropriate Federal departments and agencies in carrying out the provisions of this section and shall report to Congress annually on the impact of grants made, on the experiences of grantees in meeting the requirements of this section, and on the comparative benefits and costs of projects assisted under this section.

"(d) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section for each fiscal year ending prior to October 1, 1981.".●

By Mr. CLARK (for himself, Mr. MORGAN and Mr. CULVER):

S. 2968. A bill to strengthen the economy of the United States through increased sales abroad of American farm products; to the Committee on Agriculture, Nutrition, and Forestry.

AGRICULTURE EXPORT EXPANSION ACT OF 1978

● Mr. CLARK. Mr. President, today I am introducing the Agricultural Export Expansion Act of 1978. Its purpose is to strengthen our national economy, and our farm economy, by strengthening our farm exports.

Basically, this bill would do four things. It would authorize the establishment of up to 25 overseas agricultural trade offices; provide intermediate 3 to 10 year credit for purchasers of U.S. commodities and for construction of facilities to handle imports of commodities; establish a new position of Under Secretary of Agriculture in the U.S. Department of Agriculture; and upgrade certain positions of U.S. diplomatic missions from their current rank of agricultural attache to agricultural counsellor.

Mr. President, since 1973 a series of changes in economic circumstances both in the United States and around the world have converted U.S. agriculture to an export oriented industry. We depend on foreign markets for more than half of our soybean production; half of our wheat; and a quarter of our corn. And, we depend on the $22 to $23 billion in foreign exchange our agricultural exports bring in.

Our current policy is designed to keep our products competitive in foreign markets, and this is extremely important. However, partly because we did not consciously design our current commitment to an export oriented agricultural policy, our system of efforts to maintain and increase our overseas markets has not kept pace. It is important that we systematically expand those efforts in order to strengthen and build our long term export markets.

Each of the four parts of the bill I am

introducing here today would help meet that goal.

I believe the intermediate credit provisions of the bill are the most important additions to the current program. We have short term (up to 3 years) commercial credits available from CCC at market rates. And, we have very long term credit under Public Law 480 that permits repayment over a 10 to 40 year period. However, for those purchasers who need somewhat better terms than the current 3 year CCC loans, but who do not need or who cannot qualify for the concessional sales provisions under Public Law 480 long term programs, there is now no adequate source of credit.

Similarly, many countries that are potential markets for U.S. exports do not have adequate facilities to handle or store these products. In many cases, these countries lack adequate credit to permit the construction of such facilities.

It is impossible to know how much credit is needed under this program, or exactly what the cost would be. The program would operate through the existing structure of CCC. The new authorities would permit loans, and Congress would reimburse CCC after the loans were made. The loans would be at commercial rates of interest, and would be repaid.

The level of loan activity under the program would depend on a number of factors, including the price of grain, and the availability of grain both here and in importing countries. USDA estimates outlays under this program at approximately $100 million per year.

The second feature of this bill is to establish U.S. agricultural trade offices in a number of countries. We now have one such office, in London. In the typical setting in the U.S. diplomatic mission abroad, the management of U.S. market development activities is but one of a large number of responsibilities agricultural attachés must carry out. They now work from their U.S. Embassy offices. Because the attachés' attention must be divided and because cooperators and private trade representatives cannot conduct business on the same premises as the attaches, coordination and consolidation of activities are greatly hindered. Furthermore, many nonresident exporters are discouraged by the lack of facilities and services at their disposal for market development activities.

This bill would permit trade offices to be located outside embassies. They would be headed by an assistant agricultural attaché and staffed by local national for professional and clerical help.

The offices would provide the data for use by the strategic planning activities needed for formulate long term market development programs and policies. They would be responsible for the implementation and coordination of all USDA export market promotion activities within each country. They would assist visiting U.S. business representatives and nonresident cooperator personnel in their market development efforts, and would provide guidance on the use of Public Law 480 as a development tool for U.S. agricultural markets.

These offices would also provide assistance for exhibits, sales teams, the Trade Opportunity Referral System and assist in developing the industry support for removing trade barriers that inhibit U.S. agricultural exports.

Twenty-five such offices would be authorized by this bill. USDA estimates that a gradual expansion would lead to the development of some 17 such offices during the first 5 years of the program's operation. The operation of 17 offices would require an additional $3.5 million and 56 staff.

This bill has two additional sections. One would upgrade the current position of Assistant Secretary of Agriculture for International Affairs and Commodity Programs to Under Secretary. The second would upgrade the position of the officials attached to the diplomatic missions of the United States from "Attache" to "Counsellor".

These are technical changes in structure, but they are important in making this program more visible, and in making it work better.

The current assistant Secretary of Agriculture for International Affairs and Commodity Programs not only manages programs responsible for more than $10 billion dollars, but he must negotiate constantly with officials of the Department of State and with officials of other Governments with regard to the operation of our agricultural programs. He is constantly dealing with U.S. officials with Under Secretary rank. This places him at a considerable disadvantage in his negotiations, and it reduces the status of the agricultural programs he manages in the view of those departments, and in the view of other countries. This discrepancy in rank should be changed to give the representative of agriculture equal status with those with whom he deals.

A similar situation occurs in the U.S. diplomatic missions. The rank of attache is too low to permit agricultural representatives access to many of the meetings and functions they need to attend. It significantly reduces the effectiveness of these representatives. Increasing the status of these officials should help upgrade our program of expanding agricultural exports, and make it more visible both here and abroad.

Mr. President, I have no illusions that these programs changes would remove our problems in our export markets. They would not. They are mainly technical things to make our system of export activities work better. They are not costly, and would far more than pay for themselves over the long run. I hope my colleagues in the Senate will join me in support of this bill.

I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2968

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Export Expansion Act of 1978."

DECLARATION OF POLICY

SEC. 2. It is hereby declared to be the policy of Congress in order to assist in raising farm income, to create a more favorable balance of trade, and to promote the general economic welfare, that the United States Government, in concert with private enterprise, engage in a systematic effort to expand international markets for American farm products. To achieve this purpose, there is herein authorized explicit machinery for the development and implementation of such agricultural policies and programs.

TITLE I—ESTABLISHMENT OF UNITED STATES AGRICULTURAL TRADE OFFICES

SEC. 101. The Congress finds and declares that United States Government assistance for foreign market development for agricultural commodities is declining in real terms and in relation to total agricultural exports, that other major agricultural exporting nations are winning new markets through aggressive market development programs larger in scope than those of the United States, and that the economic strength of American agriculture depends on developing, maintaining, and expanding international markets for United States agricultural commodities. It is the policy of Congress that existing foreign market development programs should be carefully and periodically reviewed for their cost effectiveness and that no new demands should be made on the United States Treasury unless it can be shown that the benefits from such increased spending will be reasonable in relation to the costs to the American taxpayer.

SEC. 102. To carry out the purposes of this title, the Agricultural Act of 1954 is amended by adding the following new title:

"TITLE VIII—UNITED STATES AGRICULTURAL TRADE OFFICES

"SEC. 801. (a) For the purpose of developing, maintaining, and expanding international markets for United States agricultural commodities, the Secretary of Agriculture is authorized and directed to establish abroad not fewer than six nor more than twenty-five United States Agricultural Trade Offices.

"(b) Each Office shall be directed and administered by a United States Agricultural Trade Officer who shall be a person who by reason of training, experience, and attainments is exceptionally qualified to carry out the purposes of this title.

"(c) Each Agricultural Trade Officer may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that each Agricultural Trade Officer may not be paid basic pay at a rate in excess of the maximum annual rate of basic pay then payable for GS–17 of the General Schedule under section 5332 of such title.

"(d) Each Trade Officer shall perform such functions, powers, and duties relating to foreign market development as may be delegated from time to time by the Secretary of Agriculture and the Administrator of the Foreign Agricultural Service and shall report directly to the Agricultural Counselor or other senior representative of the Secretary of Agriculture in the country or countries of concern or to such other person as the Administrator may designate.

"(e) The Secretary of Agriculture is authorized to appoint such other personnel as he determines to be necessary, and may employ local nationals for the professional and clerical help necessary to carry out the duties of the Office.

"(f) Each Agricultural Trade Officer shall be responsible for the exercise of the powers and the discharge of the duties of the Office, and shall have the authority to direct and supervise all personnel and activities thereof subject to approval of the senior representative of the Secretary of Agriculture in the country or countries of concern and guidance from the Administrator of the Foreign Agricultural Service.

"(g) No employee of the Office while serving in such position may engage in any business, vocation, or other employment or have other interests which are inconsistent with his official responsibilities.

"(h) Upon the request of the Secretary of Agriculture, the Secretary of State shall regularly and officially attach such Officers and personnel to the diplomatic mission of the United States in the country in which such Officers or personnel are to be assigned by the Secretary of Agriculture, and shall obtain for such Officers and personnel diplomatic privileges and immunities equivalent to those enjoyed by Foreign Service personnel of comparable rank and salary.

"SEC. 802. Subject to approval and guidance from the Administrator, Foreign Agricultural Service and the senior representative of the Secretary of Agriculture in the country or countries of concern, the functions of each United States Agricultural Trade Office shall be to—

"(a) in general, increase the effectiveness of agricultural export promotion efforts through consolidation of activities, providing services and facilities for foreign buyers and United States Trade Representatives, and coordination of market development activities sponsored by the Department of Agriculture;

"(b) establish goals by country or region and by commodity for developing, expanding, and maintaining markets for United States agricultural commodities;

"(c) initiate programs to achieve the export marketing goals approved by the Department of Agriculture;

"(d) maintain facilities for use by nonresident cooperators, private trade groups, and other individuals engaged in the import and export of United States agricultural commodities where the use of such facilities would aid in the conducting of market development activities;

"(e) develop and maintain a current listing of trade, government, and other contacts for each commodity area and make available such listing to persons with a bona fide interest in exporting or importing United States agricultural commodities;

"(f) originate and provide assistance for exhibits, sales teams, and other functions for the promotion of United States agricultural commodities;

"(g) under the direction of the General Sales Manager, provide practical assistance for use of Public Law 480, the export credit sales program, the export incentives program, and any other related programs of the United States Government where use of such programs will serve as a market development tool for United States agriculture;

"(h) supervise project agreements with United States cooperators, coordinate the activities of the Office with those of the cooperators, and submit annual recommendations to the Administrator on the efficacy of cooperator programs, including statements as to whether project agreements should be extended, amended, canceled, or allowed to expire;

"(i) publicize the services offered by the Office through advertisements in trade journals or by other appropriate means; and

"(j) perform such other functions as the Secretary determines necessary and proper for carrying out the purposes of this title.

"SEC. 803. (a) In addition to the Offices authorized in section 801 of this Act, the Secretary may establish one such Office in the United States if he determines that doing so would better effectuate the purposes of this title.

"(b) Subject to exceptions made by the Secretary consistent with the purposes of this title, any domestic Office shall operate under the same provisions of law applicable to a foreign Office.

"SEC. 804. Nothing in this title shall be construed to diminish the authority of the Agricultural Counselors established under title VI of this Act.

"SEC. 805. In establishing the United States Agricultural Trade Offices the Secretary is authorized to—

"(a) rent or lease, for periods of less than ten years, such offices, building, grounds, and living quarters as he may deem necessary, and make payments therefor in advance; and

"(b) maintain, improve, and repair properties rented or leased pursuant to authority contained in subsection (a) of this section and furnish fuel, water, and utilities.

"SEC. 806. Offices shall be centrally located in the city of assignment to facilitate foreign trade contacts and foreign trade reliance on the Offices for assistance in marketing activities, but shall not be colocated with a United States Embassy.

"SEC. 807. Upon request made by the Secretary, each Federal agency is authorized and directed to make its services, personnel, and facilities available to the greatest extent within its capability to the Office in the performance of its functions.

"SEC. 808. Agricultural Trade Officers and Agricultural Counselors may, under regulations prescribed by the Secretary, be entitled to a representation allowance in an amount determined by (1) the extent to which an Officer or Counselor can effectively utilize such funds to further the purposes of this title and (2) a level commensurate with representational and promotional efforts by other major agricultural exporting countries competing in markets assigned to the Officer or Counselor.

"SEC. 809. The term 'Agricultural Counselor' as used in this title means the principal Department of Agriculture official appointed and attached to a United States diplomatic mission as provided in title VI of this Act.".

TITLE II—INTERMEDIATE COMMERCIAL CREDIT

SEC. 201. Section 4 of the Food for Peace Act of 1966 (89 Stat. 1538; 7 U.S.C. 1707a) is amended to read as follows:

"SEC. 4. (a) Commercial sales of agricultural commodities out of private stocks on credit terms of not to exceed three years may be financed by the Commodity Credit Corporation under its Export Credit Sales Program.

"(b) Commodity facilities and Export sales of agricultural commodities for reserve use and long-range purposes out of Commodity Credit Corporation and private stocks on credit terms in excess of three years, but not more than 10 years, may be financed by the Commodity Credit Corporation. The provisions of Public Law 664, Eighty-third Congress, as amended (68 Stat. 832, 46 U.S.C. 1241(b)), shall not apply to sales financed pursuant to this subsection.

"(c) There are hereby authorized to be appropriated such sums as may be necessary to reimburse the Commodity Credit Corporation annually for its actual costs incurred or to be incurred under programs undertaken under this section.

TITLE III—REORGANIZATION

SEC. 301. The Congress finds and declares that agricultural stabilization and conservation have historically been a central mission of the Department of Agriculture, and the Congress further finds and declares that international affairs have become of increasing importance in the formulation and implementation of United States agricultural policies and to the general well-being of American agriculture, especially with regards to farm prices and exports. Accordingly, it is the policy of the Congress to emphasize the importance of commodity programs and international affairs and to upgrade these functions in the administrative structure of the executive branch.

"SEC. 302. (a) There is hereby established in the Department of Agriculture the position of Under Secretary of Agriculture for International Affairs and Commodity Programs, to be appointed by the President, by and with the advice and consent of the Senate. The Under Secretary of Agriculture for International Affairs and Commodity Programs is authorized to exercise the functions and perform the duties related to foreign agriculture and agricultural stabilization and conservation (described in 7 CFR 2.21 (1977)) and shall perform such other duties as may be required by law or prescribed by the Secretary of Agriculture.

"(b) Section 5314 of title 5 of the United States Code is amended by adding at the end thereof a new paragraph (66) as follows:

"(66) Under Secretary of Agriculture for International Affairs and Commodity Programs."

TITLE IV—AGRICULTURAL COUNSELORS

SEC. 401. The Congress recognizes that the officials of the United States Department of Agriculture attached to the diplomatic missions of the United States play an important role in developing, maintaining, and expanding markets for United States agricultural commodities and that their positions and responsibilities should be upgraded to a level commensurate with the magnitude and importance of the objectives they are assigned to accomplish.

SEC. 402. Title VI of the Agricultural Act of 1954 is amended by—

(a) amending the title to read "AGRICULTURAL COUNSELORS";

(b) changing the word "Attache" in section 602 (b) to "Counselor", adding the language "to be accorded the same rank and privileges of other counselors in the embassy"; and

(c) adding a new section as follows:

SEC. 609. (a) To effectuate the review of the worldwide supply, demand, and price of agricultural commodities and to heighten understanding of problems involved in selling United States agricultural products abroad, each Agricultural Counselor is directed to submit an annual report to the Secretary of Agriculture, who shall transmit such report to the chairman of the Agriculture Committee of the House and the Agriculture, Nutrition, and Forestry Committee of the Senate, detailing the agricultural situation in the country or area to which the Counselor is assigned, and including the following information:

"(1) a summary of the supply, demand, and price of each major agricultural commodity in the country in order to understand long-term and short-term trends in the supply, demand, and price;

"(2) present and projected imports and exports of agricultural commodities;

"(3) unusual patterns, changes or distortions such as those caused by governmental intervention, in connection with the trade and consumption of agricultural commodities in the country;

"(4) trade barriers in the country affecting United States imports;

"(5) a summary of other social, political, and economic factors affecting agricultural trade; and

"(6) other matters that the Secretary considers appropriate in carrying out this section.

"(b) The information in this report shall be periodically compiled on a country-by-country basis, or an area basis where appropriate, organized in a format suitable for a general audience with an interest in foreign agriculture, and made available at a reasonable price to the public.

"(c) Upon request made by the Secretary of Agricultural, each Federal agency is authorized and directed to make its services, personnel, and facilities available to the greatest extent within its capability to the

Counselor in the performance of the Counselor's functions.".

TITLE V—GENERAL PROVISIONS

SEC. 501. (a) The Secretary of Agriculture shall implement the Agricultural Export Trade Act of 1978 as expeditiously as possible consistent with the efficient and effective administration of the programs established under this Act and their integration with related foreign agricultural programs.

(b) The Secretary is authorized to issue such regulations as may be necessary to carry out the provisions of this Act.

SEC. 502. (a) The Secretary shall provide the funds authorized or required under the provisions of this Act through the Commodity Credit Corporation and other means available to him.

(b) Appropriations made available to carry out foreign agriculture related functions with in the Department of Agriculture shall be available to carry out the provisions of the Agricultural Export Trade Act of 1978.

SEC. 503. No person shall on the ground of sex, age, race, color, religion, handicap, or national origin be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity funded in whole or in part with funds made available under this Act.

SEC. 504. The Secretary shall transmit to the Congress each year a report which shall include a comprehensive statement of the activities and accomplishments of the Department of Agriculture in developing, maintaining, and expanding foreign markets for United States agricultural commodities.

● Mr. MORGAN. Mr. President, I am pleased to join the senior Senator from Iowa (Mr. CLARK) in offering the Agriculture Export Expansion Act of 1978.

This legislation is of utmost importance both to our farmers and to the Nation.

This much needed legislation will help reverse our serious balance-of-payments difficulties by encouraging the expansion of food and fiber exports by America's farmers.

This body has deliberated, in recent weeks, various bills designed to enhance farm income. These bills deal with the economic problems of farmers in the short run. This legislation takes a much longer look. Hence, it is a welcome complement to an overall effort geared to update our Nation's agricultural policies.

In recent years, our farmers have become more dependent on export markets for strength in farm income. Currently, 1 of 3 acres in grain production is devoted to export markets. Given this fact, it is easy to understand why exports are so important to the economic vitality of American agriculture.

I want to commend Senator CLARK's leadership in offering this very significant legislation. It is my understanding that the Senate Committee on Agriculture, Nutrition, and Forestry will hold hearings on this legislation late this month. I will testify at these hearings to further expand on my reasons for supporting this legislation.

Mr. President, this bill will be very valuable to North Carolina agriculture. In particular, this bill will help North Carolina producers engaged in tobacco, soybean, feed grain, and poultry production. While it is difficult to project the immediate impact of this bill on farm income, it is clear to me that this legislation will have significant influence on the market development policies of this Nation, policies that will play a vital role in the size of farm income at the end of this decade.●

By Mr. CHURCH (for himself, Mr. KENNEDY, Mr. CHILES, Mr. WILLIAMS, Mr. CLARK, Mrs. HUMPHREY, Mr. PELL, Mr. RANDOLPH, Mr. MCINTYRE, Mr. ABOUREZK, Mr. BROOKE, Mr. CANNON, Mr. MARK O. HATFIELD, Mr. BAYH, and Mr. MCGOVERN):

S. 2969. A bill to amend the Older Americans Act of 1965 to provide for improved programs for the elderly, and for other purposes; to the Committee on Human Resources.

OLDER AMERICANS ACT AMENDMENTS OF 1976

● Mr. CHURCH. Mr. President, on behalf of Senators KENNEDY, CHILES, WILLIAMS, CLARK, HUMPHREY, PELL, RANDOLPH, MCINTYRE, ABOUREZK, BROOKE, CANNON, HATFIELD, BAYH, and MCGOVERN, I introduce for appropriate reference the Older Americans Act Amendments of 1978.

The Older Americans Act has served our Nation well. More than 12 years of experience with this legislation have amply demonstrated its value and worth. I think it should be extended and expanded. Our proposal would continue the act for 3 years and make other needed changes.

The Older Americans Act now provides a wide range of services to the elderly through a "network" of State and area agencies on aging, senior centers, nutrition sites, model projects and an employment program. Today 566 area agencies on aging have been established under the title III State and community programs on aging in jurisdiction where 92 percent of the elderly live. These units serve as planners, coordinators, and catalysts in developing comprehensive and coordinated service systems to link up older Americans with the services they need to continue to live independently in their communities. Aged persons now receive numerous services under this system, including transportation, home health care, homemaker services, escort and shopping services, information and referral, outreach, home repair, legal counseling, and others.

Often, older Americans receive these services at community senior centers. Title V provides support for acquiring, renovating and altering facilities to be used as multipurpose senior centers. These centers, which often provide recreational, social, and health services, are focal points within the community. They can also provide a "one-stop" delivery point for older persons.

Another important service is the title VII nutrition program. Title VII provides meals for persons 60 years and older at churches, schools, and other nonprofit settings. In addition, these meal sites provide home-delivered meals to elderly persons who are homebound, but on a very limited basis. The Administration on Aging estimates that approximately 470,000 meals were served daily to elderly persons during fiscal year 1977, with approximately 15 percent of these meals being delivered to homebound persons. These nutrition programs, which exist in about 10,000 sites throughout the country, provide the elderly with more than a meal. They also offer an opportunity for senior citizens to meet and socialize with others.

More than 37,000 persons 55 years and older are employed under the title IX senior community service corps. Title IX provides an opportunity for low-income persons 55 years of age and older to serve their communities while helping themselves. Older Americans work in many capacities, including forestry aides, home health aides, secretaries, assistants in service programs and teachers aides. Title IX has been an extraordinarily effective program which deserves to be continued and expanded substantially.

In addition to the services programs, the Older Americans Act supports training and research efforts in the field of gerontology. Title IV authorizes funding to train persons to work for and with the elderly. These training efforts are concentrated in colleges and universities for career planning and primarily through State and local offices on aging for short-term, inservice training. Competently trained personnel are essential not only to administer the Older Americans Act, but also other programs for the elderly.

Our bill builds upon these programs and authorizes new ones which I think will make the act more effective for the aged.

ELEVATE AOA

First, our proposal would elevate the Administration on Aging by making it directly responsible to the Secretary of HEW. This would enable AOA to have more influence over programs within HEW as well as other Federal programs for the elderly.

FEDERAL COUNCIL ON THE AGING

The Federal Council on the Aging would be strengthened by giving it independent staff to be appointed by its Chairman. In addition, the Commissioner on Aging and the Secretary of HEW would be removed as ex-officio members. These steps would enable the Council to become more of an independent advocate for the elderly, recommending and reacting to proposals separate from an administration's viewpoint.

CONSOLIDATION

The Older Americans Act has now evolved to the point where it is possible to consolidate the services titles—III, V, and VII—into one title, while retaining the separate authorizations for each program. This would help to streamline the act by allowing title III to have one overall administrative structure which would include one State plan on a 2-year cycle, one allotment formula based on the States' 60-and-over population, one State administrative allocation, and one system of channeling all of the new title III authorizations through the State agency and area agency on aging network.

Mr. President, I know there is concern

in the field of aging about making "one program" out of these three existing titles. Our proposal would not do this. Instead, these programs would remain intact as separate sections with separate authorizations. Our bill would simply attempt to enhance the effectiveness and efficiency of the act by requiring the States and area agencies to have one comprehensive plan which would include all of the services provided under the new title III. It would also reduce the administrative and paperwork burdens for State and local personnel. The area agencies would be responsible for monitoring the title III programs. They would still have limited authority to provide services—as exists under present law—only when "necessary to assure an adequate supply of such service."

LEGAL SERVICES—NURSING HOME OMBUDSMAN

Our new title III would also authorize funding for legal services, nursing home ombudsman, and home-delivered meals programs. Model projects under the Older Americans Act have amply demonstrated the value and worth of special legal services and nursing home ombudsman programs for the aged. We do not need any more proof that these programs work. What is needed is a means to convert them from the demonstration stage to an ongoing, permanent program. That is precisely what our bill would do. Specifically, it would incorporate the Kennedy-Church legal services for the elderly bill, S. 2394, as a section under the new comprehensive title III program. Similar action would be taken for creating a statewide ombudsman program.

HOME DELIVERED MEALS

In addition, our proposal would establish a national meals-on-wheels program for the homebound elderly. Many older Americans are placed in a nursing home, simply because other alternatives—which may include a home delivered meal—are not available. Senator McGOVERN and Senator KENNEDY have introduced bills which would authorize earmarked funding for home-delivered meals under the nutrition program. This would permit greater attention to the nutritional needs of the homebound who have often been neglected in the past. This proposal would include similar language.

SENIOR COMMUNITY SERVICE EMPLOYMENT

Our bill would expand the eligibility of the title IX senior community service employment program by allowing individuals with incomes up to 125 percent of the poverty guidelines to participate. The overall emphasis would still be on low-income elderly because their needs are the greatest. But, there are many instances where individuals with incomes slightly above the poverty levels are in as great of need, if not greater. This would give title IX greater flexibility in responding to the needs of older workers.

LIMITED CONSTRUCTION OF SENIOR CENTERS

Our bill would also allow limited construction of senior centers when it is not possible to renovate, alter, or acquire facilities to be used as multipurpose senior centers. The Senate Committee on Aging has conducted extensive hearings in rural areas across the country in recent years. Witnesses emphasized repeatedly that some areas simply do not have facilities which can be acquired or renovated for senior centers purposes. Our bill would allow the State agency on aging to make exceptions for limited construction in these areas. However, the overall emphasis—as it is now—would be directed at acquisition, alteration, and renovation of facilities to enable title V to have a greater impact. I would like to pay special tribute to Senator CLARK, one of the cosponsors of this bill, for his leadership in promoting this provision.

TRAINING

The Older Americans Act has supported training for several years. However, these efforts have often been fragmented and small. Our proposal would require the Administration on Aging to develop a national manpower policy on aging. AA would be required to assess the manpower needs and then take action to fill the documented gaps.

RESEARCH AND EVALUATION

The bill would also seek to sharpen the Administration on Aging's research and program evaluation focus by providing specific directives for a fuller integration of these functions with the direct service and demonstration programs of the act as well as similar programs administered by other agencies.

The bill also provides for increased participation by older Americans themselves in program evaluation.

COMMUNITY LONG-TERM CARE

The 1978 Older Americans Act amendments incorporate a bill introduced by Senator CHILES to advance the state of existing knowledge and experience in developing comprehensive, coordinated, and community-based long-term care services. The Commissioner on Aging would be authorized to provide seed money and demonstration funds for development and operation of local continuums of service for frail older Americans.

Senator CHILES recently chaired hearings for the Committee on Aging on progress made since the 1971 White House Conference on Aging in developing community alternatives in long-term care. We found little progress made since that time. The provisions of this new section are designed to respond to many of the problems described during these hearings. The bill would authorize initial startup money for coordinated systems of long-term-care services, as well as provide incentives for States to participate fully in this new program through title XX and medicaid. It would also provide incentives to insure the development of adequate standards of service for in-home and ambulatory care.

A number of States have already developed innovative administrative and financing arrangements for coordinated long-term-care service programs. Their experience can be of benefit to other States. But incentives are needed to build upon this solid foundation and increase capabilities in this area.

DIRECT FUNDING OF INDIAN TRIBES

Our proposal would establish a new separate title to permit direct funding of federally recognized Indian tribes. Direct funding is available now under limited circumstances, but this provision has never been exercised by the commissioner. Our bill would give Indian tribes the option of receiving funds through the State agency on aging or applying for a direct grant from the commissioner.

Mr. President, the Indian tribes of this country have a unique relationship with the Federal Government. Our proposal recognizes this relationship. Several Federal programs—such as the Comprehensive Employment and Training Act, revenue sharing, Indian health services and others—now provide direct funding to Indian tribes.

WHITE HOUSE CONFERENCE ON AGING

Finally, our bill includes authorization for a White House Conference on Aging in 1981. Earlier conferences, held in 1961 and 1971, produced landmark legislative achievements for the aged, including medicare, the Older Americans Act, Age Discrimination in Employment Act, the nutrition program for the elderly, and several social security increases. A 1981 conference is needed to continue this momentum and provide a means to develop a long-awaited national policy on aging.

Mr. President, every Member of this body, I am sure, is aware of the "graying" of our population. We are reminded daily of the shift in population. We must respond to these demographic changes and provide a comprehensive service system for our elderly. I think that the Older Americans Act Amendments of 1978 can help to lead us in that direction.●

● Mr. KENNEDY. Mr. President, I am pleased to join with Senator CHURCH, the distinguished and dedicated Chairman of the Special Committee on Aging, in sponsoring the Older Americans Comprehensive Amendments of 1978, along with several other of my distinguished colleagues.

The Older Americans Act attempts to achieve for the older people of this nation the health, honor and dignity to which they are entitled. It is an act which is meant to help provide for the elder people of this country the nutrition, transportation, community employment and legal services that they need.

Mr. President, the people who are the direct beneficiaries of this act are the people who built the factories, the cities and the schools of this country. They are the people who fought the wars of this country. And they are the people whose taxes have allowed us the freedom to build the kind of society that we want to have. So, finally, this is an act which allows us to say to ourselves that we understand the debt that we owe to those who have built this country for us, and to begin to make good on it.

This act was first passed in 1965. In 1966, it had an appropriation of $6.5 million. This year, it has an appropriation of over $500 million. There are now 562 area agencies on aging, 833 nutrition programs for the elderly and 1,000 multi-

purpose centers. Over 90 percent of the eligible population is now covered by an area agency. Some 11,500,000 people a year use Older American Act services, over a third of all who are over 60 years old.

The reasons for this growth are clear: These are vital services, and they are being delivered effectively.

Mr. President, I believe that the bill which we are introducing today will provide for even more effective delivery of those services; and I believe that this bill accentuates the kinds of services which need greater support.

I would like to highlight three of the provisions which are included in this bill:

First, part C, subpart I of title III continues a separate authorization for the nutrition program for the elderly. Currently title VII, this is a program with which we are all very familiar. Since its inception in 1972, we have watched it progress to today's extensive program, which includes projects in every State. Over 800 projects serve over 450,000 meals daily to elderly recipients. Title VII is more than just a hot meal program for the elderly. It also provides a place for the elderly to meet and talk with others. In some cases, this socialization function is as important as the meal itself. Title VII project directors have made this point emphatically. They have described the friendships, even marriages, resulting from interaction among participants. Many older Americans have become volunteers, cooks, transportation assistants, and outreach workers after becoming involved with this program.

Every Senator who has visited nutrition projects throughout their State, as I have done so often, has seen their worth and impact on the elderly and the communities. We believe that the nutrition program is too vital to risk with undirected authorizations and appropriations. This program must be expanded for the sake of the people who are now waiting for their sustenance, but for whom there is no room.

Subpart II of part C establishes home-delivered nutrition services.

The history of title VII indicates that unless there is a separate authorization for home-delivered meals, the homebound who perhaps need services more than anyone else would not be cared for and assisted to their degree of need. In many instances elderly Americans have to be institutionalized primarily because there is a lack of consistent nutritious meals available to them.

It is estimated that there are currently 3 to 4 million elderly who are confined to their homes and unable to participate in present Government nutrition programs. Many of these elderly citizens suffer from a high level of anemia, mental depression and protein deficiency as well as high rates of illness and long-term institutionalization.

The act calls for the establishment of a separate "Meals on Wheels" program which would for the first time recognize the degree of need of the homebound elderly.

Third, part E of title III establishes a separate legal and ombudsman services provision. Legal and ombudsman services are essential to the elderly. We need to set up separate authorizations for these programs, since they might not otherwise be properly funded. The legal services will reach out to those elderly poor who are not reached today by the Legal Services Corporation because of the Corporation's funding limit. Importantly, it will reach out as well toward those elderly who live on limited sources of income, such as social security, which sources may barely exceed Legal Services Corporation standards but which still leave them vitally dependent upon legal services.

The reasons why the elderly are so dependent upon legal services are clear. First, upon reaching retirement age, older Americans rely increasingly upon Federal programs—such as social security, medicare, supplemental security income, veterans pensions and railroad retirement. They depend upon these programs for their very livelihood. Second, the elderly are more likely to suffer untoward effects from unsatisfactory dealings with other private individuals. Third, the elderly have been given new rights in recent years which may take court actions to enforce—for instance, transportation systems built with Federal funding have special requirements to meet the needs of the elderly.

I believe that these are critical needs which must be addressed and must be addressed now. And I believe that this bill does just that.

Mr. President, there are many other noteworthy provisions of this act, and they have been ably explained by Senator CHURCH.

In sum, these provisions will help insure a better life for older Americans. This is the purpose of the Older Americans Act. And it is a purpose which is unsurpassed by any other item on our legislative agenda.●

● Mr. WILLIAMS. Mr. President, I am pleased to join my colleague from Idaho, Senator CHURCH, chairman of the Special Committee on Aging, in cosponsoring the Older Americans Act Amendments of 1978.

The Older Americans Act, orginially enacted in 1965, was significantly restructured and expanded in 1973. This act, through area agencies and their programs, focused this country's attention on the unmet, basic human needs of food, housing, transportation, and adequate health care which are simply not available to many senior citizens.

The act has been an element of the conscience of the Federal Government, urging it to forge a comprehensive coordinated, and humanitarian national public policy toward its elderly. Through the years, the Older Americans Act has served as a valuable forum and facilitator, enabling our country to become acutely aware of the basic needs and concerns of our senior citizens.

This bill strengthens and improves the aging network and will ultimately improve the effectiveness of the programs being offered to our senior citizens.

The basic new initiatives include authorizing title III funding for a legal services program, a nursing home ombudsman program, and a home-delivered meals program.

The basis for such new initiatives stem from successful demonstration models which have been previously funded by the Administration on Aging. Both the legal services and nursing home ombudsman programs are most important, since they protect the rights of the elderly. In addition, the home-delivered meal program focuses attention on the "frail elderly" who, with assistance from a nutrition program, can remain in their residences and not be forced needlessly into nursing homes.

A provision in this bill would allow the Commissioner on Aging to make grants to public and private, nonprofit agencies to encourage the development of coordinated service programs which provide continuous services designed to support alternatives to institutional living. Incentives would be made available to States to encourage the development of in-home ambulatory service and to encourage the coordination of medicaid, title XX, and medicare funding sources. It is essential that new approaches be developed to avoid the needless and costly institutionalization of our elderly.

This legislation would consolidate title III (State and community programs), title V (multipurpose senior centers), and title VII (nutrition programs for the elderly) into a new title III. This consolidation could impair the effectiveness of the title VII nutrition programs. While I expect and encourage cooperation between title VII and the other components of the act, I do urge that the congregate meal sites keep their identity and that this program maintain a separate authorization.

Consequently, I have reservations about the consolidation of title VII unless I can be assured its effectiveness will not be decreased and that the current worthwhile services provided by title VII will not be endangered.

Another provision of this bill would expand the eligibility of the title IX senior community service employment program giving greater flexibility for those seniors, whose incomes are slightly above the poverty level, to participate. However, the emphasis of the program would continue to be on low-income persons 55 years and older who are in need of employment.

This bill also provides authority for a White House Conference on the Aging to be held in 1981. I strongly endorse this endeavor as I believe it would allow seniors to give input as to a coordinated, national policy on the aged.

Reauthorizing the Older Americans Act provides an important opportunity to examine the problems facing todays' elderly and to consider the problems of future generations of seniors. It is an ideal time to analyze our country's entire social policy toward seniors, expand our objectives, and to prioritize our goals under the Older Americans Act. This is an instance where we can demonstrate through a strong, adequately funded, viable, progressive Older Americans Act

that we care about seniors and are indeed committed to addressing their needs.●

By Mr. PERCY:

S. 2970. A bill to promote commercial motor vehicle safety, to prevent injury to commercial motor vehicle operators, and for other purposes; to the Committee on Commerce, Science, and Transportation.

TRUCK SAFETY ACT OF 1978

● Mr. PERCY. Mr. President, it has become painfully apparent that inadequate trucking safety on the Nation's highways has reached dangerous proportions. Today I am introducing legislation that would substantially upgrade the effectiveness of Federal and State enforcement of trucking safety regulations.

Of the 45,000 highway fatalities in 1975, over 20 percent were caused by trucks and buses. Heavy trucks alone were responsible for 7.8 percent of these fatal accidents. In 1976, this figure rose to 8.9 percent, despite the fact that heavy trucks account for less than 1 percent of vehicles on the road. While all highway fatalities increased by only 1.2 percent between 1975, and 1976, those involving heavy trucks soared 16.8 percent. Involvement of tractor-trailer combinations in fatal accidents is almost seven times greater than the involvement of passenger vehicles.

Accident data is published by the Bureau of Motor Carrier Safety (BMCS), the arm of the Department of Transportation responsible for trucking safety. The latest data indicate that in 1976 interstate motor carriers of property and passengers reported 25,666 accidents which resulted in 2,520 fatalities, 26,794 injuries, and $183.7 million in property damage. And, according to the Bureau, these figures are understated because a significant number of interstate carriers failed to report accidents.

Intrastate trucking accidents represent an even more serious problem. In the State of Illinois alone, in 1976, there were over 92,000 truck accidents which killed 527 people and injured 18,885 more.

Over one-third of the trucks and buses inspected by BMCS in 1976 were deemed "imminent highway hazards" and immediately ordered off the road until repaired. Yet the Bureau inspected less than 1 percent of the 4 million commercial vehicles charged to its purview. It is reasonable to believe, therefore, that many more unsafe vehicles and drivers go undetected.

A 1977 General Accounting Office (GAO) report entitled "The Federal Motor Carrier Safety Program: Not Yet Achieving What the Congress Wanted," concluded that:

> In view of the limited accident data obtained, the continuing infrequency of safety inspections, and the high rate of trucks taken out of service after inspection, little assurance exists that most motor carriers are complying with Federal safety regulations.

Many trucking firms and drivers are conscientious about highway safety. Regrettably, there are some that are not. Federal and State vehicle safety programs must be improved to prevent such drivers from posing a danger to both the general public and other truckers.

Truck accidents not only hurt American consumers by increasing the cost of transportation; they hurt business as well. Some companies have been forced out of business by high court judgments resulting from motor vehicle accidents which could have been prevented. A major bakery in California, for example, was recently subject to a $2 million judgment arising from a single truck accident. This forced over 100 workers out of their jobs when the firm went out of business.

Mr. President, the Chicago Tribune and the St. Louis Globe-Democrat, in exceptionally well investigated task force reports completed over the past year, helped to pinpoint the problem areas with respect to safety enforcement—problems the bill which I am introducing today is intended to correct. First, the use of civil fines can only be directed at the failure of truckers to properly maintain a daily log. Civil fines are not applicable to any other violation of safety regulations, such as the failure to keep brakes in good repair or the use of poorly adjusted ventilation systems. In these cases, the BMCS can only bring formal criminal prosecution in court or initiate an administrative hearing.

This has proved to be a time-consuming and difficult process. For instance, in 1973, the latest year for which data are available, BMCS detected over 40,000 safety violations during nationwide road checks of 22,644 vehicles and drivers. Yet during all of 1973 and 1974, Bureau investigators were able to develop only 1,027 cases warranting court or administrative action. The majority of these cases were not accepted by the Department of Justice for criminal prosecution.

The effectiveness of the Bureau's safety program could be greatly enhanced by expanding civil forfeiture authority to include all types of substantial violations of safety regulations.

Moreover, the maximum amount for fines for safety violations has not been revised since 1957. They are now seriously out of line with fines for violation of other Federal regulations. Low penalties, coupled with the lengthy process of criminal enforcement, do little to discourage future violations. It is imperative that we raise these fines and set realistic time limits for the prosecution of cases and processing of fines.

Another factor working against greater safety is that the Interstate Commerce Act provides no restraints upon employers for possible reprisals against employees who report safety violations. There have been many instances where drivers have been fired for refusing to operate vehicles in violation of Federal truck safety laws. The unfortunate result has been to dissuade employees from directing Government officials to what are at times flagrant abuses of safety regulations. As a result, the Government has lost a prime ally in its effort to protect truckers and the public.

Through the years, Congress has enacted legislation that makes it unlawful for an employer to discriminate or discharge employees for seeking enforcement of legislation or for cooperating with the Government. One of these laws, the Occupational Safety and Health Act, protects nearly every worker in America except those of the trucking industry. It was not applied to truckers because, it was argued, the Department of Transportation already had authority to regulate trucking industry safety practices. As a result, drivers were denied the OSHA protections against employer recrimination for their attempts to secure safe working conditions.

In other areas, the BMCS has only 128 inspectors for the over 4 millions trucks on the road today. Obviously safety depends, therefore, on the effective operation of motor carrier safety programs by individual States. The States are in the best position to detect and prevent safety violations due to their greater personnel and resources. Yet, the 1977 GAO report found that:

> Since the Federal motor carrier safety program does not provide funding to the states, no effective incentive to promote increased cooperation from the states exist.

If States were given an incentive—for example, reimbursement for a percentage of the cost of operating adequate truck safety programs—much could be done to prevent speeding, tailgating, and the overloading of trucks. With this incentive, States could operate both more permanent and portable scales to prevent loads which make vehicle dangerous to drive, and which destroy our roadways. Increased enforcement personnel on the roads would not only slow trucks down, but automobiles as well. If the 55 mph speed limit were adhered to, traffic fatalities would drop greatly.

Mr. President, legislation to enhance the effectiveness of truck safety has been introduced in the last three Congresses. Without legislative action, the situation on the highway is steadily worsening, and we simply cannot afford to wait any longer. Fatal trucking accidents increased over 18 percent between 1975 and 1976. I have built upon past legislation and expanded it to create, what I consider to be, a truly effective truck safety program. In drafting this legislation, I have sought to reduce the load on our already overburdened courts. I have tried to alleviate the unnecessary delay that so often plagues our regulatory process. And, I have sought ways to encourage compliance that will not plunge industry neck-deep in excess paperwork.

This legislation builds upon and focuses the general authority given the Department of Transportation to regulate safety. It directs the DOT's safety function toward those areas which have caused the most serious safety problems in the 10-year period since DOT was created.

I have worked very closely with the various segments of the trucking industry in designing this legislation. The Professional Drivers Council, the American Trucking Associations, and the International Brotherhood of Teamsters have assisted me greatly. Their hard work and concern for public safety has been inspiring. As a result of this close cooperation, the legislation before you

today strikes a delicate balance between many of the most pressing concerns of both labor and industry.

The legislation I introduce today seeks to correct the shortcomings outlined above. Specifically, it:

Raises civil fines from $500 maximum to $2,500 maximum for each substantial violation and $10,000 for extremely serious safety violations.

Enlarges the scope of Federal safety regulation by including any truck over 10,000 gross vehicle weight rating in interstate commerce (interstate trucks) and affecting interstate commerce (intrastate trucks).

Authorizes the Secretary of Transportation to regulate the working conditions and operating practices of employees, to insure that trucks are so maintained as to prevent accidents, and to conduct research into new enforcement techniques and training programs.

Authorizes the Secretary to arrange to conduct on-the-job inspections and investigations.

Gives trucking employees the right to require DOT investigations of violations of safety regulations.

Requires the DOT to serve citations upon alleged violators of safety laws who are then given 15 days to notify DOT of their intent to contest the citation.

Authorizes an administrative adjudicatory hearing before the National Traffic Safety Board in cases of contested citations.

Provides for judicial review and enforcement of NTSB decisions and orders.

Protects trucking employees from discharge or discrimination for their attempts to promote greater trucking safety.

Authorizes DOT to establish penalty schedules designed to induce timely compliance with the law.

Authorizes funds to be appropriated from the highway trust fund for the purpose of offering financial incentives to States for implementing truck safety programs which have been approved by the Secretary.

Requires the Secretary to write a yearly report to Congress outlining his progress in increasing truck safety on the Nation's highways.

Mr. President, the provisions which I have outlined would greatly enhance the effectiveness and efficiency of DOT in establishing truck safety. Abuse of present regulations has resulted in countless deaths, injuries, and loss of property. This situation will not improve by itself. The time to get tough is now. The Highway Users Foundation predicts that, during the next 15 years, the number of trucks on the roads will double. Our highways should not be deathtraps—they were built for the safe, enjoyable use by all Americans.

Congress must act decisively to bring about an increase in truck safety today. Passage of this legislation will help to assure that the law and related safety regulations are strictly enforced. This was the intent of Congress in creating the Department of Transportation in 1968 and this is what all Americans have a right to expect.

I ask unanimous consent that the bill and a section-by-section summary be printed in the RECORD.

There being no objection, the bill and the analysis were ordered to be printed in the RECORD, as follows:

S. 2970

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Truck Safety Act of 1978."

SEC. 2. The Congress finds that, because commercial motor vehicles pose a risk to public safety due to their extensive use and substantial size and weight, because existing regulations pertaining to the safe operation of commercial motor vehicles are inadequate, and because existing laws fail to protect driver-employees from discrimination arising from their efforts to promote compliance with safe operating procedures, it is, therefore, in the public interest to enhance commercial motor vehicle safety and to reduce highway fatalities, injuries, and property damage which may be attributed to these causes.

SEC. 3. It is declared to be the purpose of this Act to promote and protect the American public from the hazards of unsafe commercial motor vehicle operations, to provide drivers of commercial motor vehicles with safe and healthy working conditions, and to ensure prompt and continuous compliance by all persons subject to this Act with the rules and regulations issued hereunder.

SEC. 4. For the purposes of this Act—

(1) the term "Secretary" means the Secretary of Transportation;

(2) the term "person" means one or more individuals, partnerships, associations, corporations, business trusts, legal representatives, or any organized group of persons using or operating commercial motor vehicles in commerce;

(3) the term "commerce" means trade, traffic, or transportation within the jurisdiction of the United States between a place in a State and place outside of such State, or which affects trade, traffic, or transportation between a State and any place outside of such State;

(4) the term "employer" means any person engaged in a business affecting commerce who owns, leases, or operates commercial motor vehicles in connection with that business, or assigns employees to operate them in commerce, but such term does not include the United States, or any State, or political subdivision of a State;

(5) the term "State" means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, or Guam;

(6) the term "commercial motor vehicle" means any self-propelled or towed vehicle used on the highways in commerce principally to transport people, commodities, or equipment in commerce; and

(7) the term "Board" means the National Transportation Safety Board.

APPLICABILITY

SEC. 5. This Act shall apply to the safety of operation of all commercial motor vehicles over 10,000 pounds GVW (gross vehicle weight rating). It shall also apply to the maximum hours, qualifications, working conditions, and duties and responsibilities of all persons who operate such commercial motor vehicles.

DUTIES

SEC. 6. (a) Each employer shall provide to each of his employees safe vehicles and working conditions that are free from recognized hazards which cause or are likely to cause death or physical harm, and shall comply with the safety and health standards promulgated under this Act.

(b) Each employee shall comply with the safety and health standards and rules, regulations, and others issued pursuant to this Act which are applicable to his own actions and conduct.

REGULATORY AUTHORITY AND STANDARDS

SEC. 7. (a) In carrying out the provisions of 49 USC 1655(e), in accordance with section 5 of this Act, the Secretary shall establish, maintain, and monitor safety rules and regulations necessary to assure, to the extent practicable, that—

(1) commercial motor vehicles be so maintained as to enable their safe operation;

(2) the duration, frequency, and scheduling of the responsibilities of drivers of commercial motor vehicles does not unduly contribute to driver fatigue or to a driver's inability to operate safely; and

(3) the health and physical condition of drivers of commercial motor vehicles be adequate to enable them to safely drive the vehicles they customarily operate.

(b) The Secretary shall regulate the working conditions and operating practices of employees when operating commercial motor vehicles and shall establish, maintain, and monitor safety and health rules and regulations necessary to assure, to the extent technology permits, that no employee will suffer injury or material impairment of health or functional capacity due to his exposure to such working conditions during his working life.

(c) All rules and regulations issued under this section shall be promulgated in accordance with 5 USC 553 (without regard to sections 556 and 557 of such title).

(d) In promulgating, modifying, or revoking rules and regulations under this Act, the Secretary shall not in any material way reduce (i) the protections currently afforded employees operating commercial motor vehicles, or (ii) the safety and maintenance requirements provided by safety and health rules and regulations of commercial motor vehicle equipment.

(e) The Secretary shall conduct, directly or indirectly, the research, development, demonstrations, and training activities necessary to develop rules and regulations under this Section, to design and develop improved enforcement procedures and technologies, and to familiarize all affected persons with such rules and regulations.

RECORDKEEPING, INSPECTIONS, AND INVESTIGATIONS

SEC. 8. (a) The Secretary is authorized to require, by regulation issued pursuant to Section 553 of Title 5, United States Code, that persons subject to this Act establish and maintain such records, and make such reports as are necessary to ensure compliance with this Act so that reliable information can be developed concerning health and safety, vehicle conditions, employee qualifications and conduct, vehicle inspection and maintenance practices, and the safe operation of vehicles. In addition, where appropriate, any such regulation may prescribe the manner, type, and frequency of examinations by medical authorities or other tests which shall be provided by the employer to employees exposed to such hazards in order to permit the Secretary, employer, and employees, to most effectively determine whether the health and safety of such employees is adversely affected by such exposure.

(b) The Secretary is authorized, to the extent necessary to carry out his responsibilities under this Act, to conduct investigations and inspections, compile statistics, make reports, hold hearings, require by subpoena or otherwise the production of documents, records, and property, and take depositions. Whenever practicable, investigations and inspections under this subsection shall be conducted without advance notice. Subject to regulations issued by the Secretary,

representatives of the employer and his employees shall each be accorded an opportunity to be present and participate in any workplace inspection authorized under this subsection.

(c) Any person, including an employee or employee representative, who believes that a safety or health standard, requirement, or regulation issued under this Act is being violated, or has been violated within the preceding 90 days, may request an investigation by filing a written complaint with the Secretary setting forth with reasonable particularity the nature of the violation. Whenever the Secretary determines from the complaint that there are no reasonable grounds to believe that a violation exists or may have occurred, he shall timely notify the complainant in writing of his determination and the reasons therefore. Whenever the Secretary determines that there are reasonable grounds to believe that a violation exists or has occurred, he shall conduct an investigation as soon as practicable, shall timely notify the complainant of his findings, and shall take such further action as may be appropriate for carrying out the purposes of this Act. The Secretary shall not disclose the identity of complainants unless he determines that such disclosure is necessary to prosecute a violation. If disclosure becomes necessary, the Secretary shall take every measure to assure that the complainant is not subject to harassment, intimidation, or financial loss as a result of such disclosure.

CITATIONS, ORDERS, AND PENALTIES

SEC. 9. (a) If, upon inspection or investigation, the Secretary finds that a material health or safety violation exists or has occurred, he shall timely issue a citation. Each citation shall be in writing and shall describe with reasonable particularity the nature of the violation found and the section of the Act, rule, standard, regulation, or order which has been violated. The citation shall fix a reasonable time for abatement of the violation, and shall assess a civil penalty not to exceed $2,500 for each offense. If the Secretary determines that a substantial health or safety violation exists or has occurred which could reasonably lead to, or has resulted in, serious personal injury or death, he may assess a civil penalty not to exceed $10,000 for each offense. Each day of such violation determined by the Secretary under this section shall constitute a separate offense. In determining the amount of the penalty, the Secretary shall take into account, but need not make specific findings of fact concerning, the nature, circumstances, extent and gravity of the violation committed and, with respect to the person found to have committed such violation, the degree of culpability, past history of compliance, and other matters as justice and public safety require. In each case, the assessment shall be reasonably calculated to induce further compliance.

(b) The Secretary shall further require any persons served with a citation to post it or notice thereof in such place or places and for such duration as the Secretary may deem appropriate to aid in the enforcement of the Act.

(c) The Secretary shall promulgate regulations establishing penalty schedules designed to induce timely compliance for persons failing to comply promptly with the requirements set forth in citations and orders.

(d) Any person who knowingly and willfully violates any standard, rule, regulation, or order under this Act or who knowing and willfully makes any false statement or representation required under this Act shall, upon conviction, be subject for each offense to a fine not to exceed $25,000, or imprisonment for a term not to exceed one year, or both.

(e) All penalties and fines imposed under this section shall accrue and be payable to the Highway Trust Fund.

ENFORCEMENT AND REVIEW

SEC. 10. (a) If, after investigation, the Secretary issues a citation or order under this Act, he shall timely serve a copy upon the violator either by certified or registered mail or by personal service, together with notice that the violator has fifteen working days within which to notify the Secretary that he wishes to contest the citation or order. If within the fifteen working days from the receipt of the citation or order issued by the Secretary the violator fails to notify the Secretary that he intends to contest the citation or order, it shall be deemed final and shall not be subject to review by any court or agency.

(b) If a violator notifies the Secretary that he intends to contest a citation or order issued under this Act, the Secretary shall promptly advise the National Transportation Safety Board of such notification, and the Board shall afford the violator an opportunity for a hearing in accordance with Section 554 of Title 5, United States Code. The commencement of proceedings under this subsection shall not, unless ordered by the Board, operate to stay the citation or order. The Board shall thereafter issue an order based on findings of fact, affirming, modifying, or vacating the Secretary's citation or order, or directing other appropriate relief, and such order shall become final and not subject to review thirty days after its issuance. The Board shall promulgate reasonable rules of procedure for the conduct of such proceedings provided, however, that such rules give an opportunity to affected persons to participate as parties.

(c) Any person adversely affected or aggrieved by an order of the Board issued under this section may obtain review of such order in any United States Court of Appeals for the circuit in which the violation is alleged to have occurred or where the violator has his principal place of business, or in the Court of Appeals for the District of Columbia circuit, by filing in such court within thirty days following the issuance of such order a written petition praying that the order be modified or set aside. A copy of such petition shall be forthwith transmitted by the clerk of the court to the Board and to the other parties, and thereupon the Board shall file in the court the record of the proceedings as provided in 28 USC 2112. Upon such filing, the court shall have jurisdiction of the proceedings and of the question determined therein, and shall have power to grant such temporary relief or restraining order as it deems just and proper, and to make and enter upon the pleadings, testimony, and proceedings set forth in such record a decree affirming, modifying, or setting aside, in whole or in part, the order of the Board and enforcing the same to the extent that such order is affirmed or modified. The commencement of proceedings under this subsection shall not, unless ordered by the court, operate as a stay of the order of the Board. No objection that has not been urged before the Board shall be considered by the court, unless the failure or neglect to urge such objection shall be excused because of extraordinary circumstances. The finding of the Board with respect to questions of fact shall be conclusive if supported by substantial evidence on the record considered as a whole. Upon the filing of the record with the court, its jurisdiction shall be exclusive and its judgement and decree shall be final, except that the same shall be subject to review by the Supreme Court of the United States, as provided in Section 1254 of Title 28, United States Code. Petitions filed under this subsection shall be heard expeditiously.

(d) The Secretary may also obtain review of any final order of the Board by filing a petition for such relief in the United States Court of Appeals for the circuit in which the alleged violation occurred or in which the violator has his principal place of business.

(e) Any fine or assessment modified or abated by the Board or a court under this section shall be returned with interest to the violator.

(f) The Secretary may obtain enforcement, including injunctive relief, of any uncontested citations or orders issued under this section by applying to the United States district court for the district where the violation occurred or where the cited party has his principal office or residence. All findings of fact, conclusions of law, fines, penalties, and orders, issued by the Secretary or the Board shall be conclusive and shall not be subject to review under this subsection. In addition to granting enforcement, the district court shall assess an appropriate penalty for noncompliance and award such further relief as justice and public safety require.

SEC. 11. Except as provided in Section 518(a) of Title 28, United States Code, relating to litigation before the Supreme Court, the General Counsel of the Department of Transportation may appear for and represent the Secretary in proceedings before the Board and in any civil litigation brought under this Act but all such litigation shall be subject to consultation with and the concurrence of the Attorney General.

EMPLOYEE SUITS

SEC. 12. (a) No employer shall discharge or in any manner discriminate against an employee because such employee has filed any complaint or instituted or caused to be instituted any proceeding under, or relating to, any standard, requirement, or regulation issued under this Act, or has testified, or is about to testify, or has participated in any way, in such proceeding.

(b) No employer shall discharge or in any manner discriminate against an employee for refusing to operate equipment subject to motor carrier safey regulations in violation of hours of service regulations or because of the employee's reasonable apprehension of serious injury to himself or the public due to the unsafe condition of such equipment. The unsafe conditions causing the employee's apprehension of injury must be of such a nature that a reasonable person, under the circumstances then confronting the employee, would conclude that there is a bona fide danger of an accident resulting from the unsafe condition. In order to qualify for protection under this subsection, the employee must have sought from his employer, and have been unable to obtain, correction of the unsafe condition.

(c) Any employee who is discharged or in any manner discriminated against in violation of this Section shall be entitled to (i) reinstatement to his former position and to be made whole for lost compensation and benefits, (ii) compensatory damages, and (iii) where appropriate under the circumstances, exemplary damages.

(d) Suits to enforce the provisions of this Section may be brought in the United States district court in the district in which the employer owns or leases facilities or in the United States district court in the district within which the employee has been discriminated against or has received notice of discharge. No suit may be instituted to enforce such provisions more than six months after written notice of discharge is received by the employee concerned, or more than six months after the discriminatory practices have been discontinued, whichever is later.

(e) Whenever an order is issued under this Section, the court at the request of the complainant, may assess against the person committing the violation a sum equal to the aggregate amount of all costs and expenses,

including attorney's fees, reasonably incurred by the complainant for, or in connection with, the institution and prosecution of such proceedings.

STATE ENFORCEMENT

SEC. 13. (a) (1) Any State agreeing to adopt, and to assume responsibility for enforcing, the standards, requirements, and regulations issued under Section 7 of this Act shall submit a plan which shall be approved by the Secretary if, in his judgment, the plan is adequate to promote the objectives of this Act, and the plan—

(i) designates a State agency responsible for administering the plan through the State;

(ii) provides a right of entry and inspection comparable to the Secretary's right under Section 8(b) of this Act;

(iii) contains satisfactory assurances that such agency has or will have the legal authority, resources, and qualified personnel necessary for the enforcement of such rules and regulations;

(iv) gives satisfactory assurances that such State will devote adequate funds to the administration of such plan and enforcement of such rules and regulations;

(v) requires employers, owners, and lessees of commercial motor vehicles to make all reports pursuant to this Act to the Secretary; and

(vi) provides that such State agency will adopt uniform reporting requirements and use uniform forms for recordkeeping, inspections, and investigations as may be established and required by the Secretary.

(2) If the Secretary rejects a plan submitted under the foregoing paragraph, he shall provide the State a written explanation of his action and shall permit the State to modify and resubmit its proposed plan for approval.

(b) The Secretary shall, on the basis of reports submitted by the State agency, and on his own inspections, make a continuing evaluation of the manner in which each State having a plan approved under this section is carrying out such plan. Whenever the Secretary finds, after affording due notice and opportunity for comment, that a State plan previously approved is not being followed, or that it has become inadequate to assure the enforcement of rules and regulations issued under this Act, he shall notify the State of his withdrawal of his approval of such plan and upon receipt of such notice, such plan shall cease to be in effect. The State may, however, retain jurisdiction in any case commenced before the withdrawal of the plan whenever the issues involved do not directly relate to the reasons for the withdrawal of approval of the plan.

(c) There is hereby authorized to be appropriated out of the Highway Trust Fund a sum not to exceed $100,000,000 for the fiscal year beginning October 1, 1979, and each fiscal year thereafter, to provide incentive assistance to States to develop and institute enforcement plans under this Section. No state shall receive under this Section during any fiscal year grants exceeding eighty per centum of the cost during such year of developing and implementing its plan. The Secretary is authorized to allocate amounts appropriated under this subsection pursuant to an equitable formula to those States administering plans under this Section.

SAFETY REPORTS

SEC. 14. The Secretary shall make a comprehensive written report to the Congress by July 1 of each year concerning his efforts during the preceeding calendar year, and his current plans to increase motor vehicle and driver safety. The report shall include, but not be limited to, an evaluation of the Department of Transportation's commercial motor vehicle safety program, an outlining of problem areas and appropriate steps to alleviate them, and any recommendations for closer coordination and cooperation among agencies of the Federal Government and between the Federal Government and the States to enforce the standards requirements, and regulations issued pursuant to this Act.

SEC. 15. Section 304(a) of the Independent Safety Board Act of 1974 is amended by striking "and" at the end of clause (8), striking the period at the end of clause (9), and inserting in lieu thereof a semicolon and the word "and" and inserting after such clause (9) the following:

"(10) review or appeal in accordance with section 10 of the Truck Safety Act of 1978 an order issued by the Secretary of Transportation under section 7 of such Act."

SEC. 16. Nothing in this Act shall be construed to amend or modify the National Labor Relations Act or the Railway Labor Act.

SEC. 17. Nothing in this Act shall diminish the existing functions, powers and duties of the Interstate Commerce Commission which shall consider the public safety and a carrier's record of compliance with safety regulations as a principal criteria in determining whether to confer operating authority upon motor carriers pursuant to Part II of the Interstate Commerce Act (49 U.S.C. 301, et seq.).

SEC. 18. Nothing in this Act shall prevent any State agency or court from asserting jurisdiction under State law over any safety or health issue involving commercial motor vehicles with respect to which standard, rule, or regulation the Secretary has not addressed under this Act.

AUTHORIZATIONS OF APPROPRIATIONS

SEC. 19. There are authorized to be appropriated to carry out this Act for each fiscal year such sums as the Congress shall deem necessary.

EFFECTIVE DATE

SEC. 20. (a) Except as provided in this section, the provisions of this Act shall take effect immediately on the date of enactment.

(b) The Secretary shall, by regulation promulgated pursuant to section 553 of Title 5, United States Code, take all steps necessary to bring all orders, determinations, rules, and regulations into conformity with the purposes and requirements of this Act as soon as practicable.

(c) All orders, determinations, rules, and regulations issued under section 204(a) (1), (2), (3), (3a), (5) of the Department of Transportation Act shall be continued under this Act until such time as they may be modified by the Secretary.

(d) Judicial proceedings pending upon the date of enactment of this Act shall not be affected by the provisions of this Act.

SECTION BY SECTION SUMMARY OF THE TRUCK SAFETY ACT OF 1978

Section 1: Short title.

Section 2: Finds that it is in the public interest to enhance motor vehicle safety and to reduce highway fatalities, injuries, and property damage which may be attributed to the extensive use and substantial size and weight of trucks, to the inadequacy of existing laws pertaining to the safe design and operation of trucks, as well as to the failure of existing laws to protect driver-employees from discrimination arising from their efforts to promote compliance with safe operating procedures.

Section 3: States that the purpose of this Act is to protect the public from the hazards of unsafe trucking operations, to provide drivers with healthy, safe working conditions, and to ensure prompt compliance with safety regulations and rules by all persons subject to this Act.

Section 4: Definitions section.

Section 5: Applies the provisions of the Act to the safe operation of any truck over 10,000 pounds gross vehicle weight rating. The Act also applies to the maximum hours, qualifications, working conditions, and duties and responsibilities of all persons who operate trucks in commerce.

Section 6: Requires each employer to provide his employees with safe vehicles and safe working conditions, and to comply with all safety and health standards promulgated under the Act. Employees likewise must comply with all regulations which are applicable to their conduct.

Section 7: Requires the Secretary of Transportation to establish, maintain, and monitor safety rules and regulations necessary to ensure that trucks can be operated safely, that the frequency and duration of driver duties do not unduly contribute to fatigue or an inability to drive safely, and that drivers be physically fit to drive safely. DOT is further authorized to conduct research, development, demonstration, and training activities necessary to establish regulations and improve enforcement procedures and technologies.

Section 8: Authorizes DOT to require reports and records of employers and employees, to prescribe the type and frequency of medical examinations of employees, to conduct on-the-spot inspections and investigations without advance notice, and to establish uniform reporting requirements and forms for recordkeeping, inspections, and investigations by Federal, State, and local jurisdictions. Any person who believes that a safety regulation has been violated within the preceding 90 days may request an investigation by federal officials.

Section 9: Raises the maximum fine from $500 to $2,500 for most substantial offenses, and $10,000 for very serious violations of truck safety regulations. DOT is authorized to establish penalty schedules to induce timely compliance with citations. Establishes a criminal offense for knowingly and willfully violating any provision of this measure or for any false statement made pursuant to any requirement under the Act. It calls for a maximum fine of $25,000 and/or 1 year imprisonment. All pentities and fines collected would be payable to the Highway Trust Fund.

Section 10: Creates a new enforcement and review procedure. After DOT issues a citation for a violation of law, the violator has 15 days in which to notify DOT of his desire to contest the citation. If he wishes to contest the charge, the National Transportation Safety Board would act as a review panel to either affirm, modify, or vacate the citation. If a violator wishes to apepal the decision further, the U.S. Court of Appeals would have jurisdiction. District courts would have the authority to enforce any uncontested citations or orders.

Section 11: Permits the General Counsel of the Department of Transportation to represent the Secretary of Transportation in any civil litigation brought under this Act.

Section 12: Establishes that no employer may discharge or discriminate against an employee for filing a complaint relating to any truck safety regulation, or for testifying in any proceeding relating to safety, or for refusing to operate equipment because of his reasonable apprehension of serious injury to himself or the public due to the unsafe condition of equipment. Any employee who shows in court that he has indeed been discharged or discriminated against for these reasons would be entitled to be reinstated to his former position, to be made whole for lost compensation and benefits, and to recover compensatory damages, and, where appropriate, exemplary damages.

Section 13: Provides incentives up to 80% reimbursement to any State that agrees to adopt federal truck safety measures, and to assume responsibility for enforcing the

requirements issued under Section 7 of the Act. To be eligible, such State must implement a plan which has been approved by DOT.

Section 14: Require DOT to submit to Congress a yearly safety report concerning its efforts to improve trucking safety and its plans for the future to further improve trucking safety.

Section 15: Amends the Independent Safety Board Act of 1974 to allow the National Traffic Safety Board to act as a review panel under Section 10 of this Act.

Section 16: Clarifies that the Act shall not affect union procedures as established under the National Labor Relations Act and the Railway Labor Act.

Section 17: States that this Act shall not diminish the existing functions and duties of the Interstate Commerce Commission which will continue to consider a carrier's safety record as a principal criteria in granting authority.

Section 18: Allows State agencies and courts to assert jurisdiction under State law over any health or safety issue which the Secretary has not addressed.

Section 19: Authorizes such funds as necessary to carry out this Act, to be appropriated by the Congress.

Section 20: Stipulates that the provisions of the Act will take effect as of the date of enactment.●

By Mr. RIBICOFF (for himself, Mr. PERCY, Mr. JAVITS, Mr. KENNEDY, Mr. CLARK, and Mr. STAFFORD):

S. 2971. A bill to require public disclosure of certain lobbying activities to influence issues before the Congress and the executive branch, and for other purposes; to the Committee on Governmental Affairs.

LOBBYING REFORM ACT OF 1978

● Mr. RIBICOFF. Mr. President, today I am introducing legislation to replace the Federal Regulation of Lobbying Act of 1946. The bill is cosponsored by Senators PERCY, JAVITS, KENNEDY, CLARK, and STAFFORD.

This bill responds to many of the concerns of witnesses who have testified before the Governmental Affairs Committee in the 94th or 95th Congress. It is based on all the work the committee and the Senate has done in this area since 1975.

The failures of the present law are well documented. Almost every one of the witnesses who testified before the Governmental Affairs Committee in the 94th and 95th Congresses acknowledged that the present law is too limited in scope, too vague, and too difficult to enforce. As a result, many organizations who engage in extensive direct lobbying do not register or report under the law. Large grassroots lobblying solicitation campaigns go unreported.

Lobbying is a vital part of the legislative process. Indeed, a democracy depends on communications between the people and their representatives in Congress.

Yet if people are to have faith in the democratic process, that process cannot be shrouded in secrecy. The people have a right to know which special interests are seeking in an organized and systematic way to influence the way the public's business is conducted. That is the fundamental idea behind this lobbying disclosure legislation. At the same time, it is very important that any lobbying law not infringe upon first amendment rights.

In the 94th Congress the Senate approved a new lobbying law by a vote of 82 to 9. The House, too, passed a lobbying disclosure bill, but unfortunately it was too late in the session to reconcile the versions of the two Houses.

In the 95th Congress, the committee has held 3 additional days of hearings on S. 1785 introduced by Senators KENNEDY, STAFFORD, and CLARK, and S. 2026, introduced by Senators MUSKIE and MATHIAS.

The bill I am introducing today builds on the extensive work the committee did on lobbying legislation last Congress. It also builds on the legislation subsequently introduced in this Congress, especially S. 1785. This bill strikes a careful balance between the need for disclosure and the protection of first amendment rights. It avoids excessive paperwork or unduly burdensome reporting requirements.

The bill will only require organizations with paid employees to register as lobbyists and file quarterly reports on their activities.

The bill contains different definitions of a lobbying organization applicable to different types of activities. An organization must register if during a 3-month period it:

Expends $1,250 on hiring outside lobbyists;

Compensates its own employees to lobby Congress on a total of 15 or more occasions, or has one employee who spends 24 hours, or two or more employees who each spend 12 hours, lobbying on behalf of the organization; and

Spends over $5,000 or more on letter-writing or other grassroots campaigns requesting people to write Congress in support or opposition to a bill in Congress.

The bill includes a number of safeguards to protect communications between Congress and the public. For example, all communications between a Member of Congress and constituents from the State the Congressman or Senator represents are exempted.

Once an organization is a lobbyist it must register once a year and file lobbying reports each quarter. The registration will disclose basic information about the identity and nature of the organizations and its legislative interests. The quarterly reports will identify the issues on which the organization lobbied—but not the Members of Congress it lobbied on the issues—the identity of the individuals who lobbied for the organization, the gifts it made, and in some cases information about the total amount of money the organization spent lobbying during the period. The organization will also briefly describe the size and nature of any grass-roots lobbying campaign the organization conducted.

A separate section requires similar information about organizations which bid on the largest contracts—about 600 a year—which the Government awards. The General Accounting Office is responsible for administering the act.

The following are among the bill's most important safeguards which have been added to the legislation since it was considered and approved by the Senate in the last Congress:

First. All communications between an organization and any Congressman or Senator from the organization's State are exempted from the definition of a lobbyist.

Second. The bill, as in S. 1785, establishes two different categories of lobbyists depending on the amount of lobbying the organization does. Lobbyists who fall in the first category because they do relatively less lobbying must report less. I recognize that concerns have been raised about the complexity of this "two-tier" approach. The bill the Senate passed last Congress contained a single threshold which required any organization that engaged in 12 or more oral lobbying communications to file full information with the General Accounting Office. A single threshold based on the number of oral lobbying communications an organization makes is an alternative resolution of this issue which should also be considered. I look forward to more discussion on this point during committee consideration of the legislation.

Third. The bill deletes all requirements that the lobbying organization identify any individuals who contribute money to the lobbying organization. The number of organizations that must be identified as contributors to a lobbying organization has been substantially reduced.

Fourth. The bill only covers organizations with one or more full-time employees. Thus a small organization which can afford only occasional or part-time employees will not be subject to any of the bill's requirements.

Fifth. The financial expenditure information which an organization must file has been simplified. Organizations will not have to keep track of the time employees spend doing research or other work related to lobbying unless the employee actually lobbies on behalf of the organization, and the employee spends a total of 12 hours or more during the quarter lobbying or doing related work.

Sixth. The amount of information which an organization must report about its grass-roots lobbying solicitations has been substantially reduced.

Seventh. The requirement that organizations report on their efforts to secure contracts from the Government has been reduced. The number of contracts covered and the information required have both been pared significantly.

The following is a summary of the chief elements of the bill I am introducing today:

I. WHO MUST REGISTER

Only organizations with one or more full-time paid employee must register. Individuals will never have to register.

The bill establishes separate definitions of a lobbyist depending on the type of lobbying involved.

An organization will file abbreviated registration and reporting forms if it engages through its own paid employees in 15 or more oral lobbying communications in a quarterly period. Written lob-

bying communications do not count in determining whether an organization must register under this test.

An organization must register and file full reports if it—

Pays an outside lobbyist $1,250 or more in any quarterly period to lobby on behalf of the organization;

Employs one individual who spends 24 hours or more, or two individuals who each spend 12 hours or more in a quarter, actually engaged in making lobbying communications on behalf of the organization;

Spends over $5,000 in a quarter financing a mail-writing campaign or otherwise organizing a grass-roots lobbying campaign encouraging others to write Congress about an issue.

The bill specifically excludes communications between an organization and all the Senators and Congressmen from the State where the organization is located. Such communications can never make an organization a lobbyist. This provision will especially benefit small, locally based organizations which usually confine themselves to contacting Members of Congress from their own State.

Other safeguards included in the bill's definition of a lobbyist include the following:

First. The organization must have one or more paid officers, directors, or employees, who must be employed on a full-time basis. To be paid for purposes of this bill, the employee must receive compensation at a rate at least equal to the minimum wage.

Second. The organization's lobbying must be done by these paid officers, directors, or employees, and not by volunteers. The paid officers, directors, or employees must lobby Congress on behalf of the organization.

Third. Communications are not included in determining whether an organization is a lobbyist if they only seek information about the status of a bill, or otherwise are not intended to influence an issue before Congress.

Fourth. Even oral communications which are intended to influence an issue before Congress are not included in determining whether an organization is a lobbyist if they are contained in testimony delivered to Congress.

The following are examples of how these definitions would apply to different organizations:

First. A large national trade association that lobbies Congress directly through lawyers it hires will have to register and report whenever it pays the outside lobbyist more than $1,250 in a quarter. Another public interest group headquartered in Washington must register because two or more of its own paid employees each spends 12 hours or more during the quarter in conversations with Congressmen or their staff, or one of its paid employees spends 24 hours or more in such conversations.

Second. A smaller public interest organization seeking to influence legislation also has paid employees who orally discuss issues with Congressmen or their staff 15 or more times, but no one employee spends 24 hours, or two employees 12 hours, engaged in such activities. The organization will have to register and report under the act. But they will not have to file as much information as organizations who do enough lobbying to meet the higher threshold described in the first example.

Third. A national public interest group or a business group spends over $5,000 preparing and mailing letters to its members or other individuals or groups requesting the recipient to write their Congressmen about a particular issue. The organization must register and disclose that it made this solicitation. The local groups which receive the letters may in turn talk to their Congressman as a result of such letter, but this would not make the local groups lobbyists as well.

Fourth. An individual citizen, concerned about the safety of children's toys, journeys to Washington and talks on his own behalf to staff assistants in the offices of 80 different Congressmen or Senators. The citizen is not a lobbyist because he is simply an individual expressing, on his own behalf, his personal concern about a matter.

II. WHAT MUST A COVERED ORGANIZATION DISCLOSE

The bill requires any organization that is a lobbyist under any of the different tests to register once a year. It must in addition file quarterly reports on its activities.

Organizations which must register and report because they engage in 15 or more oral lobbying communications must provide less information than an organization that meets any of the higher tests. Most expenditure reporting is eliminated for organizations that do not meet the higher tests.

A. REGISTRATION

The annual registration must provide basic information about the identity and nature of the organization. The information that will appear on the registration will include:

The identity of the organization and any affiliates; and

The approximate number of individuals and organizations who were members or contributors to the organization.

In addition, those organizations that must file complete information must:

Identify any retained lobbyist or any paid employee who spends 12 hours or more engaged in lobbying;

If it is a voluntary membership organization, briefly describe the kinds of general procedures it follows when deciding what its views on issues before Congress will be;

Identify any other organization which directly, or through an individual contributed funds to the registered organization to be used in whole or in part for lobbying, as well as the general range of the size of the contribution. This requirement only applies, however, where the contribution was $3,000 or more and accounted for 1 percent or more of the organization's total budget in the past year.

B. QUARTERLY REPORTS ON ACTIVE LOBBYING ACTIVITIES

Any registered organization must disclose on a quarterly basis:

A description of the 10 issues on which the organization spent the most time;

A description of any gift over $35 to a Congressman or staff, and a description of any congressional reception costing $500 or more.

In addition, an organization that must file the more complete information will also:

Describe any additional issues (up to 30) on which the organization lobbied;

Estimate the total amount it spent on lobbying communications and lobbying solicitations, as well as the amount paid to an outside lobbyist to lobby on any issue;

Identify any chief executive officer or principal operating officer who lobbied, any paid employee who spent 12 hours or more engaged in lobbying, and any retained outside lobbyists—along with the issues on which any such individuals lobbied.

These reporting requirements are designed to avoid imposing burdensome recordkeeping requirements on any organization. The bill provides that when reporting lobbying expenditures, the organization does not have to include the salary of any employee who does not actually engage in one or more lobbying communications for the organization. Employees who only do research or prepare material used by others in lobbying are excluded. In addition, the salaries of employees who do lobbying must be reported only if the employee spends 12 hours or more in a quarter making lobbying communications or solicitations, or in the actual preparation of lobbying communications or solicitations.

This will considerably reduce recordkeeping and paperwork for all organizations. To facilitate compliance with the law, the bill provides that an organization may, at its discretion, report an employee's whole salary rather than allocate the portion of the employee's salary spent directly on lobbying.

C. QUARTERLY REPORTS ON GRASS-ROOTS LOBBYING EFFORTS

Any organization that qualifies under the bill as a lobbyist must also report on general letterwriting or other grass-roots lobbying campaigns it finances.

An organization that qualifies for the abbreviated form must only report on any solicitations it made in written form or through advertisements. The information must include:

A description of the means employed to make the solicitation (letterwriting, TV ads or the like), the issue involved, and an indication whether the recipient was in turn asked to solicit others;

If the solicitation is conducted through a paid advertisement, an identification of where it appeared; and the approximate number of persons directly solicited through the mail.

Organizations that do not qualify for the abbreviated form must provide, in addition to the above information, the following information about any general solicitation:

The identity of any outside person it retained to make the solicitation;

The approximate number of its own affiliates it solicited;

The total direct cost of any solicitation conducted through an advertisement if the cost exceeded $5,000.

A national trade association would thus have to describe the number of times it asked its affiliates or members throughout the country to write Congress supporting or opposing a particular issue. An organization would also have to disclose the fact that it spent tens of thousands of dollars taking ads out throughout the country requesting the public to write Congress supporting or opposing a particular bill.

A locally based organization that spends $500 distributing flyers at a local shopping center, in addition to lobbying its own Congressmen, would not be a lobbyist. It would not have to file reports on its local solicitation effort.

III. LOBBYING ON GOVERNMENT CONTRACTS

The bill requires that any organization that submits a bid or proposal on a Government contract worth $10 million or more must file annual reports with the contracting agency and the Comptroller General until the award of the contract. This section's reporting requirements will apply to organizations whether or not the organization does enough lobbying on Congressional issues to make the rest of the bill's provisions applicable. Grants are not included within the scope of the provision. Coverages of only those contracts worth over $10 million will focus the section on the relatively few contracts which nevertheless account for about 40 percent of the total annual value of Government contracts.

The reports concerning lobbying on Government contracts must contain the following information:

Identification of the organization;

Description of the contract;

Identification of any employee who seeks to influence the award if he or she is a former employee of the contracting agency, or the chief executive officer or principal operating officer of the organization;

Identification of any person retained to make lobbying communications, the amount of the retainer, and whether the employee is a former employee of the agency;

Record of gifts worth more than $35 to an employee of the contracting agency and the identity of the employee;

A listing of receptions held in whole or in part for employees of the contracting agency if the cost of the event exceeds $500.

In order to avoid any burdensome recordkeeping requirements, the bill does not require the organization to report on what it cost the organization to bid on the contract.

IV. ADMINISTRATION AND ENFORCEMENT

The General Accounting Office will be responsible for the administration of the law. The GAO will have the authority to promulgate rules, issue advisory opinions, subpena documents, and compile reports. GAO would have the initial authority to investigate an alleged violation of the law.

If the Comptroller General determines that there is reason to believe the law has been violated he must try to correct the matter by informal methods of conference and conciliation or refer the apparent violation to the Attorney General. The Justice Department has primary authority to bring a civil enforcement action and exclusive authority to bring a criminal enforcement action. GAO may only initiate a civil action if the Justice Department fails to act on an apparent violation referred to it by the Comptroller General.

Civil violations of the law are punishable by a $5,000 penalty. Only if a person knowingly and willfully violates the law can a criminal fine be imposed.

In order to make sure that unwary organizations are not penalized for their lack of knowledge about the law, the bill provides that no organization will be subject to civil sanctions for failure of the organization to register for the first time under the act, unless the failure to do so was a knowing violation of the law.

I hope the committee and the Senate can rapidly conclude its consideration of lobbying reform legislation so that by the end of this year the Nation may finally have a lobbying law worthy of its name.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2971

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Lobbying Reform Act of 1978".

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds—

(1) that the enhancement of responsible representative government requires that the fullest opportunity be afforded to the people of the United States to exercise their constitutional right to petition their Government for a redress of grievances, to express their opinions freely to their Government, and to provide information to their Government; and

(2) that the identity and extent of the activities of organizations which pay others, or engage on their own behalf in certain efforts, to influence an issue before Congress or the executive branch should be publicly and timely disclosed in order to provide the Congress, the executive branch, and all members of the public with a fuller understanding of the nature and source of such activities.

(b) It is the purpose of this Act to provide for the disclosure to the Congress, the executive branch, and to all members of the public of such efforts without violating the right to petition the Government for a redress of grievances or other constitutional rights.

DEFINITIONS

SEC. 3. As used in this Act:

(a) "Affiliates" includes organizations or other groups of persons which are associated with each other through any type of formal relationship, such as through ownership, the election of officers or directors, through franchise agreements, through common funding, or through common adherence to a charter of organization bylaws, whether or not one such person controls the policies or actions of the other, but does not include an informal or ad hoc alliance or coalition.

(b) "Chief executive officer" means the individual with principal authority to influence the overall direction of the organization's policies and activities.

(c) "Comptroller General" means the Comptroller General of the United States.

(d) "Expenditure" means—

(1) a payment, distribution (other than normal dividends and interest), loan, advance, deposit, or gift of money or other thing of value, made—

(A) to, on behalf of, or for the benefit of a Federal officer or employee; or

(B) for mailing, printing, advertising, telephones, fees, salary, travel, educational materials or the like which are attributable to activities related to lobbying communications or solicitations, and for costs attributable partly to such activities, where such costs may, with reasonable preciseness and ease, be directly allocated to activities related to such communications and solicitations, except that (i) costs partly attributable to such activities shall not be included if they are incurred for a regular publication of a voluntary membership organization where such publication is primarily devoted to purposes other than lobbying solicitations; and (ii) costs shall not be included for the salary of any employee of the registered organization unless the employee engages in one or more lobbying communications on behalf of the organization during the quarterly filing period and the employee spends a total of 12 hours or more during the period engaging in lobbying communications or lobbying solicitations, or in the actual preparation of lobbying communications or solicitations; or

(2) a contract, promise, or agreement, whether or not legally enforceable, to make, disburse, or furnish any item referred to in paragraph (1).

The term "expendtiure" shall not apply to any practices or activities regulated by the Federal Election Campaign Act of 1971, any loan made on terms and conditions that are no more favorable than those aavilable to the general public, or any gift or loan to any individual who is an immeidate member of the family of the donor or lender.

(e) "Federal officer or employee" means—

(1) any Member of the Senate or the House of Representatives, any Delegate to the House of Representatives, and the Resident Commissioner from Puerto Rico in the House of Representatives;

(2) any officer, employee, or consultant of the Senate or the House of Representatives, or any employee or consultant of any Member, committee, or officer of the Congress; or

(3) any employee of the executive branch of the Government listed in sections 5312 through 5316 of title 5, United States Code, or holding a position within the scope of the General Schedule for grades 15 and above (5 U.S.C. 5332) or holding a commission within the scope of pay grade O–6 and above (37 U.S.C. 1009).

(f) "Identification" means—

(1) in the case of an individual, the name and personal or business address of the individual, and any position held in the organization identifying the individual pursuant to the registration and reporting requirements of this Act; and

(2) in the case of an organization, the name and address of the organization, the principal place of business of the organization, the nature of its business or activities, and the names of the chief executive officer and the directors of the organization, regardless of whether such officers or directors are paid.

(g) "Lobbying communication" means an oral or written communication directed to a Federal officer or employee to influence the content or disposition of any issue before Congress, including any pending or future bill, resolution, treaty, nomination, hearing, report, or investigation, but does not mean—

(1) a communication (i) made by any employee of the Federal Government or (ii) made in the form of public testimony given before a committee or office of the Congress

or submitted for inclusion in the public record;

(2) a communication by an individual, acting solely on his own behalf, for redress of his personal grievances, or to express his personal opinion; or

(3) practices or activities regulated by the Federal Election Campaign Act of 1971.

(h) "Lobbying solicitation" means an oral or written communication intended to influence the resolution of any issue before Congress by urging, requesting, or requiring another person to communicate with a Federal officer or employee with respect to such issue, but does not mean—

(1) a communication by an individual, acting solely on his own behalf, for redress of his personal grievances, or to express his personal opinion;

(2) a communication made through a public speech or address, through a newspaper, magazine, book, periodical, or other publication distributed to the general public, or through a radio or television broadcast: *Provided,* That this exemption shall not apply to an organization responsible for the purchase of a paid advertisement in such publication or broadcast;

(3) practices or activities regulated by the Federal Election Campaign Act of 1971; or

(4) a communication made in person by one organization registered under this Act to an affiliated organization registered under this Act.

(i) "Organization" means any organization which has one or more paid officers, paid directors, or paid employers who work for the organization on a full-time basis. The term "organization" includes any corporation, company, foundation, association, labor organization, firm, partnership, society, joint stock company, organization of State or local-elected or appointed officials (excluding any Federal, State, or local unit of government or Indian tribe, any Federal, State, or local unit of government of another country, any National or State political party, and any organizational unit thereof), group of organizations, or any group of individuals.

(j) "Paid officer, paid director, or paid employee" means an officer, director, or employee who receives income for his services, other than personal travel expenses, at a rate equal to, or in excess of, the standard Federal minimum wage. An officer, director, or employee who is not employed on a full-time basis is included within this definition if the effective hourly rate at which such individual is compensated exceeds the effective hourly rate of a full-time employee who receives income at a rate equal to, or in excess of, the standard Federal minimum wage.

(k) "Personal travel expenses" means any sum expended by any organization in payment or reimbursement of the cost of any transportation for any agent engaging on behalf of the organization in activities related to lobbying communications, plus any sum received on an occasional basis by such agent as a per diem allowance as is not in excess of the maximum applicable allowance payable under section 5702(a) of title 5, United States Code, to employees of the executive branch subject to such section.

(l) "Principal operating officers" means the individuals employed by an organization on a full-time basis charged with managerial responsibility for the conduct of the organization's affairs who (1) report directly to the organization's chief executive officer or (2) are members of the organization's highest managerial policymaking body responsible for the direction of the organization's day-to-day operations.

(m) "Quarterly filing period" means any calendar quarter beginning on January 1, April 1, July 1, or October 1.

(n) "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

APPLICABILITY OF LOBBYING REGISTRATION AND REPORTING REQUIREMENTS

SEC. 4. (a) The lobbying registration and reporting requirements of section 5(a) and 5(b) and section 6 shall apply to any organization which, acting through its own paid officers, paid directors, or paid employees, engages in fifteen or more oral lobbying communications in any quarterly period.

(b) The lobbying registration and reporting requirements of section 5 and section 7 shall apply in their entirety to any organization which—

(1) makes expenditures of $1,250 or more, other than personal travel expenses, in any quarterly filing period for the retention of one or more other persons to engage in lobbying communications or for the actual drafting of such communications, where each such person makes one or more oral or written lobbying communications on behalf of the organization: *Provided,* That this paragraph shall not apply to expenditures made to an individual in his capacity as an officer, director, or employee of the organization; or

(2) employs at least one paid officer, paid director, or paid employee who spends a total of twenty-four hours or more in any quarterly filing period, or employs two or more such individuals, each of whom spends twelve hours or more in any quarterly filing period, making oral or written lobbying communications on behalf of the organization, including any time expended by such individuals in the actual drafting of material for use by the individual in such communications; or

(3) expends in any quarterly period in excess of $5,000 to engage directly or through any other person in a lobbying solicitation effort of the kind reportable under section 7(b)(5).

(c) For purposes of this section an oral lobbying communication which is made simultaneously in the course of a single meeting or conversation to more than one Federal officer or employee, or which involves more than one paid officer, paid director, or paid employee of the organization, shall be treated as a single oral lobbying communication.

(d) For purposes of this section, a communication by a paid officer, paid director, or paid employee of the organization to a Member of the Senate or the House of Representatives, or to an individual on the personal staff of such Member, shall not be considered a lobbying communication if the organization's principal place of business is located within the State represented in whole or in part by such Member.

REGISTRATION OF LOBBYISTS

SEC. 5. (a) Each organization shall register with the Comptroller General not later than fifteen days after engaging in activities described in section 4.

(b) The registration shall be in such form as the Comptroller General shall prescribe by regulation, and shall contain the following, which shall be regarded as material for the purposes of this Act:

(1) an identification of the organization, except that nothing in this paragraph shall be construed to require the disclosure of the identity of the individuals who are members of a voluntary membership organization; and

(2) the approximate number of individuals and organizations that are members of the organization except where publication of such membership numbers violates the existing laws of a country, the names of any affiliate of the organization; and the approximate number of individuals and organizations that contributed or paid dues to the registered organization during the year preceding the year in which the registration is filed, including the amount of each such payment by an individual which exceeds $3,000 and amounts to one per centum or more of the total value of all payments to the registered organization from all sources during such period.

(c) Any registration filed by an organization engaged in activities described in section 4(b) shall also contain the following, which shall be regarded as material for purposes of this Act:

(1) an identification of any person retained under section 4(b)(1), including the individuals associated with such person with primary responsibility for such activities, and any employee described in section 4(b)(2);

(2) a separate schedule listing the name and address of each organization from which the registered organization received directly or indirectly $3,000 or more in dues or contributions during the year preceding the year in which the registration is filed, including any contribution or dues given by an individual acting on behalf of an organization or reimbursed by an organization, where (i) the dues or contributions were expended in whole or in part by the registered organization for activities described in section 4, and (ii) the dues or contributions constituted one per centum or more of the total vallue of all payments to the registered organization from all sources during the year preceding the year in which the registration is filed. The organization shall indicate the amount of the dues or contributions provided by such organization or individual: *Provided,* That the organization may, if it so chooses, state such amount in the following categories: Category A—$3,000 to $10,000; category B—$10,001 to $25,000; category C—$25,001 to $50,000; category D—$50,001 to $100,000; category E—$100,001 to $250,000; category F—over $250,000.

(3) in the case of a voluntary membership organization, a general description of the methods by which such organization arrives at its position with respect to those issues which it seeks to influence through lobbying communications or solicitations.

(d) A registration filed under this section in any calendar year shall be effective until January 15 of the succeeding calendar year.

ABBREVIATED LOBBYING REPORTS

SEC. 6. (a) Each organization required to register solely by reason of the provisions of section 4(a) shall file a report with the Comptroller General not later than thirty days after the last day of each quarterly filing period in which the organization engaged in the activities described in such subsection. Each report shall be in such form as the Comptroller General shall prescribe by regulation.

(b) Each report required under subsection (a) shall contain the following, which shall be regarded as material for the purposes of this Act—

(1) an identification of the organization filing such report;

(2) a record of any expenditure in the form of a gift of money or thing of value, including a loan or honorarium, in excess of $35 made during the quarterly period, to or for the benefit of any Federal officer or employee, and the identity of the recipient of such gift, where the gift is (i) by the organization or by the person employed or retained by the organization who is reimbursed for the expenditure, or (ii) by an officer, director, or employee of the organization if such individual has taken, or will take, such gift, in whole or in part, as a deduction under section 162 or 212 of the Internal Revenue Code;

(3) an itemized listing of each expenditure made during the quarterly period for any reception, dinner, or other similar event in whole or in part for Federal officers or

employees paid for by the reporting organization where the total cost of the event exceeds $500;

(4) a description of the issues concerning which the organization filing such report engaged in lobbying communications, through its own paid officers, paid directors, or paid employees, except that if the number of such issues exceeds ten, the organization may describe the ten issues on which it spent the greatest proportion of its efforts and provide a general description of the categories of any other issues concerning which the organization engaged in such communications;

(5) in the case of any lobbying solicitation (i) is written or made through an advertisement, (ii) which is directly made or paid for by the organization, and (ii) which directly reached or could reasonably be expected to directly reach, in identical or similar form and with respect to the same issue or issues, five hundred or more persons, one hundred or more employees, twenty-five or more officers or directors, or twelve or more affiliates of such organizations—

(A) a description of the means employed to make the solicitation, the issue with which such solicitation was concerned, and an indication whether the recipient was in turn asked to solicit others, except that the requirement of describing the issue involved may be satisfied, as the discretion of the reporting organization, by filing a copy of the solicitation;

(B) if the solicitation is conducted through a paid advertisement in a newspaper, magazine, book, periodical, or other publication, or through a paid radio or television advertisement, an identification of the publication, or radio or television station, where the solicitation appeared; or, if the solicitation is conducted through the mails, the approximate number of persons directly solicited.

FULL LOBBYING REPORTS

SEC. 7. (a) Each organization required to register by section 4(b) shall file a report with the Comptroller General not later than thirty days after the last day of each quarterly filing period in which the organization engaged in the activities described in such subsection. Each such report shall be in such form as the Comptroller General shall prescribe by regulation. The information required by this subsection shall be regarded as material for the purposes of the Act.

(b) Each report required under subsection (a) shall contain the information required in section 6(b) (1), (2) and (3) and the following additional information—

(1) the approximate amount of the total expenditures which such organization made during the quarterly filing period with respect to lobbying communications and with respect to lobbying solicitations reportable under this section including the approximate percentage related to such lobbying communications, and the approximate amount related to such lobbying solicitations: *Provided*, That the organization filing the report may disclose the total salary paid to an officer, director, or employee of such organization in lieu of allocating the portion of the salary of the individual attributable to lobbying activities;

(2) an identification of any person retained by the organization under section 4(b)(1) and a disclosure of the following information for each person—

(A) a description of each issue as to which that person engaged in lobbying communications on behalf of the organization, identifying each officer, director, partner, or employee of that person, and of any other person, to whom expenditures were made by the retained person to make one or more such lobbying communications; and

(B) the approximate amount of money received by the person from the organization in connection with each such issue: *Provided*, That if the person is under a general retainer he shall have the option of reporting the amount of the retainer.

(3) an identification of any paid officer, paid director, or paid employee described in section 4(b)(2);

(4) a description of the issues concerning which the organization filing such report engaged in lobbying communications, through its own paid officers, paid directors, or paid employees, identifying with respect to each issue any employee described in section 4(b)(2), and the chief executive officer and any principal operating officer who engaged in lobbying communications on that issue; except that if the number of such issues exceeds thirty, the organization may describe the thirty issues on which it spent the greatest proportion of its efforts, and provide a general description of the categories of any other issues concerning which the organization engaged in such activities;

(5) in the case of any lobbying solicitation which is directly made or paid for by the organization, and which directly reached or could reasonably be expected to reach directly, in identical or similar form and with respect to the same issue or issues, five hundred or more persons, one hundred or more employees, twenty-five officers or directors, or twelve or more affiliates of such organization—

(A) a description of the means employed to make the solicitation, the issue with which the solicitation was concerned, and an indication whether the recipient was in turn asked to solicit others, except that the requirement of describing the issue involved may be satisfied, at the discretion of the reporting organization, by filing a copy of the solicitation;

(B) an identification of any person retained to make the solicitation; and

(C) the approximate number of individuals and organizations, including the approximate number of affiliated organizations, solicited, or if the solicitation is conducted through a paid advertisement in a newspaper, magazine, book, periodical, or other publication, or through a paid radio or television advertisement, an identification of the publication, or radio or television station, where the solicitation appeared, and the total amount expended on any solicitation conducted through one or more such advertisements where the amount exceeds $5,000.

CONTRACTS

SEC. 8. (a) Any organization that submits a bid or proposal on a contract that may reasonably be expected to have a value of $10,000,000 or more, shall file with the executive agency responsible for the award of such contract, and with the Comptroller General, a report containing the information required in subsection (b). Each report shall be filed in such form as the Comptroller General shall prescribe by regulation, at the time the organization submits the bid or proposal, on an annual basis thereafter, until the award or cancellation of the contract, and immediately prior to the award of the contract.

(b) Each report required by subsection (a) shall contain the following information about the activities of the organization not contained in any report on such contract previously filed under this section—

(1) an identification of the organization filing the report;

(2) a description of the contract including an indication of its estimated value;

(3) an identification of each paid officer, paid director, or paid employee of the organization who sought to influence the award of the contract by engaging in one or more communications with a Federal officer or employee if the officer, director, or employee of the organization is—

(A) a former employee of the executive agency responsible for the award of the contract or grant and the communication is with a Federal officer or employee of that agency; or

(B) the chief executive officer or a principal operating officer of the organization;

(4) an identification of any person other than an officer, director, or employee of the organization filing the report who received income from such organization to engage in one or more communications with the executive branch to influence the award of the contract, the total amount of income received to date by such person in connection with such communications, and an indication whether such person, or a member or employee of such person who made one or more such communications, is a former employee of the executive agency responsible for the award of the contract;

(5) in the case of any former employee of an executive agency identified as such by paragraph (3)(A) or (4), a description of the position and duties of the former employee during the last three years of employment with the agency;

(6) a record of any expenditure in the form of a gift of money or thing of value, including a loan or honorarium, in excess of $35 to any Federal officer or employee of the executive agency responsible for the award of the contract or grant; and the identity of the individual who received such gift, where the gift is (i) by the organization or by any person identified in paragraph (4) of this subsection who is reimbursed for the expenditure, or (ii) by an officer, director, or employee of the organization if such individual has taken, or will take, such gift, in whole or in part, as a deduction under section 162 or 212 of the Internal Revenue Code; and

(7) an itemized listing of each expenditure during the period covered for any reception, dinner, or similar event in whole or in part for Federal officers or employees of the executive agency responsible for the award of the contract or grant, where the total cost of the event exceeds $500.

(c) The executive agency with whom the reports required by this section are filed shall preserve the originals or reproductions of such reports, filed according to the name of the contract, for the same length of time, and make them available to the public in the same manner, as prescribed in sections 11(a)(3) and 11(a)(4) of this Act.

(d) For purposes of this section—

(1) the term "contract" means any agreement for the acquisition, by purchase, lease, or barter, of property or services for the direct benefit or use of the Federal Government. The term includes, but is not limited to, contracts, options, claims, bilateral agreements and change orders;

(2) the term "former employee of the executive agency" includes any person who was employed at any time within the last five years by an executive agency at a rate of compensation in excess of the highest rate for grade GS–11 of the General Schedule under section 5332 of title 5, United States Code, or at a rate of compensation in excess of the highest rate for pay grade O–4 or W–2, as the case may be, under chapter 3 of title 37, United States Code, while any such person served as a member of a uniformed service; and

(3) the term "Federal officer or employee" shall include, in addition to any person described in section 3(e) of this Act, an employee of the executive branch whose principle responsibility is the drafting, revising, or letting of Government contracts.

PREPARATION OF REGISTRATIONS AND REPORTS

SEC. 9. (a) Each organization required to register or to report under section 5, 6, 7, or 8, and each agent or other person retained by such organization, shall maintain for each quarterly filing period such records, in accordance with regulations prescribed by the Comptroller General, as may be necessary

to enable the organization to file the registrations and reports required by this Act; except that the Comptroller General may not require by rule or otherwise that any organization which is not registered pursuant to this Act, or which is registered only pursuant to section 4(a), to establish or maintain any records other than those records normally established or maintained by the organization, in order to enable the Comptroller General to determine whether such organization is, in the case of an unregistered organization, required to register, or, in the case of an organization registered only pursuant to section 4(a), required to register pursuant to section 4(b). Any officer, director, employee, or retained person of any organization shall provide to such organization such information as may be necessary to enable the organization to comply with the recordkeeping and reporting requirements of this Act. Any organization which shall rely in good faith on the information provided by any such officer, director, employee, or retained person shall be deemed to have complied with this subsection.

(b) The records required by subsection (a) shall be preserved for a period of not less than five years after the close of the quarterly filing period to which such records relate.

(c) Each registration filed pursuant to section 5, and each report filed pursuant to section 6, 7, or 8 shall be signed by an officer or director of the organization who shall certify that the information certified therein is accurate and complete to the best of his knowledge and belief.

(d) Whenever an organization is required under section 6 or 7 to describe an issue, the description shall include, where feasible, the bill or other identifying number, and, in the case of any issue involving communications with the executive branch, the name of the agency. The description shall disclose the general subject matter which is of interest to the organization.

(e) Whenever an organization is required to approximate in the registration or reporting forms numbers of persons or amounts of expenditures, the organization shall provide the information in a manner prescribed by regulations issued by the Comptroller General.

(f) If a reporting organization requires an affiliate which is not required to register under this Act to engage in a lobbying solicitation, or reimburses such affiliate for expenses incurred in such a solicitation, then such organization must report the solicitation as if it were initiated, or paid for, by such organization.

(g) If an affiliate of a registered organization engages in activities described in section 4(a) or 4(b), the affiliate need not file the registration and reports required by sections 5, 6, and 7 if the registered organization files the required information on behalf of the affiliate. Where the reporting organization calls, organizes, or finances in whole or in part a meeting or conference of its affiliates who are not otherwise required to report under this section and one function of the meeting or conference is to coordinate a program of in-person lobbying communications by the affiliates, the reporting organization may, by filing the following information in lieu of separate reports by those affiliates, satisfy the reporting requirements of this Act applicable to such in-person lobbying communications engaged in by the affiliates during the duration of the conference or meeting:

(1) the dates on which the meeting or conference took place;

(2) the full name and mailing address of the affiliates that attended;

(3) the issue or issues on which oral lobbying communications were made; and

(4) the expenditures made by the reporting organization in connection with the meeting or conference.

POWERS OF THE COMPTROLLER GENERAL

SEC. 10. The Comptroller General, in carrying out the provisions of this Act, is authorized—

(a) to informally request or to require by subpena any person to permit the Comptroller General to examine, or to submit in writing to the Comptroller General, such reports, records, correspondence, and other documentary evidence, and such answers to questions, as the Comptroller General may consider necessary to carry out the provisions of this Act, within such reasonable period of time and under oath or such other conditions as the Comptroller General may require;

(b) to administer oaths or affirmations;

(c) to require by subpena the attendance and testimony of witnesses and the production of documentary evidence;

(d) in any proceeding or investigation, to order testimony to be taken by deposition before any person designated by the Comptroller General who has the power to administer oaths and to compel testimony and production of evidence in any such proceeding or investigation;

(e) to pay witnesses the same fees and mileage as are paid in like circumstances in the courts of the United States; and

(f) to petition any United States district court having jurisdiction for an order to enforce subpenas or orders issued pursuant to this section.

DUTIES OF THE COMPTROLLER GENERAL

SEC. 11. (a) It shall be the duty of the Comptroller General—

(1) to conduct investigations with respect to any registration or report filed under this Act, with respect to alleged failures to file any registration or report required under this Act, and with respect to alleged violations of this Act and otherwise to employ his powers under this Act to insure compliance with it;

(2) to develop filing, coding, and cross-indexing systems to carry out the purposes of this Act, including but not limited to—

(A) a cross-indexing system which (i) for any person identified in any registration or report filed under this Act, other than those listed pursuant to section 5(c)(2), discloses each organization identifying such person in any such registration or report and (ii) for any such person retained by two or more organizations filing reports under this Act, discloses the information concerning such person provided by such organizations pursuant to sections 7(b)(2), 7(b)(5), and 8(b)(4;

(B) a cross-indexing system to be developed in cooperation with the Federal Election Commission which discloses for any person identified in any registration or report filed under this Act, other than those listed pursuant to section 5(c)(2), each identification of such person in any report filed under section 304 of the Federal Election Campaign Act of 1971 (2 U.S.C. 434), including the amounts and recipients of any campaign contributions made by such person; and

(C) a cross-indexing to be developed in cooperation with the Department of Justice which discloses for any person identified in any registration or report filed under this Act, other than those listed pursuant to section 5(c)(2), each identification of such person in any report filed pursuant to the Foreign Agents Registration Act (22 U.S.C. 611 et seq.);

(3) to make copies of each registration and report filed with him under this Act available for public inspection and copying, commencing as soon as practicable after the date on which the registration or report involved is received, but not later than the end of the fifth working day following such date, and to permit copying of such registration or report by hand or by copying machine or, at the request of any person, to furnish a copy of any such registration or report upon payment of the cost of making and furnishing such copy, which cost shall be limited to reasonable standard charges for the direct cost of a document search and duplication; documents shall be furnished without charge or at a reduced charge where the Comptroller General determines that waiver or reduction of the fee is in the public interest;

(4) to preservve the originals or accurate reproductions of such registrations and reports for a period of not less than five years from the date on which the registration or report is received;

(5) to compile and summarize, with respect to each quarterly filing period, the information contained in registrations and reports filed during such period in a manner which clearly presents the extent and nature of the activities described in the registrations and reports filed under this Act; to the extent the Comptroller General determines that it is meaningful and practicable to do so, the compilation and summary shall include information on all lobbying activities by organizations subject to this Act pertaining to a particular issue, and the total lobbying activities under this Act by organizations who share an economic, business, or other common interest;

(6) to make the information compiled and summarized under paragraph (5) available to the public within forty-five days after the close of each quarterly filing period, and to publish such information in the Federal Register at the earliest practicable opportunity;

(7) to furnish assistance, to the extent practicable, to any person who requests assistance in the development of appropriate accounting procedures and practices to meet the recordkeeping and reporting requirements of this Act; the Comptroller General shall issue regulations prescribing the minimum segments of an hour which any person may utilize in recording the length of any communication or the drafting of such communications in connection with the registration and reporting requirements of this Act; and

(8) to prescribe such rules and regulations, and such forms, as may be necessary to carry out the provisions of this Act in an effective and efficient manner, and to prevent the evasion of the requirements of this Act.

(b) For purposes of this Act, the duties of the Comptroller General described in subsections (a)(1) and (a)(8) of this section shall be carried out in conformity with chapter 5 of title 5, United States Code, and any records maintained by the Comptroller General under this Act shall be subject to the provisons of section 552 and 552a of title 5.

COMMERCIAL USE OF INFORMATION DISCLOSED

SEC. 12. No information contained in any registration or report filed under this Act shall be sold or utilized by any person for the purpose of soliciting contributions, or for any commercial purpose.

ADVISORY OPINIONS

SEC. 13. (a) Upon written request to the Comptroller General by any person, the Comptroller General shall, within a reasonable time, render a written advisory opinion with respect to the applicability of the recordkeeping, registration, or reporting requirements of this Act to any specific set of facts directly involving the person requesting such opinion.

(b) Notwithstanding any other provision of law, any person with respect to whom an advisory opinion is rendered under subsection (a) who acts in good faith in accordance with the provisions and findings of such advisory opinion shall be presumed to be in compliance with the provisions of this Act to which such advisory opinion relates.

The Comptroller General may modify or revoke any such advisory opinion, but any modification or revocation shall be effective only with respect to action taken after such person has been notified in writing, of such modification or revocation.

(c) All requests for advisory opinions, all advisory opinions, and all modifications or revocations of advisory opinions shall be published by the Comptroller General in the Federal Register, except that upon the request of any person seeking the advisory opinion, the identity of such person shall not be disclosed, directly or indirectly, in any information made public by the Comptroller General pursuant to this subsection.

(d) The Comptroller General shall, before rendering an advisory opinion under this section, provide any interested person with an opportunity, within such reasonable period of time as the Comptroller General may provide, to transmit written comments to the Comptroller General with respect to such request for an advisory opinion.

(e) Any person who has received and is aggrieved by an advisory opinion from the Comptroller General may file a declaratory action in the United States district court for the district in which such person resides or maintains its principal place of business.

ENFORCEMENT

SEC. 14. (a) The Comptroller General shall use his authority under section 11 to investigate possible violations of this Act by any person. Whenever the Comptroller General commences such an investigation of any person, he shall so notify the person of the investigation, unless the Comptroller General determines that notice would interfere with effective enforcement of this Act. Any investigation shall be conducted expeditiously, and with due regard for the rights and privacy of the person involved.

(b) If the Comptroller General determines, after an investigation under subsection (a), that there is reason to believe that any person has engaged in any acts or practices which constitute a civil violation of this Act, he shall endeavor to correct such matter—

(1) by informal methods of conference or conciliation; or

(2) by referring such apparent violation to the Attorney General.

The Attorney General shall act upon any referral made pursuant to this subsection in as expeditious a manner as possible.

(c) The Attorney General may institute civil enforcement actions for relief, including a permanent or temporary injunction, restraining order, or any other appropriate relief, in the United States district court for the district in which such person is found, resides, or transacts business.

(d) The Comptroller General shall refer apparent criminal violations of this Act to the Attorney General. In any case in which the Comptroller General refers such an apparent violation to the Attorney General, the Attorney General shall act upon the referral in as expeditious a manner as possible.

(e) If the Attorney General fails to bring a civil or criminal action within sixty days of the date the Comptroller General refers an apparent violation to him pursuant to this section, the Comptroller General may bring an action described in subsection (c) in his own name, and through his own attorneys.

REPORTS BY THE COMPTROLLER GENERAL

SEC. 15. The Comptroller General shall transmit a report to the President of the United States and to each House of the Congress no later than March 31 of each year. Each such report shall contain a detailed statement with respect to the activities of the Comptroller General in carrying out his duties and functions under this Act, together with recommendations for such legislation or other action as the Comptroller General considers appropriate.

SANCTIONS

SEC. 16. (a) Except as provided in subsection (c), any person violating section 5, 6, 7, 8, 9, or 12 of this Act shall be subject to a civil penalty of not more than $5,000 for each such violation.

(b) Any person who knowingly and willfully violates section 5, 6, 7, 8, 9, or 12 of this Act, or who, in any statement required to be filed, furnished, or maintained pursuant to this Act, knowingly and willfully makes any false statement of a material fact, omits any material fact required to be disclosed, or omits any material fact necessary to make statements made not misleading, shall be fined not more than $10,000 or imprisoned for not more than two years, or both, for each such violation.

(c) No organization shall be subject to civil sanctions for failing to register for the first time under section 5, unless the failure of the organization to register constitutes a knowing violation of the requirements of this Act.

REPEAL OF FEDERAL REGULATION OF LOBBYING ACT

SEC. 17. (a) The Federal Regulation of Lobbying Act (2 U.S.C. 261 et seq.), and that part of the table of contents of the Legislative Reorganization Act of 1946 which pertains to title III thereof, are repealed.

(b) All documents, papers, and other information in the custody or control of the Clerk of the House of Representatives or the Secretary of the Senate obtained or prepared pursuant to the provisions of the Federal Regulation of Lobbying Act are hereby transferred to the custody and control of the Comptroller General. The Senate and the House of Representatives consent to the transfer of such documents, papers, or other information.

SEVERABILITY

SEC. 18. If any provision of this Act, or the application thereof to any person or circumstance, is held invalid, the validity of the remainder of this Act and the application of such provision to other persons and circumstances, shall not be affected thereby.

AUTHORIZATION OF APPROPRIATIONS

SEC. 19. There are authorized to be appropriated such sums as may be necessary to carry out this Act.

EFFECTIVE DATES

SEC. 20. (a) Except as provided in subsection (b), the provisions of this Act shall take effect on the first day of the first calendar quarter which begins more than one hundred and fifty days after enactment of this Act.

(b) The provisions of this Act requiring the issuance of regulations to implement this Act shall become effective upon enactment.●

● Mr. PERCY. Mr. President, the drafting of lobbying disclosure legislation which is both fair and effective, is a difficult task. It is an intricate problem of how to collect enough information without discouraging free communication between Congress and the public.

The difficulty of this task was evidenced by the inability of the House and the Senate to come to a compromise on a lobbying disclosure bill in 1976.

In this Congress, two bills (S. 1785 and S. 2026) have already been introduced in the Senate. The purpose of both of these bills is to provide for the disclosure of information which Congress and the public need to evaluate efforts to influence the course of legislation. The Governmental Affairs Committee has held several days of hearings on lobbying legislation, and we have heard from a myriad of witnesses representing fields as diverse as industry, education, conservation, public interest, the press, and labor. All of our witnesses have agreed on one point—lobbying disclosure legislation must not inadvertently restrict lobbying activity by placing undue burdens on the basic constitutional rights of free speech, association, and redress of grievances, nor an undue burden from that and point of disclosure requirements.

For this reason, I congratulate Senator RIBICOFF on this legislation of which he is the principal sponsor. The refinements made by this bill reflect the close attention we have all paid to the need for cost-effective legislation—legislation which can serve a useful purpose without creating too great a cost.

This legislation will undoubtedly be further refined in committee markup, on the Senate floor and in conference, and we will continue to work closely with all interested parties to insure that the final product is a truly workable and effective piece of legislation. As a cosponsor I shall work toward this end.●

● Mr. JAVITS. Mr. President, it has now been 32 years since Congress last enacted a statute designed to disclose the activities and identities of the lobbyists who play such an important role in the work of the legislative branch. Since passage of the Federal Regulation of Lobbying Act of 1946, it has become clear to all that that act is, for all practical purposes, unenforced and unenforceable. This is due in part to the narrow scope of the act, which covers only a small portion of all lobbying activity, and its ineffective enforcement provisions, which vest authority to monitor the act in the Clerk of the House and the Secretary of the Senate. It is also due to the remarkable changes in the nature of lobbying that have occurred in the last 32 years. Computer technology, virtually unknown in 1946, has transformed lobbying into a sophisticated art. The number of groups that engage in lobbying has increased dramatically, and the concerns of these groups have expanded, until now nearly every piece of important legislation introduced in Congress is the subject of intense lobbying.

I do not view these developments negatively. Honest lobbyists on both sides of an issue can play a useful role in the legislative process in presenting a point of view and supporting facts. And the emergence in the last 15 years of the many new "public interest" lobbying groups, concerned with environmental or health and safety issues, has been, I believe, beneficial.

But changed circumstances require a change in the law. If the American people are to be able to identify the forces that daily work to influence Federal legislation—forces that are not directly accountable to the public—the deficiencies in the 1946 act must be corrected. The legislation we are introducing here today is an attempt to do that. It is based on earlier legislation, such as S. 2477, which passed the Senate in 1976

by a vote of 82–9. In this regard, I would like to point out that Senators RIBICOFF, PERCY, MUSKIE and MATHIAS have all, in the last several years, worked long and hard in the Governmental Affairs Committee on the development of suitable legislation.

Any attempt to legislate on lobbying must start with the premise that the right to petition the legislative and executive branches is protected by the first amendment. Further, lobbying legislation must be reconciled with constitutional concepts of privacy grounded in the fourth and ninth amendments. Legislation must be drafted in such a way that it protects the compelling governmental and public interests sought to be promoted by lobbying disclosure without infringing on any of these constitutional rights, which are among our most cherished freedoms. We have attempted in this legislation to accomplish this objective.

Thus, the bill's requirements are structured to apply only to organizations, not individuals, and then only to organizations that engage in a significant amount of lobbying. Voluntary groups without paid employees will not be covered. Further, I believe that the reporting requirements imposed on organizations that must register under the act are not unduly onerous.

However, Mr. President, I recognize that this bill is not perfect. Indeed, there are a number of provisions in it that I believe need further refinement in committee to assure that unnecessary burdens and complexities are eliminated, and to be absolutely certain that nothing in the bill discourages, or infringes on, the exercise of any constitutional rights. Thus, I would like to stress that while I strongly support the concepts contained in this bill, I am not committed to its exact language. I remain open to any suggestions, amendments or modifications that would help make this a better bill.

Mr. President, as I have noted, lobbying reform raises many difficult issues. But their difficulty must not deter us from working toward a solution. I sincerely hope that this will be the year that Congress faces up to these issues, and enacts this important legislation.●

● Mr. KENNEDY. Mr. President, Senators CLARK, STAFFORD, and I are pleased to cosponsor this legislation and I ask unanimous consent that the following joint statement may be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

JOINT STATEMENT OF SENATORS KENNEDY, CLARK, AND STAFFORD

We are pleased to join with Senator Ribicoff and the other cosponsors of this new Senate bill to reform the Federal lobbying laws.

The bill is similar in many important respects to the lobbying reform legislation (S. 1785) that we introduced last June. But it also contains a number of useful improvements reflecting both the extensive hearings on the bill and the subsequent discussion and debate. In particular, the modifications and clarifications in the areas of the home state exemption, the definitions of lobbying organizations and grass roots lobbying, the reporting requirements, and the increased threshold for coverage of executive branch contacts are useful steps that enhance the legislation.

We would, however, reserve judgment on one provision in the new bill, which weakens the important provision requiring disclosure of the major sources of financing of lobbying organizations. On balance, however, the new bill is a good one, and we are pleased to be cosponsors. Today's action by the House of Representatives indicates strong support for the cause of lobbying reform, and we look forward to early enactment of legislation to achieve our goals.●

By Mr. BARTLETT:

S.J. Res. 128. A joint resolution designating July 1, 1978, as "Free Enterprise Day." Considered and passed.

(The remarks of Mr. BARTLETT when he introduced the joint resolution appear elsewhere in today's proceedings.)

ADDITIONAL COSPONSORS

S. 571

At the request of Mr. MATHIAS, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 571, a bill relating to discriminatory housing practices.

S. 1500

At the request of Mr. JACKSON, the Senator from Maryland (Mr. MATHIAS) was added as a cosponsor of S. 1500, a bill to designate certain lands in the State of Alaska as units of the National Park, National Wildlife Refuge, National Wild and Scenic Rivers, and National Wilderness Preservation Systems.

S. 2227

At the request of Mr. DOLE, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 2227, a bill to postpone the effective date of the carryover basis provisions of the Internal Revenue Code.

S. 2416

At the request of Mr. JAVITS, the Senator from Illinois (Mr. STEVENSON) was removed and the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 2416, the Nurse Training Amendments of 1978.

S. 2583

At the request of Mr. DOLE, the Senator from South Dakota (Mr. ABOUREZK) was added as a cosponsor of S. 2583, a bill to provide for the temporary transfer of the U.S.S. *Sanctuary* to Life International, a nonprofit corporation.

S. 2780

At the request of Mr. HATHAWAY, the Senator from New Mexico (Mr. DOMENICI) was added as a cosponsor of S. 2780, a bill to amend the Public Health Service Act to provide for grants and contracts for projects to provide health and dental care to medically underserved rural populations, and for other purposes.

S. 2895

At the request of Mr. BENTSEN, the Senator from Alabama (Mr. ALLEN), the Senator from Alaska (Mr. GRAVEL), and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of S. 2895, a bill to amend the Meat Import Act of 1964.

SENATE RESOLUTION 327

At the request of Mr. DOLE, the Senator from Texas (Mr. TOWER) was added as a cosponsor of Senate Resolution 327, to urge the President to embargo the export of military or paramilitary equipment to Uganda, and for other purposes.

SENATE RESOLUTION 438—SUBMISSION OF A RESOLUTION TO ENCOURAGE INTERNATIONAL DISCUSSIONS WITH JAPAN CONCERNING THE SLAUGHTER OF DOLPHINS

Mr. WEICKER (for himself, Mr. MAGNUSON, Mr. HOLLINGS, Mr. LEAHY, Mr. HASKELL, Mr. WILLIAMS, Mr. PELL, Mr. BAYH, Mrs. HUMPHREY, Mr. NUNN, Mr. CRANSTON, and Mr. INOUYE) submitted the following resolution, which was referred to the Committee on Foreign Relations:

S. RES. 438

Whereas the seagoing migratory mammal known as the dolphin is generally recognized as a unique, scientific, ecological, cultural and esthetic living marine resource;

Whereas fishermen on the remote island of Iki in the Sea of Japan, with the consent of officials of Nagasaki Province, determined it necessary to kill some one thousand dolphins on February 23 and 24, 1978, in order to restrict the effects such mammals were having on their fish catch and profits;

Whereas strong concerns were raised during consideration of H.R. 6970, Ninety-fifth Congress (which proposes to amend the Marine Mammal Protection Act of 1972 and which passed the House of Representatives on June 1, 1977, by a vote of 334–20), in hearings before the House Merchant Marine and Fisheries Committee, as well as during discussion on the floor, that the mass killing of such mammals appears to be in conflict with the sound policies of resources management and maintenance of the stability of the marine ecosystem;

Whereas the Pacific Marine Fisheries Commission sees the possibility of growing conflict within the ecosystem between some marine mammals, fishery stocks, and man;

Whereas it is essential to understand all the components of a balanced ecosystem, including fishery resources, marine mammal populations, and socioeconomic factors affecting the ecosystem;

Whereas it is the desire and the responsibility of the Senate to avoid major and possibly irreversible economic and social disruptions of man's activities in the area of marine resources by encouraging the developing and use of new methods and technologies;

Whereas the National Marine Fisheries Service of the Department of Commerce, as a component of the National Oceanic and Atmospheric Administration, promotes the protection and rational use of living marine resources for their esthetic, economic, and recreational value, administers programs to determine the consequences of the naturally varying environment and man's activities, and provides knowledge and services to foster efficient international management, use, and protection of living marine resources;

Whereas the Small Cetacean (porpoise/dolphin) Subcommittee of the Scientific Committee of the International Whaling Commission will hold hearings on the first day of the regular Scientific Meeting on June 1, 1978, in Cambridge, England;

Whereas the United States has proposed that an international cetacean commission

be established as an outgrowth of the International Whaling Commission; and

Whereas the Government of Japan will conduct research in FY '78 to discover alternative means, including sonic and radio equipment, to keep dolphins away from island fishing grounds: Now, therefore, be it

Resolved, That the Senate expresses its strong concern regarding the slaughter of some one thousand dolphins in the Sea of Japan by Japanese fishermen on February 23 and 24, 1978, and hereby strongly encourages the Government of Japan—

(1) to join in discussions to be held by the International Whaling Commission's Small Cetacean Subcommitee in June 1978, in an exchange of information with other nations facing similar problems and cooperate to advance understanding of small cetaceans on a global basis in order to insure the most effective use of living marine resources without disturbing the natural balance of the aquatic environment;

(2) to participate in an exchange of information, including various impact studies of small cetaceans on economically related human foodstuffs and alternative methods of dealing with the problems as they occur, with the National Marine Fisheries Service of the Department of Commerce;

(3) to cooperate to establish an international cetacean commission to advance understanding of all cetaceans and to insure their effective conservation and protection on a global basis; and

(4) to adopt comprehensive marine mammal protection legislation.

● Mr. WEICKER. Mr. President, today I am pleased to introduce a resolution, addressing the issue of the recent slaughter of 1,000 dolphins off the coast of Japan. This resolution expresses the concern of the Senate regarding the mass killing, and calls for increased participation by the Japanese Government in international discussions aimed at eliminating further problems of this nature.

The task of creating and maintaining a balance between the workings of the global ecosystem, and those of the world's economic systems is one of increasing importance to every nation. The dolphin slaughter in the Sea of Japan off Iki Island, and its subsequent social and economic reverberations provides a striking example of the complicated problems that such a task entails.

The hunt on February 23 and 24, 1978, in which the dolphins were lured to shore areas, where they were stabbed to death, was undertaken by Japanese fishermen in an effort to reduce the effect which these mammals have on their fish catch, and consequent profits. A similar conflict of interest between the well-being of oceangoing mammals, fishery stocks, and man has been encountered by U.S. fishermen.

In dealing with this issue, the 95th Congress asserted that the destruction of dolphins, however, inadvertent, is inconsistent with prudent resource management; it therefore developed stringent regulations to protect these intelligent mammals. However, by taking this step toward improved maintenance of the ecology, our domestic commercial fleets were placed at a disadvantage to those of Japan, with whom they must compete in the U.S. tuna market. As global food requirements increase, the importance of the ocean as a source of high protein will, too, and the trade off between the needs of the ecosystem, and the socioeconomic system will become even more bitterly disputed.

Ultimately, careful maintenance of a balanced marine environment will result in the most profitable harvesting of the ocean's resources. In recognition of this fact, the Japanese Government will conduct research in fiscal year 1978 to develop methods of tracking and chasing dolphins from fishing operations. Japan is to be commended for its initiative in this area, and encouraged to join in other international exchanges of information regarding the impact of marine mammals and socioeconomic concerns upon each other, in the hope that the killing of dolphins as an economic necessity will cease.

The resolution that I am introducing similar to H.R. 1065, which has already been introduced in the House, strongly urges the Government of Japan to participate in the discussions to be held by the International Whaling Commission's Small Cetacean Subcommittee in June 1978; further, it encourages Japan to take part in an interchange of information concerning the rational use of living marine resources, with the National Marine Fisheries Service, and to participate in the formation of an international cetacean commission. Finally, it suggests the adoption of comprehensive marine mammal protection legislation by the Japanese Government.●

AMENDMENTS SUBMITTED FOR PRINTING

CONGRESSIONAL BUDGET, 1979—SENATE CONCURRENT RESOLUTION 80

AMENDMENT NO. 1795

(Ordered to be printed and to lie on the table.)

Mr. HARRY F. BYRD, JR., submitted an amendment intended to be proposed by him to the concurrent resolution (S. Con. Res. 80) setting forth the congressional budget for the U.S. Government for the fiscal year 1979.

COLLEGE HOUSING LOAN PROGRAM—S. 2637

AMENDMENT NO. 1796

(Ordered to be printed and referred to the Committee on Banking, Housing, and Urban Affairs.)

Mr. SPARKMAN submitted an amendment intended to be proposed by him to the bill (S. 2637) to amend and extend certain Federal laws relating to housing, community and neighborhood development and preservation, and related programs, and for other purposes.

● Mr. SPARKMAN. Mr. President, I am submitting today an amendment that I plan to offer to S. 2637. This amendment would seek to assure that the college housing loan program under the administrative jurisdiction of the Department of Housing and Urban Development, will be continued. The amendment would require the deletion from S. 2637 of section 418 which would terminate the program in fiscal year 1979. I feel strongly that this highly successful program is still needed. Its continuation will require no new budget authority; the program would simply recycle, as it is now doing, the repayments of loans made in prior years.

The college housing program, of which I was one of the original cosponsors, was enacted in 1950, and was amended in 1968 to provide alternative assistance in the form of debt service grants. Since enactment, it has assisted over 1,500 educational institutions located in all of the 50 States. Almost 1 million housing units have been constructed on campuses with loans totaling over $3 billion. Only three colleges have had loans foreclosed since the beginning of the program, and actual HUD losses from these foreclosures amounted to $2 million, or less than 1 percent of the loans outstanding. In my own State of Alabama, the college housing program has assisted higher education institutions with $70 million in loans, without any losses. I call this an outstanding record.

Along with other HUD programs, the college housing program was shut down between 1973 and 1976. In 1977, it was reinstituted as a limited program for the modernization and rehabilitation of existing facilities, and the construction of certain new projects. In fiscal year 1977, HUD made 1,945 loans totaling $156 million. However, for every dollar HUD loaned, it had to turn down over $2 in requests. It is expected that the demand for college loans will increase next year and in the years immediately ahead.

The projected increase in loan applications reflects the increasing college requirements for funds to conserve energy; rehabilitate older facilities; comply with new laws designed to assure that facilities are accessible to handicapped students and employees; and provide additional facilities for campuses where, because of the lack of dormitories, students are competing for an already critically short supply of housing which they can afford.

One college president has said that the "banquet years of higher education are over." I agree. With continuing budget deficits, it is clear that the Congress will have to conserve on spending for higher education, as with our other needs. We must, at the same time, however, preserve our institutions of higher learning. These institutions require housing facilities that are accessible, safe, and functional. I believe, therefore, that we can make a very significant contribution toward preserving our colleges and universities by continuing to recycle the college housing loan funds which Congress made available over 20 years ago.

I would welcome the support of my colleagues of my amendment.●

NAVIGATION DEVELOPMENT ACT—H.R. 8309

AMENDMENT NO. 1797

(Ordered to be printed and to lie on the table.)

Mr. CURTIS (for himself and Mr. ZORINSKY) submitted an amendment intended to be proposed by him to the bill

(H.R. 8309) authorizing certain public works on rivers for navigation, and for other purposes.

SENATE RESOLUTION 219—SENIOR CITIZEN INTERNSHIP PROGRAM

AMENDMENT NO. 1798

(Ordered to be printed and to lie on the table.)

Mr. ALLEN submitted an amendment intended to be proposed by him to the resolution (S. Res. 219) establishing a senior citizen internship program in the Senate.

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

● Mr. JACKSON. Mr. President, I wish to announce for the information of the Senate and the public the following hearings and business meetings scheduled by the Committee on Energy and Natural Resources. Questions concerning this schedule should be directed to Avis O'Leary, 3106 Dirksen Senate Office Building, Washington, D.C. Telephone: 224–7142.

April 20: Energy Conservation and Regulation Subcommittee—10:00 a.m., Room 3110, hearing. S. 2692, Department of Energy authorization bill. (Energy Information Adm. & Federal Energy Regulatory Commission).

April 21: Energy Research and Development Subcommittee—9:00 a.m., Room 3110, business meeting. S. 2692, Department of Energy authorization bill.

April 21: Energy Conservation and Regulation Subcommittee—10:00 a.m., Room 357, hearing. S. 2692, Department of Energy authorization bill.

April 24: Parks and Recreation Subcommittee—10:00 a.m., Room 3110, hearing. S. 2876, the omnibus ceiling increases and boundary adjustments.

April 24: Public Lands and Resources Subcommittee—10:00 a.m., Room 6226, hearing Oversight of P.L. 95–87, Surface Mining Law.

April 25: Full Committee—10:00 a.m., Room 3110, hearing. S. 499, S. 1500, S. 1546, S. 1787, S. 2465, re lands of national interest in Alaska.

April 26: Public Lands and Resources Subcommittee—9:00 a.m., Room 3110, hearing. S. 2913, S. 2914, Mineral Impact Loan bills.

April 26: Full Committee—10:00 a.m., Room 3110, business meeting. Pending calendar business.

April 27: Energy Research and Development Subcommittee—9:00 a.m., Room 3110, business meeting. S. 2692, Department of Energy authorization bill.

April 28: Parks and Recreation Subcommittee—10:00 a.m., Room 3110, hearing. S. 88, to enlarge the Sequoia National Park in the State of California by adding Mineral King Valley, S. 1906, Santa Monica Mts. Park & Seashore.

May 1: Parks and Recreation Subcommittee—10:00 a.m., Room 3110, hearing. H.R. 6900, S. 2705, S. 929, S. 2659, S. 2663, S. 2664, Omnibus trails bills.

May 2, 3, 4: Full Committee—10:00 a.m., Room 3110, business meeting. Pending calendar business.●

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

● Mr. CHURCH. Mr. President, for the information of the Senate and the general public, the Subcommittee on Energy Research and Development of the Committee on Energy and Natural Resources has scheduled two dates on which to mark up S. 2692 and S. 2693, the Fiscal Year 1979 Department of Energy Authorization Act. The Subcommittee will meet on Friday, April 21, 1977, and Thursday, April 27, 1977, at 9 a.m. in room 3110 of the Dirksen Senate Office Building.

Anyone wishing additional information with regard to the markup should contact the subcommittee staff director, Dr. Willis D. Smith at 202—224–4431.●

SUBCOMMITTEE OF HOUSING AND URBAN AFFAIRS

● Mr. SPARKMAN. Mr. President, I wish to announce that the Subcommittee on Housing and Urban Affairs of the Committee on Banking, Housing, and Urban Affairs, will hold a 1-day hearing on Wednesday, April 26, 1978, on S. 2726, the proposed Housing Conservation Act of 1978; S. 2798, the proposed Homeowners Rehabilitation Assistance Act of 1978; S. 2800, the proposed Housing Act of 1978, and S. 2931, proposed amendments to the 1974 urban homesteading program. This hearing will continue consideration of proposed 1978 housing legislation.

The hearing will be held in room 5302, Dirksen Senate Office Building, and will begin at 10 a.m.

The subcommittee would welcome statements on the bills for inclusion in the hearing record.●

SUBCOMMITTEE ON PARKS AND RECREATION

● Mr. ABOUREZK. Mr. President, I wish to announce for the information of the Senate and the public, the scheduling of a public hearing before the Subcommittee on Parks and Recreation, Committee on Energy and Natural Resources.

The hearing is scheduled for Friday, April 28, 1978, beginning at 10 a.m., in room 3110 of the Dirksen Senate Office Building. Testimony is invited regarding S. 1906, a bill to establish the Channel Island and the Santa Monica Mountains National Parks and Seashore in the State of California.

For further information regarding the hearing, you may wish to contact Mr. Tom Williams at 224–7145.

Those wishing to testify or who wish to submit a written statement for the record should write to the Subcommittee on Parks and Recreation, room 3106, Dirksen Senate Office Building, Washington, D.C. 20510.●

COMMITTEE ON THE JUDICIARY

● Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Tuesday, May 2, 1978, at 9 a.m., in room 2228 Dirksen Senate Office Building, on the following nominations:

Cristobal C. Duenas, of Guam, to be judge of the District court of Guam for a term of 8 years (reappointment).

Alfred Laureta, of Hawaii, to be judge for the district court for the Northern Mariana Islands for a term of 8 years (new positon Public Law 95–157).

Len J. Paletta, of Pennsylvania, to be U.S. district judge for the western district of Pennsylvania vice Herbert P. Sorg, retired.

Leonard B. Sand, of New York, to be U.S. district judge for the southern district of New York vice Charles M. Metzner, retired.

Any persons desiring to offer testimony in regard to these nominations shall, not later than 24 hours prior to such hearing, file in writing with the committee a request to be heard and a statement of their proposed testimony.

This hearing will be before the full Judiciary Committee.●

CHANGE OF HEARING DATE—SUBCOMMITTEE ON IMPROVEMENTS IN JUDICIAL MACHINERY

● Mr. DECONCINI. Mr. President, March 10, 1978, I announced that an open public hearing would be held by the Subcommittee on Improvements in Judicial Machinery of the Committee on the Judiciary on S. 1314, a bill to amend title 28, United States Code, to provide that State prisoners and Federal prisoners shall not be denied Federal habeas corpus relief on the ground that such prisoners were previously afforded a full and fair opportunity to litigate their claims, and for other purposes, would be held on April 21, 1978.

The hearing on this subject is now scheduled to be held on May 9, 1978, in room 2228 Dirksen Senate Office Building, commencing at 9 a.m.

Those who wish to testify or submit a statement for inclusion in the record should communicate as soon as possible with the Subcommittee on Improvements in Judicial Machinery, 6306 Dirksen Senate Office Building, Washington, D.C. 20510; telephone 202–224–3618.●

ADDITIONAL STATEMENTS

AFRICA UPDATE: RHODESIANS, REVOLUTIONARIES, AND RUSSIANS

● Mr. GOLDWATER. Mr. President, as I have repeatedly pointed out in recent weeks, the Carter administration is following an incredible and dangerous policy in the Rhodesian situation. In effect, our Government is confronting black Rhodesian moderates and the white Rhodesian minority as part of a coalition made up of black terrorists, the Soviet Union, and Great Britain. News reports following a visit of Cyrus Vance to Rhodesia described him as upset to learn the true Marxist nature of the terrorist group he and the administration are backing. Whether this will be sufficient to cause the administration to overrule U.N. Ambassador Andrew Young and go along with a sane and reasonable approach to the Rhodesian situation remains to be seen.

Mr. President, recently, Lt. Gen. Daniel O. Graham, U.S. Army, retired, who was former head of the U.S. Defense Intelligence Agency, returned from a fact-finding trip to South Africa and Rhodesia. His firsthand report is highly pertinent to the situation I have been discussing. General Graham's report was published in the April issue of the American Conservative Union publication,

Battle Line. I submit the article to be printed in the RECORD.

The article follows:

AFRICA UPDATE: RHODESIANS, REVOLUTIONARIES AND RUSSIANS

(By Lt. Gen. Daniel O. Graham, U.S. Army, retired)

The essence of the situation in Rhodesia today is this: A coalition of black Rhodesian moderates and the white Rhodesian minority are confronting a coalition of Marxist black terrorists supported by the Soviet Union and incredible as it may seem—the United States and Great Britain! This situation is made even more grotesque by the atrocities committed against defenseless black tribesmen by the US-UK supported side in the struggle for control of Rhodesia.

The recent political agreement inside Rhodesia between the whites led by Prime Minister Ian Smith and the moderate blacks represented by Mssrs. Chirau, Sithole and Muzorewe presents the United States and the British with a chance to make sense of policy toward that country and toward Southern Africa as a whole. This is the so-called "internal solution" to the problem of majority rule in Rhodesia. It quite simply excludes the participation of the Marxist "Popular Front" led by Joshua Nkomo from neighboring Zambia and Robert Mugabwe in neighboring Mozambique.

Both London and Washington have been insisting that no settlement in Rhodesia would be tolerated that did not include these "external" factions. Surprisingly, the British government softened its stand almost immediately after the new Salisbury agreement was announced, leaving the U.S. State Department alone in condemning the agreement out of hand. However, Washington registered second thoughts a few days later and took a more neutral stance toward the "internal solutions" in Rhodesia. It remains to be seen whether these faint indicators actually herald a return to common sense in U.S. policy toward critically important Southern Africa.

As one American who has visited Southern Africa, I certainly hope that our government takes advantage of the current opportunity to discard immoderate and immoral politics toward Rhodesia and South Africa. Once an American is brought face-to-face with the realities of Southern Africa, he finds it difficult if not impossible to explain his government's policies, let alone defend them. He finds the United States wide open to charges of blatant hypocrisy, of playing into our enemy's hands, and of pushing the black populations which we profess to defend backwards toward the Stone Age. The American in Southern Africa finds himself using the lame excuses of "American naivete" or "deference to British policies" to explain our blind hostility toward the Rhodesians and South Africans.

There is one other escape from the problem of trying to defend indefensible U.S. policy—to attack the obvious flaws in South African and Rhodesian societies. It is the easiest escape, because the American visitor can point the finger of outraged supermorality at the gross disparity of numbers between the powerful white factions and the politically deprived black population. He can in South Africa point with scorn at the "Whites Only" and "Nonwhite Only" signs which bedeck the country's facilities. (He can't do this in Rhodesia.) An American can lash out at the all too obvious disparity between Rhodesian and South African societies and the ideals (not the reality) of Western democracy.

Many Americans and Europeans take this tack when addressing Southern Africa. But to do so requires rejection of a fundamental reality—Rhodesia and the Republic of South Africa are in Africa, not in Europe or North America. The condemnation and subsequent pariah status of these two countries can be justified only by the unjust practice of comparing them with European states, e.g., Holland or France. If we judge them in the African context, Rhodesia and South Africa—for all their flaws—are exemplary states. This is true not only in terms of the material and social well-being of their black populations, but even in terms of the black populations.

The stark reality of Africa is that only a handful of its 52 nations are not totalitarian or authoritarian dictatorships. Some are ruled by incredibly brutal regimes such as that of Idi Amin's Uganda or Mengistu's Ethiopia. With the exception of four or five countries—Rhodesia and South Africa being prominent among those exceptions—no political opposition is allowed; no opposition newspapers, no meaningful elections. Most of these dictatorships are drifting backwards into tribalism, sometimes accompanied by massive slaughter of weaker tribes by the dominant one, e.g., 100,000 opposition tribesmen slaughtered in Burundi. Political repression in many of these countries makes the limited franchise of Rhodesia and South Africa appear benign and liberal.

These lame excuses are not a comfortable refuge from black and white Southern African questioners of U.S. policy. There is no escaping the fact that in Rhodesia black men are volunteering to defend the government in numbers too great to be accommodated with salary and arms, while on the other side, that of the "Patriotic Front", black recruits are collected at gun point and forced into the terrorist movement. Yet the U.S. government insists that the terrorist "Patriotic Front" represents Rhodesian blacks! There is absolutely no doubt that the "Patriotic Front" is supported by the U.S.S.R. and Cuban troops while the much-abused black and white Rhodesians plead for the support of the West. Yet we insist on joining our enemies against our friends. There is no doubt that the "confrontation states" of Zambia, Mozambique and Tanzania are destroying their own economies and reducing their black populations to misery while Rhodesia and South Africa offer the black person a far better life. We join the ideologues of black power to the detriment of black people. These realities which loom starkly to any American visiting Southern Africa make it awkward indeed to explain his government's attitudes.

The human misery in a country like Mozambique makes the economic condition of a black Rhodesian look utopian by contrast. Prior to the accession of black nationalists in Mozambique, the country exported foodstuffs. Today the population teeters on the brink of starvation, with utter famine ironically held at bay by food imports from the "enemy"— Rhodesia and South Africa. The once-great game herds of Mozambique are being slaughtered for food. Endemic diseases nearly obliterated by the Portuguese have returned in epidemic proportions.

These are African realities, and U.S. policies ignore them. We cannot pretend to a higher morality when we support totalitarian regimes over imperfect democracies. We deserve the appellation of hypocrites when we support the butchers and oppressors of black people simply because they are also black while condemning two African nations simply because the dominant "tribe" there is white, ignoring if not thwarting their progress toward our own political ideals.

The whites and moderate blacks of Rhodesia have given us a rare opportunity to shed our image as hypocrites. At a minimum we should drop our insistence that those who have perpetrated vicious atrocities against Rhodesian black people must be part of a settlement. How can we in good conscience insist that the terrorist leaders Nkomo and Mugabwe enter the Rhodesian government when their henchmen have hacked off the noses and genitals of black men and made their wives cook and eat the severed parts? Is this the road to political power we condone? Does our support of Soviet-backed terrorists who lock black women and children in huts and set fire to them signify U.S. concern for the black people of Rhodesia or contempt? Honest answers to these questions would prompt a U.S. change of policy toward support of the black-white settlement reached recently in Rhodesia which should be followed by a lifting of economic sanctions to give a promising effort by men of good will in that part of the world a reasonable chance of success. ●

STATEMENT BY SENATORS CHURCH AND SARBANES CONCERNING THE LEADERSHIP ROLE IN THE PANAMA CANAL TREATIES

● Mr. CHURCH. Mr. President, now that the Panama Canal treaties have been approved by the Senate, for both Senator SARBANES and myself I wish to say a few words about the work of the majority and minority leaders on the Panama Canal treaties.

Both played an essential role in shaping the final form of the treaties, in creating the political consensus necessary to obtain the approval of two-thirds of the Senate, and in providing masterful leadership during floor debate. These treaties would not have received the Senate's advice and consent without the active and courageous support of Senator ROBERT C. BYRD and Senator BAKER.

There is a long history behind what came to be called the leadership amendments that dealt with problems that, from the beginning of the hearings, concerned so many members of the Foreign Relations Committee. Their sponsorship of these two amendments was the crucial factor in reassuring many Senators with similar concerns. Later, when questions of interpretation about Senator DECONCINI'S provision threatened the fragile consensus behind the treaties, both in the Senate and in Panama, the leadership worked with all parties to find the key to the problem.

As floor managers of the treaties, Senator SARBANES and I had the fullest cooperation from the majority and the minority leader throughout the 38 days the Senate debated the treaties. It has been a pleasure and an honor to work with them so closely.

Both have demonstrated the highest qualities of true political leadership. They deserve the thanks of all Members of this body. Their role in this controversial issue was crucial. It will not go unnoticed in history.●

BRIGHAM YOUNG UNIVERSITY

● Mr. MARK O. HATFIELD. Mr. President, as usual, columnist George Will has insightfully touched upon the heart of an important issue worthy of the attention of this Senate.

Just over a month the Justice Department decided to officially announce their intention to sue Brigham Young University over their policy which requires housing facilities for male and female students to be separate. It has been encouraging to read letters from constituents over this past month responding to the Justice Department's action. Such a move is seen by many as a definite encroachment upon the right of the private educational institution to maintain high moral standards. Indeed, such intervention by the Justice Department, which bears the responsibility to protect the civil rights of all American citizens, in the words of Brigham Young university president:

Asserts a right based upon statute against our Constitutional right to the free exercise of religion guaranteed by the First Amendment.

This very same concern has been pointed out again and again by concerned constituents. For example:

My wife and I have four daughters we hope someday to send to a university where moral propriety and principles are upheld. Publicly funded universities and the attendant government's restrictions make that hope a difficult task by crowding out privately financed alternatives. Now the Justice Department seeks to use our tax dollars to extinguish all hope of our dream ever being fulfilled.

It is important to remember that dream for religious freedom, which lies at the heart of American Democracy, as our Nation continues to fight the battle for civil justice.

Legislation has been introduced by Senator McCLURE (S. 2721), of which I am a cosponsor, which amends the Fair Housing Act by resolving the apparent conflict found between title IX and the Fair Housing Act. This bill would permit separate housing for students and staff of private educational institutions. Trusting in the Justice Department's reasonable approach to this matter, I do not believe or hope that the situation will require legislative resolve.

I refer my colleagues of the Senate to George Will's article appearing in today's Washington Post, confirming my support for the stand BYU has taken against the Justice Department's action, and ask that it be printed in the RECORD at this point.

The editorial follows:

GOVERNMENT AS PEST (AGAIN)

It has been said that love and a cough cannot be hid. That also is true of the government's tendency to look strange and be a pest while defending the latest "rights." Just ask the people in Provo, Utah, home of Brigham Young University.

BYU, a Mormon institution, believes that "a reasonable separation of the sexes in housing" helps to maintain "traditional restraint in relations between the sexes." Although Washington has not *yet* made traditional restraint illegal, separation of the sexes may be.

Some 13,000 of BYU's 25,000 students live off campus. They are required to rent from landlords who agree to house men and women in separate buildings or wings. Most students live in apartments with three to five other students, and sign individual rental agreements. But in 1974 Congress had sex discrimination on its mind, and amended the Fair Housing Act to make it "unlawful . . . to refuse to . . . rent . . . a dwelling to any person because of sex." The act defines a "dwelling" as a building "or any portion thereof."

Two years ago, a female was refused an apartment in a private building reserved for males. Eventually her complaint came to the Justice Department. In February, Justice cleared its throat and told BYU: "This department has now completed an extensive, time-consuming and painstaking investigation" into BYU's off-campus housing policies and has reason to believe that BYU has caused landlords to violate the Fair Housing Act. BYU's practices require action "to ensure the full enjoyment of rights secured by the act."

But BYU's motto is "The Glory of God Is Intelligence," and it asked an intelligent question: What rights, exactly? In a letter that is a masterpiece of temperateness, Dallin Oaks, BYU's president, noted: "The law seems to require that if a landlord has signed rental agreements with five women students to live in a six-student apartment and a male applies for housing, the landlord must rent the sixth space in that apartment to the male applicant."

A Justice Department official has said, "Any suit that would try to put men and women in the same room would quite justly be classified as kooky." But Oaks, who probably understands that kookiness is in season, is not reassured, and asks:

Does BYU act unlawfully in assigning students to dormitories restricted to one sex, and, if not, what legal principle exempts campus housing? Does BYU act unlawfully when it tells off-campus landlords that students will be dismissed if they live in buildings or wings not restricted to a single sex, and when it urges landlords to accommodate that policy?

The Justice Department's protectors of "civil rights" probably lack the kamikaze instinct of their counterparts in the Department of Health, Education and Welfare and may be looking for a way to retreat gracefully. Oaks helpfully reminds Justice that Congress stipulated that the law forbidding sex discrimination in education does not forbid separate housing for the sexes.

And Oaks notes, with the innocence of a reasonable gentleman who lives far from Washington: "One department of government should not be in court to prevent actions in the private sector that another department expressly permits in federally assisted programs."

Even assuming that Congress had something clearly in mind when it banned sex discrimination in housing, Congress obviously did not intend to compel sexual integration in campus housing. Nor did Congress expect that, four years later, Justice would be asserting a right based on that statute against BYU's constitutional right to the free exercise of religion.

If the ban on sex discrimination that Congress reflexively inserted into the Fair Housing Act can cause government to become, almost absent-mindedly, a pest in Provo, imagine the mischief that ideological lawyers and compliant judges could produce with the vacuous language of the proposed Equal Rights Amendment. It blandly says that "equality of rights" shall not be denied or abridged on account of sex.

BYU is an inconvenient institution because it is out of step with the march of progress, and the government, in its role as sergeant major, is barking orders. Obviously there are "now" people who believe that BYU's practices, which are decidedly not "now," should for that reason be illegal.

BYU can defend itself, but it needs to do so only because government, having made a fetish of abstract rights, is making a nuisance of itself, again.●

● Mr. GARN. Mr. President, George F. Will is, as most of us readily admit, one of the most brilliant and learned commentators in the country. He is particularly good at calm analysis of the prevailing world view and in pointing out the inconsistencies and plain errors and stupidities of that viewpoint. Of course, one of the most fascinating aspects of Mr. Will's analyses is that he often succeeds in showing that what we at first thought was a "world view" is in fact not a widely held view at all, but the view of small group of intellectuals, bureaucrats, or writers who represent neither the scholarly, governmental, and journalistic communities nor the law, logic, and reason. What this small group does represent is sometimes not clear, but in the case most recently addressed by Mr. Will it represents the "now people" who believe that the "now ethic" should be extended by force of law to those who are not "now people."

Gratefully, the "now ethic" at the Department of Justice is promoted by reasonable people. At least we may say that they have acted reasonably (although mistakenly) to this point. After notifying Brigham Young University (BYU) in Provo, Utah, of its intent to file suit under the provisions of the Fair Housing Act, the Department of Justice has acted in good faith in negotiations aimed at avoiding litigation. I very much hope that litigation can be avoided and understand that Justice and BYU may be nearing an agreement.

The BYU housing case may soon go away, but remaining will be the tendency of the Federal Government to involve itself in the most minor private decisions. This involvement can only be had at some cost and that cost is growing increasingly unacceptable: There is the direct cost of Federal investigations, research and litigation; there is the less evident (to some) loss of personal and institutional freedom; and there is tremendous loss of governmental prestige and trustworthiness as the government seeks to enforce the unjustifiable—necessarily at the expense of that which is urgent and required.●

● Mr. McCLURE. Mr. President, I would like to associate myself with the remarks of my colleague from Oregon, Mr. HATFIELD regarding George F. Will's editorial in todays Washington Post, entitled "Government As Pest (Again)."

Mr. Will appropriately points out that a failure in legislative drafting has forced one Department of the Government to go to court to prevent actions in the private sector that Department expressly permits. Several years ago we recognized discriminatory practices in the field of education based solely upon sex. In response to this problem we adopted title IX; forbidding sex discrimination in education. In doing so however, we stipulated that under certain specific circumstances distinctions could be drawn based solely upon sex. One of these circumstances dealt with housing in connection with educational institutions. It was apparent that we all recognized that the Federal Government should not dictate to private individuals that cohabitation would be a

part of their nondiscriminatory education. Yet, in 1974 when we had sex discrimination on our mind, and we amended the Fair Housing Act to forbid discrimination based upon sex, we failed to include a similar exclusion with regard to housing occupied by students.

Although I felt that we had made our intentions clear, our oversight has caused the Justice Department to threaten one of our Nation's universities, Brigham Young University, which is renowned for its high moral standards, with a law suit which would in effect sanction cohabitation. I feel it is unfortunate that the Justice has failed to read the spirit of the law as indicated by our intentions. However, this problem does point out the important responsibility that Congress possesses to clear and consistently state the law.

In order to clarify Congress intentions and make this clear even to those in the Justice Department who will accept restraint on their power no other way, I have offered S. 2721 which states with precision and certainty the obvious fact that requiring separate living facilities for young people in school is not a violation of the fair housing laws of the United States.●

DESIGNED TO EQUALIZE

● Mr. BURDICK. Mr. President, I would like to include in the RECORD two letters relating to the U.S. Office of Education's interpretation of three words in the impact aid laws: "designed to equalize." Specifically, these letters concern the lengthy and complex regulations OE has devised to define these words.

Current law allows States whose school aid programs are designed to equalize expenditures to consider Federal impact aid as local resources, since it is intended to replace local taxes lost because of Federal installations. Yet, in their effort to define what "designed to equalize" means, OE has taken it upon itself to demand near perfect equalization of State education funds—a demand that is far beyond the congressional intent of the law and, I believe, an unnecesary encroachment on the State and local government's right to run their own education systems.

It is interesting to note that, although one of these letters comes from the Council of Chief State School Officers and the other from a local school superintendent, the feelings expressed are the same: That these OE regulations are arbitrary, overly restrictive, and need to be altered.

The regulations have been a continuing headache for North Dakota, Kansas, and other States whose school aid programs partially recognize Federal impact aid payments as local resources. As more States improve their school aid laws, I might add, they, too, will face similar problems.

North Dakota, which has one of the best equalization programs in the Nation, currently has 87 percent equalized revenues—a perilously small two percentage points above the arbitrary 85 percent level demanded by OE. Given the practical problems of available funding, the political problems of meeting State legislative demands, and the reality of helping school districts with widely differing tax bases, however, I believe the North Dakota percentage is perfectly acceptable. It is, in fact, a very good percentage. But what is really important, however, is that the North Dakota school aid program is designed to insure that the percentage of equalized revenues is always relatively high. And it is this fact which the law directs OE to determine. It does not give them the authority to dictate to the States the exact amount of equalized or unequalized revenues they should have.

The first letter I would like to put in the RECORD speaks to this. It comes from the Council of Chief State School Officers who, at their March meeting, passed a resolution unanimously recommending deletion of section 5(d)(2)(B) from Public Law 81-874. Such a deletion would take away from OE the authority to define the "designed to equalize" clause while, at the same time, continuing protection of the interests of school districts.

The second letter comes from the Superintendent of Schools in Grand Forks, N. Dak., Mr. Burton M. Nygren. Grand Forks is one of the two largest recipients of impact aid in North Dakota. Yet this letter, too, urges that OE relax its overly stringent regulations. Mr. Nygren describes the serious problems at the local level created by the continuing uncertainty of Federal funding.

In light of the continuing inflexibility of OE on this subject and the unending problems North Dakota and other States have faced, I would like to see the Senate adopt the position of the Chief State School Officers and strike section 5(d)(2)(B) from the law. The term "designed to equalize" does not require States to achieve perfect equalization. It requires only that they have programs whose goal is to equalize. Deletion of this provision would retain that requirement and would leave intact that section of the law which protects local school districts. That section, in fact, contains a fair formula which allows the States to count only that portion of local resources which are equalized. This is built-in protection, fair to both the States and local agencies.

I would hope that the Congress will take action this year in the 1978 ESEA bill to resolve this matter once and for all. Whether it is through elimination of section 5(d)(2)(B) or through some other action, I hope very much that we can ease the strict and arbitrary standards now demanded by the Office of Education.

Mr. President, I ask that the two letters be printed in the RECORD.

The letters follow:

MARCH 13, 1879.

Hon. QUENTIN N. BURDICK,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BURDICK: I thought you would want to know that the Council membership, at its Annual Legislative Meeting on March 7, 1978, voted unanimously to support a resolution sponsored by State Superintendent Howard Snortland regarding the use of Impact Aid payments in states which have moved to equalize expenditures in their state aid formula. Specifically, the Council recommended that Section 5(d)(2)(B) be deleted from P.L. 81-874.

This action was based on the experience of the affected states which have had continuing problems in their attempts to meet arbitrary and unrealistic criteria suggested in regulations promulgated by the U.S. Office of Education over the period of the last several years. The recommended deletion would remove the authority of the Commissioner to develop such regulations and, at the same time, continue to protect the interests of local education agencies.

The Council is anxious to assist you and your colleagues toward the successful resolution of this problem which is of such critical importance to the State of North Dakota, and a growing number of other states as they move toward greater equalization efforts in their respective state aid formulas.

Sincerely,

JOHN W. ADAMS,
Director, Federal-State Relations.

MARCH 10, 1978.

Senator QUENTIN BURDICK,
Russell Senate Office Building
Washington, D.C.

DEAR SENATOR BURDICK: Although I haven't written you since becoming Superintendent in Grand Forks, I know you and your staff have been most helpful over the years in resolving problems related to P.L. 874 Impact Aid funding. Payments have come in well this year, and we appreciate the efforts made by your office.

As you are well aware, North Dakota's law requiring a deduct of P.L. 874 in calculating Grand Forks' (or any other district's) foundation aid payment does conflict with federal law and regulations as presently interpreted.

There is a philosophical and practical issue as to why a state, such as North Dakota, should not deduct P.L. 874 payments. Certainly, such monies are provided in lieu of a local tax base. Indeed the federal government has recognized that a deduct mechanism is reasonable if the state's program of financing education is well equalized.

How the federal government determines the adequacy of a state's equalization program is so complicated most cannot understand it including myself—and I've tried.

Personally, I understand the contentions of both the state and federal governments that you should or shouldn't deduct. Good arguments can be made on both sides. This doesn't help resolve the problem, however.

In Grand Forks the uncertainty each year or whether or not we'll be in compliance with federal law and regulations leads to problems of budget planning, of staff morale, of poorer relations between Base and town, and of great exasperation of the School Board and the general public.

My position is that the federal law and regulations are overly complicated and arbitrary regarding the deduct provisions of Impact Aid. A situation where H.E.W. is attempting to judge how well state educational financing plans are working (equalized) seems unworkable. There is such a range of approaches to how states finance local school districts that the federal government will probably never come up with a law or regulations broad and narrow enough to cover all circumstances in an equitable manner.

It is my information that some work is being done on P.L. 874 during the current session. Senator Burdick, I would urge you to support a change in the law which would allow states a P.L. 874 deduct without the complex or stringent conditions now imposed by the federal government.

If such a direction is politically unrealistic, then the current arbitrary and re-

strictive controls determining whether states have adequately equalized must be changed. North Dakota presently has a good system of equalizing educational costs and it has been improving the level of equalization since 1971. Yet compliance with federal regulations is most difficult.

The present law and administration of it by H.E.W. impose regulations so rigid and unreachable that the effect is to deny states the opportunity to exercise the deduct provision even when their equalization programs are working well such as in North Dakota.

I hope 1978 will be the year we can finally resolve this frustrating annual problem. Thanks for your help. Please contact me if I can assist with any specific information regarding the Grand Forks School System.

Sincerely,

BURTON M. NYGREN,
Superintendent.●

PRIME MINISTER WELCOMES U.S. BUSINESSMEN

● Mr. GOLDWATER. Mr. President, we have heard a great deal in recent weeks from President Carter, U.N. Ambassador Andrew Young, and Secretary of State Cyrus Vance about what should be done in Rhodesia. Most of what has been said has been the administration's idea of what constitutes an acceptable settlement of a so-called Rhodesian problem. By and large, it ignores, and indeed has labeled "illegal," the very important agreement already reached by Rhodesian leaders for the orderly development of majority rule in that country.

At this stage, it strikes me that it might be well for the Members to understand how Prime Minister Ian Smith of Rhodesia feels about the situation. Recently, the Prime Minister met with a group of American businessmen taking part in a Time magazine tour of Rhodesia. What he had to say to them was very much to the point and I ask to have his remarks printed in the RECORD.

The remarks follow:

PRIME MINISTER WELCOMES U.S. BUSINESSMEN

The following are extracts from an address made by the Prime Minister, Mr. Ian Smith, to American businessmen taking part in the Time magazine tour, at the Prime Minister's residence in Salisbury on Tuesday (March 21).

I am speaking to you tonight in my capacity as first Chairman of the Executive Council and I'm sure I represent the views of the other three members who joined me today in the first meeting of our Executive Council.

I don't want to go back too far in history but perhaps it is appropriate for me to say that we were disappointed by the action which the American Government took at the time of the imposition of sanctions against us. We feel that now there is an opportunity for them to rectify any wrong which may have been done. We believe that an injustice was done to us and we think at least two should have been given a chance to state our case. Unfortunately a lot of members of the Free World including your own country allowed the British Government to lead them by the nose into joining in the imposition of sanctions against us. For a country which has the reputation of yours, of maintaining the highest standards as far as impartiality and justice is concerned, this was an unusual act to put it mildly, because you put us in the dock and charged us, you convicted us and you actually sentenced us without ever giving us an opportunity to defend ourselves. I think you will agree with me when I say there could be no more fundamental breach of the ethics of justice than that. But I don't want to go into recrimination. I believe now we should be able to put things right.

The next important part that America played was when we met Dr. Kissinger in September '76 and he was then asked, on behalf of the British and American Governments to sell an agreement to us which he told us was a British agreement but that the Americans backed it. This was a dramatic change for us. We accepted then something which we hoped we would never have had to accept. We had all along believed in a system of meritocracy, but we were told that in this world today it had to be "one man one vote", whether we like it or not, and if we did not like it, then life was not going to be easy for us so we accepted it. A traumatic decision for Rhodesia.

The Rhodesian nation accepted it with great statesmanship with tremendous grace. However, when we went to Geneva to implement it the thing fell through because the British Government allowed themselves to be deviated from the terms of the agreement. We were promised that if we accepted this magic thing, "one man one vote", that the British and American governments guaranteed they would remove sanctions. They would acknowledge us. They would join with us in calling for an end to terrorism, and they told us that as the leading powers of the Free World this would be of tremendous influence.

It was no fault of ours it broke down and we were left in the middle. We picked up the threads and eventually we got the internal black political leaders to come and talk to us. Britain had been pulling them away from us for years, telling them that we were wrong, that we were bad and we couldn't be trusted. I think I can say now that the black political leaders with whom I have been talking, will tell you that they found once they came face to face with us that we were not what the British had painted us to be. In fact they may have come to the conclusion that we are probably a little better, a little straighter to deal with than those they dealt with in the British Government.

We have accepted in this new Agreement exactly what we accepted under the Anglo-American proposals which Kissinger sold to us, and the crux of the matter is "majority rule". Our plea now to the Free World is to give us what they promised us when Kissinger sold us those proposals. We have now accepted what they asked us to accept on that occasion so are we not justified in saying—why do you not now deliver the goods which you promised us at that time? And there is an even greater case now.

I'm sure I don't have to tell you of the communists' march down Africa—how they started in Angola. Had the Free World come in, there they would have had two thirds of the population of that country on their side—but they didn't. The Russians had one third, they came in and they have taken over. I don't have to remind you of what is happening in the Horn of Africa today, you know as much about it I'm sure as we do here in Rhodesia.

I think that the one thing that might help us is that the Free World now believes that the Russians might come further down into this part of the world. And if the Free World sits back and allows that, it would be a tragedy because this is a little part of Africa which has always been associated with the Free World. We believe in private enterprise. We believe in Western democracy and we want to be on the side of Western democracy. If we fail now, then you know what the alternative is—that the people who are being pushed by the Russians or the Marxists, will then come in at the point of a gun, because it has been made clear to us that we won't get help from the Free World. They don't supply us with the things that we need to defend ourselves, not even if we are prepared to pay for them. These other people, they get their requirements free from the communists.

I want to tell you, and I speak as a white Rhodesian, that the information before me, which I believe is very accurate, from our Security Forces, tells me that the three black leaders with whom I have made an agreement represent from 85 percent to 90 percent of black opinion in this country. What more can we do than come to a peaceful agreement with them, accepting what they have been asking for, and fighting for, for a long time. We have now given them this. I wonder if one could make a better case for saying that there is no need for the fighting to go on. At least we would hope that our friends in the Free World would not lend their support to the fighting, for it is the intention of the Marxists who are behind them to encourage the fighting to continue.●

AID TO CYPRUS, GREECE, AND TURKEY AND PEACE IN EASTERN MEDITERRANEAN

● Mr. KENNEDY. Mr. President, 3 days ago I called on this floor for a major U.S. diplomatic initiative, working closely with the United Nations, to move toward a settlement of the territorial, constitutional, humanitarian, and security issues facing the people of Cyprus.

I strongly believe that the pressing issue should be negotiations over Cyprus, not arms for Turkey. The administration, working closely with U.N. Secretary General Waldheim, should actively encourage a comprehensive peace settlement for that strife-torn island.

I am therefore, deeply concerned by the administration's recent request to lift the embargo on arms supply to Turkey.

We must recall that the Congress first imposed this embargo because Turkey used American arms to invade and occupy Cyprus in August 1974—in violation of its legal obligations to the United States.

The circumstances have not changed substantially since 1974. Today, 30,000 Turkish troops continue to occupy nearly 40 percent of Cyprus, displacing over 200,000 Greek Cypriots from their homes and lands.

We cannot justify to the American people a lifting of the arms embargo, unless and until there is substantial movement toward a just solution of the Cyprus tragedy. The Government of Cyprus has made serious efforts to move toward such a solution. Greek Cypriots are, I believe, increasingly prepared to negotiate reasonable territorial and constitutional guarantees for the Turkish-Cypriot minority. But we have failed to see a constructive approach from Turkish Cypriot leaders since 1974—a failure subsidized by Turkish troops and U.S.-supplied arms.

Last week, the Turkish side responded at long last to the April 1977 Greek Cypriot proposals on both territorial and constitutional arrangements. This week, Secretary General Waldheim is presenting the Turkish proposals to the Cyprus Government. The reported Turkish response still falls short of what is needed,

but we must all hope that Mr. Waldheim can bring about serious and productive efforts by both sides to resolve their differences.

The last thing that this fragile diplomatic process needs, at this early stage, is a major new U.S. commitment of arms to Turkey. Instead of coming to the Congress with a request to lift the embargo, the administration should be telling us of new U.S. efforts to help resolve the differences on Cyprus.

It is a sad commentary that Cyprus can be relegated to the back burner of diplomacy for 1 year, but Turkish demands can precipitate an urgent arms request from the administration. This is a sharp turnaround of the U.S. position up to only a few weeks ago: that further movement on arms supply should follow, not precede, diplomatic movement on Cyprus.

So instead of seeking arms for Turkey, we should be pursuing peace for Cyprus. We should now be making serious efforts to guarantee the rights of the Turkish minority and the Greek majority in that island, in the context of a comprehensive settlement which addresses both the constitutional and the territorial issues.

Greece and Turkey now have responsible leaders, with a serious interest in resolving differences not only over Cyprus but over boundaries in the Aegean. I welcome both the direct discussions between Prime Ministers Karamanlis and Ecevit and their stated interest in improving relations between their two countries. The elements of statesmanship, of readiness to take risks for peace, are now apparent in the eastern Mediterranean.

Greece and Turkey are, furthermore, longstanding friends and allies of the United States. Democracy should prosper with peace in each of our countries, as well as in Cyprus, and our commitment to each other's security in the NATO alliance should remain firm.

These interests can and must be brought into balance. We all should have an interest in moving the peace process forward in Cyprus. Substantial progress will make it possible to consider arms supply without incurring the unacceptable risk of destroying this process.

Nor should we consider assistance to Turkey in isolation from assistance to Cyprus and to Greece. The administration has requested $175 million in foreign military sales (FMS) financing for Turkey and only $140 million for Greece, after having requested $18 million less in its original budget request. It is incongruous, to say the least, that we appear to reward Turkey—which has failed to withdraw its forces from Cyprus and is threatening to review our bilateral and NATO ties—at the same time as we appear to penalize Greece—which has been our longstanding ally, having survived the trauma of dictatorship to which the United States had contributed, and which is now moving toward closer association with both NATO and the European Community. At a minimum, the assistance that we give Greece should be equivalent to any assistance we give Turkey.

Finally, it is inconceivable that the administration should move to reduce our humanitarian assistance to Cyprus itself from $15 million in fiscal year 1978 to $5 million in fiscal year 1979. Over 200,000 refugees remain to be cared for; large proportions of the island's housing, health and education facilities, agriculture and industry have been destroyed or dislocated; 70 percent of the total productive capacity is now in Turkish hands. The Government of Cyprus has estimated that it will cost $78,200,000 for its special relief fund, including housing, welfare, education, and training, in 1979—excluding the ordinary HEW budget and additional benefits and pensions for the displaced. The least that we can and should do is maintain the level of our contributions to the enormous tasks of reconstruction and rehabilitation still ahead of Cyprus, and I intend to sponsor increased funding to this effect.

The first priority of the United States, in the eastern Mediterranean as well as elsewhere, must be to encourage a peaceful and just settlement of the conflicts that persist in Cyprus and the Aegean. It would be premature and dangerous for us to lift the arms embargo against Turkey until substantial progress is achieved. Our interests and assistance can be brought into balance, not by threats to end alliances, but by putting peace ahead of arms in this conflict-ridden part of the world.

Mr. President, I ask that two thoughtful editorials from the New York Times, on this important issue, be printed in the RECORD.

The material follows:

[From the New York Times, Mar. 31, 1978]

THE WAY BACK FROM CYPRUS

Since 1974, when Turkish troops, using American weapons, occupied two-fifths of the island of Cyprus, relations between Ankara and Washington have been sour. Congress has limited the flow of additional arms until Turkey pulls back its forces; successive Turkish Governments have refused to define their conditions for withdrawal under such pressure. Both the United States and Turkey will end up losers if no way can be found to break out of this bind. Turkey could point the way by revealing its proposals for a Cyprus settlement.

Turkey's invasion was scarcely unprovoked. The 18 percent Turkish minority on Cyprus had never been well treated by the Greek majority. And in July 1974, a coup brought to power a hard-line Greek-Cypriot faction that seemed likely to take even less account of Turkish-Cypriot rights. Although the insurgent regime lasted only a few days, that was long enough to precipitate Ankara's invasion.

Ankara has reacted to the limit on arms sales—$175 million this year—by sharply restricting American use of NATO facilities in Turkey. Under steady pressure from Greek-Americans, Congress has remained firm. But the Ford Administration strongly deplored the Congressional restrictions as harmful to NATO—and thus caused the Greek Government to curtail its military cooperation with NATO. The Carter Administration has tried to straddle the issue. It has continued discussions for a defense agreement that would substantially increase American military aid to Turkey. But it has implied that it would not conclude the agreement until there had been progress on Cyprus. Early this month, Secretary of State Vance was explicit: Washington would not move, he told Congress, until it had examined proposals for Cyprus promised by Turkey's new Prime Minister, Bulent Ecevit.

More intolerable "linkage," responded Mr. Ecevit—and this time from the Administration, not merely from Congress. He countered with reverse linkage: no Cyprus proposals until the heat is off. That message, and subsequent hints that Turkey might withdraw its half-million men from NATO's command and even sign a nonaggression pact with Moscow, caused a high-level American delegation to hurry to Ankara this week to attempt to set things right.

That won't be easy. Strong sentiment continues in Congress that Turkish concessions are necessary before normal military relations can resume. That sentiment is justified. Turkey broke United States law and violated the spirit of its alliance when it used American weapons to expel Greek Cypriots from their homes and farms. Having made its point, Ankara should now pull back. Greek Cypriots—and Greece—realize there can be no return to the old arrangements on Cyprus. They acknowledge that Turkish Cypriots should enjoy nearly complete autonomy, including a territorial zone of their own, but one roughly proportionate to the size of the Turkish-Cypriot population.

There is every reason to believe that both Prime Minister Ecevit and the Turkish military leadership would like to pull back. Because the Turkish occupation force is the central issue in contention, the first moves must come from Ankara. Since the issue continues to be the most explosive one in Turkey's politics, such a move would be painful. But Mr. Ecevit is in a strong parliamentary position; unlike his predecessor, he does not depend upon ultranationalists for his majority.

Turkish dissociation from NATO would be costly to the United States. But it is the Turks who should calculate the benefits of full participation in NATO; it is they who face the risks of weakened ties to the West. Meanwhile, those who would support NATO by lifting the restrictions on arms to Turkey should remember that Cyprus is just as emotion-wrenching an issue in Greece. It would not strengthen the alliance to appease Turkey at the expense of turmoil in Greece.

[From the New York Times, Apr. 9, 1978]

TAKING A CHANCE ON TURKEY

Secretary of State Vance told Congress last Thursday that if only it would lift its restrictions on shipments of American arms to Turkey, the Turks and Turkish Cypriots would put forward new proposals for a Cyprus settlement. He may be right. But the issue is not whether there will be new proposals. Rather, it is whether the proposals will move Turkish troops back from the 40 percent of Cyprus they now occupy to a zone more nearly proportional to the 18 percent of the island's population that is Turkish. Secretary Vance is thus asking Congress to join him in betting that once the American restrictions are removed, the Turkish Government of Prime Minister Ecevit will be able to make large concessions that could not be made while the limits remain.

The bet may be a bad one. In Turkey's politics, no time is a good time for conceding territory to Greek Cypriots. And Mr. Ecevit's position seems less strong now than it did when he returned to office last Jan. 1. In Parliament he has been able to govern without the votes of ultranationalists. But in the streets extremists continue their campaigns of violent intimidation that have taken more than 100 lives this year. There is no reason to think that Mr. Ecevit himself does not want to be generous so as to remove the Cyprus problem from his crowded agenda. But in the prevailing political climate, concessions that are even remotely acceptable to

the Greek Cypriots may be impossible. And once American pressure is removed, Mr. Ecevit will have even less reason to take political risks.

Secretary Vance emphasized the strains that the limits on arms shipments impose on Turkish politics and Turkey's links to NATO. But he glossed over the comparable strains on Greek politics, and Greece's links to NATO, if removal of the restrictions is not accompanied by a satisfactory outcome on Cyprus. Greece is no less important to NATO's southern flank than Turkey. Any bargain that "saves" Turkey for the alliance at the cost of losing Greece would be hollow indeed. And if, as is likely, Congress should refuse to ease the limits on Turkey, the Administration's present approach risks alienating both countries.

Turkey's spokesmen decry what they see as an American tilt toward Greece, and they say that they only want Americans to be "even-handed." Yet in the present Cyprus situation, removing the arms limits would amount to a tilt toward Turkey. So long as Ankara's troops remain where they are on the island, Congress should retain the only leverage it has.●

DETERIORATING RAIL ROADBEDS

● Mr. JAVITS. Mr. President, I have worked together with Senator HEINZ and other distinguished Members of the Senate to find a much-needed solution to the serious problem of deteriorating rail roadbeds in the United States. In our efforts, we have also sought to address another significant problem facing the Nation and particularly the Northeastern States—unemployment. We firmly believe that the bill we have introduced, "The Emergency Rail Transportation Improvement and Employment Act of 1977," S. 1419, addresses both of these problems by establishing a program which would put unemployed Americans back to work repairing our rail roadbeds.

Recently, radio station KQV in Pittsburgh broadcast an editorial commending these objectives and pointing out the urgent need for immediate action. Citing the recent tragic derailments which caused numerous deaths and injuries, KQV appropriately asked what would have happened if the derailments had occurred in more populated areas. Implicit in the editorial is the question: When and where will the next derailment occur? The situation is critical. I, therefore, commend the editorial to my colleagues and ask that it be printed in the RECORD.

The editorial follows:

[KQV Editorial, Pittsburgh, Pa.]

RAILROAD TRAGEDY

The recent series of tragic accidents on America's railroads emphasizes the need for corrective legislation which has been introduced in the United States Senate by Pennsylvania's Senator John Heinz. One train derailment in Tennessee caused 12 deaths and 40 injuries, and the more recent chlorine gas cloud resulting from another derailment in Youngstown, Florida, caused 8 deaths and 89 injuries. What if that accident had happened in Youngstown, Ohio? There might have been hundreds, if not thousands, of people dead, with many more thousands injured.

In 1976, according to official figures, there were 1,964 people killed and an additional 65,387 injured in railroad accidents. The major cause of these accidents was bad tracks and worse road-beds. There are now 44,000 miles of tracks in such rotten shape that trains are restricted to speeds of less than 10 miles per hour.

Senator Heinz' legislation, S. 1419, would create 100,000 meaningful jobs repairing the road-beds of railroads. The federal government would pay labor costs and the railroads would pay for materials. In Pennsylvania alone, 8,000 new jobs would be created and the purchase of steel for new tracks would be a tremendous shot in the arm for our ailing steel industry.

Senators from both parties have signed a resolution urging Congress to act upon this Bill immediately. Before any more lives are lost, Congress should pass S. 1419.

ROBERT W. DICKEY,
General Manager.●

SUBCOMMITTEE ON INVESTIGATIONS RELEASES REPORT ON PREPAID HEALTH PLANS

● Mr. PERCY. Mr. President, 3 years ago, the Senate Permanent Subcommittee on Investigations entered into a study of prepaid health plans and health maintenance organizations in California. The study served to determine whether such one-stop complete health delivery systems based on preventive care might be ready for national implementation when national health insurance becomes law.

I personally believe that the HMO concept is a sound idea, since it has the potential of placing the lid on rapidly rising medical costs and insuring quality care to those who need it. But, as our report shows, a good idea can soon turn sour without the establishment of adequate safeguards and standards.

California, in an effort to halt skyrocketing costs in its State medicaid program, began implementing its PHP program in 1972. At the height of the program, it included 54 PHP's that were providing care to 250,000 medicaid recipients. The investigation by the subcommittee staff and our hearings, uncovered examples of fraud, abuse, and mismanagement rampant in practically every aspect of the system. As is noted in our report:

The California PHP program was plagued by a medical commercialism that was often nothing more than profiteering.

What is most troubling to me, Mr. President, is that throughout the first 2½ years of California's experiment with prepaid health plans, officials in the Department of Health, Education, and Welfare in Washington were well aware of these difficulties. Yet they did nothing about them, even though 50 percent of the medical care costs provided by these plans came directly out of the Federal Treasury. A recent article in the New York Times indicates that fraud and abuse has become almost a way of life at HEW, with the agency itself estimating that between $6.3 and $7.4 billion was lost last year alone through fraudulent activities. The California experience is a case in point as to how HEW has allowed this situation to develop.

Among the PHP problems in California that HEW in Washington had been advised of, but did nothing about, were the following:

Door-to-door solicitation of poverty-stricken families was marked by misrepresentation, and enrollment techniques ranged from the offering of gifts of football tickets and chicken dinners to outright coercion;

Consultants exacted exorbitant fees from those setting up PHP's, often as a result of obtaining contracts based on a gross percentage of fees. On that basis, one PHP began paying $60,000 per month for services that it later found could be obtained for as little as $4,000 per month;

The corporate structures of the PHP's often involved nonprofit corporations whose officers and directors contracted with for-profit entities they owned or controlled.

One incoming head of such a corporate complexity aptly described its interrelationships as a "pretzel palace." These corporate schemes were designed to take advantage of tax exemptions in a way that appears to violate at least the spirit underlying the exemptions.

Naturally, none of this could have gone on without the State government in Sacramento also ignoring the problem. And, as the subcommittee report indicates, State health department investigators were regularly reporting to their superiors about alleged violations of law, administrative regulations, and medical ethics. Yet action was not taken on these reports by the California Health Department. Substandard health care and fraudulent activities by corrupt individuals often flow from an absence of aggressive controls by government. This is what happened in California and it should be a lesson to HEW.

I firmly support the HMO concept. And, but for the subcommittee's inquiry into the PHP matter, I suppose I would have enthusiastically supported the upcoming $500 million continuation of the HMO program.

However, my enthusiasm has waned considerably in the face of the facts presented in the subcommittee report. The $500 million that is now requested to continue the program will be administered by the same agency which stood idly by for so long while the California PHP experiment floundered. I have not decided whether to vote for the continuation of the HMO program. I think what we need at HEW is a more proprietary attitude toward the tax dollars that we are spending. Adoption of the subcommittee's recommendations would go a long way toward insuring responsible and fiscally sound administration of the HMO program.

Perhaps one solution is to require enforcement of the provision that no more than 50 percent of the beneficiaries in each federally supported HMO be welfare recipients. This would necessarily mean that half of the HMO's funds would come from the private sector. With half of HMO's membership paying for its own health care, there is likely to be a more demanding consumer clientele. And HMO's serving this population mix would be more likely, fearing consumer withdrawal and complaints, to provide top medical care at reasonable prices.

I think that HEW should study this report carefully, for much can be learned about the pitfalls of operating a pro-

gram, with as much promise as this one has, without adequate controls.

I want to extend my thanks and appreciation to my distinguished colleagues, Senators JACKSON and NUNN, who as chairman and vice chairman of the subcommittee have worked diligently to pursue this investigation and bring forth this report. Also, I want to thank the staff members of the subcommittee without whose efforts this investigation and report would not have come about. In particular, David Vienna has done a tremendous job every step of the way in this 3½-year effort.

I ask that the findings and conclusions in the subcommittee report be printed in the RECORD at the close of my remarks and Senator NUNN's remarks. I also ask that an article on fraud in government appearing in the New York Times of April 15 be printed in the RECORD at that point.

The material follows:

V. FINDINGS AND RECOMMENDATIONS

A. SUMMARY

The State of California implemeted in 1972 an alternative form of health care organization, financing and delivery in its Medicaid program when it began contracting with prepaid health plans. It was a bona fide effort to reduce spiraling Medicaid program costs, and at the same time, to improve the quality of care for the poor. The State attempted to duplicate in its Medicaid program the history of a generation of success and consumer satisfaction with prepaid group practice organizations. The enthusiasm for the program and the hope that it would succeed resulted in a belief on the part of the State officials that the prepaid health program would be a panacea.

Subsequent to the implementation of the PHP program in California, the Federal Government enacted in 1973 the HMO Act to provide funds for the development of HMO's across the nation. However, the PHP program resulted in the development of more prepaid health systems in California than in any other State. As Senators Jackson and Percy said at the opening of the Subcommittee's March 1975 hearings, the inquiry was aimed at learning from the mistakes of the California PHP program so that the same errors would not be made in other States and in the new Federal HMO development program.

The California PHP program was plagued by a medical commercialism that was often nothing more than profiteering. The program very seriously needed to be regulated—to be managed—not only to achieve the original policy ideal, but more importantly, for the protection of the public purse and the poor.

The hearing record of the Permanent Subcommittee on Investigations shows that the California Health Department contracted with non-profit, tax exempt prepaid health plan corporations whose officers and directors created or contracted with for-profit entities they owned or controlled to provide the services required by the PHP to fulfill its State Medicaid contract responsibilities. Through these often complex corporate structures, State and Federal Medicaid program funds were diverted from their intended beneficiaries. The State auditor general in April 1974 reported that as much as 52 percent of the Medicaid funds were accounted for in administrative costs and profits.

In an effort to obtain enrollees in their plans, numerous PHP operators used deceptive and fraudulent enrollment techniques in their door-to-door sales operations. Enrollees who sought to disenroll from plans were trapped in them by the failure of some plans to process these disenrollment forms with the State health department. Other enrollees, who needed treatment, were involuntarily disenrolled from the plans by the operators when the cost of their care became expensive.

The quality of care provided in some plans was below reasonable standards, as judged by the State's own medical auditors. Some of the plans contracted with substandard and non-accredited hospitals. Consulting firms exacted exorbitant fees for providing management and computer services.

While both DHEW and the California Health Department were aware of all of these problems, they did little from the program's inception in 1972 to January 1975 to reform the program. At the Federal level, responsible officials ignored warnings about the program's deficiencies for three years. Investigative reports on abuses and fraud were ignored as were medical quality audit findings. Program contract managers were rotated so frequently, according to the State's legislative analyst, that none of them spent enough time working with specific plans to learn enough about each to manage them properly.

The State failed to scrutinize the role of consultants. The State's failure to act on its own investigative reports was tantamount to condoning program improprieties.

Congress responded to the situation with the Health Maintenance Organization Act Amendments, late in 1976, which required that all PHP's receiving Medicaid funds be Federally qualified HMO's. This forced the California PHP's to be approved by HEW as a condition of continuing in the California Medicaid program.

Some plans did not seek Federal qualification and dropped out of the program. Six plans have been qualified. There are presently 11 California PHP's seeking Federal HMO Qualification from DHEW.

One of the root causes of the excessive administrative costs and profits of the plans was the State's failure to develop, in violation of its own regulations, an actuarially based, reimbursement rate. To this day, the State has no method to objectively monitor quality of patient care. DHEW provided the State a $5.2 million grant to develop a method to determine appropriate rates and monitor patient treatment. A rate setting method is expected to be tested this year as is a quality monitoring system.

Prepaid group practice can be a successful alternative to fee-for-service medicine. As Senator Jackson said at the opening of the Subcommittee hearings, the concept of prepayment of health care services "is a good idea that should not be abandoned because men without consciences, profiteers and scam artists took the initiative in California from those with good intentions." Indeed, no witness at the hearings was critical of the HMO concept.

However, the record of the California program should alert other State health program administrators, Federal program managers and the Congress to the kinds of fraud and abuse possible in prepayment systems. It should be a clear warning that effective regulatory and management safeguards are essential in these and other State and Federal health care programs.

The Subcommittee's hearing record shows that existing laws and regulations are inadequate to cope with marketing abuses and problems related to corporate structure and contractor management. Indeed, Federal officials have made clear their concern that the Federal investment in some HMO's is in jeopardy, and that they are powerless under present law to effectively safeguard Federal funds. It is clear that DHEW now lacks the resources to properly monitor the quality of care provided in Federally qualified HMO's and to assure compliance with existing Federal regulations.

In short, unless remedial action is taken, the Federal Government, through its program of financing the development of HMO's, faces the prospect of encountering nationwide the same kinds of scandal and abuse that have plagued the California Medicaid program.

B. MAJOR FINDINGS AND RECOMMENDATIONS

1. Consulting companies often charged excessive fees to prepaid health plans particularly when fees were based on a percentage of gross income

There is, without question, an important role for qualified consulting firms in the prepaid health plan area. The Subcommittee finds, however, that the compensation arrangements between certain of the plans studied and their outside consultants bare little or no relation to the reasonable value of the services contracted for. For example, two consulting companies entered into contracts with groups seeking PHP contracts with the State of California. These contracts provided that if the State contract were to be awarded, the consultant would provide management, marketing and/or computer services and would be reimbursed on the basis of a percentage of gross Medicaid receipts from the State, without regard to the actual or reasonable cost of the services. In another case, a consulting company entered into a contract with a plan which agreed to pay the consultants 10 percent of the gross receipts it would receive from any labor union business the consultants could direct to the plan, again without regard to reasonable costs.

One witness noted that his plan formerly had been paying $60,000 per month to a consulting company for computer services. That payment was based on a percentage of the gross Medicaid payments to his plan. At the time of the Subcommittee's hearings, he was paying only $4,000 per month based on reasonable charges.

The regulations promulgated by DHEW provided that the regional officers were responsible for review and approval of all PHP subcontracts in excess of $100,000. However, the GAO found that DHEW neither reviewed nor approved any such subcontracts of the five PHP's examined at the request of the Subcommittee. Likewise, the GAO found that the California Health Department failed to review and approve subcontracts as provided for in State regulations.

In a December 16, 1977 report on the California Department of Health secure "written subcontracts for each PHP" and "require prior approval of all subcontracts including individual providers (physicians, hospitals and others)."

The subcommittee recommends that the Medicare, Medicaid and HMO Acts be amended to require that DHEW promulgate regulations to assure that compensation under any contracts for services to an HMO shall not exceed the reasonable cost of such services. Such regulations should eliminate unwarranted payments by HMO's on the basis of a percentage fee for any goods or services rendered.

2. There is a serious potential for conflict of interest involving the acts of State officials and employees who handle Federal health care funds

In two separate inquiries the Subcommittee has found State officials engaged in activities that raised serious questions of conflict of interest. In California, a State official left his position as deputy director of the State medicaid agency and established a consulting company. The company obtained contracts for and with a number of PHP contractors and prospective contractors, some of which dealt with the State medicaid agency when he was a State official.

In another situation, the Subcommittee found that a West Virginia official, responsible for overseeing the performance of a medicaid program contractor, purchased stock in

the contractor's corporation and accepted consulting business from the firm in another State.

To guard against such conflicts of interest on the part of Federal officers and employees, Section 207 of Title 18 of the U.S. Code disqualifies former officers and employees from dealing with certain matters connected with their former duties and official responsibilities. Section 207(b) of Title 18 imposes a one-year post-employment restriction respecting matters which were within the area of official responsibility of a former officer or employee at any time during the last year of his Federal service. Section 208 of Title 18 prohibits certain actions by Federal employees affecting their personal financial interests.

Under the Medicaid program many State and local employees are called upon to administer hundreds of millions of dollars of Federal funds.

The subcommittee recommends that the restrictions imposed on Federal offices and employees under Sections 207 and 208 of Title 18 of the U.S. Code be made applicable to officers and employees of State and local governments who are responsible for the expenditure of substantial amounts of Medicaid program funds.

3. *Prepaid health plans in almost every instance, involved complicated corporate structures consisting of non-profit corporations whose directors and officers contracted with for-profit entities they owned or controlled. This created a strong appearance of improper self-dealing. In certain instances it resulted in unnecessary and improper depletions from health care services*

Special attention should be focused on situations where the Federal Government contracts with corporations, whether they are non-profit or for-profit, which then subcontract with entities owned by officers or directors of the prime contractor or parties related to the prime contractor through interlocking directorate or officer relationships. Such structures lend themselves to self-dealing. They can and do lead to unnecessary administrative costs and excessive profits. There is no question that non-profit prepaid health plans will require the services of outside entities. But when these outside entities involve common directors, shareholders and officers, special vigilance is needed to guard against improper diversions of funds.

The subcommittee recommends that the Medicare, Medicaid and HMO Acts be amended to require:

(a) That HMO's file with the DHEW Secretary a consolidated financial statement on an annual basis.

(b) That the DHEW Secretary issue regulations establishing and requiring the use of a uniform system of accounts and reporting by HMO's. Such regulations should define each account so that financial information reported by HMO's will be consistent among the HMO's.

(c) That Federally-supported programs be prohibited from reimbursing HMO's for costs that exceed the amounts that a reasonably prudent businessman would have paid. The so-called "prudent buyer" principle, adopted by Medicare authorities, should be made explicit in the Medicare and Medicaid law.

(d) That, as a condition of qualification and continued Federal support, each HMO applicant and each qualified HMO be required to provide documentary evidence satisfactory to the Secretary of DHEW of its legal status as a sole-proprietorship, partnership, corporation, joint stock company, trust, or other entity. Such evidence shall include:

Certified copies of articles of incorporation, partnership agreements, by-laws, and the names and addresses of all owners, partners, officers, directors, and shareholders owning 5 percent or more of outstanding stock, and the owners of 5 percent or more of any bonds or other obligations issued by the HMO or applicant.

(e) That each HMO fully disclose to the DHEW Secretary, in writing all leases and contracts for goods and services with any entity in which any of its owners, partners, shareholders (of 5 percent or more), officers or directors or members of the immediate families of any of the above has any ownership or financial interest.

(f) That the Secretary of DHEW shall, upon notice to the parties, and a determination that any HMO is engaged in any self-dealing relationships that unnecessarily increase the cost of the HMO doing business, require the HMO to correct the situation within 60 days. Furthermore, the beneficiaries of such self-dealing shall be required to make restitution of such funds to the HMO. Should the HMO fail to comply the Secretary shall withdraw qualification.

4. *Self-dealing relationships between the directors and officers of non-profit corporations that contract with the Federal Government and for-profit entities appear to violate the intent of the Internal Revenue Code*

The interrelationships between non-profit and for-profit entities makes possible the diversion of health care funds from their intended beneficiaries. Furthermore, those practices appear to violate the Federal Government's intent in granting tax-exempt status to non-profit corporations that propose to provide a socially beneficial service. The HMO Act allows Federal grants—gifts of taxpayer funds—to only non-profit corporations. The HMO Act presumes the beneficence of the non-profit corporations. The HMO Act presumes the beneficence of the non-profit corporation and its directors and officers. Yet many of the HMO's that have already qualified have apparent self-dealing relationships with for-profit entities substantially tied to, owned, or controlled by non-profit corporate trustees.

The subcommittee recommends that this report and the hearing record be referred to the Commissioner of Internal Revenue. The Commissioner should examine whether the non-profit/for-profit corporate arrangement of prepaid health plans and HMO's described in this report are compatible, as a matter of policy, with those provisions of the Internal Revenue Code granting tax-exempt status to non-profit health service organizations, and transmit his conclusions to the Subcommittee. It is also recommended that this report be referred to the Joint Congressional Committee on Internal Revenue Taxation for its review of the same matter.

5. *Door-to-door selling of health care services lends itself to fraud and abuse. In addition this method of enrolling beneficiaries in prepaid health plans is expensive to the plans and diverts funds from health care services*

Door-to-door sales of the services of prepaid health plans was marked by patent abuse and fraud. The poor were induced and threatened into signing enrollment forms by techniques ranging from gifts to coercion. This marketing technique proved to be inordinately expensive. It opened the way for the plans to selectively enroll only healthy patients. The scheme tended to reduce the financial risks of such plans and take unfair advantage of the State's method of reimbursement. One plan operator testified that the cost of his marketing program was $900,000 a year—an expense which added substantially to overall program costs. Door-to-door selling is an inappropriate way to obtain enrollments in prepaid health systems.

The subcommittee recommends that door-to-door solicitation of enrollees for HMO's be prohibited.

6. *California PHP program managers and Federal overseers of that program have no reliable or systematic method by which to judge the quality of care provided to enrollees of prepaid health plans. Likewise, the Federal Government has no program to monitor quality of care in the national HMO program*

Other than the subjective review of PHP clinics by California medical auditors, there was no orderly, objective and efficient means by which PHP program managers or Federal overseers could evaluate the quality of care rendered by prepaid health plans. State reports showed that plans frequently sent patients to substandard and non-accredited hospitals, and State auditors turned up clear cases of patient abuse. There continues to be no reliable, systematic program for identifying quality of care problems in the delivery of health services in an HMO. As the hearing record shows, there exists a heavy financial incentive to enroll the healthy and to avoid providing health care services to persons who need care.

Although required by the Health Maintenance Organization Act, there is presently no effective system for monitoring the quality of health care provided by HMO's. Such monitoring is particularly important in view of the California experience where many enrollees were not provided needed medical services. This experience is the result of the financial disincentive to provide needed health care services to enrollees of prepaid plans and the failure by the State to effectively monitor the provision of health care services to patients.

HMO's offer the promise of improved health quality for patients through programs of preventive medical care—detecting and treating illnesses and conditions before they become catastrophic and expensive to treat. Without an effective measure of whether necessary services are being provided, that promise will be unfulfilled.

DHEW, partially in response to this situation in California awarded the State of California a $5.2 million grant to study health care monitoring and evaluation systems. The State, under the grant, is developing a system for the computerized tracking of patient encounters with HMO's. Government already monitors every service provided to patients whose care is financed through the Medicare and Medicaid programs reimbursing physicians and other providers on a fee-for-service basis. The California experience with prepaid health plans demonstrates the need for such a monitoring system for enrollees in prepaid health systems.

The subcommittee recommends that the Secretary of the Department of Health, Education, and Welfare report to the Subcommittee by January 1, 1979 setting forth a specific program to carefully monitor the number of enrollees and nature of the health care services provided to them in Federally qualified HMO's. Furthermore, the Secretary should report to the Subcommittee on the same date a specific program to evaluate the quality of care provided to enrollees of HMO's.

7. *There is no effective rate-setting method by which the State of California can determine fair rates to pay prepaid health plans for the care of Medicaid beneficiaries. However, such a method will be tested this year under a grant to the State of California from DHEW*

California law required the Medicaid agency to reimburse prepaid health plans on the basis of actuarially-determined rates. The record before the Subcommittee shows that the State failed to implement its own law in this regard.

PHP rates were arrived at by simply taking the per capita cost of the Medicaid program by county in each of the four categories of Federal-State program aid—aid to families with dependent children, to the aged, and to the totally disabled—and paying 90 percent of these figures.

The General Accounting Office in its September 1974 report said that there is "no assurance that the PHP program is achieving its objective of reducing Medicaid costs." In fact, the GAO said, the program may be "more costly than the fee-for services program." This statement remains true to this day.

The Subcommittee found instances where HMO's (1) unreasonably limited the provision of health care services to those who needed such services, (2) utilized marginal facilities and manpower, and (3) diverted funds away from health care purposes. Clearly, a method is needed for determining what is a fair and reasonable rate of reimbursement for contract goods and services. That method must not reward systems that deny needed health care services and divert funds from their intended beneficiaries.

The Secretary should take into account the results of the study being funded by the DHEW grant. Under the grant the State of California is currently seeking to determine rate-setting methods. Ultimately, the Congress should consider legislation standardizing rate reimbursement programs for both Medicare and Medicaid programs.

The subcommittee recommends that the Secretary of Health, Education, and Welfare report to the Subcommittee by January 1, 1979, a uniform method of establishing actual costs of an HMO in providing health care services along with a method of determining an appropriate rate of reimbursement.

8. The State of California overpaid a prepaid health plan by $4.3 million of fiscal years 1973 and 1974 in violation of its own regulations and those of the Federal Government. DHEW has not recovered the Federal share of the overpayment as recommended by the General Accounting Office.

The GAO found that the State had overpaid the Medical Care Foundation of Sacramento in fiscal years 1973 and 1974. The overpayment totalled $4.3 million—the amount by which reimbursement to the Foundation exceeded the per capita of fee-for-service costs in the plan's marketing area. State and Federal regulations provide that reimbursement to PHP's and HMO's cannot exceed fee-for-service levels. The overpayment is a direct result of the State's failure to develop a rate setting method as required by its own law.

The GAO recommended that DHEW recover the Federal share of the overpayment, which would amount to approximately $2.2 million.

The subcommittee recommends that the Secretary of the Department of Health, Education, and Welfare report to the Subcommittee by June 1, 1978, either a plan for the recovery of these funds from the State of California or the reason why such recovery cannot be made.

9. Federal HMO program officials lack adequate statutory authority and manpower to cope with the kind of problems that beset the California programs, to administer the Federal HMO program and to monitor the performance of Federally-qualified HMO's.

Chapter IV of this report makes it clear that Federal HMO program administrators believe that existing statutes and regulations are inadequate to cope with the troublesome problems that beset the California PHP program. According to a series of reports by the General Accounting Office the Federal HMO program has not been efficiently organized and DHEW has committed inadequate staff resources to assure proper program management. Concern was expressed that the financial interests of the Government may not be adequately protected in the HMO grant, loan, and loan guarantee programs. The record before the Subcommittee evidences a serious lack of coordination of DHEW's HMO qualification, funding and compliance activities.

The subcommittee recommends that the problems identified in Chapter IV of this report be given careful consideration by the responsible legislative committees and appropriations subcommittees of the Congress in connection with their oversight and actions relative to the Federal HMO program.

10. Federal law and regulations are not adequate to prevent the willful diversion of funds for HMO development.

Federal HMO program administrators testified before the Subcommittee concerning the inadequacy of current law and regulations to deal with problems of corporate structure, marketing, and financial abuse. They also noted the law and regulations do not provide adequate protection for the Federal expenditure of HMO grants, loans and loan guarantees. As some witnesses testified, a new HMO may have problems developing capital. What the law and program regulations do not effectively cope with is the ability of HMO's to divert and misallocate Federal funds for private gain.

The General Accounting Office has recently reported to DHEW that loans totalling more than $2 million to two Federally qualified HMO's in Florida and Oregon are in trouble and that the Federal Government may not get its money back.

In his testimony before the Subcommittee, the director of the Federal HMO qualifications office said that he did not believe there is adequate protection for the Government and taxpayers in the grant, loan, and loan guarantee program for HMO's. He warned of the situation in which not-for-profit corporations expend the bulk of the Federal funds in contracts with for-profit organizations. This invites opportunities for collapsing the not-for-profit corporations once the draw-down of Federal funds has been exhausted, leaving the Government with an empty shell.

The subcommittee recommends that the Health Maintenance Organization Act be amended to make the principal owners, officers and directors and HMO's personally liable for the return to the Federal Government of any funds determined to have been willfully diverted or misallocated in a fraudulent manner or for personal gain.

C. ADDITIONAL FINDINGS

1–A. The PHP program in the State of California was grossly mismanaged over a period of years. Awareness of the California experience should help Federal, State and local authorities to avoid a repitition of California's problems in PHP and HMO programs elsewhere.

The California PHP program was seriously mismanaged and grossly abused. Reform efforts did not begin to take lasting effect until following the enactment of amendments to the Federal HMO Act in October 1976. The record shows that the State of California failed to enforce its own program regulations and failed repeatedly to respond to evidence of fraud and abuse reported by the press, by its own investigators and auditors, by State legislative committees, and by the General Accounting Office. The State failed to act effectively against highly questionable enrollment and marketing practices. It developed no objective standards and criteria for quality of care reviews, or for determining fair rates of payment to the plans. Program officials ignored their own staff investigative and quality of care audit reports. As a result, an atmosphere was created that invited mismanagement and abuse.

The use of prepaid health plans to deliver health care services to Medicaid beneficiaries in California began as an innovative and highly promising alternative to the costly fee-for-service system of financing such health care program. The value of this kind of health care delivery system had been demonstrated by successful prepaid group health plans, and has been recognized at the Federal level in the Health Maintenance Organization Act of 1973, as amended. Prepaid health plans and HMO's continue to be a promising alternative to the traditional fee-for-service health financing mechanism.

The Subcommittee recognizes the value of prepaid health plans and HMO's as vehicles for the organization, financing and delivery of health care services. However, the record developed during the Subcommittee's hearings and discussed in this report should alert responsible Federal, State and local officials and help them to avoid the many problems that beset the California PHP program.

1–B. The Department of Health, Education and Welfare was lax in its oversight of Federal Medicaid funds used in California in the PHP program. DHEW failed to respond in a timely way to information it received evidencing fraud and abuse and failed to act effectively to curb abuses.

The record before the Subcommittee makes it clear that the Department of Health, Education and Welfare was apprised of serious problems affecting California's prepaid health program by numerous sources including the media and the Department's San Francisco regional office. Yet the Department remained immobile in the face of this information until the situation was addressed by the Subcommittee in its hearings.

Only then did DHEW begin to respond with active support of California's belated efforts to reform the program. When California's reform efforts faltered, DHEW did threaten to cut off funding for the program. However, the record shows that throughout much of the period, DHEW failed to enforce its own PHP regulations.

DHEW was lax in its oversight over Federal Medicaid funds spent in the California program over a period of years. In effect, the Department abdicated its responsibility to insure that millions of dollars in Federal grant funds were properly spent.

The record developed by the Subcommittee and summarized in this report is clearly pertinent to the Congress' continuing interest in prepaid health plans and HMO's as vehicles for the delivery of Federally financed health care services. This record of the serious mismanagement, fraud and abuse that beset the California program, demonstrates the need for greater Congressional, State and local oversight over such programs, and the need for effective management and monitoring by DHEW and State authorities to obviate program abuse.

The subcommittee recommends that the Chairman transmit copies of this report to the Senate Committee on Finance, the Senate Committee on Human Resources, the House Committee on Ways and Means, the House Committee on Interstate and Foreign Commerce, and the Senate and House Committees on Apropriations for their review in connection with legislation and apropriations involving the Federal health maintenance organization programs and other Federal programs involving the delivery of health care services through prepaid group health plans.

REMARKS OF SENATOR SAM NUNN

Mr. President. The report of the Permanent Subcommittee on Investigations on Prepaid Health Plans (PHP) and Health Maintenance Organizations (HMO) being filed today is timely. Both the Senate and the House are about to consider renewal of the Health Maintenance Organization Act.

This is a law that authorizes the Department of Health, Education and Welfare to give grants, loans and loan guarantees for the development of HMO's.

The program is small in light of the multi-billion dollar Federal budget. It is even a rather minor element of the $162 billion budget of the Department of Health, Education and Welfare. Nonetheless, it is important.

First of all, the Congress in passing the HMO Act expressed its desire to encourage the development of organizing, financing and delivering health care services that would serve as an alternative to the fee-for-service method of paying for health care.

Secondly, the Administration has made the development of HMO's a major policy initiative. Only last month, HEW Secretary Joseph Califano convened a conference of business and labor leaders to encourage their participation in the development of HMO's.

Thirdly, already more than 4 million persons receive their care through prepaid health systems which have been qualified under the HMO Act.

And, finally, the study of Health Maintenance Organizations by the Subcommittee offers the Congress the opportunity to further improve the HMO Act to assure not only a more effective expenditure of public funds, but also to ensure the safety of patients entrusting their health care to HMO's.

The Subcommittee's report on its investigation is full of examples of fraud and abuse of patients as well as shortcomings in present law and program administration with regard to HMO's. That does not mean that all HMO's are bad or that the program should be scrapped.

Indeed, prepaid group practice is a viable method of organizing, financing and delivering health care which should be encouraged. To label all HMO's as bad or to suggest that the concept is doomed on the basis of the Subcommittee report would be irresponsible. Likewise, simply because we find some fee-for-service physicians and hospitals overcharging, providing more services to patients than they need or being convicted of fraud does not mean that fee-for-service health care is bad.

I hope that the Congress and the Administration will perceive the report in this context. Moreover, I hope that the very forceful advocates of HMO's both in the Congress and the Administration will have the wisdom to recognize the abuses identified by the Report and respond to them with improved legislation and program management.

The report discusses the Subcommittee's investigation of the Prepaid Health Plans receiving Medicaid funds in California. At the peak of the program there, some 54 plans provided health care service to more than 250,000 Medicaid beneficiaries.

There were several times more Medicaid prepaid health plans in California than in all the other States combined. The 1972 implementation on a large scale of prepaid health system contracting in California preceded by almost two full years the enactment of the Federal HMO Act at the end of 1973.

As Senators Jackson and Percy said at the outset of the hearings, the Subcommittee hoped to review what had happened in the California program so that the lessons there could be used to improve the Federal HMO program.

The investigation found that PHP's contracted with consulting firms that exacted exorbitant fees which were paid on the basis of a percentage of PHP gross income.

Almost all of the plans were non-profit corporations whose officers and directors contracted with for-profit entities they owned or controlled. Self-dealing led in some cases to self-enrichment and a depletion of funds for health care services. Indeed, the California Auditor General reviewed 15 plans and reported that 52 percent of the Medicaid funds were accounted for as administrative costs and profits. The return on invested capital in one plan amounted to 3,000 percent.

State financial auditing systems were weak or non-existent. However, the diversion of funds was found indirectly by medical auditors who reported inferior quality of care being provided to the patients. But nothing was done.

Plans enrolled Medicaid beneficiaries through door-to-door solicitations, a marketing method that was not only expensive, but also was marked by fraud and abuse.

The State, in violation of its own regulations, failed to develop an actuarial method of arriving at rates. This resulted in payments to some plans that exceeded fee-for-service levels. This overpayment violated both State and Federal regulations.

Today, Federal HMO program officials, according to their testimony before our Subcommittee, do not have the necessary authorities under the law to respond to financial abuses. Though HMO program administrators are working toward developing a financial auditing system and a quality of care review program, the Subcommittee staff has told me that the Federal officials are building a system which was abandoned by the State of California because it didn't work.

To its credit, the State of California recently enacted a major reform of its program. Furthermore, under a $5.2 million grant from DHEW, the State developed and is testing quality and financial auditing systems. Also being tested is an actuarial method of determining rates.

At my direction, the staff of the Subcommittee prepared the report recommendations following lengthy discussions over a number of months with the California Health Department and the State Legislature. I was concerned that those most experienced in prepaid health program administration tell us what they believed to be workable and reasonable reforms.

That is why there is a remarkable similarity between the Subcommittee's recommendations and the California Prepaid Health Program Reform Act which was recently enacted.

While there is always room for improvement, California has, indeed, taken the lead. The Congress and the Administration—particularly the Administration—should learn some lessons from the experts in that State.

One lesson the Administration has not learned from California is the catastrophe of its former method of reimbursing HMO's. The State, in the past, determined fee-for-service costs in geographic areas and paid HMO's 90 percent of those costs on a per-capita basis.

The result was a boondoggle. Some plans were actually paid more than fee-for-service costs. In fact, the General Accounting Office reported that the California program may have actually cost the State more than it would have paid had the program never been implemented.

California has taken steps to solve that problem under its new actuarial method. Costs in prepaid health systems in the California Medicaid program are running 83 percent of the fee-for-service costs.

Given the lesson of California and its rate setting reform, it was hard for me to believe that DHEW proposed to pay HMO's 95 percent of the cost of fee-for-service for care to Medicare beneficiaries.

The DHEW proposal for HMO reimbursement belies all of the arguments that HMO's are financial alternatives to fee-for service. Indeed, attaching HMO reimbursement to the fee-for-service inflationary spiral should make us all question whether we need HMO's at all from a simply financial standpoint. The State of California has advised us that if this reimbursement proposal is extended to the Medicaid program, it would be forced to consider dropping out of HMO contracting because it would lead to a program cost increase—from its present 83 percent of fee-for-service to the 95 percent giveaway level.

I have been asked to testify before the Senate Finance Subcommittee on Health if the DHEW proposal is considered by the Committee. I have told Senator Herman Talmadge, Chairman of the Subcommittee, that I would testify against this proposal.

Rather than tinkering in a destructive manner with HMO reimbursement, the DHEW administration would be wise to take a long view of where we are and where we are going with regard to HMO's.

A witness before our hearings testified that his HMO was the subject of 13 audits by government agencies in one year. He said he must deal with so many auditors that he has had to create permanent office space for these individuals. These audits are inevitably duplicative. The California Health Department recently informed us that 15 different Federal and State laws and regulations are now in force involving HMO's. The number is bewildering.

Today, in the Federal establishment, we have the HMO Act administered by the Public Health Service. There is HMO jurisdiction in the Medicare and Medicaid programs, each of which have their own regulations and statutes. In addition, the Civil Service Commission is a major factor in Federal HMO activities through the Federal Employees Program. As Chairman of the Senate Armed Services Subcommittee on Manpower and Reserve Affairs, I recently chaired a hearing on legislation to allow contracting with HMO's by the Civilian Health and Medical Program of the Uniformed Services.

These Federal and State efforts are bound to be duplicative and, most likely, unnecessary. Furthermore, we may be seeing the evolution of laws, rules and regulations that may be in conflict. Finally, the duplications of authorities and the expansion in the number of agencies, rules and regulations will be, if they are not already, burdensome and confusing to HMO's, particularly small, developing organizations.

Therefore, I believe we should consider eliminating this unnecessary and expensive fragmentation. This was one of the Subcommittee's goals in writing the findings and recommendations contained in the report of the Subcommittee.

The most significant problems identified by the Subcommittee inquiry were the diversion of funds through complicated corporate structures; the financial dis-incentive to provide necessary health care services to patients who needed care; the absence of quality of care monitoring systems; and the absence of rate setting methods.

I believe that with some thought a single, simple and uniform management information system could be developed which would reduce the need for multiple and duplicative on-site HMO auditing and, at the same time, provide government with essential information it needs to monitor the financial and quality of care performances of HMO's. Whatever is developed should reduce, not add, to the paperwork and auditing to which the HMO's are now subject.

In response to the problems of diversion of funds, HMO's should be required to file a consolidated financial statement on forms prepared by DHEWS so that reports from various HMO's can be compared. Such a statement should identify specific administrative costs and costs of the direct and indirect delivery of health care services by cost/profit centers. It should provide information which can be related to the information in the financial reports.

The goal here would be to reduce the number of field audits by obtaining information to determine from afar what is actually hap-

pening within the HMO. For example, if the financial statement required a breakdown on the cost of general medicine, obstetrical and other specific health care services, it could be related to information on patient encounters by age, sex and nature of health care services as set forth in the financial statement. Such a system is already used for internal management by many HMO's.

Through such a reporting system, it could be easily determined whether an HMO was providing the number of services one could reasonably expect based upon what we know from our previous experience with prepaid group practice organizations. If administrative costs are excessive and specific patient health care services are low in number, then questions could be raised about the appropriateness of patient care as well as the possible diversion of funds.

The HMO program already requires numerous financial reports and utilization data, but these reports are prepared in such a way as not to be useful together.

Related financial statements and utilization audits would be useful not only to the government but also to the HMO which should have this data for its own efficient management. Furthermore, such a system would eliminate the need for annual or more frequent on-site audits of every health maintenance organization, which is presently contemplated by the HMO office.

If the management information system and its resulting reporting requirements are well thought out, there is no reason why the Public Health Service program's system could not be used by Medicare, Medicaid, the Federal Employees program and State agencies. It would serve both as an HMO management assistance device and as a compliance and regulatory tool.

I am not suggesting that on-site financial and quality of care audits be abandoned. What I am suggesting is that there may be many HMO's whose performance as measured by a management information system may never require an audit. Audits should be reserved for HMO's exhibiting problems as demonstrated by reports or other sources of information such as consumer complaints. In addition, such information would respond to the problem of limited DHEW manpower resources in this area.

Some would argue, as I do from time to time, against Government interference in private business. But this is a special case.

Once an HMO is Federally qualified, certain employers who provide health benefits to their employees are required under the HMO Act to offer the HMO as an alternative to their workers if an HMO makes such a demand. The law, itself, imposes the HMO concept on employees. Qualification implies a seal of approval by the United States Government. It is my view that the Federal Government has a very special responsibility to stand behind its seal of approval through a reasonable system of HMO review.

The legislation now before the Human Resources Committee takes a number of steps in the right direction. Its provisions for management assistance to HMO's is particularly noteworthy as is the requirement for a consolidated financial statement.

However, a number of other provisions could be added to build upon this foundation which would more fully respond to the problems identified not only by the Subcommittee Report, but also GAO audits, the experience of HMO program officials, and the State of California.

I cannot myself vote for a nearly one-half billion dollar, five-year extension of the existing HMO program until there is a substantial legislative and administrative response to the problems which have been identified. Furthermore, to double to $5 million the amount of funds an HMO can receive under the program as is proposed in the Senate legislation without, at the same time, cleaning up the Act is a mistake.

But I pledge to work with my colleagues and the Administration to improve the HMO Act and program management. As I said at the outset of these remarks, the HMO concept is a viable one that has worked well without Government assistance. With reasonable Federal help, I believe the development of health maintenance organizations will serve the public and Government well.

[From the New York Times, Apr. 16, 1978]

FRAUD IN FEDERAL AID MAY EXCEED $12 BILLION ANNUALLY, EXPERTS SAY

(By Anthony Marro)

WASHINGTON, April 15.—Fraud in Federal aid programs has grown to the point at which, some experts say, its annual cost may exceed $12 billion. But many agencies have not yet established the mechanisms to detect, let alone prevent, fraud in their programs.

That is the assessment of a cross section of prosecutors, Congressional investigators and Government officials who said in recent interviews that the Federal Government has been so negligent in monitoring its own grants that it has permitted itself to become a major victim of white collar crime.

For the most part, the fraud is occurring in programs designed to provide services, training and aid to the disadvantaged: food stamps, health care, job training and housing aid.

But it is not the classic case of the welfare mother who cheats. Much of the fraud is committed not by the poor persons receiving the benefits, but by relatively well-to-do doctors, pharmacists and businessmen who have contracted with the Government to provide services and then set out to defraud it intentionally and systematically.

There are no precise figures for the amounts lost each year because of fraud. Mark M. Richard, chief of the fraud section of the criminal division of the Justice Department, says that the mechanisms for detecting fraud in many agencies are so weak that "the data base just isn't there."

"FRAUD, ABUSE AND WASTE"

But a recent report by the Inspector General of the Department of Health, Education and Welfare estimates that at least $6.3 billion to $7.4 billion was lost through "fraud, abuse and waste" last year in that agency alone.

And at a recent seminar on white collar crime, an official of the General Accounting Office, the investigative arm of the Congress, estimated that outright fraud in Federal economic assistance programs could amount from $12 billion to $15 billion a year and perhaps as much as $25 billion a year. The current annual budget of the State of New York is $12 billion.

Largely because of attention generated by a series of dramatic Congressional hearings and a string of critical audits by the accounting office, there has been a growing awareneess of the extent of such fraud.

Among the problems and weaknesses cited repeatedly by persons familiar with fraud against the Government were these:

Relatively few resources have been committed to fight the problem. The fraud section of the Justice Department's civil division, for example, has only 13 staff attorneys and three supervisors to handle a load of about 1,200 active cases and a backlog of about 4,000 referrals.

Although the great bulk of the money in these programs comes from the Federal Government, the primary responsibility for policing them is often left to state and local prosecutors, who may lack the resources and expertise, and sometimes the enthusiasm, to do it. "The fact is that the public is more concerned with so-called street crime," Mr. Richard says.

With the exception of the Department of Housing and Urban Development, which was the victim of major program frauds in the early 1970's, few agencies have redesigned their programs to minimize the potential for fraud or to make detection easier.

DIFFERENCES ON SCOPE OF OFFENSES

There is some evidence that many of those engaged in fraud do not consider it theft, or at least see it as a crime less serious than robbery or mugging.

"There's a feeling that people have that they can rip off the Government and it doesn't matter, that it isn't really a crime," says John Ols, the G.A.O. official who cited the $12 billion to $15 billion estimate. "But the fact is that every dollar lost in this way is a dollar that doesn't go to someone who needs it and who is entitled to it."

Mr. Richard, the Federal prosecutor, says that fraud against the Government results in social costs beyond the money involved.

"It's not only a violation of law, but it's an attempt to subvert a program, and this sort of thing affects us all," he said. "When someone manages to subvert a Federal program, he's done something to undermine the integrity of the system over and above the actual dollar cost."

Some evidence of the extent to which the "integrity of the system" has been subverted can be seen in the report by H.E.W., in prosecutions and civil suits by the Justice Department, in Congressional hearings and in audits by the G.A.O.

THOUSANDS COMMITTING FRAUD

Taken together, they present a picture of thousands of persons—many of them well-educated, middle-class citizens—engaged in schemes that range from pennyante abuses of food stamp programs to alleged fraud in massive, multimillion-dollar grain deals.

They include William C. Sibert, a former employee of the Department of Transportation who was charged with embezzling some $856,000 by putting his own name on checks intended for the construction of a subway in Atlanta.

Asked by a judge how this could happen, the Federal prosecutor is said to have replied: "Your honor, he posed as a subway system."

The cases include that of a doctor who allegedly billed H.E.W. for seven tonsilectomies on the same patient; the daughter of a Civil War widow who continued to collect "widow's benefits" for two decades after her mother had died and the officials of a health plan in California who persuaded some people to sign enrollment forms by telling them that they were signing petitions to impeach Ronald Reagan, who was then the Governor.

They also include the case of William F. Wilson, a dentist in South Carolina who is now in prison after being charged with, among other things, extracting healthy teeth from poor children so that he could collect fees from a Medicaid dental plan.

"It was just awful," said Joel W. Collins, the Assistant United States Attorney who prosecuted that case. He said the dentist had been found to have billed the Government for thousands of dollars worth of work not actually performed as well as for work that was not required.

"BROKEN HEART"

"There was one girl about 13 years old who only had about three teeth left in her mouth," Mr. Collins said. "Looking at her just broke your heart."

Many of the cases disclosed in reecent prosecutions and investigations are far more complex and involve larger sums of money.

Item: The Federal Government is trying to recover $24 million in damages from Cook Industries, which it contends defrauded the Government on grain shipments to 32 for-

eign countries. The suit, which is the largest civil suit the Justice Department is pressing in a fraud case, charges the company with having shortweighted, misgraded or adulterated grain shipments.

Item: The H.E.W. report, while saying that the estimates of dollars lost through "fraud, waste and abuse" might not have been more than 5.4 percent of its total budget of $136.1 billion, nonetheless concedes that the percentage was far higher in some programs. It said, for example, that at least 24 percent of its Medicaid funds had been misspent and concluded on the basis of a preliminary and hurried investigation that "criminal prosecution potential" exists in cases involving at least 290 physicians and 245 pharmacists.

Item: After paying nearly $5 million vocational training benefits for veterans enrolled in a "barber's school" in Puerto Rico, the Veterans Administration discovered the bulk of the 1,000 veterans it intended to aid had never actually taken the courses and that the "school" was little more than a storefront.

The proprietor, Romanita Garcia, eventually was jailed, and the Government has since recovered about $500,000 through a civil suit. But the rest was lost in what Federal prosecutors say was a classic case of fraud, much of it going to veterans who were not taking the courses they had reported taking, and much of it going to the businesswoman who was not providing the instruction she had promised.

Many fraud cases are fairly uncomplicated, relying less on careful planning than on the assumption that the Government cannot or will not audit its expenditures.

In many of the Medicaid fraud schemes, for example, doctors simply billed the Government for services not rendered or overcharged for services that were rendered. In many of the vocational education frauds, schools, sometimes with the aid of "students" who shared their Government benefit checks, simply enrolled veterans and billed the Government for training, even though the veterans never attended classes.

Often, this has involved some collusion with persons in the bureaucracy. In its investigation of prepaid health plans in California, a subcommittee headed by Senator Sam Nunn, Democrat of Georgia, discovered an official of H.E.W. who allegedly had accepted money and a car from a contractor whose grants he had approved. And as a result of an investigation of fraud in its educational training programs last year, the Veterans Administration, according to a recent report, meted out to its employees "one suspension, two demotions, 16 reprimands, 15 admonishments and 36 counselings."

FEW INSIDE ACCOMPLICES

Virtually all of those familiar with the programs agreed, however, that outsiders did not need, and in most cases did not have, inside accomplices to help them defraud the Government.

The fraud is not confined to social welfare and economic assistance programs. Although there are no estimates of fraud in military contracts and other forms of procurement, J. Roger Edgar, the head of the fraud section of the Justice Department's civil division, estimates that fraud in defense contracts accounts for 30 percent to 40 percent of his workload.

One typical case handled by his office resulted in the Government's recovery of $600,000 from a contractor who had been accused of using scrap metal rather than new materials in the catapults that launch aircraft from the carrier U.S.S. Forrestal.

In the past, Government officials say, the public and law enforcement figures were more concerned with other crimes, particularly organized crime and narcotics and street crimes, and fraud was not perceived as a major problem.

Even where there was heavy policing of fraud programs, they said, it often focused on welfare mothers who were believed to be obtaining benefits to which they were not entitled rather than on calculated and sophisticated fraud.

According to Richard L. Thornburgh, a former head of the criminal division, the Department of Justice did not even have a strategy for dealing with program fraud before 1972 and thus failed to detect many of the schemes to defraud Federal programs that are now known to have taken place.

"ERROR" OR "ABUSE"

One reason that estimates of the amount of fraud are so vague, sources said, is that many Government officials refuse to call fraud what it is, preferring to dismiss it as "error" or "abuse."

Another is that Federal audit cycles are so long that often fraud is not detected until years after it has taken place. In the case of Mr. Sibert, who allegedly embezzled the $856,000 from the Department of Transportation, the program that the money was taken from was not scheduled to be audited until eight years later, though the applicable statute of limitations runs only five years.

"It was a fluke that we caught him," said one Federal prosecutor. "If he hadn't aroused so much suspicion by spending so much money, the statute of limitations would have lapsed before we even knew the money was gone."

According to many of the sources, the problem is not just with the agencies, but with a lack of commitment by the Justice Department.

An indication of this can be seen in the limited resources of the civil fraud section headed by Mr. Edgar. Last year, it managed to recover about $8 million through civil suits against persons accused of defrauding the Government. It won numerous other suits against persons who did not have the resources to pay.

This, according to colleagues in other parts of the department, was an impressive performance for so small a staff, though it accounted for only a tiny fraction of the billions estimated to have * * *.

"There are a lot of cases that are going to have to be handled, and I'd like to know who is going to handle them," said one recently retired prosecutor. "If you start talking about a $6 billion problem at H.E.W., where are the bodies going to come from?"

A number of prosecutors and former prosecutors agree, noting that last year H.E.W. found suggestions of fraud by more than 13,000 persons in one welfare program alone and that since then several other agencies have begun similar internal investigations.

Griffin B. Bell, the Attorney General, has said repeatedly since taking office 14 months ago that fraud against the Government is a major concern and will be a top priority of the Justice Department.

To date, he has assigned nearly 200 agents of the Federal Bureau of Investigation to audits of health care programs and has added 13 staff lawyers, at least temporarily, to the 33-person staff in the criminal fraud section headed by Mr. Richard.

Although most of those interviewed argued that many more resources would be needed at both the state and Federal level, Mr. Richard said that he believes a strong commitment has now been made.

"You're dealing with an area that has been virtually ignored over the years in deference to other priorities," he said. "We are playing catch-up ball, and it's not going to be done overnight."●

GEN. LUCIUS D. CLAY

● Mr. BIDEN. Mr. President, I wish to say a few words today in tribute to a distinguished American soldier who died last Sunday, Gen. Lucius D. Clay.

It was in the summer of 1948, with the advent of the Berlin blockade that General Clay first made his mark on world history. He was military governor of Germany at the time the Soviets cut off all land access to Berlin, leaving the city with no electricity and a month's supply of food.

Surrounded by Soviet controlled territory, Berlin was in virtual isolation. From a military point of view, the city was regarded as indefensible. But there was a will among the free people of Berlin—a will to remain independent, a will to resist being absorbed into the Soviet empire.

President Harry S. Truman made a significant decision in the summer of 1948. The United States would counter the Soviet blockade with an airlift. And Gen. Lucius D. Clay was charged with the task of carrying it out.

Within weeks food and fuel and all other necessities of life were being airlifted into West Berlin. Within months a cargo plane was landing or taking off from West Berlin's Templehof Airport every 90 seconds.

Despite daily provocation by the Soviets, General Clay managed the Berlin airlift with steady and effective leadership. His achievement became a landmark in diplomatic and aviation history.

The American people were quick to recognize the significance of the Berlin airlift; it was the American commitment to Western Europe. And when Lucius Clay returned home, he was greeted with a ticker-tape parade down Broadway. For he was a symbol of the determination of the American people to counter the Soviet threat without resorting to war.

In 1961 when Berlin was again threatened by cold war tactics, this time by the notorious Berlin Wall, President Kennedy asked General Clay to return to Berlin. The city gave him an enthusiastic reception as the man who represented the U.S. commitment to its freedom and independence.

Neither Berlin, Germany, nor the Western World will forget the courage and achievements of Gen. Lucius D. Clay.●

QUESTIONS ON WATERWAY USER CHARGES

● Mr. DOMENICI. Mr. President, many of my colleagues, as well as others, have asked me on various occasions to explain in greater detail why waterway user charges are needed and justified.

To assist in this dialog, I have put together some of the various questions often raised, together with answers:

QUESTIONS REGARDING WATERWAY USER CHARGES AND LOCKS AND DAM 26

1. How is the inland waterway system presently financed?

The taxpayers, through the Corps of Engineers, pay the full costs—close to $500,000,-

000 a year—for barge canal maintenance and improvements. Some $7.5 billion in new inland navigation projects are under construction or are authorized and awaiting construction. In addition, there are heavy waterway expenditures by TVA and the Coast Guard, plus Maritime Administration equipment guarantees. The barge companies pay nothing for these services.

2. How do free waterways distort transportation?

By picking up rights-of-way costs that competitive modes carry for themselves, a free-waterways policy makes waterway traffic artificially cheaper, undermining the competition. It's like giving the New York Yankees 4 strikes every time at bat, while other teams get 3.

3. How do the Federal subsidies to the barge companies compare with those provided to other modes?

According to the Congressional Budget Office, just the Corps subsidy each year to the barge companies exceeds 40 per cent of the industry's annual revenues; the Federal subsidy to other modes is 3 percent of revenues or less.

4. Haven't the railroads received billions in offsetting subsidies?

No. Since 1967, the railroads, outside of bankrupt Northeast roads that are now Conrail, have received $138,000,000, all of it in loans or repayable stock investment. The Library of Congress has calculated that the barge industry has received more net subsidy than all other modes combined.

5. Why are user fees necessary?

User fees would help to create better competitive balance among modes, and establish a more rational national transportation policy. User fees would encourage the big barge companies to work for the taxpayers and to lobby for a cost effective waterway program, not the most grandiose. Noted Robert L. Shevin, attorney general of Florida: "Establishment of a comprehensive system of waterway user charges will create a climate on which waterway users can be expected, for the first time, to share responsibility for the formulation of waterway projects and priorities which are mutually in their interest and in the public interest."

6. Hasn't the Senate already decided this issue?

Yes. The Senate voted to adopt a user charge provision last June 22 to phase-in, over a decade, a user charge to recover all of the Corps spending to operate and maintain the commercial aspects of the inland waterways, plus half the Corps spending on new construction, with the 1 percent cap on charges. That leaves a 50 percent construction subsidy from taxpayers. The Senate must act again because the House refused the Senate's request for a conference on that June legislation.

7. How does the House bill (H.R. 8309) work?

It would impose a small fuel tax, unrelated to waterway expenditures. The House bill only imposes this charge on 40 per cent of the nation's system of inland waterways, leaving 60 per cent of the inland waterway mileage free of user charges.

8. What are the benefits of Locks and Dam 26, authorized in both bills?

Construction of a new Locks and Dam 26 gives the barge companies $53,411,000 per year in direct cash savings. Such benefits, repeated over and over at other new projects, is a transfer of cash from the pockets of the taxpayers to the treasuries of the barge companies. That transfer should be partially recovered through user fees. User charges and cost recovery are common practice in other transportation and water resources programs. The trucking industry, for example, pays the equivalent of over 20 cents a gallon in taxes dedicated to highway work.

9. Who owns the barge lines?

Most are subsidiaries of major corporations such as Exxon, U.S. Steel, Ashland Oil, Cargill, Dow Chemical, Mobil, Du Pont, Texas Gas Transmission, Dravo, Continental Grain, Chromalloy, Peabody Coal, etc.

10. What do economists have to say about user charges?

Otto Eckstein of Harvard: 'The 'freebie' inland waterway system is one of the coffin nails in our railroads, which the Federal Government is now forced to rescue through subsidies and nationalization." Dudley Pegrum of UCLA: "Total freight bills will be less because of: a more efficient allocation of economic resources to transportation; a more efficient allocation of freight traffic among the mode; a reduction in the total cost of the infrastructure of freight transportation facilities; a reduction in the federal tax burden on taxpayers; and a reduction in total federal spending with a consequent reduction in the pressure on inflation." A survey of corporate marketing and transportation executives found some 85 per cent favoring user charges.

11. Do major newspapers editorially support waterway user charges?

Yes. Many major newspapers have strongly endorsed the Senate's cost-recovery approach. The Chicago Tribune said "Barges should contribute substantially to the cost of the waterways they use"; The New York Times said "Righting the balance (in transportation subsidies) would lower the total cost of hauling freight around the country"; The Miami Herald said "The free ride of the waterway users leads to unfair competition and unfair distribution of the Federal tax load"; The Houston Post talks of "The underlying common sense of the Senate version"; The Birmingham Post says "Simple equity demands user fees sooner or later, and the sooner they are instituted the sooner the inequity which now exists will be rectified". Others favoring cost-recovery user charges: The Washington Post, The Arizona Republic, The Chicago Sun Times, and The Houston Chronicle.

12. Aren't waterways the most energy efficient means of transportation?

No. The Congressional Budget Office made this analysis: "In the eleven reports surveyed by CBO, estimates of energy use for domestic water transportation generally fall in the range of 500 to 700 BTU's per ton-mile, while the usual range for rail freight was 300 to 700 BTU's and 400–500 for oil pipeline."

13. Won't user charges force business off the waterways?

No. According to a DOT study, waterway traffic will grow by more than 40 per cent over the next decade, even with the most severe assumptions of the Senate-passed version. Annual barge growth is now more than 5 times greater than the growth rate for rail traffic.

14. Won't farmers be hurt?

No. Far more grain moves to market by rail than by barge. Farmers in Kansas, the Dakotas, and many other states are totally dependent on rail traffic. What hurts farmers is the continued deterioration of rail service. If a transportation subsidy to farmers is needed, it should be given all farmers, not just those who happen to ship by barge.

15. How about the steel industry or the coal industry?

The recent National Coal Policy Study Task Force "endorses user charges based on the full cost of operation, maintenance, repair, and new construction of facilities on the waterways." While only 1/500 of the nation's steel moves by barge, steel companies own and operate a significant percentage of the general barge business.

16. Don't waterway user charges need more study?

No. Just in the past seven years, there have been 14 significant studies and evaluations of the impact of waterway user charges. All show a minimal impact. For example, a 15 cent-a-gallon barge tax might add all of 0.13 percent to the cost of coal shipped into Ohio, DOT calculates. That same tax would add an average of 1/20 of a penny to a bushel on wheat shipped out of Oklahoma.

17. Is this a partisan issue?

Apparently not. Every President since Franklin Roosevelt has endorsed waterway user charges. The Carter Administration's 1979 Budget states: "The Administration strongly supports enactment of waterway user charge legislation that will establish charges to users of the inland waterways in amounts to recover a substantial portion of the Government's cost of building and maintaining the system."

18. Is the barge industry taking an intransigent position?

"We shall . . . devote our best efforts to repeal of any waterway charge legislation that may be enacted," proclaims the Water Resources Congress. "We will not accept any bill based on the cost-recovery principle," declared the National Waterways Conference.●

FARMERS UNION TAKES NURSING HOME ACTION

● Mr. CHURCH. Mr. President, recently I had the enjoyable experience of addressing the National Farmers Union in Salt Lake City, Utah. It was my special function at that time to deal with international issues related to agriculture, but I also was keenly interested in a domestic issue which later received attention. The farmers union has long been recognized as being deeply concerned about the well-being of people who live on the land and contribute so much to the security and abundance of this Nation. Members' interests go far beyond the economy and agricultural issues.

That breadth of concern was again demonstrated at the Salt Lake City meeting in many resolutions, one of which is of special interest to me as chairman of the Senate Committee on Aging. Adopted as a paragraph in the National Farmers Union policy statement was a commitment by the National and State Farmers Union to encourage personal attention by its members to nursing home issues. This constructive, grassroots approach is typical of the farmers union and its members; I ask that the following paragraph be printed in the RECORD:

We recognize that vast numbers of farm families either now have or will have family members in nursing homes, and that residents of nursing homes should be entitled to the same civil and human rights guaranteed to all citizens, we resolve that National Farmers Union and the State Farmers Unions become actively involved in the development and dissemination of information on problems, issues and reform strategy pertaining to nursing homes and alternatives to nursing homes and that they further encourage members to participate in specific activities to bring about reform of the health care industry with the intent of raising the quality of care of older persons to reflect more consideration for human dignity.●

MEG GREENFIELD THINKS LARGE

● Mr. MATHIAS. Mr. President, having earned a Pulitzer Prize this week, Meg Greenfield, deputy editor of the editorial page of the Washington Post, is not rest-

ing on her laurels. Her essay, "Thinking Small," in the April 24 edition of Newsweek is witness to her thoughtfulness and vision. No one has better said something that is on all our minds, that there never has been a period when special interest group politics have so dominated Washington. As always, she has sage advice for us all on what to do about it. I thank Meg Greenfield for her continuing contribution to the stock of commonsense in this country and I congratulate the judges who award the Pulitzer Prize on their good sense in choosing her. I ask that her Newsweek column be printed in the RECORD.

The column follows:

THINKING SMALL

(By Meg Greenfield)

It's as if the nation had swallowed a solvent and we were breaking up into our constituent parts—or, to be chemically more consistent about it, coming unglued. I can't remember a time in Washington when interest-group issues and politics so dominated events. And every day the units of protest and concern seem to be subdividing into even smaller and more specialized groupings—these miners, those farmers, certain public employees, some gas-producers and so forth. What's going on? Why has the nation's Capital taken on the aspect of a glorified state legislature?

To be fair about it, it's not only the Federal government that is feeling the pressure. Even as I write, I note that Toledo schoolteachers have gone out on strike, and a significant number of Washington-area doctors, displeased with their group-health arrangements, are threatening to do the same. It's a nationwide pattern. But rarely has a President's time and attention been so consumed by the economic demands of particular groups. Consider Washington's agenda and some of its most hotly contested issues: social-security taxes and payments, civil-service salaries and perquisites, military pensions, tax credits for parents of private-school students, farm prices and income, steel prices, coal wages . . . the list goes on.

A labor lobbyist I know was observing the other day how this atomizing of constituencies was apparent in his own attempt to get some manpower legislation passed. He didn't try to arrange meetings of his "coalition" any more, he said, but rather just dealt one-on-one with the various elements involved—mayors, unions, welfare organizations and the rest. That was because these days each was only inclined to "go in and try to save its own piece of the program."

TRENDS OF "SELF-PREOCCUPATION"

President Carter clearly had something similar in mind when, in his speech on inflation, he spoke ruefully of a widespread "preoccupation with self," deplored the attenuated sense of national purpose and community it reflected and concluded: "We favor sacrifice, so long as someone else goes first. We want to abolish tax loopholes, unless it's our loophole. We denounce special interests, except for our own." Hard-hitting, eloquent stuff—but the trouble is this: no one believes that Presidential exhortations will be enough even to slow the process, let alone to reverse it. And plenty of people think that Carter himself has inadvertently contributed to the trends in the country toward ever greater assertiveness of ever smaller interest groups.

I stress the word "trends" because poor Jimmy Carter, being blamed for floods, droughts and most of the pestilence stalling the land today, can hardly be said to have brought all this to office with him—although I do believe that in some ways, which we will get to in a moment, he has made it materially worse. But one must begin with the trends, and first among these is the much remarked upon popular loss of confidence in the nation's leaders and institutions.

This does not just mean, as the more romantic among us would have it, that people are concerned with the rectitude of their government. Surely, it also means that they have lost confidence in government's ability to deal effectively with the economy—with inflation and unemployment. And this being so, groups are rushing in to get "theirs" while there is time. It's almost as if we had developed—all of us—a looter's mentality in the presence of the shattered storefronts of so many administrations' economic policies. The Carter Administration has not exactly reversed the trend or covered itself with glory in this connection.

DECLINE OF NATIONAL FEELING

There is also the cumulative impact of what has been called "interest-group liberalism" and its legislative product. By now, there can hardly be a cultural, racial, regional, economic or professional group for whom the lawmakers of Washington have not fashioned some special statutory blessing—a prerogative, a grant, an exemption, a reimbursement . . . something. It puts a premium on identifying yourself with the special subgroup and helps to thin, if not destroy, whatever feeling of larger national loyalty various citizens may have.

So has the well-documented decline of both major political parties, as well as the decline of labor unions. These were all, at one time, much stronger forces for the nationalizing of people's ambitions and interests than they are now. And no comparable national influence has taken their place. On the contrary, if anything they have been increasingly displaced by computerized, single-issue-oriented lobbying efforts—efforts complete with glossy brochure; stupendous direct-mail, grass-roots outpouring; and highly sophisticated, pinpoint pressures on the relevant members of Congress.

It needs to be added that the recent reforms of Congressional practice and procedure and the revised rules governing campaign financing have accentuated this trend. There is far less partywide discipline or sentiment in Congress these days. The individuals legislator is less accountable to or dependent on the hierarchy of his national party on the Hill, so there is less incentive to take a national-party view. Legislators are more preoccupied with state and district "casework," as they call it—and more vulnerable to interest-group heat.

THE INSTRUMENT OF COHESION

Finally, there is the absence of war or any comparably vivid national danger to unite people. To be sure, anyone old enough to recall when "rollback" was an emotional rallying cry to push the Soviets out of Eastern Europe rather than a call to reconsider a hike in social-security taxes will have no trouble deciding which is the preferable condition. Still, as Carter himself concedes—the business about the energy crisis being the "moral equivalent of war" was a doomed example—somehow the nation needs to recapture the sense of common purpose and urgency that tends to go with high-risk business, to view its economic and energy imperatives in this light.

I think Carter has accelerated the opposite process by an overwillingness to settle claims and demands group by group and to yield to various constituency pressures. And although the troubles didn't start with him, he represents pretty much the only mechanism that can be used to deal with them now. For it is an ironic fact of contemporary life that even as people around the country, Jimmy Carter included, have been expressing great unease with the scope and reach of Federal government, that government does have the distinctive capacity to draw people into a coherent national effort. Carter, notably and brilliantly, got the competing groups together in his campaign. But he still has not stopped dealing with them one by one and fogging over their conflicts and differences. The success of his anti-inflation effort is a thin prospect at best, but it will depend on his willingness and ability to alter this habit. And so, as a result, will the success of his Presidency.●

PRAISE FOR THE SOUTHERN COOPERATIVE DEVELOPMENT FUND, INC.

● Mr. STONE. Mr. President, I recently had an opportunity to go down to Palmetto, Fla., and met with members of the Southern Cooperative Development Fund, Inc. (SCDF). This fund is actually a development bank which loans money and provides technical assistance to limited-resource cooperatives and community-controlled organizations in the southern United States.

The SCDF is owned by the very people it seeks to help. When an eligible group borrows money from SCDF, it is required to purchase shares in the corporation, thereby becoming an owner of the corporation.

By far, the largest single category of borrowers from SCDF are farming cooperatives. These member-borrowers are engaged in activities such as agricultural production and supply, agricultural marketing, fishing, housing development, and retail sale of groceries.

I mention this, Mr. President, because I feel that the efforts of this cooperative should be lauded by all of us. Their efforts in helping to make small farmers self-sufficient are meritorious and are a tremendous example for other cooperatives to follow.

I would like to quote from the annual report of the SCDF. The following are the goals this cooperative is striving toward—an example for all of us:

While SCDF and the clientele it serves must do everything in our power to make the nation's institutions and decision-makers more responsive to the needs of the poor, we must continue to practice and emphasize the value of self-reliance. To practice self-reliance, we must continue to help ourselves and not be so dependent upon others. If we are to be self-reliant, we must stop consuming our total income. Typically, minorities are consumers and not producers in this society. No matter how meager that income, we must save and invest it to build our future.●

SOVIET ACTIONS IN AFRICA THREATEN SALT

● Mr. DOLE. Mr. President, the successful conclusion of a nuclear arms control pact with the Soviet Union will, in large part, depend upon the status of United States-Soviet relations during the next few weeks. It seems to this Senator that the relationship is now threatened at a concluding stage of the SALT II negotiations—not because of U.S. intransigence—but because of direct Soviet military influence in Africa, and similar Soviet provocations elsewhere. I believe that Secretary of State Cyrus Vance would be well advised to inform Moscow, during his discussions there this

week, that there will be no SALT treaty unless aggressive Soviet-Cuban military adventurism in Africa is halted, and the military presence withdrawn.

Before leaving the country last week, Secretary Vance reiterated the administration's policy that there need be "no linkage between the negotiation of a SALT agreement and the activities of the Soviet Union in Africa." I believe it is unrealistic and somewhat naive for Secretary Vance to maintain that there will be "no linkage" between the two matters, at least so far as the Senate is concerned.

According to the latest intelligence estimates, Ethiopia has been saturated with more than 16,000 Cuban troops, and with Soviet military hardware including 50 Mig jet fighters and more than 400 tanks. There is no way imaginable that the U.S. Senate could ignore this Soviet military presence in Africa in the context of our consideration of SALT II. Not only are peaceful intentions of the Kremlin called into question by its aggressive African policies, but the credibility of Soviet pledges are cast into serious doubt as well.

There should be no mistake on our part about the fact that the Soviet Union is anxious to conclude a SALT II treaty agreement with the United States. Their own economy would suffer from a continued arms race, and they would prefer to see the U.S. development of strategic weapons curtailed at present levels. Yet, the Kremlin leadership continues to insist that only further American concessions can bring about a new treaty. Further concessions on our part, however, would be unjustified and dangerous to the national interest.

UNILATERAL REDUCTIONS

Despite the unavoidable indications of continuing Soviet adventurism in Africa, and unrestrained development of strategic weapons, the administration has shown little inclination to face the hard facts. In his speech delivered at Wake Forest University last month, President Carter expressed concern about Soviet force increases "beyond the level necessary for defense" and its "ominous inclination * * * to intervene in local conflicts * * * as we observe today in Africa." Had Mr. Carter heeded his own words, I believe he would have recognized the necessity of proceeding with the neutron bomb, at least until some gesture of self-restraint was made by the Soviets.

It is fine to speak of working toward further reductions and limitations of nuclear weapons consistent with the national security interests of the United States and of our allies. Yet, while President Carter has called for the necessity of multilateral cooperation in this area, every cancellation and postponement of a defense program in his administration has represented unilateral action by the United States. We experienced this self-denial of major weapon systems not only with the neutron bomb decision, but also with the cancellation of the B–1 bomber production, curtailment of full-scale development of the M–X missile, and serious cutbacks on construction on naval ships.

There is simply no prevailing rationale—no predictable consistency—in the confusing pattern of strategic policies set forth by this administration. Even Soviet President Leonid Brezhnev seems astonished by what he terms Mr. Carter's "indecision and inconsistency" on policies affecting United States-Soviet relations. Mr. Brezhnev's confusion about U.S. policy is shared by many Americans, as well.

Until the Soviet Union begins to match our long list of defense concessions, it is simply not in the best security interest of this country and that of our allies to cancel one major weapon system after another. And so long as Moscow shows no sign of restraint in Africa or in its posture toward Europe, we should reflect carefully upon any new commitments that would limit our ability to respond to future Soviet provocations.

For that reason, Mr. President, I believe the U.S. Senate will scrupulously examine the final SALT agreement that is submitted for our consideration. And it would be well for the administration to recognize the reality of the situation now, and advise the Soviet Union accordingly: That we will make no further substantive concessions in the SALT negotiations, and that Soviet aggression on the African continent must cease immediately.●

THE 60TH ANNIVERSARY OF THE ESTABLISHMENT OF THE REPUBLIC OF LITHUANIA

● Mr. GOLDWATER. Mr. President, on February 16, Americans of Lithuanian origin and descent commemorated the 60th anniversary of the establishment of the Republic of Lithuania. On February 19, over 200 residents of Phoenix, Ariz. participated in their own services of this important date. I submit a resolution adopted at that time by the Phoenix, Arizona chapter of the Lithuanian-American community of the United States of America for the RECORD.

The resolution follows:

RESOLUTION

We, Lithuanian-Americans of Phoenix, Arizona at a meeting attended by over 200 people on February 19th, 1978 commemorating the 60th anniversary of the reestablishment of the independent state of Lithuania on February 16th, 1918, and the 727th anniversary of the formation of the Lithuanian Kingdom in 1251, send our warmest greetings to the people of the Soviet-occupied Lithuania and pledge our unwavering support for the restoration of Lithuania's sovereignty and unanimously adopt the following resolution:

Whereas in 1918 the independent state of Lithuania was reestablished by the free exercise of the right of self-determination by the Lithuanian people; and

Whereas by the Peace Treaty of July 12, 1920 Soviet Russia officially recognized the sovereignty and independence of Lithuania and voluntarily renounced forever all rights and claims by Russia over Lithuanian soil and her people; and

Whereas until 1940 Lithuania was a sovereign nation, a member of the League of Nations and a signator of numerous international treaties with the Soviet Union; and

Whereas the Soviet Union during June 15–17, 1940 invaded and occupied Lithuania, and subsequently, forcibly annexed the Lithuanian Nation into the Soviet Union; and

Whereas the Soviet Union continues to conduct a policy of colonization, Russification, ethnic dilution and religious and political persecution; and

Whereas the people of Lithuania to this day are risking and sacrificing their lives in defiance of the Soviet regime as most recently an untold number of Lithuanian and Russian dissidents have been arrested and imprisoned for the publication or dissemination of "The Chronicle of the Lithuanian Catholic Church"; and

Whereas the United States Government maintains diplomatic relations with the government of the Free Republic of Lithuania and consistently has refused to recognize the unlawful occupation and forced incorporation of this freedom-loving country into the Soviet Union; and

Whereas the 89th U.S. Congress unanimously passed House Concurring Resolution 416 urging the President to raise the question of the Baltic Nations status at the United Nations and other international forums; now therefore be it

Resolved, that we, Lithuanian-Americans will urge our representatives in Congress to sponsor and adopt the sense of a number resolutions which have been recently introduced calling for "Full Freedom and Independence for the Baltic States"; and

Resolved, that copies of this resolution be forwarded to the President of the United States, the United States Secretary of State, the United States Ambassador to the United Nations, the United States Senators and members of the House of Representatives of Arizona, the Lithuanian Minister in Washington, D.C., the Lithuanian Consuls in New York City, Chicago, Los Angeles and the press.

Lithuanian-American Community of the U.S.A., Inc.

Phoenix, Ariz. Chapter

VINCENT RUSECKAS, President.

JANINA RIMAVICIUS, Secretary.●

SENATE PROGRAM REVIEW REFORMS

● Mr. TALMADGE. Mr. President, I wish to share with my colleagues the statement which I submitted to the Rules Committee on the resolution entitled "Senate Program Review Reforms of 1978".

The material follows:

SENATE PROGRAM REVIEW REFORMS OF 1978

I am pleased to accept your invitation to appear before the Rules Committee of the Senate on the resolution entitled, "Senate Program Review Reforms of 1978", which was reported out by the Senate staff working group. The purpose of this resolution is to assist the authorizing Committees in the consideration of their re-authorization and program review functions. It is not meant to take program oversight away from the authorizing Committees or reduce their role in making program determinations.

As I understand the Senate resolution on program review, it will serve as a system for the Senate Committees in the review of programs under their jurisdictions. Procedurally this will mean that each authorizing Committee of the Senate, will submit to the Rules Committee of the Senate, along with their operating budget, the anticipated schedule for program review for the forthcoming year. This effort by the authorizing Committees will require the cooperation of the Federal agencies over whose programs they have jurisdiction.

This new review procedure will provide the Senate with a means of making all program evaluations available to all Senators and the public. While I initially expressed concern over the rigid structure of evaluation pro-

posed in the original "Sunset" bill, I feel that this new resolution will offer a viable framework for oversight while still providing adequate flexibility to permit reasonable and effective Committee scheduling.

Further, I wish to state that I was pleased that the Senate staff working group included the Regulatory Impact Rule which was an amendment that I offered to S. Res. 4, which was adopted by the Senate. Specifically, this requirement calls for regulatory, privacy, economic, and paperwork impact statements where it is practical and applicable. The inclusion of this language in the Senate resolution before you today strengthens the Senate Regulatory Impact Rule.

I thank the members of the Rules Committee of the Senate for giving me this opportunity to testify before you today.●

TRIBUTE TO ORRELL'S BEATEN BISCUITS

● Mr. MATHIAS. Mr. President, it is a source of pride and pleasure to Marylanders that geographical circumstances have made our State the home away from home for so many Members of the Congress. We are honored by their presence among us.

But the honor confers upon us special responsibilities. As hosts, we must look to our guests' comfort and to their pleasure. Today, I would like to call my distinguished colleagues' attention to a Maryland institution that will contribute mightily to their pleasure. That institution is the beaten biscuit, one of Maryland's many contributions to gourmet dining in America.

When I was a child, many families made their own beaten biscuits. But that wonderful tradition, like many others, is a casualty to the quickened tempo of our times. The beaten biscuit cannot be hurried.

Happily, however, the beaten biscuit has not disappeared entirely from the Maryland scene. Thanks to the enterprise and dedication of an Eastern Shore family, headed by Ruth and Herman Orrell, the beaten biscuit survives. In a little home bakery almost in the shadow of the famous Wye Oak in Wye Mills, the authentic Maryland beaten biscuit is still produced. The entire operation is conducted by members of the Orrell family and their friends.

It is one of the few surviving cottage industries in the State and is a fascinating enterprise to visit. Sampling its wares, of course, is the major inducement for a visit but the operation itself is also of great interest.

James Bryant Conant wrote that:

Each honest calling, each walk of life has its own elite, its own aristocracy based upon excellence of performance.

The Orrells are members of that "aristocracy of excellence of performance." They exemplify a proud Maryland tradition.

On April 13, the Baltimore Sun carried a comprehensive article on the Orrell's beaten biscuit operation, lovingly and knowledgeably written by food editor, Martha H. Schoeps. In order to tempt my colleagues to devote some fine spring day to a drive to the Eastern Shore in search of the beaten biscuit, I ask that this article, entitled "Maryland Beaten Biscuits: Tradition Lives," be printed in the RECORD.

The article follows:

MARYLAND BEATEN BISCUITS: TRADITION LIVES

(By Martha H. Schoeps)

"Years ago, my grandmother actually beat the biscuit dough with the back end of an ax on a big tree stump," Bonnie Reichert, the young granddaughter of Ruth and Herman Orrell, told her early morning visitors. "Now we use a small handmade machine that beats the air into the dough," she said while displaying an old ax on a hand-hewn butcher block.

As the popularity of "Ruth Orrell's Maryland Beaten Biscuits" grew, the tree stump was moved inside, and later gave way to a butcher's-block table before the machine finally took over.

Today—with Orrell's one of the few commercial beaten biscuit enterprises still in existence in Maryland—the biscuit dough is worked by motor-operated rollers that seem to slap the simple dough mixture into smoothness. However, each biscuit is still shaped by hand. The dough is kneaded by the fingers of each person shaping the biscuits. It is done in such a manner as to make the biscuit smooth on all sides. This process gives the outside of the biscuit the surface tension it needs to keep its shape while baking.

After the biscuits are shaped, they are placed on large flat pans that hold 4½ dozen biscuits. My grandmother used to use the ball of her hand to press the biscuit down and then she would prick the tops with a fork. Soon she had a special little gadget made, which, in prick marks, shapes a large letter O [for Orrell]. Inside the letter O is a letter B [for biscuit], Bonnie told her guest.

The biscuits are baked in very hot ovens until they appear lightly golden. It takes a special touch of the fingers and a keen eye to know the precise moment the biscuits are done, Bonnie explained just as Mary Holtzclaw (the 13-year-on-the-job expert) removed a batch from one of the ovens.

Orrell's beaten biscuits are not only a tradition on the Eastern Shore, they are an institution.

Ruth Orrell has been baking the small round balls of dough for 30 years—first in the kitchen of her quaint old house in Wye Mills and now in a somewhat larger room added on to that kitchen.

Beaten biscuits must be classed with terrapin, steamed crabs and oysters on-the-half-shell, for these are some of the foods that have given Maryland the high rating it holds among the connoisseurs of the culinary arts.

To be truly initiated into the beaten biscuit habit, one should go right to the source. Tasting your first beaten biscuit fresh off the baking pan is to make you an addict for life. On the Eastern Shore, the biscuits are eaten with just about anything from stewed chicken to homemade preserves or molasses. An ideal way to serve them would be with terrapin—Maryland style.

The enterprising Mrs. Reichert also pointed out that the biscuits were not normally eaten hot because originally they were baked as a weekend bread and kept for Sundays or special meals.

Bonnie Reichert is the daughter of Lt. Col. Herman Orrell 3d, USA (Ret.), the only son of Ruth and Herman Orrell. As a member of an Army family, Bonnie traveled and lived in many places before returning to the Eastern Shore to meet and marry Lewis Reichert. The Reicherts now live next door to her grandparents and the beaten biscuit bakery.

"I work for my grandmother," the modest young woman said as she talked and worked at the same time. It was obvious from her efficiency in managing the operation, packaging the biscuits in special little plastic bags—all the while graciously greeting customers—that she had learned well the charm of the Eastern Shore.

"Unfortunately, my grandmother had an emergency errand to attend to this morning and couldn't be here," Bonnie explained.

"Your grandmother is a legend around here isn't she?" one of the visitors asked.

"Oh, yes!" Bonnie exclaimed. "She was a schoolteacher for more than 30 years. In fact, she taught in a little red school house between here and Easton [at Longwoods] that they hope to preserve as a historic landmark. Then, too, grandmother and grandfather act as custodians of the old Wye Mills church next door," Bonnie added.

The whole operation of producing Maryland Beaten Biscuits at the Orrells' place is conducted by family and friends. Mrs. Dunbar Chambers, 80, has worked for Mrs. Orrell almost since the beginning of the business. Although she has recently retired, she can't stay away and often sits in on the biscuit making.

Then there is Mary Catherine Whitby, Blanche Callahan, Elva Wooters, Delores Terris, Linda Patchett and Kathleen Reichert (Bonnie's mother-in-law) who have worked for the Orrells for many years. And it is Bonnie's father-in-law who is in charge of making the dough (using 25 pounds of flour at a time) and operating the beating machine.

Bonnie helps her grandmother in supervising, selling and managing the business.

Then, too, special orders must be taken care of promptly. For example, SS Peter and Paul Catholic Church in Easton wanted 125 dozen for a supper. Other organizations, such as the Eastern Shore Society, order large quantities. And yes, Baltimoreans, the Orrells do send their famous beaten biscuits to the city. They can be purchased at the Woman's Exchange, 333 North Charles street, and at Graul's market, 7713 Bellona avenue.

"We welcome visitors and are only too happy to explain the making of Orrell's beaten biscuits. We bake on Wednesdays, Thursdays and Fridays if people want to see the baking in action." About 300 dozen biscuits are baked in a day—more for special occasions, Bonnie said.

"We only ask that large groups of people advise us ahead of time," she added.

To contact the Orrells, write to Orrell's Maryland Beaten Biscuits, Box 7, Wye Mills, Md., 21679. Telephone (301) 822-2065. The little bakery is located not far from the famous Wye Oak tree in Wye Mills.

Mr. and Mrs. George Nesbitt, of Sandy Spring, Md., made a special "spring trip to Wye Mills to buy Maryland Beaten Biscuits from the Orrell's."

"We drive over several times a year to the Eastern Shore and always make a stop for several dozen biscuits," Mrs. Nesbitt said.

Bonnie pointed out that the biscuits can be fresh by repackaging them in airtight plastic bags. (The original bag has little airholes). The biscuits can be reheated in foil paper.

Mrs. Reichert also said that the biscuits will keep several weeks if kept properly refrigerated. "The biscuits have no preservatives but they do not get moldy. If they become too hard to eat, they can be crushed for dressings, pancake base or made into dumplings. I used to give them to our son, Christopher, as a teething ring."

Ruth Orrell's recipe for Maryland Beaten Biscuits is, of course, carefully guarded. However, the basic ingredients are unbleached flour, country lard (both from the Eastern Shore), baking powder, salt, sugar and water.

Among the recipes generally used by people on the Eastern Shore are these that appeared in the Tidewater Times in an article written by Cindy Doerbach.

MARYLAND BEATEN BISCUITS

2 cups sifted all-purpose flour
¼ teaspoon salt
½ teaspoon sugar
3½ tablespoons lard
OR 5½ tablespoons shortening
½ to ⅔ cup milk

Sift together flour, salt and sugar, cut in shortening and stir in milk to make stiff dough. Turn out on pastry board and beat with wooden mallet. Fold over and beat again. Continue folding and beating about the size of small walnuts, form into balls and press flat. Stick 4 times with a fork. Bake on ungreased cookie sheet at 425 degrees for 30 minutes. Makes about 15 biscuits.

This second version of Maryland Beaten Biscuits uses water instead of milk.

2 lbs. flour
6 oz. lard
Scant teaspoon salt
½ teaspoon sugar
1 cup cold water
Pinch baking soda, size of pea, no larger

Work all ingredients together well, have stiff dough. Beat 20 minutes with iron mallet. To shape biscuits, squeeze dough through hole made by thumb and forefinger, pinch off and pat down a little. Place on baking sheet and prick 3 times with fork. Bake in oven about 400 degrees for 25 minutes. Makes 6 dozen biscuits.

In the cookbook, "Maryland's Way," published by the Hammond-Harwood House Association, Julia Loker, of St. Marys county, has contributed a recipe that is a favorite with many fanciers of the beaten biscuit.

MISS JULIA'S BEATEN BISCUITS

4 cups flour
1 tablespoon lard,
½ teaspoon salt
Water

Mix flour, lard and salt; then add water to make a very stiff dough. Knead it with the hands until pliable and smooth. Continue to knead until it pops with every pressure of the hand. It takes about 20 minutes to half an hour. When it pops this is the test of its lightness. Then make balls of the dough about the size of a small egg. Flatten them on the board with the rolling pin, prick them in the center with a fork and bake in a quick oven, 400 degrees, for 20 minutes to ½ hour. When the edges are hard, they are done, otherwise do not take them from the oven or they will be undone and unwholesome.

For the novice, it should be noted that the biscuits are hard on the outside but softer on the inside.●

NATIONAL SECURITY ISSUES

● Mr. GOLDWATER. Mr. President, the American Security Council, a highly respected group of men interested in the defense of our country, has prepared a poll touching on various issues. The poll not only touched on my own State of Arizona, but touched on other parts of the country as well. I recall in the closing hours of debate that one of our colleagues said the American people were turning around on the Panama Canal, and I hope that individual will read the first question in the poll, which shows 85 percent of those people questioned throughout the United States were opposed and 87 percent in my State of Arizona were opposed. This poll is interesting reading and I suggest my colleagues continue through it and not just look at the Panama Canal poll, but also the others because it shows rather clearly that Americans are concerned about the direction of our foreign policy. Therefore, I ask that this poll be printed in the RECORD.

The poll follows:

ASC 1978 NATIONAL SECURITY ISSUES POLL

The preliminary results of our 1978 National Security Issues Poll follows:

QUESTION 1

Should the United States Senate ratify the Panama Canal treaties?

State of Arizona:
2,342 participants, 5 percent yes, 87 percent no, 8 percent undecided.
Nationally:
108,385 participants, 6 percent yes, 85 percent no, 9 percent undecided.

QUESTION 2

Retired FBI agent John Kearney was indicted for wiretapping and mail opening in his efforts to find the Weatherman terrorists. Do you believe that he should be prosecuted?

State of Arizona:
2,342 participants, 7 percent yes, 89 percent no, 4 percent undecided.
Nationally:
108,385 particpatnts, 8 percent yes, 86 percent no, 6 percent undecided.

QUESTION 3

Should both the FBI's internal security role and the CIA's counterintelligence role be greatly strengthened?

State of Arizona:
2,342 participants, 89 percent yes, 6 percent no, 5 percent undecided.
Nationally:
108,385 participants, 86 percent yes, 8 percent no, 6 percent undecided.

QUESTION 4

Should the House and Senate Internal Security Committees be re-established?

State of Arizona:
2,342 participants, 81 percent yes, 4 percent no, 15 percent undecided.
Nationally:
108,384 participants, 82 percent yes, 4 percent no, 14 percent undecided.

QUESTION 5

Do you trust the Soviets to honor Strategic Arms Limitation Treaty agreements which do not provide for on-site inspection?

State of Arizona:
2,342 participants, 5 percent yes, 95 percent no, 1 percent undecided.
Nationally:
108,384 participants, 6 percent yes, 93 percent No, 1 percent undecided.

QUESTION 6

Should the United States regain military superiority over the Soviet Union?

State of Arizona:
2,342 participants, 95 percent yes, 1 percent no, 4 percent undecided.
Nationally:
108,384 participants 94 percent yes, 2 percent no, 4 percent undecided.

QUESTION 7

Would you support regaining military superiority over the Soviet Union even if it cost twenty billion dollars more per year?

State of Arizona:
2,342 participants, 91 percent yes, 2 percent no, 7 percent undecided.
Nationally:
108,834 participants, 88 percent yes, 3 percent no, 9 percent undecided.

QUESTION 8

Should the United States build an antimissile defense to protect its citizens?

State of Arizona:
2,342 participants, 88 percent yes, 2 percent no, 10 percent undecided.
Nationally:
108,384 participants, 88 percent yes, 2 percent no, 10 percent undecided.

QUESTION 9

Should the United States counter the new Soviet Backfire supersonic bomber by building the B–1 which was canceled by President Carter?

State of Arizona:
2,342 participants, 91 percent yes, 2 percent no, 7 percent undecided.
Nationally:
108,384 participants, 88 percent yes, 3 percent no, 9 percent undecided.

QUESTION 10

Should the United States develop mobile ICBMs to counter the Soviet mobile ICBMs?

State of Arizona:
2.342 participants, 92 percent yes, 1 per. cent no, 7 percent undecided.
Nationally:
108,384 participants, 90 percent yes, 1 percent no, 9 percent undecided.

QUESTION 11

Should the United States develop and deploy supersonic cruise missiles with intercontinental range?

State of Arizona:

QUESTION 15

Should the United States adopt a national objective of rolling back the growth of communism?

State of Arizona:
2,342 participants, 86 percent yes, 4 percent no, 10 percent undecided.
Nationally:
108,383 participants, 86 percent yes, 5 percent no, 9 percent undecided.●

TOBACCO—A MAJOR FOOD SOURCE FOR A HUNGRY WORLD?

Mr. HELMS. Mr. President, over 350 years ago tobacco provided this Nation with its first cash crop. Today it is supporting more than 500,000 farm families. In my State alone over 150,000 families depend upon tobacco as the vital cash crop. It is tobacco that enables these farm families to remain on the small family farm to produce the food and

fiber that our country and the rest of the world need.

Last year, taxes on tobacco amounted to more than $6 billion—$2.5 billion to our national treasury, and $3.6 billion to the States, cities, and counties.

Tobacco exports are contributing more than $1 billion to our international trade balance this year—over 100 countries are buying our tobacco. It is not only the finest tobacco crop in the world, but nearly the largest—only China's is bigger.

Mr. President, these statistics tell an important story about tobacco. Unfortunately, the administration seems to have forgotten the crucial role tobacco plays in this country's agricultural economy.

President Carter's Secretary of Health, Education, and Welfare has virtually declared war on tobacco, a decision that has left tobacco farmers, manufacturers, workers, and exporters disillusioned and frightened.

Secretary Califano, you may remember, even suggested that tobacco farmers should quit farming and go on welfare. Then he announced that the administration would spend $23 million in a massive advertising campaign against tobacco. Just the other day, Mr. Califano again attacked the tobacco companies for what he termed "sinister" advertising.

That is not all. The Carter administration's proposed budget for fiscal year 1979 represents yet another serious attack on tobacco. If the administration has its way, all funding for tobacco production research will be terminated. This research is conducted in various States, including Georgia, Maryland, North Carolina, Virginia, and Tennessee.

Mr. President, several of us have appealed time and time again to the President and Secretary Califano urging them to reconsider their actions. But so far, these appeals have been in vain.

The total elimination of the federally supported program of tobacco research greatly troubles me. Had it not been for this research—which the administration now proposes to end—tobacco would not be grown efficiently in the United States today. Those impressive figures I mentioned at the beginning of my remarks simply would not exist.

Tobacco research efforts designed to develop a safer product, to improve production methods for our farmers, and to conduct scientific studies on potential new uses of tobacco have apparently been the victim of the administration's negative approach toward tobacco generally.

This sad turn of events, Mr. President, is so disturbing to me because right now our scientists are working on a new project to extract protein from green tobacco leaves. This offers great potential for producing protein for food; and by removing the protein from tobacco, a safer smoking product should be obtained. Instead of pursuing their attacks on tobacco and related research, I urge administration officials, and indeed Mr. Califano himself, to carefully examine—as I have—the promising benefits of this tobacco protein research.

Late last month, I spoke at some length with a distinguished scientist in California, Dr. Benjamin Ershoff, president of the Institute of Nutritional Studies at Culver City, Calif.

As Secretary Califano should have known, Dr. Ershoff, and another distinguished scientist, Dr. Samuel Wildman of the University of California at Los Angeles, have together achieved an astonishing breakthrough in experiments showing that tobacco has the highest potential of any green plant in providing protein to feed, and to improve the health or hungry people all over the world.

Also, as Secretary Califano should have known, the National Science Foundation is excited about the discovery achieved by Dr. Ershoff, Dr. Wildman, and other distinguished tobacco research scientists.

But there is another equally important potential in this discovery. Today, thousands of Americans suffer diseases to the kidney and other vital organs. Preliminary tests indicate that the use of protein from tobacco may very well save the lives of people whose present hope of survival is limited to the use of kidney machines and expensive medication.

And what is the potential effect for North Carolina's farmers—as well as those from the other tobacco producing States?

Dr. Ershoff told me that the downstalk tobacco, which now presents a problem of oversupply, can be used for the production of food protein, thus indicating a multibillion-dollar market for tobacco growers.

He also suggested that tobacco farmers could probably plant, harvest and sell two crops each year, instead of one—if and when the protein potential of tobacco can be fully developed. Dr. Ershoff also stated that this could occur in the relatively near future if research funds for testing and developing are made available.

One further comment from Dr. Ershoff: He suggested that, when tobacco can be commercially produced for its protein content, 20 times as much tobacco can and should be grown per acre. We would, of course, have to coordinate this kind of production with our present tobacco support program which we want to protect.

Think of the income potential for our tobacco farmers. Think of the economic opportunities for the United States in exporting to other countries a product which will both relieve the hunger of the world, and improve the health of the people of the world.

Mr. President, earlier this month I toured the Tobacco Research Laboratory at Oxford, N.C. Much of the work on extraction and recovery of tobacco leaf protein is now in progress there; however, this research will stop unless Congress restores the funds the administration wants to cut.

In Oxford, I saw first-hand the efforts of Dr. James F. Chaplin and his staff to make protein recovery from tobacco leaf commercially feasible. It was also my privilege to meet with Dr. Thurston Mann, assistant director of the North Carolina Agricultural Experiment Station in charge of tobacco research, who definitely feels this research has great potential. Also with me at Oxford was Dr. E. Leon Moore, one of the outstanding scientists in this field of research who himself developed a tobacco variety resistant to root knot nematode while employed at the Oxford laboratory.

Mr. President, after seeing the research work in progress at Oxford and talking with some of the distinguished scientists and leaders in this effort, I am convinced that tobacco will continue to be an important agricultural crop in our Nation's economy.

The point, Mr. President, is that this is clearly not the time to terminate tobacco research funding from the Federal budget. While much has been accomplished, the need for continued research should be obvious. Indeed, the Federal Government ought to consider increasing the $3 billion current outlay for this research.

We should give more than just a passing interest to the studies of outstanding scientists who tell us that within 10 to 20 years tobacco grown as a food crop will be one of the major agricultural products in the world.

I urge the administration to reverse its negative position on tobacco and to join in a creative approach to solving problems confronting us all. Instead of shutting down vital research facilities, let us make even greater use of creative and constructive research for the betterment of mankind.

Mr. President, I ask that Dr. Ershoff's letter, the Wildman-Kwanyuen-Ershoff paper presented to the NSF Conference on Nonconventional Proteins and Foods, my letter to Senator EAGLETON seeking reinstatement of tobacco research funding, two reports on the Oxford Tobacco Research Laboratory, and a summary of tobacco research affected by the President's proposed budget elimination all be printed in the RECORD following my remarks. I urge my colleagues to give this matter the serious attention and study I so strongly believe it merits.

The material follows:

INSTITUTE FOR NUTRITIONAL STUDIES,
Culver City, Calif., March 31, 1978.

Senator JESSE HELMS,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR HELMS: Dr. S. G. Wildman and I are most grateful for the interest you expressed during our telephone conversation of March 30th concerning our studies on tobacco proteins. We feel that such studies have the potential of vastly improving the economic status of the tobacco growers not only in your state but throughout the entire country, and we feel that within 10 to 20 years tobacco grown as a food crop will be one of the major agricultural products in the world.

With the rapid increase in world population, the importance of obtaining new sources of protein fit for human consumption, high in biological value and low in cost, cannot be overemphasized if worldwide protein malnutrition is to be avoided in the future. Leaf proteins are by far more abundant of all protein sources; but for them to serve as a significant source of protein for man, they must be concentrated. The cost of such concentration has priced these proteins out of serious consideration as a source of

protein in the past. Technological improvements in the concentration of leaf proteins (particularly from tobacco) now make it possible to produce at nominal cost highly purified proteins from tobacco of high biological value to have no odor or taste and that can be added to foods to improve their protein content without altering their appearance, texture or taste.

When tobacco is grown for smoking purposes, the plants are harvested when mature. In the case of Burley tobacco grown in Kentucky, tobacco culture as presently practiced calls for planting approximately 8,000 plants per acre. When tobacco is grown as a food crop for its protein content, however, the plants are harvested while still immature (i.e., approximately 6 weeks after the seeds are planted with a second harvest from the same plant 4 weeks later). Under the latter conditions, close spacing culture is employed with as many as 150,000 plants per acre. Two or more plantings can thus take place depending on weather conditions during the course of the growing season. This can result in a substantial increase in the financial return to the farmer per acre of land per year over that obtained when tobacco is grown for smoking purposes.

Dr. Wildman and associates have prepared from young tobacco plants 3 different classes of proteins of major economic importance: (1) a crystalline, water-soluble protein of high biological value that contains no sodium or potassium that would have marked value in the treatment of patients with certain kinds of renal, liver and heart disease; (2) a series of water-soluble proteins of high biological value that are odorless, colorless and tasteless that could be incorporated in beverages, liquid foods (such as soups for senior citizens), etc. to increase their nutritional value; these proteins would be particularly valuable in the preparation of milk replacers in parts of the world where milk is not readily available for infants and children; and (3) a non-soluble protein that could be incorporated into cereal grain products, flour and other food substances to increase their protein value both quantitatively and qualitatively.

The material remaining from tobacco plants after the above protein products are removed can be processed to produce material that is similar in color, texture and taste to various blends of smoking tobacco but from which many of the constituents which have been implicated as possibly hazardous to health have been removed.

The above studies have been conducted to date only on a laboratory scale. We are most anxious at this time to initiate studies to determine the most feasible methods for their production on a commercial scale, to conduct the toxicity tests required by the FDA to obtain approval of these various tobacco proteins for use as an additive to foods; to determine the optimal conditions for planting and harvesting; etc. Funds are lacking for this purpose. We should be most grateful for any suggestions that you might care to offer to further such a program.

Enclosed is a copy of a paper dealing with one of the proteins prepared by Dr. Wildman and associates from tobacco that may be of interest to you. It was presented at a conference on Non-Conventional Proteins and Foods sponsored by the National Science Foundation that was held last October at the University of Wisconsin.

Sincerely yours,

BENJAMIN H. ERSHOFF, Ph. D.,
Director.

PRODUCTION AND BIOLOGICAL EVALUATION OF CRYSTALLINE FRACTION I PROTEIN FROM TOBACCO LEAVES

(S. G. Wildman, P. Kwanyuen and B. H. Ershoff, Department of Biology, University of California, Los Angeles, California 90024, and Institute for Nutritional Studies, Culver City, California 90230)

Abstract. Fraction I protein (F-I-p) is the most abundant single protein in Nature and can constitute 25% of the total protein in leaves. Compared to other green leaves such as alfalfa, the F-I-p from tobacco leaves is unique in that it can be obtained in crystalline form. The crystalline protein is composed only of amino acids and is odorless and colorless. The pure protein is soluble to a large extent in dilute salt solutions. In the salt-free crystalline state, lyophilization produces a tasteless white powder. When fed to rats at a 10% level in the diet the lyophilized F-I-p had a PER (protein efficiency ratio) which was consistently greater throughout a 28-day experimental period than that of rats fed a similar diet containing casein. In California, field experiments with tobacco plants grown as a forage crop indicate a potential yield approaching 60 metric tons of fresh plants per acre per growing season and a yield of more than 100 kg/acre of lyophilized, crystalline F-I-p. It is anticipated that the crystalline protein may have medical applications such as reducing the frequency of hemodialysis for patients suffering renal failure, maintaining adequate protein nutrition of patients with pylorospasms and other disorders of the gastro-intestinal tract, and as a more adequate milk replacer for infants and children allergic to cow's and goat's milk. The absence of taste together with superior nutritional quality would indicate F-I-p to have advantages over current protein hydrolysates employed in medically supervised reducing diets.

INTRODUCTION

Fraction I protein (F-I-p) is the most abundant, single protein in the world, since it is present in all green plants (1). F-I-p may constitute 25% of the total protein and 50% of the soluble protein in leaves. The leaf proteins constitute the most direct utilization of solar energy in the manufacture of protein. F-I-p is synthesized in the chloroplasts of leaves where photosynthesis occurs in the first instance.

With the current rapid increase in world population, the importance of obtaining new sources of protein fit for human consumption and of high biological value cannot be overemphasized if worldwide protein malnutrition is to be avoided in the future. Leaf proteins are by far the most abundant of all the protein sources of the world but very little of them are used directly for human consumption. Proteins constitute but a small portion of the leaf, and for them to serve as a significant source of protein for man, they must be concentrated. The cost of concentration has priced these proteins out of consideration as a source of human protein in the past. With the increasing costs of protein from conventional sources and technological improvements in the concentration of leaf proteins, the possibility that leaf proteins may serve directly as an important source of protein for man is receiving increasing consideration.

F-I-p from tobacco is unique from that derived from other green plants such as spinach, wheat, rice, cabbage, clover, alfalfa and others in that only from plants of the genus Nicotiana (of which tobacco is a member) can it be obtained in pure, crystalline form (2). The crystalline protein is composed entirely of amino acids with no carbohydrates, purines, pyrimidines, pigments or minerals (with the exception of the sulphur present in the sulphur-containing amino acids, none of which are united by disulfide bonds). It consists of a single homogeneous protein whose molecular weight is approximately 500,000 daltons. The pure protein is odorless, colorless and soluble to a large extent in dilute salt solutions (3). In the salt-free, crystalline state, lyophilization produces a tasteless white powder. The protein breaks down into 80–100 small peptides when treated with the digestive enzymes of human gut, trypsin and chymotrypsin. Because the essential amino acid composition of crystalline F-I-p was closely comparable to that of an ideal protein for human nutritional purposes by F.A.O. standards (4) as shown in Table 1, the RANN Division of the National Science Foundation funded a project whereby 0.6 kg of crystalline F-I-p were prepared by laboratory methods for biological evaluation. Production of this quantity of protein was greatly facilitated by the cooperation of Dr. Richard Lowe of the University of Kentucky in notifying us of his discovery that F-I-p would crystallize upon passage through a G-25 Sephadex chromatography column (5). Thanks to Lowe's cooperation, we have used this method with great success with greenhouse and field grown plants. The following is a description of the procedure employed to prepare crystalline F-I-p in batches of 6 to 12 g per day.

Production of Crystalline F-I-p on a Laboratory Scale. Turkish tobacco plants were grown in a greenhouse at a spacing of one plant per 0.25 ft.^{2} until they attained a height of 18 to 21 inches. The leaves were detached from the stems. The blades of a gallon size Waring Blender were covered with 400 ml of 2.5 M NaCl solution and 10 ml of beta mercaptoethanol. Then 2 kg of fresh leaves were homogenized in this solution. The homogenate was filtered through two layers of fine cheesecloth supported on a 32 mesh screen. The cheesecloth was twisted by hand to press out the green juice whose pH ranged from 5.7 to 6.2 and amounted to about 1900 ml. In 400 to 500 ml batches, the green juice was heated in a 50° water bath for 10 minutes. After removal from the bath, 10 ml of 50 times concentrated Tris-HCl-EDTA buffer was added to produce a pH of 7.6—7.8, and a final concentration of 0.025 M Tris and 0.0005 M EDTA. Upon standing at room temperature for 1 hour, partial separation of a green sediment from a brown juice could be seen. The neutralized juice was centrifuged at 5000 g for 15 min. The brown juice (total volume, *ca.* 1700 ml) was collected and passed through a G-25 Sephadex column equilibrated with Tris-HCl-EDTA buffer. As Tris-HCl-EDTA buffer passed through the Sephadex column, the total soluble proteins of the tobacco leaves eluted in the void volume of the column. Frequently, crystals of F-I-p appeared during collection of the eluate or shortly thereafter. The eluate was allowed to stand for 2–3 days at 8° C to allow more F-I-p crystals to form and settle into a thin layer at the bottom of the flask. Then, the proteins which remained dissolved in the mother liquor were decanted so that the F-I-p crystals could be collected and washed with distilled water. The crystals were redissolved in 0.1 M NaCl solution, the latter centrifuged to remove slight amounts of undissolved material and the water-clear, supernatant solution dialyzed against distilled water to cause recrystallization of F-I-p. The recrystallized protein was transferred to flasks and the protein lyophilized to produce a white, non-hygroscopic powder which was tasteless. The yields of recrystallized F-I-p have been consistently between 3 to 4 grams dry protein per kg of fresh tobacco leaves during the Fall, Winter and Spring months of 1976–77.

Protein Efficiency Ratio of Crystalline F-I-p Compared to Casein. Twenty male rats of the Sprague-Dawley strain ranging from 48 to 52 g in body weight were divided into 2 comparable groups of 10 animals each. These were fed diets similar to the AOAC Protein Evaluation Diets (6) but differed as to the source of protein. Rats in group I were fed ANRC Reference Casein and those in group II twice crystallized F-I-p from tobacco leaves as the sole source of dietary

protein which was incorporated at a 10% level in the test diets. Sucrose was employed as the source of dietary carbohydrate. Animals were placed in individual metal cages with raised screen bottoms and were provided the above diets and water ad libitum. Animals were fed daily, and all food not consumed 24 hours after feeding was discarded. Food consumption was determined daily for each rat for 28 days. Animals were weighed once weekly. The average weight increments and PERs of rats in the two groups after 7, 14, 21 and 28 days of feeding are summarized in Table 2. Findings indicate that the average weight increment and PER of rats fed the diet containing F–I–p from tobacco were consistently greater throughout the experimental period than that of rats fed the casein-containing diet.

After the 28th day of feeding, rats were fasted overnight. The next morning they were anesthetized with sodium pentobarbital, and 5 ml of blood were withdrawn from each rat by heart puncture. Two ml were taken for hematological determinations; serum was separated from the remaining 3 ml and analyzed with a Technicon SMAC high speed computer controlled Biochemical Analyzer for serum levels of protein, lipids and other serum constituents. No significant differences in respect to hematological findings and serum levels of proteins, lipids and other constituents were noted between rats in the two dietary groups.

Potential Medical Applications of Crystalline FXI–p Because crystalline F–I–p from tobacco leaves is composed entirely of amino acids and contains no carbohydrates, purines, pyrimidines, pigments or minerals (with the exception of the sulphur present in the sulphur-containing amino acids) and because of its high nutritional value and absence of odor and taste, it has the potential of being developed into important therapeutic products for the treatment of a number of medical conditions. It would appear to be particularly valuable in the feeding of patients with various types of renal disease whose sodium and potassium intake must be rigorously controlled and might well be incorporated in special diets which could reduce the frequency of hemodialysis required by patients suffering from renal failure. F-I-p from tobacco is water soluble and can readily be administered in conjunction with other water-soluble and water-dispersible nutrients in amounts sufficient to meet the nutritional requirements of patients with pylorospasms and other disorders of the gastrointestinal tract. In the case of mothers who are unwilling or unable to nurse their young and when the young are allergic or will not respond well to infant formulas containing cow's milk or goat's milk, infant formulas containing F-I-p from tobacco as the sole source of protein may be particularly appropriate. It has a number of advantages over soy protein not only in respect to the biological value of its protein but also in regard to such factors as odor, taste and water solubility. Current medically supervised fasting in which patients are administered vitamin and mineral supplements with limited quantities of a protein hydrolysate as the sole source of calories is gaining considerable popularity for patients who are markedly obese and who have failed to lose weight on other dietary regimes. It might be anticipated that the efficiency of F-I-p from tobacco in maintaining nitrogen equilibrium and meeting protein requirements in such patients would be greater than that obtained with protein hydrolysates in current use. The latter are prepared primarily if not solely from connective tissue which is deficient in one or more of the essential amino acids. Inasmuch as F-I-p from tobacco is water-soluble, odorless and tasteless, it has the further advantage over preparations now in use in that it can be prepared in the form of a tasty beverage in contrast to the liquid hydrolysate preparations currently available that can most charitably be described as "unpleasant".

Potential Yields and Uses of Crystalline F-I-p from Tobacco. Current tobacco culture, as for example the production of Burley type tobacco in Kentucky, is based on growing 8000 plants per acre which result in a harvest of 2000-2400 dry lbs per acre or at 85 percent moisture, somewhat more than 30,000 lbs of fresh plants. As compared to forage crops such as alfalfa, this is not a very impressive yield of biomass. However, it is possible to grow tobacco as a forage crop like alfalfa. In California, we have been growing tobacco at a density of one plant per 0.25 ft^2 in the San Fernando Valley. During July and August 1977, growth for six weeks produced plants which averaged 0.125 kg per plant (fresh weight) cut off four inches above the soil level. This yield is equivalent to more than 20,000 kg fresh weight tobacco plants per acre. At 15 percent dry matter, a single harvest would produce about 3000 kg dry matter per acre. Allowing the harvested plants to regenerate new shoots for a second harvest followed by replanting and two more harvests, we envisage yields approaching 60 metric tons of fresh tobacco plants per acre per year. At our present level of recovery of crystalline S-I-p from these field grown plants, we could anticipate a yield of more than 100 kg of F-I-p/acre per growing season.

A project under the direction of Dr. T. C. Tso of the Tobacco Laboratory of the U.S. Department of Agriculture at Beltsville, Maryland, is attempting to develop a method for extracting crystalline F-I-p during a process known as homogenized leaf curing (HLC) (8, 9). This process is being developed in response to the need for saving the high costs of labor now required for conventional harvest and curing of tobacco. It is also believed that a safer smoking product can be F-I-p and other soluble nitrogenous components become reduced in amount during the tobacco leaf residue into cigarette tobacco. F-I-p and other soluble nitrogenous components become reduced in amount during the homogenization stage of the HLC process. Extensive studies are underway to see whether crystalline F-I-p could be obtained during the HLC process. There is considerable evidence that the protein content including the F-I-p content of leaves is less in very mature plants than in young growing plants. The need to "yellow" the leaves before HLC in all probability results in a further diminution of its F-I-p due to the senescence of the leaves while still attached to the plants standing in the fields prior to harvest. There is good likelihood that when tobacco plants are grown primarily for their protein content and harvested at an early stage when they have attained a height of 18 to 21 inches, their F-I-p content will be significantly greater than that obtained from mature plants in the HLC process.

Of the various sources of plant proteins, those from tobacco leaves would appear to have important advantages over other plants on the basis of production and economics. Compared to soybeans, for example, which grow poorly in subtropical and tropical regions, cultivars of tobacco have been bred which are suited to growing from the equator to as far north as Novosibirsk, Siberia (latitude 55°). Tobacco leaves also can serve not only as a source of crystalline F–I–p but also of a mixture of a large number of different soluble proteins. No single protein in this mixture comprises more than 10% of the total nor does the molecular weight of any of them exceed about 50,000 daltons. These proteins as well as the non-crystallized F–I–p can also serve as human grade protein of high biological value. In addition to the above, tobacco leaves can also serve as a source of a number of by-products of considerable commercial value. These include proteins ("green" protein) for use in animal feeds, nicotine and other alkaloids which can be employed in the manufacture of pesticides, and deproteinized tobacco leaf residue which can be processed to produce smoking products of improved quality, safety and usability. It would appear that the combined value of the various by-products indicated above when added to that of the human grade protein might well make the financial return from the growing and processing of tobacco primarily for its protein content a most lucrative venture.

This investigation was supported in part by Research Grant AER 76–11051 from the RANN Division of the National Science Foundation. However, any opinions, findings, conclusions or recommendations expressed herein are those of the authors and do not necessarily reflect the views of the National Science Foundation. The authors are indebted to Dr. H. T. Huang of the National Science Foundation for his constructive criticism and encouragement during the course of this study.

ABLE 2.—COMPARATIVE EFFECTS OF CASEIN AND CRYSTALLINE F-I-p FROM TOBACCO ON THE WEIGHT INCREMENT AND PER (PROTEIN EFFICIENCY RATIO) OF RATS

Dietary protein	(10 animals per group) average weight increment (g) after the following days of feeding: 7	14	21	28
ANRC casein	18.1	51.5	80.8	114.4
F-I-p from tobacco	25.7	64.2	100.6	139.1
	PER after the following days of feeding:[1] 7	14	21	28
ANRC casein	2.73	3.07	2.88	2.83
F-I-p from tobacco	3.40	3.44	3.10	3.01

[1] PER equals weight gain/protein consumed.

UNITED STATES SENATE,
Washington, D.C., March 13, 1978.

Hon. TOM EAGLETON,
Chairman, Subcommittee on Agriculture and Related Agencies, Committee on Appropriations, Washington, D.C.

DEAR TOM: The Administration's proposed budget for Fiscal Year 1979 terminates all funding for tobacco production research. This research is conducted in various states, including Georgia, Kentucky, Maryland, North Carolina, Virginia, and Tennessee, at a total cost of $3,311,000.

The elimination of these research programs represents another serious blow to our farmers who are in the midst of the worst farm crisis since the Great Depression. Farm income, which, in terms of current dollars, was $33 billion four years ago (1974), fell to about $20 billion in 1977. To cut research programs out from under the American tobacco farmer in this manner again shows an insensitivity to what is happening to farmers all over the nation.

Senators Huddleston, Ford, Stone, and I met with Rupert Cutler, Assistant Secretary for Conservation, Research, and Education, on February 3, 1978 to protest the elimination of these vital research efforts from the President's proposed budget. In our meeting with Mr. Cutler, there was no doubt that we had persuaded him of the necessity of restoring the money. He took our request back to the Office of Management and Budget with the recommendation that funds be provided for the tobacco research program. Unfortunately, OMB refused to alter its original decision to cut off these funds. What bothers me a great deal is that administration officials were apparently not even aware that these research programs were actively involved in the general area of health and smoking research when the decision was made to eliminate the funds.

On March 8, 1978, the Senate Agriculture Committee voted its recommendation to include funding for tobacco production research in the 1979 budget. Thus, I am writing you now to urge your support for inclusion of this funding in the budget.

I am particularly concerned about the closing of the Richmond, Virginia Stored Tobacco Insects Laboratory and the Oxford, North Carolina Tobacco Research Laboratory. There are very strong reasons for continuing both of these facilities in operation.

I have enclosed with my letter a statement prepared by Fred G. Bond, General Manager of the Flue-Cured Tobacco Cooperative Stabilization Corporation in Raleigh, North Carolina, supporting the funding of both the Richmond and Oxford facilities. I hope you will take time to study his remarks, particularly dealing with the benefits of the Richmond Laboratory research which has provided solutions and control methods that have protected and preserved stored tobacco, especially as it relates to Commodity Credit Corporation's interest and investment.

The Oxford Tobacco Research Laboratory has an outstanding record of accomplishments in tobacco research throughout the years of its existence. The research work at Oxford, begun in 1912, emphasizes tobacco production efficiency and the development of a safer product. The research work at Oxford has long been important for improving the over-all economy of North Carolina, the flue-cured tobacco growing region of the Southeastern United States, and all tobacco growing areas of the country. The primary objectives of the research at the laboratory are:

(1) Breeding and developing varieties and lines resistant to diseases and insects with varying chemical and other quality characteristics.

(2) Controlling disease by use of pesticides that leave little or no residue and the use of methods that do not require the use of pesticides.

(3) Controlling tobacco insects by non-chemical means, such as use of male sterile techniques, better use of insect predators, and host plant resistance.

(4) Improving quality of the cured leaf by eliminating or reducing chemical constituents that might be harmful to health. This is being done by breeding, curing methods, and cultural practices.

(5) Reducing labor requirements for the production of tobacco by developing breeding lines and varieties that may be more adaptive to mechanization and different harvesting methods.

Anew project is the extraction of protein from green tobacco leaves. This offers great potential for producing protein for food; and by removing the protein a safer smoking product should be obtained.

Researchers at Oxford developed the first Granville Wilt resistant, the first black shank resistant, and the first root knot resistant variety of tobacco. If it were not for this research, tobacco could not be efficiently grown in this country. So many of our citizens—600,000 farm families nationwide and over 150,000 in my state alone—depend upon tobacco as an important cash crop. It is this crop which enables them to remain on the small family farm to produce the food and fiber that our country and the rest of the world needs.

The Oxford laboratory should be looked upon as a vital component of the total research program in tobacco. Termination of production research will leave health research personnel without support or plant materials to work with, which will seriously jeopardize or even paralyze the health-related tobacco program.

If this funding is not restored, experienced tobacco production scientists will be no longer available to conduct any crash program in the event of a major disease or other important production problem. The U.S. tobacco industry could soon be relying on foreign tobacco producers to supply their raw materials.

Approximately 40% of U.S. grown flue-cured tobacco is sold in overseas markets. Because of the demand for American quality in world markets, exports of tobacco and tobacco products resulted in a positive net contribution of $1.2 billion to the U.S. balance of payments last year. If this is to be maintained, it is imperative that research efforts must continue in the years ahead.

Your consideration of this matter is appreciated. In addition to Mr. Bond's statement, I am also enclosing some helpful and convincing information about the Oxford Laboratory, as well as a synopsis of the tobacco production research programs and the amounts necessary to continue them. I strongly urge the Subcommittee to restore these funds. As you know, the Agriculture Committee has recommended that action.

Sincerely,

JESSE.

U.S. DEPARTMENT OF AGRICULTURE,
OXFORD TOBACCO RESEARCH LABORATORY,
Oxford, N.C.

The Oxford Tobacco Research Laboratory has an outstanding record of accomplishments in tobacco research throughout the years of its existence. The work at the laboratory is cooperative with the North Carolina State University Agricultural Experiment Station and the North Carolina Department of Agriculture. The federal laboratory buildings are located on approximately four (4) acres of land which belongs to the federal government.

The research work at Oxford was begun in 1912, by one man and the first laboratory building was constructed by the U.S. Department of Agriculture in 1939. This building and accompanying outlying buildings such as laboratory-headhouses, greenhouses, and etc., have laboratory space for seven (7) scientists.

A new laboratory building was completed in 1969 which has facilities for nine scientists. At the present time there are five scientists located in this building, however, there are facilities for six more scientists at the location; four in the new building, one in the old building, and one in the headhouses greenhouse complex. The laboratory has never been completely staffed because of lack of funds.

The agricultural research program at Oxford has long been important for improving the over-all economy of North Carolina, the flue-cured tobacco growing region of Southeastern United States, and all tobacco growing areas in the United States. Tobacco ranks fifth in value among crops produced in the U.S. It brought in over 2.4 billion dollars to the growers in 1976. In addition tobacco and tobacco products account for approximately 1.7 billion dollars in exports and the sales in the U.S. result in taxes collected of over 6 billion dollars.

During the early years of the development of the laboratory, experimental work was primarily with fertilizer requirements, culture practices, and diseases of tobacco. A magnesium deficiency of soils was first clearly defined at the Oxford Tobacco Research Station. This finding has had national and international significance to agriculture.

Bacterial wilt was first reported in 1903, in local areas of Granville County. Oxford 26, the first plant variety resistant to this disease was developed at Oxford. It was estimated that the development of the variety was worth 2 million dollars annually when released in 1945. Projecting this over the last 25 years, Oxford 26 and varieties subsequently developed from it have been worth over 100 million dollars to flue-cured tobacco growers.

Another disease, black shank a more destructive disease than bacterial wilt, was first controlled by a variety developed at Oxford, Oxford 1. The first variety developed with combined resistance to two diseases was developed at Oxford, Dixie Bright 101. Resistance to the root knot nematode was added to a new release in 1961, NC 95. The first root knot resistant variety has led to the development of many subsequent varieties and now over 50% of the flue-cured acreages are planted to root knot resistant varieties. Many other significant contributions in the areas of tobacco curing, plant bed management, fertilization and culture practices have been made over the years.

In the last few years the objectives of the research conducted at the laboratory have changed due to changing problems and

times. At present the most pressing problems in flue-cured tobacco production are, those of labor required to produce the crop and the smoking and health issue.

The primary objectives of the research at the laboratory are:

Breeding and developing varieties and lines resistant to diseases and insects with varying chemical and other quality characteristics.

Control of disease by use of pesticides that leave little or no residue and the use of methods that do not require the use of pesticides.

Control of tobacco insects by non-chemical means, such as use of male sterile techniques, better use of insect predators, and host plant resistance.

Improve the quality of the cured leaf by eliminating or reducing chemical constituents that might be harmful to health. This is being done by breeding, curing methods, and cultural practices.

Reduce labor requirements for the production of tobacco by developing breeding lines and varieties that may be more adaptive to mechanization and different harvesting methods.

Progress has been made in host plant resistance to insects. Low nicotine lines have been developed and are being used extensively in smoking and health research. Techniques have been developed for producing lines or varieties with any reasonable levels of nicotine. The production of haploids from anthers and subsequent diploids (which is a new technique) is being used for developing pure lines of tobacco within the shortest possible time. This technique should give a big boost to our research program for developing plants with varying chemical constituents.

Imaginative biochemical approaches are being used at Oxford in the homogenized leaf curing research on flue-cured tobacco. This procedure for processing ripe tobacco leaf offers the possibility of complete mechanization of harvesting and curing, and a means of reducing biological activity of the resulting product.

Also considerable progress has been made in the area of disease control by acquired resistance in plants.

A new project associated with the homogenized leaf process is the extraction of protein from green tobacco leaves. This project offers great potential for producing protein for food and by removing the protein a safer smoking product should be obtained.

Considerable data have been obtained as to the effect different diseases have on the chemical and physical constituents of the cured tobacco leaf.

A smoking laboratory has been completed where TPM (tar) and nicotine can be measured. A program for breeding varying cultural practices, and other techniques to reduce TPM in the tobacco leaf is underway. Preliminary results show a wide variation in tar content among tobacco types.

The world collection of *Nicotiana* species and *tabacum* germplasm is maintained at the laboratory which includes over 65 *Nicotiana* species, 1000 tobacco introductions and approximately 350 cultivars. This material is available to scientists all over the world who are interested in tobacco research and is needed in all breeding programs for chemically altering the plant.

In addition to the research by the individual scientists at the laboratory, it has served as a focal point for the tobacco breeding and disease research and tobacco insect control research for the U.S. Department of Agriculture.

The hornworm and budworm have been the two most important tobacco insects. A combination of cultural, biological, and physical control practices have resulted in decreased importance of the hornworm. The budworm now is the most important insect pest of tobacco. Control of this pest with chemicals is highly variable because of extended feeding periods in vegetative buds, where it is protected.

Since 1965, the stiltbug has been recognized as an important hornworm and budworm egg predator in the Oxford, North Carolina area. However, in areas to the south it is less abundant and poorly synchronized with pest populations. Other predators and parasites are also known to play important roles in suppressing tobacco pests. A large scale pilot test will be conducted for the next three years in trying to control the budworm by the use of the stiltbug.

The breeding for insect resistance has progressed to the point of identifying a line (TI 1112) that has budworm resistance. This resistance is being incorporated into a line which should eliminate the need for the use of pesticides on this material.

Contributions from the laboratory continue to be important, not only in North Carolina but in all of the tobacco growing areas in the United States.

OUTSTANDING ACCOMPLISHMENTS IN LAST 5 YEARS, OXFORD TOBACCO RESEARCH LABORATORY, OXFORD, N.C.

The inheritance of nicotine levels in flue-cured tobacco were determined and based on the research, a low nicotine flue-cured line (LAFC 53) was developed and released. This line has nicotine level of 0.2% as compared with normal cultivars of about 2.5–3.0% and has good smoking qualities. It has been used extensively in smoking and health research.

The Tobacco Research Laboratory at Oxford is responsible for maintaining the world collection of tobacco germplasm. In testing the germplasm for "tar" content, two fold differences were found. Lines with low tar have been identified and a breeding program begun to reduce the tar content. The reduction of tar in tobacco through genetic, production, and curing practices is a high priority research item. The older method used for tar determination was time consuming and only about 300 samples per year could be determined. A new machine, using a different method that will be much faster, has been obtained and installed. Using this method over 3000 samples per year can be used and progress will be made faster.

The nicotine to tar ratio is important. People smoke for the nicotine yet it is generally believed that most of the harmful effects to the smoker is from the tar. Therefore, a reasonable approach would be to lower the tar and have the nicotine remain constant. Results obtained show a difference in the tar/nicotine ratio in different tobaccos.

Non-pathogenic isolates of the brown spot fungus, when applied to leaves of tobacco before inoculation with the pathogenic strains of brown spots reduce the disease. This technique of inoculating plants with non-pathogenic strains of an organism to build up immunity in the plant has great potential for controlling plant diseases without the use of pesticides. The basic information can be used in controlling diseases in other plants.

Projects are underway to breed tobacco with less suckers. There is considerable controversy at present over the use of Maleic Hydrazide on tobacco because of the residue levels. While it may not be practical to eliminate suckers, data obtained to date indicate that they can be reduced, therefore, if the number of suckers are reduced the amount of chemicals used on tobacco could be reduced, thereby cutting down on the residue problem.

Techniques have been developed to produce haploid plantlets of tobacco in large numbers. In 1968 (when the project was started) eight plantlets were produced, now several thousand can be produced in a month.

This technique allows changes in the genetic make up of the plant to be made rapidly. Using old techniques it would take seven or more years to change a plant genetically, however, with the haploid technique plants with four levels of nicotine were produced in two years. This technique will be used to change tar content and other chemical constituents in the plant. This technique produces a pure line or true breeding entity in one generation.

A pale yellow flue-cured breeding line (NC PY 10) was developed and released which offers to reduce the number of harvest. In addition this variety was shown to have 10–30% less polynuclear aromatic hydrocarbons. The line also contains lower levels of solanesol and sterols. These constituents are suspected of contributing toward health hazards in tobacco smoke. This tobacco was developed at the Oxford Laboratory.

Development of insect resistant tobacco varieties is an alternate to the use of insecticides. Resistance to the tobacco budworm has been identified in a line TI 1112. This line does not have glands on the leaves. The lack of glands cause the tobacco leaves not to have gum. We are in the process of determining what effect the absence of gum on the leaf may have on the amount of tar.

It was found that the spined stiltbug destroys hornworm and budworm eggs. A large scale pilot test is underway to test the practicality of using stiltbugs to control these pests. The project begins in 1978 and was to continue for three years. This is an alternate method of controlling insects which reduces the residues from pesticides.

Polyphenols are a group of chemicals in tobacco which is suspected of being a health hazard. The common varieties, as well as the germplasm collection were surveyed for this constituent and two fold differences were found. A breeding program was started to change the levels of this chemical in the leaf.

Homogenized leaf curing (HLC) flue-cured tobacco is being investigated at the laboratory. This process involves homogenizing the green tobacco and an accelerated curing method. The tobacco can then be dried and made into sheet and cigarettes. The tobacco made by this process has been shown to have lower biological activity. Also involved in this process is the extraction of protein. The recovery of protein on a rather large scale has been demonstrated at the Oxford Laboratory. The protein can be obtained in a pure form from tobacco which is the only green plant known where this can be accomplished. The work on this should continue.

TOBACCO PRODUCTION RESEARCH PROGRAMS AFFECTED BY PROPOSED FY 1979 BUDGET

THE ENERGY CONSERVATION POLICY CENTER OF THE CARNEGIE-MELLON INSTITUTE OF RESEARCH

● Mr. PERCY. Mr. President, the Carnegie-Mellon Institute of Research has created a new and much-needed program. It is called the Energy Conservation Policy Center. Heading the center is Roger Sant, formerly President Ford's leading energy conservation advisor, someone with great insight into the complex American energy system. Under Mr. Sant's direction, the center seeks to develop information that can be used to determine how increasing energy efficiency might affect society. Such information will be of immense importance to the Congress as we weigh the alternatives of conservation and production. I intend to keep my colleagues informed as the center progresses in its projects, and as results are made available.

The distinction between conservation and production is, in truth, not so sharp. Insulating a building that needs 100 barrels of oil per winter so that it needs only 75 is the same as producing an extra 25 barrels of oil. Significant differences arise, however, in the effects on the economy and the environment of installing the insulation versus pumping more oil. On a national policy level, the differences between installing insulation everywhere and developing oil shale, for example, are enormous. The center's program will examine modifications that improve energy efficiency as though they are alternate energy sources. When the center further examines the societal effects of efficiency modifications, the results should be extremely helpful for comparing possible energy policies.

I cannot stress enough the importance of treating conservation as an alternate energy source, and not as a form of sacrifice. Energy conserved is new energy. In many cases it is the cheapest and easiest form of new energy we can use.

The Alliance to Save Energy, an organization I chair, is dedicated to providing conservation energy with voice and influence comparable to other kinds of energy, like oil and coal. That goal should be aided by the emergence of Carnegie-Mellon's Energy Conservation Policy Center. I look forward eagerly to the results of the center's research.

Mr. President, the center has produced a document explaining its purposes and its approach to the problem. In order that my colleagues understand the importance of the tasks the center sets out to do, I ask that this document be printed in the RECORD.

The document follows:

THE ENERGY CONSERVATION POLICY CENTER, CARNEGIE-MELLON INSTITUTE OF RESEARCH

THE PURPOSE OF THE CENTER

Energy conservation as a partial solution to the Nation's energy problem has become a topic of major concern in public and private discussions. The population seems to support the general idea that energy should be conserved, but strong disagreements persist as to how energy can be saved efficiently, how much of it can be saved, and who should bear the burden of saving it.

Some of the basic questions about conservation remain unanswered. For example, what exactly is conservation? Many people feel that conservation would reduce their style of living; others insist that conservation primarily involves technological improvements in energy efficiency. This difference of opinion is illustrated by the current unresolved, and often heated, debate over whether everyone should drive smaller cars, or whether the mileage efficiency in present-sized cars should be improved.

Much of the controversy occurs because we do not have a precise understanding of the characteristics of energy use. To obtain such an understanding requires that we make a concentrated effort to ascertain specific cost and energy advantages from various available technologies; those technologies should then compete with each other and other new energy sources replacing the Nation's declining oil and gas supplies. It is also necessary that we make an effort to find out how energy usage and investment decisions are made in all the consuming sectors. And perhaps most importantly, it requires that this information be developed without an underlying belief that conservation is inherently either good or bad.

To meet these needs, the Carnegie-Mellon Institute of Research established the Energy Conservation Policy Center headed by Roger W. Sant, formerly the head of energy conservation in the Ford Administration. The purpose of the Center is to make a detailed assessment of the potential for increasing energy efficiency in buildings, industrial equipment, automobiles, and other energy-using devices. The Center's program will examine modifications that improve energy efficiency as though they are alternate energy sources. This approach is in contrast to those programs that view conservation as actions that require us to give up something.

The Center's overall task is to develop information that can be used to determine how increasing energy productivity might affect society. A major goal o fthis work is to provide a basis for reconciling various public and private positions on energy policy. This will be done by replacing today's widely differing demand forecasts with a sound model of the processes and functions that require energy and the way people make energy use and investment decisions. Consequently, the Center provides its sponsors a unique opportunity to improve their own energy demand forecasts and assess the market for their energy efficient products. Additionally, sponsors participate in determining the Nation's energy and the way people make energy use and communication of new, relevant, and credible information about how energy is used.

Background

The need for this analysis has a very recent origin. Until the early 1970's, U.S. energy prices consistently declined relative to other goods in the economy. From 1950 to 1970, for example, average energy prices dropped at a real rate of 1.7 percent per year, led by lower costs for electricity. As a result, the overall fuel efficiency of buildings and equipment remained relatively static throughout these years.* There was no economic incentive for it to be otherwise. Energy consumed during these years was closely related to economic conditions as measured by the gross national product and disposable income. Under these highly stable conditions, simple extrapolations forecast energy demand quite well; more sophisticated econometric modeling techniques added some precision to the figures.

However, beginning with the 1970's the world commenced what now appears to be a long term transition to higher energy prices. The Arab oil embargo of 1973 accelerated this trend and provided a dramatic event which put the energy issue into the public forum. By September 1977, the composite cost of producing new energy (replacement cost) had increased to about two and one-half times what it was in 1970 and 40 percent above the average price paid by users. These increases were brought about by a decline in availability of cheaper oil and gas and the sudden turn upward in the cost of building new power plants (See Figure 1.).

The replacement cost of natural gas, using Canadian gas as an example, is now almost 60 percent above the current wholesale price. This cost would be closer to 100 percent above the current wholesale price if imported liquid natural gas, Alaskan gas, or gas from coal were considered the replacement fuel. Oil (from Alaska and abroad) is approximately 20 percent above the wholesale price, while electricity (from new power plants) is nearly 45 percent above it (See Table 1.).

Although the OPEC-related price increases were startling, the present cost estimates of more plentiful and renewable energy sources that might eventually replace imported oil are even more alarming. As these new costs are reflected in prices, the existing energy using systems are becoming obsolete. The relative attractiveness of technical options for modifying those systems to use less energy—more fuel-efficient methods of providing heat, mechanical motion, and light—has greatly increased.

Modifying energy-using devices to require less fuel represents what might be called the "supply" portion of energy conservation. Modifications such as increased insulation, more efficient electric motors, heat exchangers, lighter components for automobiles, electricity generated from waste heat, and thermal energy storage, all have characteris-

* Although the efficiency of industrial energy use improved steadily during this period, it was essentially offset by declines in efficiency in the residential-commercial and transportation sectors.

tics that are similar to new sources of energy. In each case, a given investment produces a given quantity of energy, but the energy is saved—without any loss of benefits to the consumer—rather than produced. However, the potential contribution of this new energy source has previously not been analyzed in detail, particularly as it relates to existing buildings and industrial process equipment.

Of course, that portion of energy conservation representing decisions to reduce usage by giving up benefits, has also been changed by the new energy costs. Computer models based on past experience may be more useful in predicting such "give-up" decisions due to higher prices. Models used to forecast have been handicapped in the past because they were constructed from data obtained in the '50's and '60's when energy prices were gradually declining.

The need to collect more reliable information on energy demand is becoming increasingly recognized. Broad national and worldwide issues for growth, stability, and world tensions hinge on a better understanding of demand-reduction opportunities. This situation will remain for the next 10 to 20 years, in particular. A National Academy of Sciences study entitled "Energy Conservation Measurement: Data Needs for cially new buildings, but usable information amongst the Nation's highest research priorities.

Several analysts have begun to study specific aspects of energy use. In the auto and appliance sectors, where replacement takes place every 10 or 15 years, more reliable data has been developed because only new products and standards need be considered. Some progress has also been made with regard to residential and commercial buildings, especially new buildings, but usable information relevant to the potential for making adjustments to existing structures is scarce. Since buildings usually last well over 40 or 50 years, this retrofit analysis assumes major importance. Conspicuously absent is knowledge about the degree to which building owners might be willing to make appropriate improvements. In the industrial sector, plant and equipment also turn over very slowly and this makes analysis of the existing stock essential. Only general assessments of industrial energy use have been attempted to date, but that which has been undertaken has yet to gain broad acceptance.

Some recent progress has been made. However, the analytical tools now in existence do not measure up to the critical tasks of projecting credible energy demand estimates or of deciding whether to mobilize the Nation to achieve specific energy saving goals.

THE CENTER'S APPROACH TO THE PROBLEM

The Center seeks to act as a focal point in gathering together some of the widely scattered, ongoing analyses, as well as stimulate original work in the areas where little information now exists. This approach has three objectives:

First, to develop a wide consensus on a set of concepts for application to the demand-analysis task.

Second, to sponsor the original work required to fill the critical gaps in the existing work.

And third, to build a computer model that integrates the work developed by others with the detailed results of the Center's research.

General concepts

The concepts considered essential to the Center's approach are:

The technical or "supply" side of energy conservation must be explicitly recognized. This means that a thorough understanding of the fuel flows through the Nation's capital stock of buildings, industrial equipment, and vehicles is required. There will be a heavy emphasis on characterizing the cost and physical characteristics of technical changes that can be made to both existing and new stock. Also, the inherent production, labor, and capital constraints on the rate of incorporating those changes must be taken into account.

Further, the technical component must be coupled to a new behavioral or "demand" analysis that requires a better understanding of individual consumer decision making. For each of the consuming sectors, the decision criteria that affect purchase and energy usage must be researched and incorporated. Legal and regulatory limitations affecting the process must also be factored explicitly.

And finally, mechanisms must be established to demonstrate the likely technical, behavioral, and institutional decision responses to existent and future public policies.

CMIR's original work

The original work sponsored by the Center will embody several important concepts. Taking industry as an example, the sector analysis will:

Approach industrial energy use on a generic basis instead of by industry type. This means that industrial equipment will be surveyed and classified by similar energy using functions, such as generating steam, heat treating, drying, and motive power, rather than by specific processes.

Classify these generic functions by various industries or processes to connect them to economic forecasts and broad energy flow models.

Describe the available technical efficiency improvements for each generic classification as a function of energy price. In this effort, thermodynamic principles, as well as more traditional measures, will play a crucial role in identifying applicable technologies. These data—the "supply" curves of savable energy—will be used to indicate the levels of improvement possible relative to the cost of each unit of energy saved.

Explicitly consider the physical, financial, behavioral, and institutional limitations that affect industrial energy use decisions to show how and when these technical adjustments might be made. These data will then make up the behavioral or "demand" portion of the forecast and replace theoretical or historically derived estimates.

Both the technical and behavioral portions of the industrial sector analysis will be linked to a policy side of the model to better evaluate the impacts of imposed conditions stemming from alternative policies.

Structure of the integrating model

The CMIR demand model is being designed to:

Initially rely on existing models of the economy and energy models to set the conditions to forecast demand. However, these models may have to be modified to handle investment and employment results from the Center's demand model to achieve an optimal solution as much as is technically possible.

Provide the ability to compare the cost of saving energy from the "technical" side of the demand model on an equivalent basis with current investments in new energy supplies, such as power plants, synthetic fuels, remotely produced oil and gas, and solar energy.

Emphasize the effects of decisions to be made over the next ten years, although the model should be capable of predicting the consequences of these decisions for a substantially longer period. For example, the difference between the savings from intermediate term technology over what the longer term energy supply and price outlook defines as available could identify the role and priority of new end-use technology.

Include regional detail.

Be reasonably uncomplicated and widely affordable.

Leave in-depth technical detail in the satellite models for each of the individual sectors. Close attention will be given to insure that the inputs to and results from these supporting tools are compatible and consistent.

Be as technically sophisticated as the state of the data and knowledge will support, but no more.

In summary, the Center's goal is to substantially overcome the defects of present energy demand forecasting techniques. New baseline energy consumption data is being gathered; the technical potential to modify capital stock is being defined; the gap between that potential and the forecast from decision making research is being systematically assessed; and the various private and public policits that affect those results are being evaluated.

THE CENTER'S STAFF

Carnegie-Mellon Institute of Research performs its research programs by task force teams. Thus, CMIR can effectively augment the capabilities of its managers and scientists with the prominent faculty members of Carnegie-Mellon University and other academic, government, or private institutions.

Center director

The Director of the Center is Roger W. Sant. Mr. Sant began the energy conservation efforts of the Federal Government as Assistant Administrator of the Federal Energy Administration immediately following the oil embargo. Much of what is now considered the market approach to conservation was developed under his leadership; he is credited with having developed the initial methods of comparing the economics of various conservation technologies with supply alternatives. Mr. Sant provided the primary conservation input for President Ford's energy proposals and was responsible for representing the Administration at Congressional hearings and public forums.

Prior to his government service, Mr. Sant was Vice-President of Saga Corporation, founder and Chairman of Finnigan Corporation, and a Lecturer in Corporate Finance at the Stanford Graduate School of Business Administration.

Center staff

A number of highly qualified engineering professionals and economists at CMIR, CMU and the University of Pittsburgh will make key contributions to the program. A brief description of some of these professionals is presented below:

Dr. Norris Barbre, Director of Materials and Technical Division at Carnegie-Mellon Institute of Research, is a physicist and a business administrator with extensive administrative experience in energy programs as the Technical Director at two industrial firms. As the former Director of the Construction Institute (Texas), he led engineering research on the energy efficiency-improvement of industrial processes; design and manufacture of combustion burners for alternate fuels; and the design, construction and operation of an experimental house heated by solar energy and cooled by enthalpic pumps.

Dr. Kris Bhat, Director of Metallurgy and Materials Engineering at Carnegie-Mellon Institute of Research, has broad experience in the development of novel, energy-saving industrial processes and improvement of heat transfer devices.

Dr. Walter Dolde, a macroeconomist at the Graduate School of Industrial Administra-

tion, CMU, has made significant contributions in theoretical macroeconomics. Dr. Dolde's expertise includes the field of energy economics, particularly with regard to demand for goods and consumer behavior. Dr. Dolde is currently working with Dr. Dennis Epple on a long-run equilibrium model emphasizing energy.

Dr. Dennis Epple, an applied econometrician at the Graduate School of Industrial Administration, CMU, has made significant contributions to the understanding of petroleum supply decisions utilizing his unique training and experience in design engineering, public policy and energy economics.

Dr. Robert Hodrick, Manager of Economics at the Carnegie-Mellon Institute of Research and Assistant Professor of Economics at CMU, has a strong theoretical background in monetary theory and in the rational expectations of consumers.

Dr. Chang-i Hua, Professor of Architecture with the School of Urban and Public Affairs at CMU, has substantial experience in the design of energy-saving systems for urban housing.

Dr. Lester Lave, Chairman of the Department of Economics at the Graduate School of Industrial Management, CMU, is currently heading the Synthesis Panel for the National Academy of Science energy study (CONAES).

Dr. John Purcupile, Director of Energy Utilization and Materials Conservation at the Carnegie-Mellon Institute of Research, has considerable experience and a thorough understanding of energy utilization in industry. Dr. Purcupile is a mechanical and electrical engineer.

Mr. C. Arthur Rolander, Advisory Fellow at CMIR, has broad experience in governmental relations and nuclear energy. He was formerly a Senior Vice-President of Gulf Oil Corporation, President of General Atomic Company, and held a senior position with the U.S. Atomic Energy Commission.

Dr. Raymond Zahradnick, Director of Energy Engineering at CMIR, is a former professor in CMU's Chemical Engineering Department and the former Director of Coal Conversion at ERDA.

Other participants in the project

Several energy professionals outside CMU have agreed to participate in the project:

Dr. Scott Cunningham, President, CCG, Inc., market research and general management consultants.

Mr. Fred Dublin, President of Dublin-Bloome Associates, consulting engineers, and a foremost authority on energy systems in buildings and industry.

Dr. Gene Goodson, Professor of Engineering at Purdue University and one of the Nation's experts on the transportation sector.

Dr. Elias Gyftopoulos, Ford Professor of Engineering at Massachusetts Institute of Technology and a renowned thermodynamicist.

Dr. Eric Hirst, a specialist in the building and transportation sectors for Oak Ridge National Laboratory.

Dr. Robert Reid, Vice-President of Energy and Environmental Analysis, Inc., an Arlington, Virginia consulting firm. Dr. Reid has directed some of the most useful analysis of the industrial sector.

Dr. Arthur Rosenfeld, of Lawrence Berkely National Laboratory, a specialist in the buildings area.

Dr. Marc Ross, Professor at the University of Michigan and author of several papers on conservation.

Dr. Robert Socolow, Professor of Engineering at Princeton University and author of various articles on conservation.

Mr. William Stitt, partner in ICF, Inc., a Washington, D.C. consulting firm. Mr. Stitt has consulted with the U.S. Government on energy data and analysis since before the embargo; he will assist the Center in developing the integrating model.

Mr. Robert Waterman, principal, McKinsey and Company, Management Consultants.

Advisory board

In addition to the contributions of the staff and consultants to the program, an essential role will be played by the Center's Advisory Board. The Board fulfills the vital function of ensuring that the Center focuses on useful research and analysis rather than advocating specific solutions or positions. Meetings will be held every six months in either Pittsburgh or Washington, D.C.

Current members of the Board include:

Mr. Theodore A. Burtis, President of The Sun Corporation.

Dr. James E. Fletcher, former administrator of NASA and currently Gulf Professor of Energy at the University of Pittsburgh.

Mr. John Harper, Chairman Emeritus of ALCOA Corporation and former Chairman of the Business Roundtable.

Mr. Frank Potter, Chief Counsel, House Subcommittee on Energy and Natural Resources.

Dr. John Sawhill, President of New York University and former Administrator of the Federal Energy Administration.

Dr. Edward Teller, Professor Emeritus, University of California.

Mr. Russell Train, former Administrator of the Environmental Protection Agency and now senior fellow at the Conservation Foundation.

Dr. Arnold Weber, Provost of Carnegie-Mellon University and former Director of the Cost of Living Council.

Mr. Lee White, attorney and former Chairman of the Federal Power Commission.

CENTER REPORTS

The Center intends to occasionally issue topical and other special reports on its own as well as to comply with the reasonable requests of the sponsors.

One comprehensive report shall be issued to the sponsors each year after thorough review and substantive discussions between the Advisory Board and program staff.

ORGANIZATION OF THE CENTER

The Center is located outside Washington, D.C., in close proximity to the energy information and policy-making actions of the Federal Government. The Director and most of the professional staff members will be located at CMIR's D.C. offices. Administrative and support services will be provided from Pittsburgh.

PROGRAM SPONSORSHIP

The work of the Center is financially supported by sponsors from a broad spectrum of business and industrial organizations (suppliers of energy, large energy users, and suppliers of energy-using products) and government agencies. The Center provides its sponsors with a unique opportunity to impact the Nation's energy course positively through a credible and totally original analytical effort. It also provides sponsors access to a planning tool that will be useful to energy suppliers as well as organizations with capabilities of meeting the market for energy efficient devices.

Examples of initial sponsors include:

American Telephone and Telegraph Company.

Gas Research Institute.

Electric Power Research Institute.

The Sun Corporation.

U.S. Department of Energy.

Gulf Oil Corporation.

International Business Machines Corporation.

TABLE I.—AVERAGE PRICE AND REPLACEMENT COST OF ENERGY USED IN INDUSTRY

Energy form	Percent of industrial use (June 1977)[1]	Dollars per million Btu of delivered energy: Average spot price[2]	Dollars per million Btu of delivered energy: Replacement cost[3]	Ratio of replacement cost to average cost
Coal	19.0	$1.05	[2] $1.05	1.00
Petroleum	34.0	2.41	[1] 2.88	1.29
Natural gas	34.5	2.08	[1] 3.30	1.59
Electricity	12.5	9.00	[4] 12.90	1.43
Weighted average	100.0	2.86	3.93	1.37

FIRST RURAL AMERICAN WOMEN LEADERSHIP CONFERENCE

Mr. WALLOP. Mr. President, several weeks ago women from across the country gathered in Washington for the First Rural American Women Leadership Conference. The purpose was to discuss the pressing problems of this important segment of the country.

Among those in attendance were members of the Western agricultural community—people who have grown to understand and respect the dignity of the Earth. Life on the land has taught them both the capriciousness of the seasons, and the rewards of sound stewardship and commonsense.

It is in this light that I was particularly impressed by the reflections of Mrs. Katherine Morehead, a rancher from Savery, Wyo. Her timely thoughts on the conference and the problems of rural America were published in the March 24 edition of High Country News. I wish to share the article with my colleagues and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RANCHERS, ENVIRONMENTALISTS, INDIANS—NEW ESTABLISHMENT?

(By Katherine Morehead)

I recently returned from a conference of rural women in Washington, D.C., both stimulated and with a pervasive feeling of uneasiness.

The First Rural American Women Leadership Conference was sponsored by a new advocacy group, Rural American Women, Inc. and was heavily subsidized by the federal government.

Particularly disturbing to me was an apparent schism between agriculture and other non-urban populations, and also the apparent widespread ignorance of the problems posed to the West by energy development.

I also came away concerned, possibly because I am a landowner, by a growing impetus toward land reform.

Also disturbing to me is a growing feeling of the awesome power of the federal government over every aspect of many people to extend that power even further.

Rural, for purposes of this conference, was defined as all areas having populations of

50,000 persons or less. Of the 150 or so delegates and participants at the conference, less than a dozen were primarily concerned with agriculture.

Broadly speaking, the agricultural women wanted to talk more about economics, land use, energy, and the preservation of a way of life, while those from other areas were more concerned with social action programs such as pre-natal clinics, battered wives' centers, comprehensive health plans, and legal services.

We all seemed to agree, for example, on the desirability of keeping essential agricultural land in production, rather than going for development. But there was little agreement on how that might best be accomplished.

Having regarded myself for the last several years as fairly liberal, I was surprised and discomfited to find myself pushed into some unexpected idealogical corners. One odd conclusion I reached at the end of the conference is that in some funny way, the farmer, the rancher, the Indian, and the environmentalist, because he is a self-appointed steward of the land, have somehow become the new Establishment.

Perhaps because those four groups are all trying in their way to preserve a way of life, a vastness of sky and prairie, they are seen by those who feel they are not sharing fully in the benefits as privileged.

Perhaps I exaggerate, but I got the strong feeling at this conference that those who have been on the land for several generations are perceived, not as rooted in our culture, or as good stewards of the land, but as exploiters of the People and opponent of social progress.

Many people don't seem to understand that fouling the air in Montana or Colorado ultimately diminishes us all. They don't understand that the vast imports of oil and the search for expensive subtsitutes—coal, nuclear, and synthetic fuels—exact an enormous social cost for everyone.

The idealogical thread woven through the fabric of the entire conference that most disturbed me was the notion of land reform. Many of those articulate, intelligent women were talking about old-fashioned, take-from-the-rich, give-to-the-poor land reform.

They called for the federal government to use the right of eminent domain to condemn land for mine workers and farm workers. They called for legislation that would establish a commission to determine whether or not a farmer could sell his land for non-agricultural use. They spoke of measures that would place a limit on the amount of land an individual or company could own.

What frightens me is that many of those well-meaning people fail to see the implications of the government's taking control of an individual's right to hold property. They fail to see that a policy that can be applied to agribusiness today can be applied to a one-acre homesite tomorrow.

They fail to recognize that the concept of the 160-acre farm was tried on a massive scale already under the Homestead Act, and that the countless tales of heartbreak and failure were caused by geography, climate, and economics.

Bigness is such a dirty word to some of those women that they are willing to throw out the baby with the bath water.

One of the most stirring speakers at the conference was Lise Sergio, an author and lecturer. She spoke of the need for rural women to use their very real power to help preserve our basic freedoms. Rural women need to think, she said, not be swung by emotions. Because they are close to nature, the changing of the seasons gives them time to reflect on the eternal verities of life.

I hope that these women I met, and others as well, will remember that federal handouts are not counted among those eternal verities.

Our country faces some difficult and perhaps insoluble problems. But what answers there are must surely lie ultimately in the hearts and minds and dedication of individual men and women.

REGULATIONS GOVERNING THE OPERATION OF THE FEDERAL NATIONAL MORTGAGE ASSOCIATION

Mr. WALLOP. Mr. President, the Department of Housing and Urban Development recently solicited comments on regulations governing the operation of the Federal National Mortgage Association (FNMA). In economies like those found in energy producing States such as Wyoming, where cities and towns are growing rapidly, the secondary mortgage market provided by FNMA is extensively depended upon to provide decent housing with reasonable mortgage rates. The Wyoming Department of Economic Planning and Development concluded in a recent study that local lenders could only provide about 15 percent of the projected home mortgage financing that will be needed during the next 10 years. Secondary mortgage sources from outside of Wyoming will have to provide the balance. The implementation of the proposed regulations have the potential to cripple the effectiveness of FNMA as a mortgage source in Wyoming.

When commenting on the proposed regulations, Mr. Edward R. Bloodworth, vice president of the First National Bank of Casper, forwarded me a copy of his letter to the rules docket clerk at HUD. Mr. Bloodworth has done an excellent job of commenting on the regulations. I wish to share with my colleagues Mr. Bloodworth's comments. Mr. President, I ask unanimous consent the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FIRST NATIONAL BANK OF CASPER,
March 30, 1978.

Re Docket No. R–77–509 [24 CFR Part 81] Regulations Governing Operations of the Federal National Mortgage Association.

RULES DOCKET CLERK,
Office of the General Counsel, Department of Housing and Urban Development, Washington, D.C.

SIR: The Federal National Mortgage Association is a vital source for permanent residential mortgage money in Wyoming. The changes proposed by the Secretary of Housing and Urban Development completely ignore the needs of energy impacted states such as Wyoming and, in fact, seem designed to exclude such states from active participation in FNMA's programs.

In the past 12 years the residential mortgage market in Wyoming has undergone a complete change. In the period extending from the late 1940's to the late 1960's several large insurance companies were active in Wyoming and were absorbing a large part of the total market. These loans were made primarily through the FHA and VA programs.

In the late 1960's the major insurance companies withdrew from the residential market and a short time later, the FHA began to place its emphasis on subsidized types of loans, and to effectively withdraw from the mass residential market. As the State began its rapid growth pattern in the early 1970's it had neither the large insurance companies to rely on to help finance its energy related "boom", nor the FHA to rely upon to insure the resulting volume of high ratio home loans (In 1976 the FHA was only involved in 4% of the statewide loan volume and less than 10% in 1977).

The Federal National Mortgage Association entered the conventional residential mortgage market at about this time and not only filled the void created by the above withdrawals, but also became a strong stabilizing factor, in the price and availability of mortgage money in Wyoming. Their willingness to make high ratio conventional loans in some of our small towns where private out of state sources had been reluctant to lend without FHA insurance, at the same rates they were realizing in the larger, more competitive metropolitan areas, has stabilized interest rates and made homes available to in-coming workers who otherwise would have been forced into secondary or substandard housing.

At the present time we are one of the major mortgage lenders in the State of Wyoming and about 95% of our residential loans are sold to FNMA. We have found them to be fair and reasonable in their underwriting standards, efficient in their loan processing, and willing to make loans in any location and under any circumstances that could be expected of a prudent lender.

In view of the circumstances presented above, we take strong exception to the Secretaries determination that "there is a need to develop a regulatory framework for FNMA operations". Further, we believe that even the most cursory comparison of the relative contributions to the American housing market made by HUD versus FNMA over the past few years, would reveal that any determination that HUD should more closely regulate FNMA, is ludicrous.

The proposed subparts of Part 81 that we consider to be the most damaging to FNMA's effectiveness in Wyoming are discussed below in the order of their importance.

SECTION 81.16

Paragraph (d) provides that, beginning in calendar year 1979, 30 percent of all mortgages purchased by FNMA must be on properties located in a central city or Standard Metropolitan Statistical Area.

Paragraph (e) provides that, beginning in calendar year 1979, 30 percent of all mortgage loans purchased by FNMA must be on existing previously occupied properties.

Wyoming is a non-populous state and has no cities that are large enough to qualify as Standard Metropolitan Statistical Areas. Numerous States, towns and communities that are vital to the energy industry and that desperately need access to the secondary market, would not qualify for 30 percent of FNMA's total lendable funds.

These energy impacted areas are expected to provide decent housing at affordable mortgage terms for the people migrating into the areas to work in the mines and oil fields. Obviously they can't accomplish this with existing and previously occupied homes. The provision in paragraph (e) is not only discriminatory, but amounts to an unreasonable penalty being assessed against these workers and the towns that are attempting to accommodate them.

SECTION 81.17

Paragraph (b) provides that in each calendar year beginning with 1979, 30 percent of all mortgages purchased by FMNA must be on housing for low and moderate income families.

This provision effectively reduces FNMA to just another useless agency of the Federal Government to serve a very small minority of the citizenry of this country. HUD already has ample programs to serve this market and we are not aware of any reluctance on

FNMA's part to purchase these types of mortgages.

The implication of sections 81.16 and 81.17 go far beyond the actual verbiage. For example, what happens if FNMA finds at mid year that only 15 percent of its total volume is involved with the types of security described in these sections—do they curtail their broad programs until their ratios are in order? Would the decision on what course of action to take be based on need or on political considerations? How can FNMA accommodate localized needs as they presently do, and at the same time fulfill their ratio obligations?

FNMA's forward commitment program (allowing four months for delivery) and their optional delivery mode (no penalties are assessed if the commitments are not filled), have been instrumental in stabilizing mortgage rates. These features have made it possible for lenders with limited in-house portfolio capacity to make mortgage funds available to small towns and communities where the funds either would not be available or would be available at higher interest rates created by the absence of a competitive market. FNMA would almost certainly have to either abandon or adversely modify their forward commitment and optional delivery programs in order to meet their ratio requirements.

Practically speaking, it simply is not possible for FNMA or any other company or institution to effectively operate under the proposed combination of restrictions.

SECTION 81.15

Paragraph (d) states in part that the Secretary may decrease FNMA's maximum debt-to-capital ratio at any time, if it is determined that such action is warranted by FNMA's curent financial condition and that such action will not be detrimental to the holders of FNMA obligations.

The actual effect of this provision would probably be to allow the Secretary to force FNMA to sell mortgages in the market from time to time to presumably make more mortgage funds available at any given time. The motive for this provision may be proper, but the reasoning is defective for the following reasons:

1. The sale of mortgages by FNMA would not create additional mortgage funds in the broad market. These mortgages would likely be purchased by private mortgage lenders (Savings Banks, Savings and Loan Associations and other traditional mortgage sources) and would correspondingly reduce these institutions ability to make additional loans.

2. Mortgage servicers who make loans and sell them to FNMA, generally do so because they do not have the financial capacity to retain them. They must maintain expensive personnel and equipment to properly service the loans. If FNMA developed a reputation of selling these servicing portfolios, leaving the servicers with insufficient income to pay their overhead, they would simply be forced to originate loans for sale in the private market, regardless of the extra front end and interest costs to the homeowner, which history proves would occur.

3. If FNMA were forced to sell mortgages during high interest rate cycles, the discounts it would have to absorb would undoubtedly be translated into higher interest rates on new mortgages.

SECTION 81.14

Paragraph (b) concludes with the statement that FNMA shall not issue any obligation, security, or debt instrument convertible into common stock.

The use of the convertible debenture has allowed FNMA to attract large volumes of money into the mortgage market from the securities market (as opposed to shifting money from one mortgage source to another as proposed in 81.15[d]). This vehicle has contributed substantially to FNMA's track record in stabilizing the mortgage market during tight money cycles. For example, FNMA's sale of $250 million in convertible debentures in 1971, resulted in their purchase of $6.5 billion in mortgages. Most of this money probably would not have been available to the mortgage market if FNMA had not been able to issue this type of instrument.

Many of the other provisions seem designed to accomplish a bureaucratic end rather than a useful purpose (such as the requirement for 23 additional reports, many of which duplicate other reports, or have no practical application), but the provisions discussed are the ones we consider to be most detrimental to FNMA's continued effectiveness in Wyoming. We strongly protest these proposed provisions and urge that they not be allowed to become law.

Very truly yours,

EDWARD R. BLOODWORTH,
Vice President.

ORDER FOR RECESS UNTIL 11:30 A.M., MONDAY, APRIL 24, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 11:30 a.m., on Monday, April 24, 1978.

The PRESIDING OFFICER. Without objection, it is so ordered.

REASON FOR RECESS UNTIL MONDAY

Mr. ROBERT C. BYRD. Mr. President, the reason the Senate is going over until Monday is twofold.

First of all, the Senate has completed in 2 days what we had anticipated would require 3 days. We had thought that 2 days would be required to complete the handling of the airline deregulation bill on yesterday, which was completed on yesterday, and we had intended, then, later today, or tomorrow, to proceed to the wiretap bill. The Senate has completed in 2 days what was anticipated to be done in 3 days. We looked at the calendar and have carefully gone over it, and there is no other measure that we are prepared to proceed to the consideration of on tomorrow. Consequently, I will go now to the second reason why we are going out. That is to express the hope that committees will take advantage of the opportunity on tomorrow to meet without interruption by rollcalls or quorum calls, keeping in mind that there is a May 15 deadline for reporting of new authorization measures.

I yield the floor.

ORDER FOR CONSIDERATION OF SENATE CONCURRENT RESOLUTION 80 ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at 12 o'clock noon on Monday the Senate proceed to the consideration of Calendar Order No. 674, Senate Concurrent Resolution 80, which is the concurrent resolution setting forth the congressional budget for the U.S. Government for the fiscal year 1979.

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, I rise only to advise the majority leader that item, Senate Concurrent Resolution 80, Calendar Order No. 674, is cleared for action on Monday on this calendar, and we have no objection to such request.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished minority leader for indicating that the people on his side who handled this matter will be ready and prepared to proceed, and I thank the Senator for not objecting.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR A PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Monday, after the two leaders are recognized under the standing order, there be a brief period for the transaction of routine morning business not to extend beyond the hour of 12 o'clock noon with statements limited therein to 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENERGY—A YEAR OF INDECISION

Mr. DOLE. Mr. President, today marks 1 year since the President announced his national energy plan to Congress. It has been a long, hard year for both the administration and Congress, and I might add the American people.

Today is a good day to review the lessons we have learned over the past year, and the reasons why the energy package has run into such trouble. Today is also a good day to look to the future in hopes that the administration might avoid the same problems when they send the Congress their next package of energy legislation.

THE NATURE OF THE PROBLEM

First of all, I think that 1 year ago the administration really did not understand the nature of the energy problem. Last year we heard that we were running out of energy, and worse, that the world was running out of energy. The call was to conserve energy because increased production was futile. There just was not any more oil and gas out there.

This year the story is somewhat changed. We now realize that the energy is there, at a price. If prices stay up, we now foresee a gradual shift to fuels derived from coal and shale, and we forsee a steady growth of nuclear power, solar energy, and other forms of inexhaustible supplies. But the transition to these fuels will take time. The more immediate problems now seem to be how to avoid, or how to cope with, the possibility of another major OPEC price hike of up to $10 a barrel, that could occur in the mid-1980's.

Thus it was inevitable that the national energy plan would run into trouble. We now realize that the problem is different from the one that the administration was trying to solve.

CONSERVATION

Conservation was the cornerstone of the national energy plan. But over the last year, we have also come to realize that the administration has greatly

overextended the concept of conservation.

When conservation means cutting down on wasted energy, we have seen that it is, indeed, cheaper to save a barrel of oil than to buy one. During the last year, industry has been rapidly changing its patterns of energy use and presently industry is progressing right on schedule towards its well-publicized energy efficiency goals.

Now industry is obviously not losing money because of their program to cut out waste and become more efficient. They are doing it precisely because it pays. And this is how conservation should work.

But in attempting to cut down our energy consumption, we have also found that some methods are simply not worth the cost or the hardship that would result. The crude oil equalization tax is a good example. The COET would cost the country $47 to save a barrel of oil. It is simply not worth the cost.

Lately we have also been threatened with a fee on imported oil, again purported to be a conservation measure. But our calculations have shown that such a measure would cost the people of this country between $100 and $150 to save a barrel of oil. Again, we can do without such a waste of our economic resources.

In fact, this brings us to one of the most important concerns that have risen in dealing with the energy bill this year. We have become very concerned of the costs as well as the effects in determining what makes a good approach to conservation. And it is on that basic issue that the administration and the Congress continue to disagree.

PRODUCTION

In the area of energy supplies, the administration has just simply failed to enact its one and only proposal to increase production. The administration had, and still does have, the authority to define certain classes of oil that could qualify for the world price. One year ago today, they announced that they planned to offer a production incentive by defining a class of oil priced at the world level. This did not appear in any of the bills because they had the authority to do it administratively.

But they have not done it. Somehow the administration continues to downplay the need to increase domestic production. They continue to hold out on this part of their plan, and they now call it a major concession. They will agree to do it, but only if the Congress agrees to pass the crude oil equalization tax.

In continuing to point the finger at Congress, the administration conveniently ignores the fact that they are failing to implement parts of the program that we all believe are absolutely necessary.

THREE BILLS READY

Then there is also the problem that three out of the five energy bills could have been passed last December, if the administration had been willing to let that happen. But they did not. And they continue to hold up these bills.

Today there is no good reason why several worthwhile energy programs are not already underway in this country. The pending bills would start a major program to insulate houses. They would assure that industry converts away from oil and gas in its new plants. They would signal the electric utility industry that the country expects a greater level of efficiency in their operations.

But these three bills have gone nowhere because the administration is holding them up. If the energy problem is so serious, and I for one am convinced that it is, then the administration should at least let us start the country on the road toward energy efficiency. Holding up these bills just makes no sense.

I have said it before, but today let me again urge the administration to allow us to pass the parts of the energy bill that are now ready.

AVERTING THE NEXT CRISIS

In looking to the future, the administration now realizes that the real problem is to increase supplies enough so that we can avert another crisis in the mid-1980's. Certainly they now have the means to work on this problem. The new Department of Energy, created in the last year, employs nearly 20,000 people. The American people have made a major commitment and we expect the new Department to solve this problem. With 20,000 people and $10 billion a year to work with, there can be no excuse for failure.

But I am already worried about whether the new Department can handle the problem. I am disturbed by reports about the approach that is being taken to the problem of increasing supplies. The last thing we need is another misguided list of proposed measures that have nothing to do with solving the problems that are facing this country.

The DOE is now busy at work on a study that is being called a supply strategy. From what I have heard about it, they are only concerning themselves with exotic energy supplies like coal liquification and gasification, technologies that will have no effect on our energy problems before 1990. I have yet to hear about what they plan to do to help the country during the next 5 years.

Today we have already lost a year during which we could have been increasing supplies in this country. If this new program from the DOE does not address supplies in the very near term, then it will quickly be judged to be a failure. After the experience of the last year, the administration should be aware of what can happen if they send another package of misguided energy measures to the Congress. I sincerely hope that this next package will more appropriately address the energy problem.

This is the start of a new year for energy. We have created a new Department to deal with the problem, and the first test of that Department is coming soon. This time the Congress expects to see proposals that will really address the problem.

I sincerely hope that we will not be disappointed.

HOLOCAUST—NEED FOR RATIFICATION OF THE GENOCIDE TREATY

Mr. PROXMIRE. Mr. President, last night was the final episode on the program "Holocaust." The indications are that many, many millions of Americans watched it all over the country. It obviously had a very profound impact. The indications were that in many places more than half of the people who had their television sets on were watching that program. Probably in the course of it 40 million to 50 million Americans watched that program, and I know it had a very, very profound effect.

Mr. President, it is appropriate that that program should have occurred at this time. We have just finished action on the Panama Canal Treaty that took some 2 months of our time. The Genocide Treaty has been pending in this body for 30 years. It is a treaty that has been ratified in every other developed country in the world—virtually 83 countries have ratified it.

It is a treaty which was, of course, one that the United Nations, by efforts of the United States, negotiated, a treaty supported by President Truman, President Eisenhower, President Ford, President Nixon, President Kennedy, and President Johnson; every President since President Truman has supported the Genocide Treaty.

Mr. President, that program that took 9½ hours on television, "Holocaust," spelled out in vivid, painstaking, cruel detail what genocide meant in Europe in World War II. I do not know how any American or any person could have watched that program without being deeply moved, and I think the overwhelming majority of people watching that program must have been convinced that at long last the Senate of the United States ought to recognize its obligations, and act on the Genocide Treaty.

In the course of depicting the vicious and monstrous actions taken against 6 million Jews, and killing them in World War II, the view of a German legal expert is set forth by a character named Erich Dorf.

He argues, and he argues very, very calmly and dispassionately, that this is legal, that genocide and wiping out of an entire people is right.

Mr. President, I think this would certainly appall a great majority of people. But if it is not legal why do we not ratify the Genocide Convention? Why do we not do what Presidents have been calling upon us to do, why do we not do what virtually every other major country in the world has done?

Mr. President, the action in trying to eliminate the Jews in Europe by Hitler was called the final solution, a solution that very nearly succeeded in Germany.

A recent article indicated that the Jews remaining in Germany are infinitesimal. It was a terrible and frightful kind of an action, but it is an action that

could recur. Those who think this is something that occurred once in history and will not occur again have a very limited and shallow view of history. It has occurred over and over and over again. It is occurring today in Cambodia, it is occurring in Uganda, and it is almost beyond belief that this body will not under these circumstances take up the Genocide Convention and act on it.

I do hope that in view of the great impact that that remarkable program has had, and I am sure it has had on the basis of everything I have heard, with a very large proportion of the American people exposed to it in one way or another, that the Senate will now realize this is the time to act on this treaty and ratify it.

We are the only body, the U.S. Senate, that remains an obstacle to action on the Genocide Treaty. The President has called for it. It does not require any action by the House. It is only up to this body to act.

Mr. President, the Committee on Foreign Relations has indicated repeatedly they would favor action on it. So I do hope that at long last we recognize our duty as well as our opportunity and ratify the Genocide Convention.

Mr. JAVITS. Mr. President, will the Senator allow me to be recognized at this time?

Mr. PROXMIRE. Yes, indeed. I am delighted to yield to the distinguished Senator from New York.

Mr. JAVITS. Mr. President, first, I would like to join in and adopt everything that Senator PROXMIRE has said, and also to express my deep gratification, deep appreciation, for the fact that he has been so constant an advocate of the Genocide Treaty here on the floor.

It is absolutely shocking that it is 30 years that this matter has now been pending, without action; that we have reported it out of the Committee on Foreign Relations three or four times; and that I can have it, because the members have asked me to report it, reported out tomorrow, if we could get the necessary votes to pass it.

All of the old shibboleths and scares about the fact that it would materially change the basic laws of the United States and make Americans subject to trial by courts outside the United States, all of that has been blown out of the water by the endorsement of the American Bar Association. There really is not any reason why that treaty should not be ratified, and the United States should not take its place with so many other nations in making it effective.

Really, it belies our status as a superpower, as a strong contender for human rights, so much supported by this Congress. It is an anomaly and a contradiction of everything we represent to ourselves and to the world.

I agree with Senator PROXMIRE that if anything should shake us up, especially the younger people who did not experience it, it is the dreadful lineaments of the Holocaust as NBC showed it, because essentially the facts are as they presented them, however they may have been dramatized.

Mr. President, it can happen again and again and again; and here is a chance for the world to declare its outrage and to prescribe a remedy which will have some restraint on other generations which may not have endured the same experience.

Why we cannot get 67 votes on this floor, which is all the leadership wants us to do—if we can come together with any remote indication that the votes are here, they will call it up—is a mystery to me, and it is very depressing. I, like Senator PROXMIRE, will never let go in this effort so long as I am a Member of this body. That is the only thing we can do for the millions who died; we can only hope that conscience will reassert itself, hopefully while I am here.

Mr. PROXMIRE. Mr. President——

Mr. MATHIAS. Mr. President, if the Senator will yield, I just want to say, in response to the remarks of the Senator from New York, that I am honored to sit beside him on the Senate floor, and I consider it my honor to stand beside him in this cause.

Mr. JAVITS. I thank the Senator from Maryland.

Mr. PROXMIRE. Mr. President, I cannot neglect to thank the Senator from New York. He has been, in so many cases and in this case particularly, the intelligence, the driving force, and the person who worked the harder on this treaty than anyone else, and has fought for it so hard and effectively on the Foreign Relations Committee.

The timing, it seems to me, is most important, because these documentary dramatizations have a more profound effect on the American people, I believe, than most Senators appreciate. I am positive that this one, as well as "Roots," is having a tremendous effect on the American people right now. I think the time to work on this issue is now. The Senator from New York is correct; we did not have 67 votes before, but we may possibly have them at this time.

We are all interested in human rights. The President has made that the cornerstone of his foreign policy. The supreme human right is the right to live. If we do not act on this treaty, it seems to me any pretense that the Senate can oppose the Genocide Treaty and yet at the same time favor human rights is an impossibility.

Mr. JAVITS. The Senator is 100 percent right. I appreciate the courtesy of the Senator from Wyoming in permitting me to tag right on with what Senator PROXMIRE has said.

THE ANNIVERSARY OF THE ENERGY MESSAGE

Mr. HANSEN. Mr. President, earlier this afternoon I presented a birthday cake to the Nation in recognition of the fact that this is the anniversary of the declaration of the President that the solution to our energy problems as he then perceived them was the moral equivalent of war.

My purpose in offering this birthday cake symbolically to the Nation, and inviting those of my colleagues who are not privy to the secret sessions which have been going on for some time, was to do two things: First, to underscore the vacillating policy of the President and of others in his administration as they have literally moved from one end of the spectrum to the other in trying to come up with a policy that could be sold to Congress and, of course, to the people of the country—which has been characterized first by sober and somber declarations on the part of the President that he opposed the deregulation of natural gas, later by his assertion to at least three Governors of important States of this country that he would favor and support the deregulation of natural gas, and that he, by virtue of his political affiliation, would be able to talk with the dominating Members of the Senate and the House of Representatives in getting a bill passed; later on, by his renouncing the deregulation of natural gas; and then later on, just this week, by his impliedly assuring Senator ABOUREZK that he had, at least for a fourth time, changed his position again.

I do not know what his policy is as of the moment; I have not heard. But at least I can say that this is not the sort of posturing that encourages Members of Congress to believe that the proposal coming from the White House is a solid, sound proposal that will bring about the kind of policy that makes sense and will move America in the right direction.

Let me point out that no one discounts the importance of savings. The Senator from Ohio (Mr. METZENBAUM) said if we did nothing more than pass the three bills agreed to by the House and Senate conferees, we would achieve 90 percent of the energy savings that would flow from the adoption of all five of the energy bills proposed and recommended by the White House.

Mr. MATHIAS. Mr. President, will the Senator yield for a comment?

Mr. HANSEN. I yield.

Mr. MATHIAS. I just want to join with the Senator in the rather mournful exercise of commemorating this anniversary of 1 year without an energy bill, 1 year in which we have seen about $40 billion flow out of America into foreign economies, with very serious results to the American dollar and very serious results to our economy. One of the causes, I think the Senator from Wyoming would agree, has been that the President has not been able to get his message across to the American people. I think that there is a serious problem there. If there was ever a failure of leadership, that is it . The polls show that 50 percent of the American people do not even know we import even a drop of oil. If the President cannot get that message across to the people, he is in trouble, and we are in trouble with him. Would the Senator agree?

Mr. HANSEN. I would indeed agree with my good friend who so ably represents the State of Maryland (Mr. MATHIAS.). It is true that the President has not been getting his message across, and I would hasten to add that maybe his message, as the President of the

United States perceives the problem, is not really the answer to the problem.

It could well be that the people of the United States have heard the President, they have listened to him, they have seen him, as you and I have, on television, and we have seen his declarations in the press, his predictions of dire distress and even near calamity for the United States; but I have to conclude that what perhaps even the President does not understand is the importance of giving the right signals to our domestic economy.

I have spoken from time to time about the situation in my State of Wyoming, one of the major oil and gas producers. We are closing down wells in Wyoming now because it simply costs more to produce the oil and the gas out there than it can be sold for, and that makes no sense.

I am happy to yield to my friend from Maryland.

Mr. MATHIAS. Mr. President, a year or so ago I had the honor of visiting the State of Kansas and riding across that wonderful countryside with Alf Landon. He pointed out during that ride that at least 40 percent of all the oil that ever was in Kansas was still there, but it is down in the bottom of the wells where it costs a little more to get it out than the regulated price would justify and therefore, it is going to stay down there while we send our dollars overseas, depressing the American currency and affecting the American economy, because we do not let the market forces pump that oil out of the ground within the domestic economy.

Mr. HANSEN. My friend from Maryland is precisely right in deploring the ongoing policy, or lack thereof, in the United States which permits the continuation of this foolhardy attitude toward a very important industry in the United States.

If I could just add a footnote to the observations made with respect to the visit by my friend with Alf Landon, of Kansas, it would be to say that the facts are that in round numbers we have discovered around 300 billion barrels of oil in the United States, and in round numbers we have produced around 100 billion barrels. There are remaining roughly 200 billion barrels. Obviously, we cannot get every bit of it out of the ground, but we can get more of it out of the ground. There is no more immediate resource available than to get more oil and gas out of the ground, that which we already know the presence of.

That is where the fallacy in the present policy is so clearly demonstrated.

If the price could rise, it would be profitable, and, indeed, we would be pumping oil from wells which are being shut down and have been shut down simply because no one in his right mind is going to pump oil when it costs as much or more to pump it than that oil will sell for.

I would say further to my good friend from Maryland that I think the President also fails to perceive the relationship between the presence of producible oil and gas domestically to our national security. When we have to import, as we did last year, almost 50 percent of all the oil we use, we place our security in jeopardy to those nations around the world which are supplying the extra oil we need. If we should have the imposition of another embargo by the OPEC nations, we would be sorely pressed to mount any significant national defense effort and to keep our domestic economy going at the same time. We could not do it.

Mr. MATHIAS. The Senator speaks for the security of a State which has its own energy resources. I represent a State on the east coast where a great part of our energy has to come in a ship from some place else. It is not what extra things we could do, but what essential things we can do to keep people working in their jobs. It is not a question of 72-degree living rooms or Sunday afternoon drives, but it is a question of our basic economy.

Mr. HANSEN. As the Senator so correctly perceives, not only national security—and I mention that first because overall it has to be of major concern to every American and, as well, to our friends around the world——

Mr. MATHIAS. When the Senator mentions national security, the mere mention of the word means we have to worry about energy when we make foreign policy. We are no longer independent in our foreign policy as we once were and as we ought to be.

Mr. HANSEN. They are tied closely together.

The Senator mentioned jobs. Our economy is dependent upon oil and gas. As a matter of fact, on the farms and ranches in this country every man-hour of human effort, which is expended in producing the food and fiber this Nation needs and has come to depend upon from the ever present adequate farm and ranch production in this country, accounts for the consumption of 1.2 gallons of gasoline. So our economy and jobs are tied very intimately into the energy picture.

The balance of payments is the fourth problem I would mention. Last year we paid out roughly $45 billion to buy the oil and gas we found necessary to import into this country in order to give us the amount of energy necessary to accomplish the things that, as a Nation, we were able to accomplish last year.

So I say that if we consider national security, and indeed we must; if we are concerned with the economy, and obviously we are, because we know that only in a healthy economy can we find jobs, can we put people to work, can we provide opportunities for those who do not now have jobs; if we consider the importance to our balanced national budget, which yet seems a long way away, we have to understand that the way to change tax consumers into taxpayers is to provide jobs for people in the domestic economy. Here, again, energy plays a vital role in the United States.

Balance-of-payments problems are of concern to everyone, and well they should be. We have seen the dramatic dropping of the dollar in the last few years. In the last several months it has been very dramatic indeed. That is a reflection of the concern which is held worldwide as other nations look upon our actions here in this country. If we want to do something about balance of payments, I can think of no better way than to give encouragement and stimulation to the domestic oil industry. They can and will provide jobs. They can and will fortify and give added strength to our national security and vitality.

They will help significantly in a reduction of the balance-of-payments problem. Every barrel of oil we produce here and every thousand feet of gas we produce here means that that is one barrel of oil and a thousand feet of gas less that we will have to buy abroad. It means that the dollars we are now spending abroad can be invested here at home. We can keep them in our treasury to help with the balance of payments, to stimulate the economy, to give jobs to Americans.

I think the only kind of energy plan that makes any sense, Mr. President, is one that is going to accomplish the twin goals of providing more natural gas and oil domestically and to reduce our dependence upon foreign sources of supply and the outflow of money which has been occurring.

I hope we can come up with a good bill. I have increasing misgivings about that. Secret sessions have been in progress now for several weeks. I have not been invited to them because my views, seemingly, are not acceptable to some of the conferees who think that it is more important to come up with a so-called energy bill, whether indeed it does achieve the purposes that an energy bill must achieve if it is really going to be a solution to our energy problems.

I would say that it just might be that we would be better advised, better guided, and better served to continue with no bill at all than to take any old bill that would represent and include all sorts of compromises to all different kinds of ideas, which has the prime purpose of trying to get enough support to have it pass the House and the Senate, than is the concern to see that it truly serves America.

I note there has been a decrease in the amount of oil and gas that we are now importing. There has been some excess capacity developed on the west coast, specifically in the State of California. There has been some slight increase in production.

When we say that anything is better than what we now have going, I am not sure that is necessarily true. I hope if we do have a bill—and I admit that I have deep misgivings about that—it will be one we can look back upon 1 year from today and say it was a distinct movement forward.

I hope that it will not be necessary, a year from now, to present another birthday cake to a misguided energy plan proposed by the administration that has been able to bear as little fruit as has this last effort that reflects a full year of frustration and lack of move-

ment and accomplishment by the administration.

A DICTATOR'S SABER RATTLING

Mr. MELCHER. The risk of dealing with military dictators was amply demonstrated by Gen. Omar Torrijos' defiance of the United States late on April 18, the day the second Panama Canal Treaty was approved, in his public threat to disrupt the Panama Canal's operation by violence.

The Washington Post quoted Torrijos as saying of the canal:

> . . . the Panamanian national guard . . . has the capability of destroying it and we don't intend to lose that capability.

He also defiantly warned, the Post reported, that Panama would destroy the canal if the United States tried to intervene under the DeConcini resolution.

Torrijos spoke and acted like a typical dictator, and we continually run the risk, by our constant support of his regime, of alienating ourselves from the Panamanian people and, for that matter, the people of other Latin American countries who believe in human rights and democracy.

The Panamanians are freedom loving and friendly. If a free election were held in their country today, General Torrijos and his national guard would probably be replaced by a democratic form of government.

We are caught in the middle. The political parties of Panama are asking for a new plebiscite on the treaties. Much of their motivation—perhaps their major issue—is a vote of protest against the Torrijos regime. General Torrijos has made it clear that he will not permit a new plebiscite. He lauds the treaties and is using them to enhance his position as Panama's "liberator."

Torrijos came to power through the 1968 coup d'état with our backing. He has had our continuous support. He hopes to remain in power either in the forefront as the "Maximum Leader" and controller of the national guard, or in a more subdued position—perhaps with an even more colorful title such as "Supreme Liberator."

For Torrijos this is an hour of glory and, as he told 10 of us last January, he may soon be ready to step aside and take a less active role. But whatever his position or his title, it will continue to be one of strength with the power to use the national guard to control the country. Every act of U.S. generosity to Panama signals to all that we continue to strongly support the Torrijos regime without insisting on protection of Panamanian democratic functions and individual rights.

We are collaborating with a dictatorship and we are not apparently objecting to that regime's denial of basic human rights. Despite that, General Torrijos responds by saying that without the treaties' ratification on Tuesday, he would blow up the canal. Not only would he bite the hand that has fed him, but he would kill the goose that laid the golden egg.

Those cliches may sound trite, but they are no more trite than saber rattling by a military dictator. Just how big is General Torrijos? If anyone knows, we should know because we built him and his regime. So far, as our protege, he has not provided us—forgive me for another cliche—with our most shining hour.

He has us in the middle between his regime and the political forces in Panama that are striving for a return to a democracy.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, appoints the Senator from Maryland (Mr. MATHIAS) as a congressional adviser to the SALT delegation in Geneva during 1978.

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MOYNIHAN). Without objection, it is so ordered.

ORDER FOR RECORD TO REMAIN OPEN UNTIL 5 P.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the RECORD be kept open until 5 p.m. today for the introduction of bills, resolutions, statements, petitions and memorials.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR COMMITTEES TO FILE REPORTS UNTIL 5 P.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that committees may be authorized to file reports until 5 o'clock p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION TO RECEIVE AND REFER MESSAGES

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to receive messages from the House of Representatives and the President during the recess over until Monday at 11:30 a.m., and that they may be appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR CERTAIN ACTION TO BE TAKEN

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Vice President and the President pro tempore and the acting President pro tempore may be authorized to sign all duly enrolled bills and joint resolutions during the recess over until Monday at 11:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR EXTENSION OF TIME TO FILE ANNUAL REPORT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Special Committee on Aging be granted an extension of time for filing its annual report until the close of business on April 28.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR COMMITTEES TO MEET NEXT WEEK

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees may be authorized to meet during each day of each session of the Senate daily next week.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I revise the request as follows:

I ask unanimous consent that committees that find it necessary to meet daily during the sessions of the Senate next week may do so provided the matters to be considered are subject to the May 15 deadline under the Budget Reform Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER THAT NO ROLLCALL VOTES OCCUR AFTER 4:30 P.M. ON MONDAY, APRIL 24, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Monday no rollcall votes occur after the hour of 4:30 p.m., except, and of course we would have to except any rollcall votes on motions to recess or adjourn, or to establish a quorum.

The PRESIDING OFFICER. Without objection, it is so ordered.

The RECORD will so show.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session for 1 minute for the purpose only of considering the nomination, under Appalachian Regional Commission, of Mr. Albers of the District of Columbia.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, I only wish to advise the majority leader that the nomination of Mr. Albers to be Alternate Federal Cochairman of the Appalachian Regional Commission is cleared on our Executive Calendar and we have no objection to proceeding to the consideration of that nomination and his confirmation.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

APPALACHIAN REGIONAL COMMISSION

The assistant legislative clerk read the nomination of William E. Albers, of the District of Columbia, to be Alternate Federal Cochairman of the Appalachian Regional Commission.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nominee was confirmed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President of the United States be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene at 11:30 a.m. on Monday. After the two leaders or their designees are recognized under the standing order, there will be a period for the transaction of routine morning business, not to extend beyond 12 o'clock noon, with Senators permitted to make statements up to 3 minutes each during that period for the transaction of routine morning business.

At 12 o'clock noon, the Senate will proceed to the congressional budget resolution and presumably there will be rollcall votes during the afternoon, but in conformity with the order previously entered there will be no rollcall votes after 4:30 p.m. on Monday.

I think that about sums it up.

RECESS UNTIL 11:30 A.M. ON MONDAY, APRIL 24, 1978

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 11:30 a.m. on Monday.

The motion was agreed to; and at 3:08 p.m., the Senate recessed until Monday, April 24, 1978, at 11:30 a.m.

NOMINATIONS

Executive nominations received by the Senate April 20, 1978:

DEPARTMENT OF STATE

Nancy Ostrander, of Indiana, a Foreign Service officer of class 2, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Surinam.

DEPARTMENT OF ENERGY

John Kenneth Mansfield, of Connecticut, to be Inspector General of the Department of Energy (new position).

CONFIRMATION

Executive nomination confirmed by the Senate April 20, 1978:

APPALACHIAN REGIONAL COMMISSION

William E. Albers, of the District of Columbia, to be Alternate Federal Cochairman of the Appalachian Regional Commission.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Thursday, April 20, 1978*

The House met at 11 o'clock a.m.

Rev. Otis Moss, Jr., D.D., Olivet Institutional Baptist Church, Cleveland, Ohio, offered the following prayer:

Dear God, Creator of life and judge of all nations, we call upon Thee to heal our land according to your loving kindness.

Bless the members of this legislative body whose responsibilities are gigantic in extent and consequential in detail.

Grant an everlasting awareness that each decision made here can either be the resurrection of hope, or, the crucifixion of justice, peace, and human rights.

May the seeds of the impossible dream forever be planted in this House of Representatives and transplanted to every district and hamlet—to such an extent that in our national life and our international relations, "justice will flow like waters and righteousness as a mighty stream."

"Father, into Thy hands we commend our Spirits." Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

The Chair recognizes the gentleman from Ohio (Mr. STOKES).

Mr. MAGUIRE. Mr. Speaker, on the approval of the Journal, I object.

The SPEAKER. Objection is heard.

The question is on the approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

The SPEAKER. The Journal stands approved.

Mr. MOFFETT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

Mr. BAUMAN. Regular order, Mr. Speaker.

The SPEAKER. The Chair will state that the gentleman did not raise his objection to the vote in a timely fashion.

Mr. MOFFETT. Mr. Speaker, I was on my feet, and the microphone was not turned on.

The SPEAKER. The Chair appreciates the fact that the gentleman was on his feet, but he was looking at the gentleman who made the first objection and was not addressing the Chair. In view of that fact, the Chair believes that a reasonable time had expired. If the gentleman wants to ask for the floor for something of that nature, he must seek recognition.

So the Journal was approved.

CALL OF THE HOUSE

Mr. MOFFETT. Mr. Speaker, I move a call of the House.

The SPEAKER. Without objection, a call of the House is ordered.

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I thought the Chair had already recognized the gentleman from Ohio (Mr. STOKES). Is it proper to interrupt the recognition of a Member with the offering of a motion?

The SPEAKER. The Chair will state that recognition to offer the motion offered by the gentleman from Connecticut (Mr. MOFFETT) is within the discretion of the Chair and if entertained is considered as a privileged motion.

Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 238]

Andrews, N.C.	Edgar	Nix
Archer	Ford, Mich.	Rahall
Armstrong	Frey	Rangel
Aspin	Garcia	Rodino
Beard, Tenn.	Harsha	Roncalio
Beilenson	Heckler	Runnels
Bonker	Heftel	Russo
Bowen	Holland	Santini
Burke, Calif.	Howard	Scheuer
Burton, John	Jenrette	Shipley
Cederberg	Kazen	Shuster
Chisholm	Krueger	Stark
Clausen, Don H.	Long, Md.	Steed
	McCloskey	Teague
Clay	McEwen	Thone
Cochran	Mann	Thornton
Conyers	Marriott	Tucker
D'Amours	Martin	Udall
Dellums	Mathis	Van Deerlin
Dent	Meyner	Whitley
Diggs	Mikulski	Young, Tex.
Duncan, Oreg.	Mikva	

The SPEAKER pro tempore (Mr. WRIGHT). On this rollcall 370 Members have recorded their presence by electronic device, a quorum.

Without objection, further proceedings under the call will be dispensed with.

Mr. MOFFETT. Mr. Speaker, I reserve the right to object.

The SPEAKER pro tempore. The gentleman from Connecticut reserves the right to object.

Mr. MOFFETT. Mr. Speaker, I want to point out that what is going on here today, while it might cause some inconvenience and unhappiness, we hope there will be tolerance and some understanding that on the first anniversary of the President's speech on energy it is time to give the Members the chance to vote on the pieces that have been agreed upon in conference, such as the provisions on utilities, insulation, coal conversion, and the like.

And now I object.

Mr. MEEDS. Mr. Speaker, I reserve the right to object.

Mr. BAUMAN. Mr. Speaker, I demand regular order.

The SPEAKER pro tempore. Regular order is being observed.

Objection is heard to dispensing with further proceedings under the call of the Chair.

The Chair recognizes the gentleman from Washington (Mr. MEEDS).

MOTION OFFERED BY MR. MEEDS

Mr. MEEDS. Mr. Speaker, I move that we dispense with further proceedings under the call of the House.

Mr. MAGUIRE. Mr. Speaker, I demand that the matter be taken up by motion, by written motion, Mr. Speaker.

The SPEAKER pro tempore. The gentleman's rights are going to be protected. We are going to proceed under the regular order.

Mr. MAGUIRE. Mr. Speaker, I demand that the matter be taken up by written motion.

POINT OF ORDER

Mr. MAGUIRE. Point of order, Mr. Speaker.

The SPEAKER pro tempore. The gentleman will state it.

Mr. MAGUIRE. Mr. Speaker, is it not in order for a Member to request that the matter be done in writing?

The SPEAKER pro tempore. The gentleman's point of order is what now, again?

Mr. MAGUIRE. The gentleman is demanding that the motion be made in writing.

The SPEAKER pro tempore. The gentleman is within his rights in that regard, and the motion now is reduced to writing and the motion, reduced to writing and received at the Clerk's desk, will be read by the Clerk.

The Clerk read as follows:

Mr. MEEDS moves to dispense with further proceedings under the call.

The SPEAKER pro tempore. The question is on the motion.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MAGUIRE. Mr. Speaker.

Mr. DOWNEY. Mr. Speaker.

The SPEAKER pro tempore. The Chair can assure all the gentlemen their rights will be protected.

Now just which gentleman wants to demand something?

Mr. DOWNEY. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER pro tempore. All those in favor of ordering the yeas and nays will stand and be counted.

The Chair will count all Members standing.

Thirty-two Members have risen. The Chair will now count the House.

Two hundred and thirty-nine Members are present, one-fifth of those present, not having arisen, the yeas and nays are refused.

So the motion was agreed to.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 2452. An act to authorize funds for the Hubert H. Humphrey Institute of Public Affairs and for the Everett McKinley Dirksen Congressional Leadership Research Center.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 2493. An act to amend the Federal Aviation Act of 1958, as amended, to encourage, develop, and attain an air transportation system which relies on competitive market forces to determine the quality, variety, and price of air services, and for other purposes.

THE REVEREND OTIS MOSS, JR.

(Mr. STOKES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STOKES. Mr. Speaker, I am very pleased to welcome a close friend, Rev. Otis Moss, Jr., as today's visiting clergyman. Reverend Moss is the pastor of the Olivet Institutional Baptist Church which is located in my congressional district, and is the home of the largest black congregation in the State of Ohio.

Our visiting clergyman received his bachelor of divinity degree from Morehouse College of Religion in 1959 and has pastored churches prior to coming to Cleveland. One of those churches was Ebenezer Baptist Church, Atlanta, Ga., where he copastored with Dr. Martin Luther King, Sr.

Reverend Moss is not only a religious leader but has been in the forefront of community activities in our city. Additionally he has traveled extensively throughout the United States as a preacher, lecturer, and civil rights speaker and organizer.

He is also a teacher and a prolific writer. One of his publications was "Going From Disgrace to Dignity" which was chosen for the book "Best Black Sermons," published by Judson Press, October 1972. He has also authored "Black Church Distinctives:" and "The Black Church Revolution" which were published in the book "The Black Christian Experience."

In 1977 Reverend Moss returned to his alma mater, Morehouse College as their commencement speaker. On this occasion he was awarded a doctor of divinity degree. Among the many special honors he has been accorded is "Man of the Year in Religion," a listing as "One of the Most Outstanding Young men of America," and an honorary doctor of divinity degree from Temple Bible College, Cincinnati, Ohio.

Reverend Moss is married to the former Edwina Hudson Smith and they have three children, Daphne, Kevin, and Otis III.

Mr. Speaker, I am enormously proud to have had this distinguished minister lead us in prayer today. I am certain that his prayer has been an inspiration to all of my colleagues.

PERMISSION FOR COMMITTEE ON SCIENCE AND TECHNOLOGY TO FILE REPORT ON H.R. 12163, DEPARTMENT OF ENERGY AUTHORIZATION ACT

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that the Committee on Science and Technology may have until midnight tonight, April 20, 1978, to file a legislative report on H.R. 12163, Department of Energy Authorization Act for fiscal year 1979.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

PERMISSION FOR COMMITTEE ON SCIENCE AND TECHNOLOGY TO HAVE UNTIL MIDNIGHT, APRIL 21, 1978, TO FILE REPORT ON H.R. 11192, THE RECOMBINANT DNA ACT

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that the Committee on Science and Technology may have until midnight, Friday, April 21, 1978, to file the legislative report on H.R. 11192, Recombinant DNA Act.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO SIT TODAY DURING HOUSE SESSION

Mr. PRICE. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services may sit during proceedings in the House today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. DOWNEY. Mr. Speaker, reserving the right to object, if I might, I would like to propound some questions to my esteemed chairman. We are marking up the authorization bill which provides for some $40 billion worth of procurements R. & D. I am wondering if there is not a more convenient time when the committee could do that other than on this day. I suspect there will be a lot of activity and Members will be called out from the committee to vote. Is it possible we could reschedule this, Mr. Chairman?

Mr. PRICE. The reason I made this request was so that we might have the legislative program in the House.

Mr. DOWNEY. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERMISSION FOR SUBCOMMITTEE ON INDIAN AFFAIRS AND PUBLIC LANDS OF COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO SIT DURING SESSION TODAY

Mr. RISENHOOVER. Mr. Speaker, I ask unanimous consent that the Subcommittee on Indian Affairs and Public Lands of the Committee on Interior and Insular Affairs be permitted to sit today for consideration of H.R. 11894.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, can the gentleman assure us that this will be for hearings only and there will be no markup of the bill?

Mr. RISENHOOVER. If the gentleman will yield, the gentleman has that assurance.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. ROSTENKOWSKI). Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

TORRIJOS WAS PREPARED TO DESTROY THE CANAL

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GONZALEZ. Mr. Speaker, I rise to make note of two statements that were printed very prominently in the press yesterday, the first, one of Gen. Omar Torrijos, the cacique of the isthmus, who stated that if the Senate had not approved the treaty, he was prepared yesterday to destroy the canal, and the other statement was made by President Carter yesterday also, in which he said that he, too, had feared most apprehensively that the canal was going to suffer destruction. He added that he intends to fly down personally to the isthmus to present the bacon to General Torrijos.

It seems to me that under those circumstances it is a terrible travesty on the famous words of President Kennedy, who upon his inauguration said:

> We shall never fear to negotiate, but we shall never negotiate out of fear.

I suggest respectfully that the Senate can still reconsider the vote, and the President ought to reconsider making a personal trip to deliver the bacon to Torrijos, because around the corner is Fidel Castro, the cacique of the Caribe and Guantanamo Base.

IT'S TIME TO ACT ON ENERGY

(Mr. WRIGHT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WRIGHT. Mr. Speaker, today is April 20. One year ago tonight, President Carter called our Nation's energy problem and the need for a response "the moral equivalent of war."

Since that time, the problem has grown worse. We are importing more oil, not less. Our Nation's troubles have been exacerbated by what the public, at home and abroad, perceive as hesitancy and vacillation on the part of Congress.

On August 5, the House passed a comprehensive energy bill. On October 5, the Senate completed action on its version.

In the long meanwhile—for almost 7 months—House and Senate conferees have been haggling over details.

Our delay in coming forward with a positive and forthright program is hurting the United States and all of its citizens.

Our continuing reliance upon foreign imports, with no clear-cut plan to free ourselves from that dependence, has created a huge balance of payments deficit and significantly eroded the value of the dollar on world markets.

In 1973, when the Arab oil embargo should have shocked us out of our lethargy and into action, this country imported $7 billion worth of foreign petroleum.

Four years later, in 1977, we imported $45 billion worth—six times the dollar drain.

Every foreign leader whom I have met in the past 6 months has asked "What is Congress going to do about the energy problem?"

Our hesitancy and inaction on energy is the biggest contributory cause to inflation, to the decline in the dollar, to the trade deficit and to the erosion of respect throughout the world for the United States and our ability to come to grips with our problems.

The failure of Congress thus far to enact a meaningful response to the energy threat is a witch's brew of several ingredients—regional rivalries, the conflict of domestic pressure groups, an all-or-nothing insistence by some in the Congress upon ideological dogma at the expense of results, and a general unwillingness to bite the bullet and do what must be done.

The energy problem that besets our Nation will grow slowly and inexorably worse until this Congress acts to set us on a corrective course.

This is not a Democratic problem, and it is not a Republican problem. It is not a problem of consuming States versus producing States. It is a problem for the Nation. We are all in it together.

In a matter so infinitely complex, no member and no economic interest group can have its own way entirely. While each insists upon so doing, the Nation suffers.

Today I call upon every member of the conference to redouble his efforts to find a solution. The Nation deserves a solution, and we in Congress are the only ones who can provide it.

I call upon every member of the conference to subordinate the petty concerns of personality conflicts and the desire to create the energy bill in his own image and to bring to both House and Senate a bill which we can pass and give reassurance to the world that the United States still has the self-discipline to settle its disputes and solve its problems.

Too much time has passed already. A year has gone by since the President's message. The Nation and the world await our action.

NATIONAL ENERGY ANNIVERSARY

(Mr. RHODES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RHODES. Mr. Speaker, I want to congratulate the distinguished majority leader for the statement which the gentleman has just made and to associate myself with that statement.

Mr. Speaker, a year ago President Carter declared a national energy emergency, called on the American people to sacrifice, and on Congress to enact a national energy policy.

In the interim, his "moral equivalent of war" has deteriorated into an endless war of words. The conferees have dug in behind ideological Maginot lines. The President himself has been an uncertain trumpet, changing his tune on crucial issues. How can the public be expected to feel any sense of urgency when the two houses of Congress have been stalemated for 5 months?

Meanwhile, we have a huge Department of Energy that has no policy to enforce. We have the deleterious effects of uncertainty weighing heavily on our economy, wreaking havoc with planning for the future.

It is obvious that somewhere amid the rhetoric and the posturing, the conflict and confusion, the public interest has been lost. The energy conferees are creating in the mind of the public a minimum of high regard for the efficacy of Congress, and we all are tarred with that brush.

It is high time to get off dead center, enact a national energy policy, remove uncertainty, and move this Nation toward a workable policy to provide adequate energy for jobs and an expanding economy.

Mr. Speaker, I want to commend the gentleman from Ohio (Mr. BROWN) and the gentleman from Connecticut (Mr. MOFFETT) for the efforts they have made to get the conference back to work. I believe the rules of the House are correct in saying a conference should be and must be open, unless the House agrees to close it.

I certainly am in hopes the efforts you are putting forth will have fruit and we will get the conferees together in the sunshine and do something about this most important national problem.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO FILE A REPORT

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that

the Committee on Merchant Marine and Fisheries may have until midnight Friday, April 21, to file a report on H.R. 11657, the Central, Western, and South Pacific Fisheries Act.

The SPEAKER pro tempore (Mr. WRIGHT). Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION FOR SUBCOMMITTEE ON FISHERIES AND WILDLIFE CONSERVATION AND THE ENVIRONMENT OF COMMITTEE ON MERCHANT MARINE AND FISHERIES TO SIT DURING 5-MINUTE RULE TODAY

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that the Subcommittee on Fisheries and Wildlife Conservation and the Environment of the Committee on Merchant Marine and Fisheries be permitted to sit during the 5-minute rule today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, why is it so important that the committee meet during this great debate on lobbyists, which I understand is such a crucial issue?

Mr. MURPHY of New York. Mr. Chairman, the Subcommittee on Fisheries and Wildlife Conservation and the Environment is in the process of marking up the D–2 Lands Act under a very strict time schedule in cooperation with the Committee on Interior and Insular Affairs, and in order for the full committee to be able to take that legislation up and complete its work, the subcommittee will have to finish its work this week. That is the reason for the request.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, has the gentleman consulted with the minority? That is always an important point.

Mr. MURPHY of New York. Mr. Speaker, I have discussed this with the gentleman from Alaska (Mr. YOUNG), who is a key minority member of the subcommittee.

Mr. ROUSSELOT. And the request is only for today?

Mr. MURPHY of New York. It is only for today.

Mr. ROUSSELOT. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

A DESPERATELY NEEDED NATIONAL ENERGY PROGRAM

(Mr. ROSTENKOWSKI asked and was given 1 minute to address the House and to revise and extend his remarks.)

Mr. ROSTENKOWSKI. Mr. Speaker, the technical complexity of the energy issue can easily boggle a well-trained mind. When one adds the intense political pressures reflecting the diversity of interests affected, this legislation is not surprisingly, moving quite slowly to final passage.

In fact, today, 1 year after introduction, we find ourselves still at an impasse on the question of natural gas pricing and the crude oil equalization tax. Added to this is the frightening occurrence that despite public awareness of the need to conserve and the emphasis placed upon the energy issue, our domestic consumption of energy continues to climb at an alarming rate.

I know you do not need to be reminded of the importance of reducing oil imports, but our current balance-of-trade deficit is $26 billion. We are importing $45 billion worth of petroleum products a year. A national energy program is desperately needed. The elements of the plan must include an increase in the price of the basic fuel commodities—especially crude oil and natural gas so that consumption is not maintained at a high level by artificially low prices. Also, effective steps to promote conservation and new production, and an emphasis on developing new technology to provide tomorrow's fuel sources is badly needed. It all sounds deceptively simple—but we all know that it is not.

We can deliberate indefinitely on this issue, but the facts speak for themselves, we no longer have the luxury of putting off hard decisions on energy. Time has become as precious a resource as energy, itself.

The excuses that energy is a tough subject is no longer in order. Oratory about complexity of the issue will not reduce our imports or strengthen our currency. The Nation expects us to respond, sheer economic logic requires us to respond—I call upon Members of both Houses of Congress to resolve their differences on this crucial issue and pass a comprehensive national energy measure.

Mr. MURTHA: Mr. Speaker, the Secretary of Energy, before the Subcommittee on the Interior of the Committee on Appropriations, pointed out that by mid-1980 the lines would cross. What he meant by that is that the demand for oil would soon surpass the supply of oil in this world.

The Secretary predicted the supplies of oil would in today's dollars go to a price of over $30 a barrel, and that would have disastrous economic consequences—consequences that would be graver than those of the depression of 1932.

The only way we are going to reduce our dependence on foreign oil is by increasing production of coal. I come from a rich coal-producing area in Pennsylvania. In that coal-producing section the industry says that unless we have an energy package bill passed by Congress, it cannot move forward with coal production.

The coal industry believes at this time that it could go to the production of 850 million tons of coal under present conditions. As everyone knows, last year nationally we produced about 670 million tons of coal.

Mr. Speaker, it is essential that the conferees come forward with an entire package on energy, not parts of a package, so that this country can reduce its dependence on foreign oil and increase production of coal in this country.

ENERGY IMPASSE MUST BE BROKEN

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, I was so pleased a year ago this evening, after years of impasse, to watch the President take the first step toward establishing a national energy policy.

During this year, Congress has debated, deliberated, wrangled, and rowed. During this year the American people have been patient indeed—very patient.

Agriculture and industry alike cannot make business decisions. They cannot properly plan for the future because the energy bill languishes in the conference. They do not know what the supply of energy will be, they do not know what the cost of energy will be. Utilities that generate electricity do not know whether they must convert to coal, and, indeed, if they ultimately must do so, they cannot plan for tax considerations relative to the conversion of coal.

Furthermore, the annual purchase of $45 billion a year in foreign oil has helped put our dollar in the red. When we buy more foreign products than we sell, the dollar buys less at the supermarket. An energy bill is essential to help fight inflation.

Mr. Speaker, I know there are differences, I know there are problems. But the Congress must act. It is time for the compromise to work. It is time for the skill of statesmanship to take place.

I earnestly urge my colleagues on the energy conference to resolve their differences and to move forward with a bill that will restore confidence in the American economy.

CONFERENCE COMMITTEE SHOULD HOLD OPEN HEARINGS ON ENERGY BILL

(Mr. MOFFETT asked and was given permission to address the House for one minute and to revise and extend his remarks.)

Mr. MOFFETT. Mr. Speaker, on the same subject, I want to make the point—and I think the gentleman from Vermont (Mr. JEFFORDS) has made it many times—that the solar industry is being hurt, severely hurt, by our inaction. The insulation industry is being hurt by our not moving the insulation pieces. Industrial conservation is being harmed in terms of incentives for conservation. Hydroelectric projects are important to us in New England. They are suffering. We do not suggest that the parts that have already been approved by the conferees make up an energy package which is by any means complete. But it is important to show the American people, on this first anniversary of the President's speech, that a majority of us think that it is really vital to have something in the way of a beginning and a foundation.

I hope that Members will understand what we are trying to do here within

the House rules. And I might add that the House rules have not been upheld with regard to openness of the conference.

TIME TO ACT ON ENERGY BILL

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, now is the time not to blame or scapegoat—and I have done my share on why we have not passed an energy bill—but, in my judgment, to act, to produce, and to lead. As a somewhat inexperienced freshman, who has not had a great deal of experience in matters of conference committees, I humbly say to the conferees the same thing I told my wheat farmers after we lost the farm bill last week, they should adopt the following attitude, and I quote, "Today is the first day in the rest of your life." Today we can prove that this statement is right and that we in the Congress have the good judgment from this point on to move this country responsibly toward energy independence.

ENERGY CONFEREES SHOULD ABIDE BY RULES OF HOUSE BY HOLDING OPEN CONFERENCES

(Mr. MAGUIRE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAGUIRE. Mr. Speaker, 1 week ago, the House voted, 371 to 6, that the rules of the House pertaining to open conferences shall be honored by the conferees on energy.

In the week that has elapsed, there has been not a single indication that the conferees are paying attention to that action by this House. In fact, we have had a continuation of secret meetings, behind closed doors, a clear example of public business not being conducted in public. Not only has the public been excluded, but furthermore, conferees themselves have not been permitted to be present.

Mr. Speaker, we are asking the House again now to make sure that we do not continue to do the business of this House in a regular day-to-day fashion until House rules are complied with by the energy conference committee. This House is not in order until its rules and resolutions are honored. Business should not proceed until the House and its conference committees are acting in conformity with the rules.

Second, Mr. Speaker, we are asking that the agreed upon portions of the energy bill be acted on positively by this House. Those completed sections deal with coal conversion, utility rate reform, and conservation. They constitute important elements of a national energy policy.

We believe Members should have an opportunity to exercise their rights under the House rules to move for a vote on provisions of the energy package already approved by the conferees. Conferees were told weeks ago that the conference would entertain such a motion, but that commitment, too, has been ignored.

Tomorrow is the first anniversary of the President's energy speech of April 20, 1977. That anniversary should be marked not by further deadlock and inaction, but by a signal that the vast majority of House Members of both parties favor the prompt consideration of an energy bill in an open atmosphere.

ANOTHER CALL FOR OPENNESS BY THE CONFERENCE COMMITTEE ON THE ENERGY BILL

(Mr. DOWNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOWNEY. Mr. Speaker, one wonders what can be added to what has already been said with respect to the energy question in this county.

I would want to point out that none of us are particularly sanguine about offering dilatory tactics to slow the urgent business of this Nation and of this Congress. However, this is a small effort by some of us and, hopefully, more of us later to demonstrate to at least those of us here in the House of Representatives that the process for determining one of the Nation's biggest problems has to be an open process.

Mr. Speaker, we get caught up in this Congress in working on the dav-to-day business of questions like the lobby disclosure bill and ignore sometimes the larger issues of whether or not the Government operates in the open.

Mr. Speaker, this House has clearly demonstrated, through its rules, that we want to have open conferences, that the conferees are determining an important issue, and that it should be done with all Members being privy to what is happening and with the public being privy to what is happening.

Mr. Speaker, that is the only way in which a democracy can operate.

GENERAL TORRIJOS' STATEMENT ABOUT POSSIBLE DESTRUCTION OF PANAMA CANAL WAS IRRESPONSIBLE

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, 2 days ago, the 18th of April 1978, the Senate of the United States ratified a treaty with the Republic of Panama.

Immediately after that ratification, the ruler of that country, Gen. Omar Torrijos, made the statement that if the U.S. Senate had not approved the second Panama Canal Treaty, he was prepared to send troops in and destroy the Panama Canal.

Mr. Speaker, I want to express my feelings on this statement. In so doing, I want to express not just my own feelings, but the feelings of many people who live in my district in western Missouri. I am frankly incensed and disappointed at this irresponsible statement by that ruler. I hope that what he said immediately after the Panama Canal Treaty was passed 2 days ago will be remembered by my colleagues in the House and will be emblazoned in the memories of all Americans. Mr. Speaker, all of us should remember that this is the type of person with whom we have been dealing.

ENERGY CONFERENCE SHOULD BE CONDUCTED IN PUBLIC

(Mr. KILDEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KILDEE. Mr. Speaker, on April 20, 1977, the President of the United States presented his energy package to a joint session of the House and the Senate. He called that energy crisis the moral equivalent of war.

A year later, we have not yet finally acted upon that package. I urge the conferees to report out the three sections of the energy package upon which the conferees have reached agreement. I also urge the conferees to follow the rules of this House by conducting the conference in public.

We reiterated our fidelity to that rule by an overwhelming vote last week. The public's business should be conducted publicly, and the public should have reason to worry when that is not done.

WE ARE LOSING THE WAR ON ENERGY

(Mr. KOSTMAYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOSTMAYER. Mr. Speaker, I want to associate myself with the remarks of the distinguished majority leader and with his concern about the energy crisis we face in this country. As has been pointed out, it was a year ago that the President of the United States stood in this Chamber and addressed himself to the problem, calling it the moral equivalent of war. If indeed that is the case, I think it is clear that we are losing the war.

My colleagues and I today, with all due respect to the Members and to the House, seek to bring this to the attention of the House and emphasize the seriousness of the problem. We regret, of course, using dilatory tactics, but I think it is important to bring this before the Congress.

Last week, the House voted overwhelmingly, by a vote of 371 to 6, to open the conference committee, to have the House consider this in a more open fashion. I commend the gentleman from Ohio (Mr. BROWN) and the gentleman from Connecticut (Mr. MOFFETT) for bringing this to our attention.

It grieves me to disagree with my distinguished colleague from Pennsylvania (Mr. MURTHA), but I think we should bring the three agreed upon titles out now; that the Congress should enact them into law and the President should sign them. We should wait no longer. We must act now.

ACTION NEEDED ON ENERGY CRISIS

(Mr. OTTINGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OTTINGER. Mr. Speaker, I congratulate the gentleman from Connecticut (Mr. MOFFETT) and the gentleman from Ohio (Mr. BROWN), the ranking minority member of our Energy Power Subcommittee, for this effort to bring to the attention of the people the urgent need for passage of energy legislation.

When the President a year ago declared the energy crisis to be the moral equivalent of war, he was right then. His assertion is even more right today. We are going to go broke. We simply cannot afford to spend $45 billion per year for importing oil. It is estimated that this will increase threefold by the year 1985 if we do not take significant action.

In addition, we are now importing more than half of our requirements of energy. That represents a severe and intolerable threat to our national security.

I have asked the President, joining with Senator HART of Colorado, to take immediate action to impose import quotas or import duties on oil, and to take action to spread the burdens of those actions equitably, until such time as the Congress can act. I think we do have a national emergency, and urgent action is needed.

The very least we can do is to pass the conservation measures already agreed to by both Houses of Congress and the conference. Our failure to take even these minimal actions would discredit the Congress and endanger the country.

OPEN THE CLOSED DOORS OF THE ENERGY CONFERENCE COMMITTEE

(Mr. MARKEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARKEY. Mr. Speaker, I also rise in support of the actions of the gentleman from Connecticut (Mr. MOFFETT) and the gentleman from Ohio (Mr. BROWN). I think, Mr. Speaker, that what we see here today is only an extension of the frustration that most of us felt last week, in the recognition of the fact that the energy bill—which will be the most important bill passed in this Congress—is being negotiated behind closed doors, by a very select number of Members of this body and of the Senate.

If this body has stood for anything in the last 3 or 4 years, it is for open meeting and open budgets and disclosing how much money we receive from lobbyists. These are the kinds of attitudes that are prevalent in this country today, and this is the only way we can conduct our business.

The reason that open meeting laws were originally passed was not to open up the 90 percent of meetings which are inconsequential, which many of us engage in day after day, but rather to open up important meetings, such as defense and energy, that determine to a large extent the fate and destiny of this country.

I do not know whether it is by choice or not, Mr. Speaker, but the way this meeting is being held is an anachronism, and it must be stopped. I hope this body, in one way or another, is able to determine a way to accomplish that goal.

CONCERN OVER INABILITY TO PASS ENERGY BILL

(Mr. GORE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GORE. Mr. Speaker, I rise to add my voice to those who are expressing concern this morning about our continuing inability to pass an energy bill and to those who have argued forcefully for the opening of the conference committee meetings. I personally believe that the most important reason why these meetings should be open is to allow members of that conference committee to make such motions as they feel will stimulate progress in the deliberations of the committee. I believe, for example, that we ought to take the three parts of the energy legislation already agreed to and pass them out so that the House and the Senate can vote on them.

We should be honest with the American people in telling them that these three components alone do not make up a comprehensive energy bill but those parts are a good first step and they will result in the saving of a good deal of energy. We ought to pass those three parts and then continue the debate on the other two more controversial elements of that bill.

ENERGY SOLUTION WOULD HELP IN WAR AGAINST INFLATION

(Mr. STARK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STARK. Mr. Speaker, I would like to suggest that moving toward a solution to the energy conference deadlock would have one additional effect on our country reducing inflation. The President has directed Mr. Strauss to start a war on inflation. They fired the first three or four shots last night at those people who really must be causing a lot of inflation—the postal workers, the teamsters. the farmers, and the environmentalists.

Fifty to seventy percent of our inflation is caused by the high cost of foreign crude oil. If we pass an energy bill that restricts the crude coming in to our country, then we can attack the biggest cause of inflation first and let alone the poor workers and environmentalists, who are the least causes of inflation. Put the pressure where it is needed, to move the energy bill ahead so that the public can have some protection from the high cost of energy, rather than put the pressure on the weakest and the least able to defend themselves.

PRESENT METHOD NOT PRODUCING AN ENERGY BILL

(Mr. BEDELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEDELL. Mr. Speaker, I rise to commend my colleagues, the gentleman from Ohio and the gentleman from Connecticut, for their effort in trying to open up this conference committee so that we can have sunshine on what is happening in that committee.

I particularly think that it is important because of the fact that if we want progress it is pretty obvious the present method simply is not giving us progress in an extremely important matter to our total society.

I have 22 counties and we have open door meetings in each of those counties twice a year, where everybody is invited to attend. Recently we had all those meetings in regard to our energy problems. I am here to tell you that the people are very disappointed in the fact that Congress has not moved more expeditiously in this regard.

In my opinion we should at least move forward with what has been agreed to so that we can bring forward those matters that have been agreed to and then proceed to tackle the more difficult problems that still exist in the committee.

I want to again commend my colleagues for their work in this effort.

UNITED STATES MUST REDUCE ITS USE OF IMPORTED OIL

(Mr. WEAVER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEAVER. Mr. Speaker, the United States is the only industrial nation which, since 1973, has used more oil than it used prior to 1973. All other industrial nations have decreased their consumption of oil since 1973.

The extravagant and flagrant use of energy in this country is something that we must curtail. We must establish strong conservation efforts in this regard.

My constituents tell me that they will be glad to reduce their energy use if all others do likewise. What good does it do them as individuals to reduce their use of energy if their neighbors do not?

So we need a national energy policy to achieve this purpose and therefore we must get moving on the energy bill.

PARLIAMENTARY INQUIRY

Mr. BAUMAN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman from Maryland will state his parliamentary inquiry.

Mr. BAUMAN. Mr. Speaker, the gentleman has been observing this House for about 25 years now in various capacities and was under the impression that the Speaker's normal custom was to recognize Members for 1-minute speeches from his right to left allowing those Members who were there from the beginning to speak. This morning we have seen a parade of Members on the major-

ity side of the aisle fill up the seats of Members who have already taken their 1-minute speeches while several other Members on the minority side of the aisle have been sitting here for more than an hour. I just wondered if that is not still the custom of the House?

The SPEAKER pro tempore. The Chair is advised that recognition lies within the discretion of the Chair. This Member has observed the Chair, I think without exception, recognizing from his right side to his left. The Chair has no control of the number of Members who might seek recognition. But the Chair is seeking to protect the rights of all Members of the House and the gentleman from Maryland (Mr. BAUMAN) may be assured that the rights of all Members will be protected.

THE NEED TO PASS AGREED-UPON PARTS OF THE ENERGY PACKAGE

(Mr. HARKIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARKIN. Mr. Speaker, I too, want to commend the gentleman from Connecticut (Mr. MOFFETT) and the gentleman from Ohio (Mr. BROWN) for bringing this to the attention of the House today.

Last year I held many town meetings in my district to talk about the bill that the House had passed and the different parts of that bill. This year as I have gone back to my district we have had other town meetings. The people there have asked me about what has happened to the energy bill. I told them that the conferees cannot agree on a couple of parts concerning oil pricing and natural gas deregulation but that they have agreed on the other parts. They asked me the question, "Why don't you bring out the other parts of the bill and vote on them and get them into law?" And, you know, I could not answer that question why we cannot do so. I think it is truly illogical.

I think what we have to do is what the gentleman from Connecticut (Mr. MOFFETT) and the gentleman from Ohio (Mr. BROWN) have brought to the attention of the House today, and that is to get out of the conference committee those three parts that have already been agreed upon and bring them before the House and Senate, pass them and show the American people that we are willing and that we do have the strength to pass those pieces of the energy package so as to get us on the right road toward reduction of our reliance on the importation of foreign oil.

LEGISLATION DENYING FEDERAL RETIREMENT ANNUITIES TO CONVICTED FELON-OFFICIALS

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, I am today introducing legislation which would deny Federal retirement annuities to officials convicted of a felony which occurred in connection with his or her employment. Specifically, my bill would amend title 5 of the United States Code relating to Federal retirement annuities to individuals convicted of any felony.

Recent convictions of officials in Pennsylvania and Washington have convinced me of the necessity of this legislation. Officials who choose to rip off the American taxpayer while performing their duties should not be permitted to continue feeding at the public's trough in any way.

We have a $61 billion Federal budget deficit in addition to requiring the American taxpayer to bear a very stiff tax burden. For one nickel of honest hard-earned tax money to be used for the support of a convicted criminal constitutes a serious injustice to the American people.

The motto of President Grover Cleveland's administration was, "A public office is a public trust." That motto was never more true than it is today. We should be working to restore the faith our citizens have in their officials not be continuing to wear away that valuable faith which is a cornerstone of our democracy. My action today will hopefully assure the American people that abuses of their money and their faith will be dealt with harshly, as befits such a crime.

MARK RUSSELL: FOREMOST POLITICAL WIT

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, I read with personal dismay the reports in local newspapers Tuesday of the rift between a well-known hostelry and my good friend Mark Russell. I am sure that most of my colleagues will recognize Mark as one of the foremost political wits of our time and certainly of our Capital City. Should events proceed as they seem certain to, the question is inevitable. In this city, where the weighty problems of a nation are brought for solutions, who will make us laugh? Who will turn calamity to comedy with a turn of the phrase? Who will mix politics and punch lines with such precision? Who, indeed, will help us laugh at ourselves?

I hope that these reports of Mark Russell's unseating are premature and that he will long stay among us to bait us and barb us, to razz us and roast us—but always to make us laugh.

"HOLOCAUST"—THE DANGER OF BIG GOVERNMENT

(Mr. EDWARDS of Oklahoma asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDWARDS of Oklahoma. Mr. Speaker, last night I sat with my family, and I watched the final episode of the television series called, "Holocaust." My own Jewish heritage made the tragedy that that series depicted even more real and even more painful. But as I watched, another thought stood out as well.

Mr. Speaker, genocide is not new. Christians died by the thousands because they were Christians. American Indians died by the thousands because they were Indians. And Jews died by the millions because they were Jews. In each case these murders, by the thousands and by the millions, were made possible by one thing: by governments so large and so powerful that they had the ability to direct the lives of others and to end those lives if they chose. That, Mr. Speaker, is the ultimate, bottom line, danger of government that becomes too big and that acquires too much power.

CONGRESS SHOULD DECLARE THE ENERGY CRISIS OVER

(Mr. FINDLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FINDLEY. Mr. Speaker, speaker after speaker here today has been calling upon the Congress to do more about the energy crises. I am inclined to think that Congress has done much too much about energy over recent years and one of the main reasons we are in trouble today is bad decisions by Congress in the past and Congress indecision today. We should quit enlarging the intrusion of the Federal Government into the energy field.

I was highly impressed by an article by our colleague, the gentleman from Michigan, Mr. DAVE STOCKMAN, which appeared in the editorial portion of the Washington Post a week ago Sunday. In that article the gentleman from Michigan suggested that Congress declare the energy crisis over and let the marketplace function. That would be the finest thing Congress could do. If we would get Government out of the energy business, let the market function, we would have a larger supply of energy and be less dependent upon imports of oil.

Mr. Speaker, when we had a proposal before this body to establish a Department of Energy, I voted "no" and I explained my vote by declaring that once we have the Department of Energy, we will have institutionalized the energy crisis. The pending legislation promotes the same unfortunate tendency.

H. R. GROSS COMMEMORATIVE SCHOOL OF PARLIAMENTARY OBSTRUCTION

(Mr. BAUMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BAUMAN. Mr. Speaker, we are now at the end of an extraordinary 1 minute speech period lasting more than one hour. I would like to announce an educational course to be offered by the H. R. Gross Commemorative School of Parliamentary Obstruction, to be held shortly after the session today.

I knew that we had a determined liberal majority here in the House of Representatives, but I was not aware that they had discovered that the rules of the House do lend themselves at various times to underscore certain points. I did observe at the opening of the session today according to my calculations that 6

to 12 rollcalls could have been required by offering various motions. My liberal colleagues missed these chances to demonstrate their protests. I have a strong feeling there is a need for education in this area. Some of the other instructors for the Gross School I am contacting will include the gentleman from Ohio (Mr. ASHBROOK), the gentleman from California (Mr. ROUSSELOT) and any other of our gentlemen on this side who wish to enlighten our liberal colleagues.

Mr. Speaker, the rules can be a very useful source for making one's point but one must know how to employ them. I am glad to see that the majority of 2 to 1, plus 1, has discovered this fact. I hope they recall this truth when next their leaders seek to change the rules once again do take advantage of the minority.

PANAMA'S CIVILIAN OPPOSITION REJECTS TREATIES

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, this morning's Washington Post contains a very interesting article entitled, "Panama's Civilian Opposition Rejects Treaties." It goes on to say:

Leading Panamanian civilian politicians in a joint statement yesterday repudiated the amended texts, it violates the constitu- the absence of a new plebiscite the military government is making this pact on its own.

It continued:

If the government unilaterally approves the amended texts, it violates the constitution, the statement said.

The disavowal of the treaties raised questions about Panama's attitude toward the pact if and when the military government is replaced by civilians.

I would assume that the policy of the United States would support the idea of a democratically elected government in the Republic of Panama.

Spokesmen for four political groupings said last night that should the parties come to power they will immediately renounce the treaties. The parties include the Panamaista Party, the Liberal Party, the Christian Democratic Party, and the "Movement of Independent Lawyers."

Mr. Speaker, interestingly enough, the only political party in Panama that is supporting the treaties is the Communist Party.

Mr. Speaker, this is yet one more example of the folly of these treaties.

CONTRASTING OUR MISSING-IN-ACTION SITUATION WITH "HOLOCAUST" INCIDENTS

(Mr. DORNAN asked and was given permission to address the House for 1 minute.)

Mr. DORNAN. Mr. Speaker, this afternoon I have asked for 30 minutes under a special order to address the House about the decaying Indochina missing-in-action situation as it relates to way over 1,000 of our men who are still unaccounted for.

I am going to put into the RECORD this evening the Department of Defense briefing the Woodcock Commission prior to its departure for Hanoi last year. Acceding to requests of the Department of Defense, I have removed from the briefing analysis all the names of missing men and their photographs, because some of these photos and some of the references to their brutal treatment would bring further unnecessary heartache to wives and children. The pain of these families is exactly like the pain of the Jews of Europe who never learned the fate of their loved ones. Last night I watched for the fourth night in a row with millions of fellow Americans one of the most incredible stories based on fact ever to be presented on television—the TV 4 night series called "Holocaust." This real life horror story certainly rivals "Roots" for its presentation of an account of "man's inhumanity to man." Today was Adolph Hitler's birth date 89 years ago. A fitting day to recall the massacre he unleashed on this planet. "Holocaust" helped put the 1,000-year Reich into frightening perspective. There were some small unfair references to Ukranians and Lithuanians as though these peoples had all contributed to the brutal treatment of Jews. There are a few cynical references to our British and French allies while always the Red Army looks heroic. Hardly accurate.

Aside from these small flaws, "Holocaust" is an awesome, mesmerizing performance by its cast and a tour de force of writing skill.

While watching the torture and scenes of beatings I thought of our own POW's in Vietnam.

Our missing-in-action situation is similar to the type of Nazi brutality shown in "Holocaust." If we write off 1,339 missing American soldiers, sailors, and airmen in two categories described by our Defense Department as "accountable" by the North Vietnamese, will we ever see on television some evening a few years from now a portrayal by actors as gifted as those in "Holocaust" showing the pain of a family waiting in vain for some word for their son, their man who gave his all. I hope not.

USE OF HOUSE RULES SEEN AS WAY TO GET ACTION IN CONFERENCE COMMITTEE

(Mr. JEFFORDS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JEFFORDS. Mr. Speaker, I also join in commending the gentleman from Connecticut (Mr. MOFFETT) and the gentleman from Ohio (Mr. BROWN) for making the Members aware as to what is going on and in effect using the rules to try and enforce the rules of the House in order to get the conference committee to meet.

I would like to focus for 1 minute on a point which I do not believe has been made, and that is that by this delay we are not just having business as usual. Rather, the delay has in effect, I believe, had a very negative effect on trying to solve the very problem before this conference committee.

After the President made his speech a year ago, there was tremendous enthusiasm by the people to insulate their homes and move toward the use of new technologies such as solar energy. However, after they found there was this delay, what we have seen after talking to people in industry is a precipitous decline in the effort in this area. Naturally people want to wait to see what is going to happen. They want to wait to see if they are going to get loans or tax breaks or whatever might be provided. I might add that with the record of this administration so far in living up to its promises, it is difficult to blame the public.

This delay, I believe, has had a tremendous negative effect on the development of new technologies such as solar energy.

So, Mr. Speaker, if we are going to go forward, we must force the conference committee to meet so that we can end this delay and provide the type of progress we need.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 11832, ARMS CONTROL AND DISARMAMENT ACT AUTHORIZATION, FISCAL YEAR 1979

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1073) on the resolution (H. Res. 1144) providing for consideration of the bill (H.R. 11832) to authorize appropriations for fiscal year 1979 under the Arms Control and Disarmament Act, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 11877, PEACE CORPS ACT AMENDMENTS OF 1978

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1074) on the resolution (H. Res. 1145) providing for consideration of the bill (H.R. 11877) to authorize supplemental appropriations for fiscal year 1978, and to authorize appropriations for fiscal year 1979, for the Peace Corps, and to make certain changes in the Peace Corps Act, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 11401, NATIONAL AERONAUTICS AND SPACE ADMINISTRATION AUTHORIZATION ACT, 1979

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1072) on the resolution (H. Res. 1143) providing for consideration of the bill (H.R. 11401) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes, which was referred to the House Calendar and ordered to be printed.

OPENNESS IN COMMITTEE SESSIONS REITERATED AS A GOAL OF THE HOUSE

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, I too, want to commend the gentleman from Connecticut (Mr. MOFFETT) and the gentleman from Ohio (Mr. BROWN) for the very necessary leadership role they are exerting in trying to get the House to abide by its own rules.

I was very proud when I came here 15 or 16 months ago to see that progress toward openness in this House was being made. Under the leadership of the gentleman from New York (Mr. DOWNEY) and the gentleman from Michigan (Mr. CARR), the rule which would open all the committee sessions, unless a specific motion to close them was agreed to, was adopted by almost the unanimous consent of this body.

For us now to be taking a step away from that kind of openness is, I think, doing a great disservice to this House. During the last year, in the consideration of various pieces of legislation such as the disclosure and lobbying legislation, this House has been proudly proceeding to accomplish its business openly and to demonstrate that we have nothing to hide from the American people.

The attitude and conduct of the conference committee, however, tells the American people something quite the opposite. I would think that it is in the best interests of the entire Nation and certainly in the best interest of this House to proceed apace, to start abiding by the rules of this House, and to open the energy conference so that we can get on with the business of the Nation.

PARLIAMENTARY INQUIRIES

Mr. YOUNG of Florida. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. YOUNG of Florida. Mr. Speaker, in view of the announced slowdown under which we are proceeding today, could the Speaker advise us whether we should use the early airplane schedule tonight or the late airplane schedule?

The SPEAKER pro tempore. The Chair will recognize the gentleman from California (Mr. DANIELSON), who is going to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 8494, Public Disclosure of Lobbying Act of 1978.

Mr. OTTINGER. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. OTTINGER. Mr. Speaker, it does not appear that there is a quorum on the floor of the House. Does a point of order lie at this time on that fact?

The SPEAKER pro tempore. Not until the Chair puts the question on the motion to be offered by the gentleman from California (Mr. DANIELSON). At that point, it would be in order, under the rules. The Chair is not going to recognize anybody prior to that motion.

The Chair is going to recognize the gentleman from California (Mr. DANIELSON). If anyone wants to object to the vote on the ground that a quorum is not present, that would indeed be in order.

PUBLIC DISCLOSURE OF LOBBYING ACT OF 1978

Mr. DANIELSON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 8494) to regulate lobbying and related activities.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. DANIELSON).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DOWNEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were yeas 369, nays 15, not voting 50, as follows:

Messrs. MOFFETT, KOSTMAYER, MAGUIRE, MARKEY, OTTINGER, WEISS, and STARK changed their vote from "nay" to "yea."

Mr. QUAYLE changed his vote from "present" to "nay."

So the motion was agreed to.

The result of the vote was announced as above recorded.

Mr. DOWNEY. Mr. Speaker, I move to reconsider the vote on the motion that the House resolve itself into the Committee of the Whole House on the State of the Union.

The SPEAKER pro tempore. Did the gentleman from New York (Mr. DOWNEY) vote on the prevailing side?

Mr. DOWNEY. Yes, Mr. Speaker, I vote on the prevailing side.

The SPEAKER pro tempore. The gentleman qualifies.

The question is on the motion offered by the gentleman from New York (Mr. DOWNEY) that the House reconsider the vote on the motion to resolve itself into the Committee of the Whole House on the State of the Union.

Mr. DANIELSON. Mr. Speaker, I move to lay the motion to reconsider the vote on the table.

The SPEAKER pro tempore. The Chair will state that the gentleman from New York (Mr. DOWNEY) has moved to reconsider the vote by which the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 8494 and the gentleman from California (Mr. DANIELSON) has moved to lay that motion on the table offered by the gentleman from New York (Mr. DOWNEY).

The question is on the motion offered by the gentleman from California (Mr. DANIELSON) to table the motion offered by the gentleman from New York (Mr. DOWNEY) to reconsider the vote on the motion that the House resolve itself into the Committee of the Whole House on the State of the Union.

The question was taken and the Chair announced that the ayes appeared to have it.

Mr. DOWNEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were yeas 362, nays 26, not voting 46, as follows:

Messrs. DOWNEY, DICKS, WEISS, and MAGUIRE changed their vote from "nay" to "yea."

Mr. MOFFETT and Mr. NOLAN changed their vote from "yea" to "nay."

So the motion to table was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 8494, with Mr. MEEDS in the chair.

The CHAIRMAN. When the Committee rose on Wednesday, April 19, 1978, all time for general debate had expired and the committee amendment in the nature of a substitute had been considered as having been read and open to amendment at any point.

Are there further amendments to the committee amendment?

AMENDMENT OFFERED BY MR. SEIBERLING

Mr. SEIBERLING. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SEIBERLING:

On page 33, line 6, after "group of individuals" insert ", which has paid officers, directors, or employees".

Mr. SEIBERLING. Mr. Chairman, before I proceed, I yield to the gentleman from North Carolina (Mr. PREYER).

Mr. PREYER. I thank the gentleman for yielding.

Mr. Chairman, I have a question about section 7(b) of the bill. That section specifically provides that records maintained by the Comptroller General under the Lobbying Act are subject to the provisions of the Freedom of Information Act and the Privacy Act. It has been unclear for some time whether these two openness-in-government laws are applicable to the Comptroller General. While I agree that lobbying records maintained by GAO should be subject to these two laws, I do not wish the language in the lobbying bill to be taken as an indication of the views of the House on the general issue of the applicability of these laws to GAO.

When the language of section 7(b) was originally added to the lobbying bill in the 94th Congress, the former chairperson of the Subcommittee on Government Information and Individual Rights which I now chair indicated that it was not the intention of the language to resolve the general issue one way or the other. Is it your understanding that the reference to the Privacy Act and the Freedom of Information Act in this bill does not have any bearing on the issue

of the general applicability of these laws to the Comptroller General in other circumstances?

Mr. DANIELSON. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from California.

Mr. DANIELSON. Mr. Chairman, in response to the gentleman from North Carolina (Mr. PREYER), the answer to that question is "Yes."

Mr. SEIBERLING. Mr. Chairman, the lobbying disclosure bill that the House passed in 1976 contained the limitation that groups of individuals meeting the threshold amounts would have to register and report only if the group had paid officers, directors or employees. The 1976 Judiciary Committee report stated, and I quote:

> The key principle here is that to qualify as an organization it must have paid officers, directors or employees. Consequently, an ad hoc coalition of unpaid persons cannot qualify as an organization.

Unfortunately, Mr. Chairman, the Committee on the Judiciary, this time around, failed to include that provision. The obvious result is that registration and reporting would be required of every group of individuals that retains outside lobbying help for $2,500 in a calendar quarter or otherwise comes within the threshold requirements of the bill.

This means that if a family hired a lawyer to lobby for the passage of a private immigration or relief bill, they would then have to file a report under the Lobbying Act if they spent more than $2,500 for legal fees. It is pretty easy to run up that kind of a fee in this day and age.

Mr. Chairman, it means that a group of individuals who simply got together to lobby on a single issue and contributed a small amount of money to help make the group's views known to Congress would have to file a report.

As a practical result, Mr. Chairman, I think that many such groups of individuals would probably decide not to express their views to Congress if they had to register and report as lobbyists in precisely the same manner and detail as a large, well-financed organization.

Surely, Congress has no compelling interest which would justify placing small groups of individuals in such a position that they would be intimidated or deterred by the bureaucracy from exercising their rights, which are guaranteed by the Constitution, to participate in the legislative and political processes. Indeed, such ad hoc groups are needed to provide a check on the activities of the large, well-financed lobbies.

Mr. Chairman, I think that if we do not make this correction, we could well run afoul of Supreme Court decisions which have held that any burdens imposed by Congress on the exercise of first amendment rights must not be greater than necessary to meet a compelling national need. No case has been made that would justify the requirement in this bill that every group of individuals, however small or informal or inconsequential, be treated as an organization and made to file voluminous reports under penalty of criminal punishment if they fail to do so.

Therefore, Mr. Chairman, I urge support for this amendment.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I am glad to yield to the gentleman from California.

Mr. WIGGINS. Mr. Chairman, I am going to support the gentleman's amendment because it narrows the scope of the bill; and to any extent that it is narrowed, I am supportive of it.

However, I would like the gentleman to state clearly that the language he adds to the bill is applicable only to groups of individuals and does not modify the listing of all other categories or organizations above.

Mr. SEIBERLING. That is absolutely correct. It is not the intent of the author of this amendment to create a loophole whereby some ingenious lawyers might create an organization and simply say that it is not going to have any paid officers and directors, even though it might be a large, massive lobby.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. SEIBERLING) has expired.

(On request of Mr. KINDNESS and by unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. WIGGINS. Mr. Chairman, will the gentleman yield further?

Mr. SEIBERLING. I yield to the gentleman from California.

Mr. WIGGINS. Mr. Chairman, I was just going to add that my support for the gentleman's amendment is not with total enthusiasm because we are raising equal protection problems by treating individuals and organizations differently for no other reason than that we seem to love people more than we do organizations, although both are entitled to full protection under the Constitution.

Mr. SEIBERLING. Mr. Chairman, if the gentleman would let me respond, I would simply say that we have first amendment considerations here, and we have to have a compelling interest to impose significant burdens on first amendment rights of people to communicate with their elected representatives. Therefore, I do feel that there is a careful balancing needed, and I believe that this amendment does do the job.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Chairman, I thank the gentleman for yielding.

I have one question which I would like to clarify about the amendment: Would the group of individuals be exempted if they had but one paid employee? The plural of "employees" gives me just a little bit of concern.

Mr. SEIBERLING. They would not be exempted if they had any paid officer or any paid director or any paid employee.

Mr. KINDNESS. Therefore, the intention of the gentleman is that even if there is one paid employee, then the group would not be exempted; is that correct?

Mr. SEIBERLING. Correct.

Mr. KINDNESS. I thank the gentleman, Mr. Chairman.

Mr. SEIBERLING. Of course, if they hired a lawyer to represent them, he would not be an employee within the intent of this amendment because otherwise, it would completely obfuscate the amendment itself. However, if they got together and simply spent some money on communications or if they hired a lawyer to represent them in connection with some private relief bill, for example, neither they nor the lawyer would be considered an employee.

Mr. KINDNESS. If the gentleman will yield further, that was the next area I wanted to get into.

Even if the group crossed the threshold otherwise in terms of, say, spending $2,500 to retain an attorney during a quarter, then it would still be exempt, if it is a group of individuals which has no paid officers, directors, or employees; is that correct?

Mr. SEIBERLING. Correct.

Mr. KINDNESS. And an independent contractor or retainee would definitely not be considered an employee; is that correct?

Mr. SEIBERLING. That is absolutely correct.

Mr. KINDNESS. Mr. Chairman, I thank the gentleman.

Mr. DANIELSON. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I rise in very strong opposition to this amendment. I want to point out that it would throw the door wide open for persons who wish to get around this disclosure of lobbying bill. I am very pleased that the gentleman from Ohio (Mr. KINDNESS) and the gentleman from Ohio (Mr. SEIBERLING) did indulge in the last minute or so of colloquy, because it reinforces the argument that I wish to make.

Under this amendment, if it were adopted, any group of individuals—any group whatever—could simply band together and agree that what they would like to do is retain a retainee, a lobbyist, a lobbying organization, to advance their cause, and pay him whatever sum—$2,500, $25,000, $250,000—and they would not have to register, they would not have to report, no matter that they may have engaged in a most extensive lobbying operation. They can do that simply by banding together, not employing any one of them as an officer, director, or employee; paying no one compensation for being a member of the group, and then by hiring as a retainee the most influential lobbying firm in the District of Columbia, which could carry out their lobbying communications without limitation whatever without any need to register, without any need to report.

I respectfully submit, my dear fellow Members of this House, that this would be the biggest loophole we could possibly put into this bill. I urge all the Members, each and every one of them, to vote down the amendment, out of hand.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, I would join in my colleague's remarks. I can un-

derstand why someone might think that language such as this would help the "mom and pop" operation. But, it is not in any way restricted to the "mom and pop" operation.

If the president of Exxon, the president of Mobil, and the president of Texaco wanted to form an ad hoc organization in order to preserve peace and freedom, and wanted to contribute $200,000 from each corporaton toward that committee, that committee—not electing any officers or directors—could in fact use that money to direct extension lobbying operations. Under this language, that committee would not have to register or report any of its activities.

Mr. DANIELSON. That is correct, they would be outside the bill. A corporation could not, in my opinion, do so, but individuals could. We all know that there are some fortunate few in this world who have more money than commonsense to spend, and they certainly could band together in this regard.

I want to invite the attention of some of my more conservative friends to the fact that 10 or 12 Squeaky Cleans could get together for the purpose of lobbying to clean up the waters of America to the point where one could drink water out of New York Harbor. The Squeaky Cleans, with that huge lobbying fund, could not be reached at all if this amendment were adopted.

The same holds true, of course, for the Dirty Dozen. The Dirty Dozen could get together and they could do the same thing, and lobby to their hearts' content and never be forced to register and never be forced to report.

Ladies and gentleman of the committee, this would blow a hole in the bill big enough to put the Capitol through.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I would be pleased to yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, the right of people to get together and exercise their political powers of citizenship in this country is of the essence of democracy. It seems to me that anything that impairs the rights of our people all over this country—and in the gentleman's district— small groups, to combine in an informal way and contact their representatives, is impairing that right if there is a substantial burden.

Now, the fact that some people who might be wealthy might be able to do the same thing is not a reason for imposing the burden on the vast mass of people who do not have that status. It does seem to me that, with the careful colloquy that we have had, there is no real loophole of the kind the gentleman feels is there.

The CHAIRMAN. The time of the gentleman from California has expired.

(On request of Mr. RAILSBACK, and by unanimous consent, Mr. DANIELSON was allowed to proceed for 3 additional minutes.)

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Mr. Chairman, I thank the gentleman from California for yielding.

Initially I must confess I was a little bit concerned about the example given by the gentleman from Ohio, which seemed to me to possibly have some merit, and that is in the case of a private claim, but in reading the exemptions set forth in the bill, I find it makes it very clear, for instance, that there can be communications made at the request of a Federal officer or he may submit for inclusion for a report or a hearing or in the record or in a public file of a hearing. There can be under subsection (c) of that section a communication from an individual for a redress of grievances. And I am inclined to think we can make it very clear that we do not mean in this bill to include somebody seeking relief by hiring an attorney, seeking redress of his grievances for, say, a private client.

Mr. DANIELSON. I thank the gentleman for his contribution.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Chairman, I thank the gentleman for yielding.

With some feeling of being ill at ease and with some concern I must concur with the chairman of the subcommittee that so studiously considered this bill. I think the language of the amendment offered by the gentleman from Ohio (Mr. SEIBERLING) was intentionally left out of this year's bill for a good purpose, because it does create the kind of loophole in which I can see the presidents of large corporations as individuals taking action in such a way as to be exempt, or the presidents of a number of labor organizations or any type of group we might wish to name.

The gentleman from California (Mr. DANIELSON) has sized it up correctly, I think. Though I would very much like to see as little coverage of individual efforts as possible in this bill, whenever people do get together to make a joint effort, that is when the theory of this bill starts to take hold, and the payment of money or nonpayment of money should not be the measurement, I am afraid. So I join the gentleman in opposing the amendment.

Mr. DANIELSON. I thank the gentleman for his analysis. He is eminently correct. It is not a matter of clean or dirty, rich or poor, good or bad. It is just that this amendment takes the bottom out of the boat. There is nothing left.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Ohio.

Mr. SEIBERLING. The gentleman from Illinois used two examples which I do not think really hit the problem this amendment is directed to. There is in the bill a provision that if the congressional committee makes a request for the testimony of the group, then they are not covered by the bill, but we are talking about the situation where the citizens themselves initiate action which is not protected.

The CHAIRMAN. The time of the gentleman from California has expired.

(On request of Mr. SEIBERLING), and by unanimous consent, Mr. DANIELSON was allowed to proceed for 1 additional minute.)

Mr. SEIBERLING. Mr. Chairman, if the gentleman will yield further, the other point is an individual is exempt if he goes and hires an attorney, but that is exactly the point. This bill does not make an exemption for a small group who wish to collectively petition for redress of grievances or otherwise express their views to members of the legislature. The amendment does take care of that situation. So I do not think the exemptions the gentleman from Illinois (Mr. RAILSBACK) cited are apposite to this particular problem.

Mr. DANIELSON. Mr. Chairman, I thank the gentleman for his comments and most respectfully disagree with him. I know the amendment is offered in the highest of good faith. My only difference with him is that I think the amendment is wrong, and for that reason we should vote it down. I urge a "no" vote on the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. SEIBERLING).

The question was taken; and the chairman announced that the noes appeared to have it.

Mr. MOFFETT. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee of the Whole appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have responded. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business before the Committee is the demand by the gentleman from Connecticut (Mr. MOFFETT) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

The CHAIRMAN. Are there further amendments?

AMENDMENT OFFERED BY MR. PRESSLER

Mr. PRESSLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PRESSLER: On page 32, line 19, insert the following new language immediately after the word "company.": "department or agency of the executive branch of the Federal Government, or the White House Office,"; and

On page 32, line 22, strike out the word "Federal,".

Mr. PRESSLER. Mr. Chairman, the purpose of this amendment is to recognize the growing activities of many of the Federal departments or agencies of the Federal Government, or the White

House Office, in lobbying. It seems that since the last few administrations there have been a great number of activities on the part of the Federal Government in lobbying, and in some ways the Federal Government has become a lobby unto itself.

I might cite as an example last week when the White House very actively lobbied against the farm bill.

There is presently a statute against the use of lobbying with appropriated moneys, but this apparently is very vague. There is a need for clarification.

I believe that my amendment would treat the lobbying by different parts of the Federal Government on the same basis that we are treating lobbyists throughout the country in different groups.

Mr. Chairman, I might also say that recently when the Consumer Protection Agency bill was before this House, that I was called by a Commissioner of the Federal Trade Commission and urged to vote for the bill. I had not sought that input. I know existing law says that Members of Congress can request the opinions of agencies or get department views on legislation; but frequently there is outright lobbying by either the liaison offices in different departments and there is outright lobbying on behalf of legislation by the White House offices. The purpose of the law is to provide information when Congress requests it; but I think it would be rather artificial for us to pass a lobbying disclosure bill without addressing the growing lobbying being done by departments and agencies and in the White House offices. My amendment would cover departments, agencies, and the White House offices. It would not affect other agencies, but treat them equally.

I think discussion of this is appropriate. As the Federal Government becomes larger and larger, we are getting into a position where frequently the Federal Government is a lobby unto itself. For instance, we can frequently cite examples where different Federal agencies have a vested interest in the passage of legislation. Traditionally, they are not supposed to lobby, but they do send members over to Congress, not only at the assistant secretary level, but also at the program level.

There is also the problem of Federal agencies stimulating activity on behalf of their corresponding groups in the States to do mailings or to participate in some other way to influence Members of Congress. We have had a vote on the grassroots lobbying measure. We have covered various aspects of lobbying in the private sector. I think we should address the growing practice of lobbying in the Federal Government by the Federal Government.

For that reason, I think this is a very appropriate amendment.

Let me say that I think the various departments and agencies and the White House are getting more and more active in lobbying, coming up to the Hill and actually urging Members to vote for or against the bill.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. PRESSLER. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Mr. Chairman, I thank the gentleman for yielding. I want to commend the gentleman for what I think is a very, very useful statement, about one of the glaring omissions in the bill that we have before us, which does not purport to deal with lobbying by the executive branch of Government. However, it is my belief that what we ought to do is perhaps consider separate legislation that could fully explore the need for some kind of regulation and reporting. I think maybe it is a little bit too much to ask to take such a major step at this time; but I certainly want to congratulate the gentleman and commend the gentleman for at least focusing on that particular omission.

Mr. PRESSLER. Mr. Chairman, I would like to continue by saying I think it is important and I thank the gentleman from Illinois; but I do believe this is such a glaring omission and the activities of the Federal agencies have become so widespread in the lobbying area that we should consider this.

Let me continue by saying there are many things the Federal agencies can do for or against a Member of Congress if that Member of Congress is friendly to the agency's proposals.

Mr. WIGGINS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I have just a few words to say. This amendment would require in all probability that the President register on behalf of the White House as lobbyists, which is unseemly to say the least.

This would require the production by the President of information which is readily available to all of us for the simple asking. It would require the President to do that which he may voluntarily do at any time. There is no law, regulation, or rule prohibiting the President from making full public disclosure, if that be his wish, as to the extent of lobbying activities conducted within the executive branch.

Perhaps that is a good idea for the President, if he is listening, but to subject the President to criminal sanction should he make a purposeful or willful omission of information in reports required under this act, including, for example, a description of the issues which concern him, is, it seems to me, an overkill.

I commend the gentleman from South Dakota (Mr. PRESSLER) for dramatizing the degree of lobbying activities conducted by the President, but if for some reason we should cover the executive branch by this amendment, simple comity and self-respect would, I think, require that we cover the activities of the Congress itself.

Mr. PRESSLER. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from South Dakota.

Mr. PRESSLER. Mr. Chairman, the purpose of the amendment would be to cover the White House offices and the legislative liaison offices, as well as various departments.

The President would, of course, still be able to take positions. If the White House was, through various agencies, engaged in certain activities or indeed if a Federal Trade Commissioner or some other Federal officer were engaged in lobbying on the Hill, this would not prohibit them from doing so. It would just require them to meet the same requirements other groups have to meet.

There was an article in the Washington Post today which will be discussed later by another Member, and that describes the activities of some foreign banks in urging Members of Congress to vote a certain way.

Mr. Chairman, I think under the spirit of this bill, if we are going to pass the bill and apply it to other groups, certain governmental agencies have become some of the biggest lobbyists up here and they should be covered.

Mr. WIGGINS. Mr. Chairman, I understand the gentleman's position, and I understand these groups are active. But if the gentleman wishes a public disclosure, then he should get the information which is available to him and put it in the RECORD, and then we will all know.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Illinois.

Mr. HYDE. Mr. Chairman, I thank the gentleman for yielding.

I am a student of the position of the gentleman from California (Mr. WIGGINS) as it relates to this bill. The gentleman has highlighted very succinctly the fact that somehow or other there must be an evil in lobbying because in this legislation we are regulating free speech, and we just should not do that without a clear and present danger being present or without some evil that should be corrected.

So obviously "lobbying" has become a quasi-dirty word. If that is so and if we are ready to regulate private money being expended by private parties to communicate with us, how much more important is it that we regulate public money being expended to communicate with us?

I know of no lobbying with the force, with the power, or with the persuasiveness of the executive branch of Government.

Personally, I am very chary of this whole legislation, but if communicating with Congress is suspect, as it must be, because we are regulating it. The executive branch, since it is expending public funds, ought to be subject to disclosure as everyone else is and we should let the sunshine in.

Mr. WIGGINS. Mr. Chairman, I do not think lobbying is an evil in either case.

Mr. DANIELSON. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, in opposing the amendment offered by the gentleman from South Dakota (Mr. PRESSLER), I want first of all to express my appreciation to the gentleman from California (Mr. WIGGINS) for his comments in opposition to the amendment.

I would like to state that I associate myself with them fully, and I will cut

short my presentation a little bit because the gentleman said exactly some of things I want to say.

This amendment would be unseemly, to say the very least. Here we are, with what I think is the finest form of government that the mind of man has ever put together, even though it has its shortcomings. We have a tripartite government. It is inherent in our system of government that all three branches work together. The failure of that would be the end of our form of government. The Executive must work with the legislative branch. The legislative branch must work with the executive. The judicial branch must resolve cases and controversies which arise out of that functioning. If the President could not communicate with Members of Congress without the undue burdens placed upon him, this would result in an unacceptable sanction against cooperation between these two branches of Government. If the President were compelled to register as a lobbyist and report on his activities simply because he is carrying out the constitutionally mandated function of seeing to it that the laws are faithfully executed, of being Commander in Chief of the Armed Forces, et cetera, then we would in effect be nullifying what makes this country work so very well. And if the President is to be restricted, then why should not the Congress be restricted in communicating with the executive branch? You and I, all of us, phone some part of the executive branch every day, requesting assistance on this measure or that measure, or asking for comments, trying to work with the executive branch. I would say that if it is sauce for the executive, it should be sauce for the legislative branch, as well. This amendment could actually destroy the good functioning of our very fine government.

Furthermore, I submit that it violates the principle of separation of powers. Can the Congress tell the executive that the executive may not communicate with the Congress? I say no! I submit that this is an infringement of the rights of the executive branch.

Lastly, bear in mind that in this bill we are already exempting from the provisions of the bill government corporations. Then why do we impose a sanction against the executive? We are exempting State and local units of government, so why should we put a burden on the Executive Branch of the Federal Government? We exempt Indian tribes, of which there are many in the gentleman's state, South Dakota. We exempt national and State political parties and organizational units thereof, associations of Members of Congress and associations of Members of Congress and congressional employees.

I respectfully submit that it is unseemly, which is a gentle word to use to describe this proposed amendment. I have stronger words which I will not use right now.

Mr. PRESSLER. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from South Dakota.

Mr. PRESSLER. I thank the gentleman for yielding.

Mr. Chairman, I would like to state this would not inhibit the Federal Government from expressing its views. Would it not regulate them, the same as the others? So why would that inhibit the way the flow of information occurs if it would not inhibit the other groups that are under the bill? In other words, it would not inhibit the President or other units of government from doing anything. It would merely ask them to report their activities, as other groups under the bill would.

Mr. DANIELSON. We should consider the fact that under the Constitution the Executive power is vested in the President of the United States. There is only one President. He is not an organization. He does have helpers, of course. He has to have helpers. But the big point simply is this: We would be putting a burden upon his communicating freely with us. We should encourage this cooperation, not discourage it.

I submit that this would result in what you might call conservative anarchism, which I certainly do not subscribe to.

The CHAIRMAN. The time of the gentleman from California (Mr. DANIELSON) has expired.

(On request of Mr. FISH and by unanimous consent, Mr. DANIELSON was allowed to proceed for 3 additional minutes.)

Mr. PRESSLER. Mr. Chairman, will the gentleman yield for one more question?

Mr. DANIELSON. I yield to the gentleman from South Dakota for a question.

Mr. PRESSLER. Mr. Chairman, would not the same reason apply to other groups that are being covered by this lobbying disclosure? If this inhibits the Federal Government from certain activities, why would they not be in the same category as the groups we are covering? What is the distinction?

Mr. DANIELSON. We have a special case when there are two branches of the same Government. We are only one Government. We are a Government in three parts, executive, legislative, and judicial; and every encouragement should be given to increase, to intensify, to smooth out, to encourage communication. Anything at all which would slow up that communication would be an unjustified burden on the governmental process.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, I would like to associate myself with the remarks of the Gentleman from California (Mr. DANIELSON), and with those of the gentleman from California (Mr. WIGGINS) made earlier.

It just seems to me so fundamentally violative of how our federal system works that it is almost hard to explain the mischief of this amendment.

Mr. Chairman, I compliment the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Chairman, I thank the gentleman. As usual, the gentleman from New York (Mr. FISH) has put it in just the right words.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Chairman, I thank the gentleman for yielding.

I rise in support of the gentleman's position on this amendment.

Mr. Chairman, I would ask the gentleman, my chairman, this question: Was there not, at our subcommittee meeting and at the full committee meeting, discussion had with respect to the basic reason for this legislation, which is reporting and publicity given to money spent? And if the gentleman will yield further, does not the President, the executive branch of the Government, have to reveal certain matters; do they not have to submit to the Congress their budget requests and so, in a sense, is there not this reporting and this publicity already?

Mr. DANIELSON. Mr. Chairman, I think the gentleman from Kentucky (Mr. MAZZOLI) has voiced something we have not said; and it is critically important, and that is that the Congress already has oversight jurisdiction, oversight hearings, and oversight over the various executive branches of the Government.

The President must come to the Congress and read his state of the Union message. He must submit budgets.

Many of the laws which we pass contain a proviso that this branch or that branch of the Government must report to the Congress annually, periodically, as the case may be.

There is no lack of disclosure of communications between the executive and the legislative branch. This amendment—I say the word "unseemly," but please think of the word "unseemly" in its strongest connotation when thinking of this amendment.

The CHAIRMAN. The time of the gentleman from California (Mr. DANIELSON) has expired.

Mr. MOORHEAD of California. Mr. Chairman. I move to strike the last word.

Mr. Chairman, I rise in opposition to this amendment.

I suppose many of us could support it on grounds that it would perhaps cause some mischief for an administration with which we did not totally agree. However, it would be totally irresponsible to put this burden on the President of the United States and upon the various executive departments of the Federal Government. We would have additional expense which the taxpayers would have to pay because of the reporting and recordkeeping required. It would absolutely serve no useful purpose.

Mr. Chairman, I think that if we want to get at this kind of thing, there are other ways we can do it.

Actually, it is against the law now for the executive branch to come down here and lobby the Congress on specific pieces of legislation. Yet, I notice that people from the White House do it on regular occasions. If we want to enforce that law, we can, but to require this kind of reporting would be undesirable.

It would not work to the benefit of the American people, and certainly would not fulfill the purpose of this legislation.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD of California. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank my colleague for yielding to me.

Mr. Chairman, I would like to associate myself with the remarks of the gentleman from California (Mr. MOORHEAD).

Mr. MOORHEAD of California. I thank the gentlewoman.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD of California I yield to the gentleman from Maryland.

Mr. BAUMAN. Is the gentleman from California telling us that the White House staff is now violating Federal statutes, and nothing is being done about it?

Mr. MOORHEAD of California. I am telling the gentleman that they may violate the Federal law if they are using appropriated money for lobbying on legislation.

Mr. BAUMAN. The thing that disturbs me about this problem is that the gentleman from South Dakota (Mr. PRESSLER) is attempting to clean up what has been described as a semi-evil lobbying effort by requiring that the White House inform the Members of the other body and the House where that lobbying is coming from.

Mr. MOORHEAD of California. I refer the gentleman to 18 U.S.C. 1913.

Mr. BAUMAN. I am very familiar with that part of the Federal Criminal Code. I must say that if reporting is the only way we can get evidence to stop illegal actions on the part of the Federal agencies, we should do that.

Esther Petersen spent thousands and thousands of dollars in lobbying for the consumer protection bill, using the facilities of the White House. I wrote and complained about it. She replied to me that it was not lobbying, but she was just giving information.

This morning the Baltimore Sun reported that the White House had given its lists to the Democratic National Committee and instructed them to phone people in the States of wavering Senators about to vote on the Panama Canal Treaty. Some 7,000 phone calls were made to Senators' constituents, and the Senators did not know who inspired those calls. Certainly, under previous administrations there was no hestiancy to condemn illegal acts and some even suggested impeachment when illegal acts occurred.

Mr. MOORHEAD of California. For one thing, if an act is illegal—and I am not going to make a final judgment on acts of that kind—but it would be a violation of fifth amendment rights. It would, in essence, be an admission of guilt in the registration and reporting.

Mr. BAUMAN. The thing that bothers me is that we are setting up a standard in this bill which diminishes the first amendment rights of all Americans governed by this bill, and we are setting aside in a special category certain types, including White House staff and Federal agencies. Why should the Government have more constitutional rights than individuals have. I think the Government ought to be more restricted than the average citizen is. That is something that might be done by the amendment now pending.

Mr. MOORHEAD of California. One further comment could be made. If we take the pernicious solicitations section that went into the bill the other day, and we put this in also, it could discourage the people in Government from communicating with citizens throughout the country on legislation. That would be absolutely ridiculous.

Mr. BAUMAN. I do not believe it would prohibit them from communicating with anyone. It would simply require them to report. That is why I think that in the Panama Canal Treaty debate, it would have been well for those Members of the other body to know that a mass of phone calls were inspired acts by the White House to trump up support. Without such illegal lobbying by the White House the Senators would have never heard from those people in their States.

Mr. KINDNESS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will not take the 5 minutes, but I would like to associate myself with the remarks of the gentleman from California (Mr. DANIELSON) in opposition to the amendment.

The problem here that is particularly highlighted by the other gentleman from California (Mr. MOORHEAD) is that with the bill now covering the reporting of grassroots lobbying solicitations, we can see how onerous the addition of Mr. PRESSLER's amendment would be. I think this points up the fact that we need to take a very hard look at what was done yesterday in adopting the Flowers amendment to include grassroots lobbying solicitations under the reporting section of this bill.

The gentleman from South Dakota has made a point here about the executive branch lobbying, but it has brought into focus the fact that we have this bill a little bit out of kilter at the present time. I would certainly hope that when a separate vote is requested on the Flowers amendment when this bill is reported by the Committee of the Whole back to the House, that we will very carefully reconsider the vote that occurred on that matter.

I think there is the possibility of more than one interpretation of section 1913 of title 18 of the United States Code, which prohibits the executive branch using money appropriated by the Congress for lobbying purposes. I am not saying that anything criminal is occurring by reason of the lobbying of the White House or any part of the executive branch, but I think it is something to be looked at more closely than we can do in the consideration of this amendment today.

I would certainly urge defeat of the amendment, though we must look more closely at section 1913 of title 18 of the Code, and see to its modification, because it is certainly not being enforced.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from California.

Mr. WIGGINS. Mr. Chairman, I think consideration of this amendment which, in all due respect, is near frivolous, requires the consideration of another matter which is not intended to be frivolous. I urge the attention of those who support the bill for a moment.

The bill covers oral or written communications. I have observed lobbyists frequent the corridors of this building and engage in a form of communication, symbolic of which perhaps is—I do not know how to describe it for the record, but I am holding out my fist with my thumb pointing upward, and then pointing downward.

I do not know how to report this for the record, but the symbol is this (gesturing). For the record, I am sticking my thumb up in the air, and occasionally it is this. I would like to know whether or not that is an oral or a written communication.

Mr. DANIELSON. Mr. Chairman, if the gentleman will yield, I would consider that to be a digital communication, and so far as the bill is concerned they are exempt, so we may just see a generation of lobbyists running around the country, some with thumbs up and some with thumbs down. We probably cannot distinguish them from hitchhikers.

Mr. KINDNESS. Mr. Chairman, I would say in further response to the gentleman from California that it is graphic communication and thus could be interpreted as written.

Mr. HYDE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, before I yield to the gentleman from South Dakota, I was interested in the remarks of the gentleman from California, and I agree I think we will see more subtle forms of communication develop and we will think we are watching the third base coach for the Baltimore Orioles with the signals we are going to be getting out there on some of these bills.

I yield now to the gentleman from South Dakota (Mr. PRESSLER).

Mr. PRESSLER. Mr. Chairman, I would like to respond just briefly to I think four objections to my amendment to place some of the White House agencies and executive agencies under this bill.

First, it is said it is onerous and would inhibit communications. This same argument could be used equally against these groups we are placing this limitation on.

Secondly, it could be pointed out there are three branches of Government and indeed I would agree, and the executive branch is not supposed to lobby unless it is asked for by the legislative branch.

Let me say that is not the case. Let me say I have complained about these activities under both the Ford administration and the Carter administration, so it is not a partisan thing in my mind.

I think we all know in the hallways of Congress there are lobbyists from the executive agencies and the White House who not only bring information but also requests to vote a certain way. Indeed some of the agencies have more of a chance to reward or punish a Congress-

man for voting their way by having them do a keynote speech at some of the openings of their buildings or programs in that district.

Also it is pointed out presently the Federal Government is not supposed to lobby this body under the United States Code. So if the Federal Government is not lobbying, then there would be nothing to report and I really cannot see logical objections to this. I think it is a very important point to be made in terms of the functioning of the three branches of Government.

I think it is an extremely important issue in the way our Federal Government functions. If the legislative branch is to be separate from the executive branch, as the committee chairman has so eloquently stated, then indeed he should support this amendment because it helps that separation of the powers. If indeed the executive branch is trying to influence the legislative branch through open lobbying, it should be reported.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of words.

I will attempt to be brief.

I would like to ask a question of my very distinguished colleague, the gentleman from California (Mr. DANIELSON), the manager of this bill, who I think said that this amendment was "unseemly in the extreme."

Now my question is why is it unseemingly or extreme to make the White House and the Federal governmental agencies have to perform in the same way as companies, foundations, associations, labor organizations, firms, partnerships, societies, joint stock companies and others have to perform? Why cannot they perform in the same way? Is that not what the name of the game is as it relates to law to have everybody operating equally?

Mr. DANIELSON. Is that the question?

Mr. ROUSSELOT. That is the question.

Mr. DANIELSON. The answer, of course, is that we, the legislative branch and the executive branch are both parts of the whole one governmental organism which runs this country.

Mr. ROUSSELOT. Certainly, I understand that.

Mr. DANIELSON. Fine.

Mr. ROUSSELOT. That is basic.

Mr. DANIELSON. That is basic and I just wanted to be sure the gentleman had that point.

Mr. ROUSSELOT. I appreciate the gentleman calling it to my attention, though I obviously know that fact.

Mr. DANIELSON. I am always willing to assist my neighbor from the north in California (Mr. ROUSSELOT). However, it is unseemingly because, in order to have an operating and functioning government, I would say that that again is basic, that there must be a matching of opinions and communications between both the legislative and the executive branches.

Mr. ROUSSELOT. If I can interject briefly, we do have the concept of the "division of powers" which is clearly established in the Constitution. Why is it so unseemingly and wrong that the executive branch conform to the same kind of requirements that we are making the private sector and local levels of government perform?

Mr. DANIELSON. Because the Government of the United States, the executive portion of which is epitomized in the President, is not a corporation and it is not a labor organization.

Mr. ROUSSELOT. But I am sure the gentleman——

Mr. DANIELSON. If the gentleman does not want to hear the answer then of course I cannot finish.

Mr. ROUSSELOT. Go ahead. I certainly wish to understand the phrase "unseemly in the extreme."

Mr. DANIELSON. Fine.

The President of the United States is not a corporation, a company, a firm, a trade association, a labor organization, he is the President of the United States of America, your country and my country. He has the responsibility, indeed he has a constitutional mandate, to see to it that the laws are effectively executed, and the logical effect of this amendment is that there be required a disclosure of lobbying activities by the executive branch. Such activities are already reflected in the legislation which we consider, they are disclosed through that means, they are also disclosed through the various contacts between the Executive and the Members of the Congress in hearings, in subcommittee hearings and in the full committee hearings.

Mr. ROUSSELOT. Let us take an example.

Mr. DANIELSON. Does the gentleman refuse to yield further?

Mr. ROUSSELOT. Of course not, I would be glad to try to have a colloquy with the gentleman rather than a filibuster.

Mr. DANIELSON. Then let us "colloquyize."

Mr. ROUSSELOT. How does the gentleman explain all of the agreements that were made relating to the Panama Canal treaties by the White House? Was the gentleman aware of all those agreements, and what those were, and were those fully disclosed?

Mr. DANIELSON. Not to this gentleman because I am not a member of the other body.

Mr. ROUSSELOT. They were never disclosed to the gentleman?

Mr. DANIELSON. They were never disclosed to me. I was not privy to them date on what was going on in the other body and therefore was not fully up to date on what was going on in the other body. Also I was busy trying to put together a lobbying bill.

Mr. ROUSSELOT. I think this amendment would help solve this problem.

I might also add to the gentleman that the bill before us suggests that State and locally elected officials be subject to these requirements, and I really do not feel that the President, who campaigned on the basic belief that he should be subject to the same laws as everybody else should be handled different than anybody else. Therefore this amendment is just a matter of applying this potential law equally to all levels of government. This amendment is just a matter of equity. So that is why I rise in support of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Dakota (Mr. PRESSLER).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. PRESSLER. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

Seventy-five Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee of the Whole appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from South Dakota (Mr. PRESSLER) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 44, noes 350, not voting 40, as follows:

[Roll No 241]

Messrs. NEAL, LAFALCE, DICKS, FORD of Michigan, SAWYER, and SATTERFIELD changed their vote from "aye" to "no."

Mr. QUAYLE changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. RAILSBACK

Mr. RAILSBACK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RAILSBACK: On page 39, after line 7, add a new paragraph:

"(c) The report covering the fourth quarter of each calendar year shall also include a separate schedule listing the name and address of each organization from which the reporting organization received an aggregate of $3,000 or more in dues or contributions during that calendar year and listing the amount given, where (i) the dues or contributions were expended in whole or in part by the reporting organization for lobbying communications and solicitations and (ii) the total expenditures reported by the reporting organization under subsections (b)(2) and (b)(7) of this section during that calendar year exceed 1% of the total annual income of the organization: *Provided*, that the reporting organization may, if it so chooses, instead of listing the specific amount received, state the amount, in the following categories: (A) amounts equal to or exceeding $3,000, but less than $10,000; (B) amounts equal to or exceeding $10,000, but less than $25,000; (C) amounts equal to or exceeding $25,000, but less than $50,000; (D) amounts equal to or exceeding $50,000."

Mr. RAILSBACK. Mr. Chairman, yesterday I had introduced an amendment that would have required the reporting of the so-called major contributors. My amendment would have included individuals as well as any organization that would make a substantial contribution to a registered lobbying organization. The amendment that was just read would remove individuals from that reporting requirement.

I want all the Members of the House to know that under existing law, under the 1946 act, there is a requirement that contributors of more than $500 be reported and that law, to be honest, just like the rest of the 1946 act, has really not been enforced.

The amendment I am now offering would provide for disclosure of those organizations which contribute significant amounts of money, that is more than $3,000.

The amendment does not, I reiterate, does not apply to any contributions given by individuals to a lobbying organization. Clearly the most frequently voiced argument yesterday against the amendment I offered was that it would unfairly invade the right of privacy of individual contributors or have a potential chilling effect, thereby discouraging individuals from contributing to lobbying organizations. I happen to believe that my amendment was drawn in such a way that it would have been a good amendment because of the exemptions and waiver provisions. However, today I am offering an amendment which will eliminate that one particular troublesome aspect that so many of the opponents spoke about.

It is important to recognize that this amendment will serve one of the most critical purposes that can be served by the bill: It will disclose those instances in which organizations lobby indirectly by putting up large amounts of money to finance a "front" organization that actually carries out the lobbying. Whether a group is called the Calorie Control Council, the Electric Consumer's Council, Americans for a Better Society, Common Cause, or the Public Citizen, I believe that the public deserves to know the true identity of those groups who are providing substantial financial help to that particular organization.

My amendment makes it possible to discover what groups are providing significant funding, without creating even a potential to abridge the rights of individuals.

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman, I thank the gentleman for yielding. Yesterday, when I rose just before the vote on the gentleman's amendment, I was attempting to draw the attention of the committee to one of the concerns expressed about that amendment that may or may not have been real. That concern was expressed because the amendment required the disclosure of the amounts of money which were not necessarily committed to lobbying.

Would it not be the intent of the gentleman from Illinois (Mr. RAILSBACK) through this amendment, as well as the other amendment, to allow organizations to structure their books in such a way in which they could identify an arm of their organization, which is the lobbying organization, and therefore fulfill the commitments of this amendment by doing that and not require them to disclose the contributors to the other functions to which they might necessarily belong?

Mr. RAILSBACK. Yes. The answer, without a doubt, is yes. This could very easily be done.

Mr. KASTENMEIER. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. Mr. Chairman, I would like to compliment the gentleman from Illinois (Mr. RAILSBACK) on his amendment and indicate my support for it. I think it is important that we do adopt this amendment because if we do not we will be taking a step backward both from the existing law and, in fact, the bill that was passed by this House overwhelmingly in 1976 had a section in it to this effect and was much more stringent than this.

I would also say that I think, whether I would like to compromise this far, it does reflect the philosophy of the bill, that is, to deal with organizations rather than individuals, and I think it ought to be overwhelmingly adopted.

Mr. WIGGINS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, on yesterday we had a very similar amendment which the House voted down. The only change from the wording of the amendment of yesterday is that its scope is limited to disclosure of contributions of organizations as distinguished from individuals. The changes in the Railsback amendment do not respond to the problem which prompted the House to reject the original amendment.

The associational rights which were recognized in NAACP against Alabama were in the context of an organization maintaining that lawsuit. Its rights were offended, said the court, by the compelled disclosure of its contributors. That is changed not one wit, of course, by saying that we are only interested in some of your contributors. This amendment contains, therefore, the same constitutional vice which infected the other amendment and should be rejected for identical reasons.

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from California.

Mr. EDWARDS of California. I thank the gentleman for yielding.

Would not the gentleman agree that even though organizations only would be affected here, names of individual members would still be disclosed in connection with the audits and examinations made necessary by the responsibilities of the General Accounting Office to determine if the organization is in compliance? So I do not think that this is very much of an improvement, and I agree with the gentleman.

Mr. WIGGINS. It is a serious risk. In this bill we have been rather cavalier with respect to the constitutional rights of organizations because, as the gentleman well knows, they are equally entitled to protection of those rights granted to individuals and which are involved in this bill. The amendment differentiates unwisely and I think improperly between the two classes.

Mr. MIKVA. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Illinois.

Mr. MIKVA. I thank the gentleman for yielding.

Let me say to my distinguished colleague that I think the reasons that were valid yesterday in opposition to the Railsback amendment—and I did oppose it yesterday—are not present in this amendment, and that the very combination of constitutional and policy questions which were addressed to the original amendment are not addressable to this amendment.

There is no constitutional right of an organization to remain anonymous. There is no right of privacy that extends to an organization. Almost none of the constitutional protections that we surround individuals with apply to organizations, and it is, to my mind, both constitutionally and policywise valid to expect organizations that contribute in substantial amounts to have their identity known.

I strongly disagree with my other colleague, the gentleman from California, that it does not necessarily follow that the membership needs to be made known, and it seems to me that what the gentleman from Illinois is doing is trying very carefully to answer the area which the Supreme Court has not suggested is improper, because we are not dealing here with individuals who can be discriminated against or persecuted, or whose privacy can be impinged upon by this disclosure.

Mr. WIGGINS. The Supreme Court defined the constitutional right involved in the NAACP against Alabama as a first amendment right. The Court characterized it as a right of association and within the first amendment's protection.

Let me ask the gentleman this: Does or does not the first amendment apply to an organization?

Mr. MIKVA. Will my colleague, the gentleman from California, yield again?

Mr. WIGGINS. I yield to the gentleman from Illinois.

Mr. MIKVA. Emphatically it does, and the Supreme Court decision specifically said it was talking about the rights of the individuals that made up the NAACP.

Mr. WIGGINS. That is a novel proposition of law. The Washington Post, an organization, would be surprised to find itself outside of the protection of the first amendment.

Mr. KINDNESS. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

I would seek to clarify something that has been argued yesterday and again today about the existing law to the effect that contributions of $500 or more are supposedly required to be disclosed. This is made clear in the Harris case to be only where the contribution is for the purpose of lobbying. There is no such distinction in the amendment of the gentleman from Illinois (Mr. RAILSBACK) offered yesterday or today. In other words, all contributions, if they happen to be from organizations to a church, for example, which uses some small portion, like 1 percent of its overall income, for lobbying, would qualify for disclosure. Organizations do, indeed, contribute to churches on occasion. So I think we are faced today with essentially the same amendment we had yesterday that was defeated by the House. The House in its wisdom turned down this amendment. It really has not changed any. The principle remains the same and the amendment ought to be defeated just as soundly.

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman, the point the gentleman is making is clearly the point I just raised with the gentleman from Illinois. It seems to me there is a discretion in this House to establish legislative precedent that the intent of the amendment is to get directly at the contributions affecting lobbying activity and the House would not be offended by regulatory action which would only require that type of disclosure.

Mr. KINDNESS. Mr. Chairman, if the gentleman will allow me to respond on that point, I do not see how we can write statutory law on such a sloppy basis as that and expect it to be interpreted to the contrary.

Mr. GARY A. MYERS. Mr. Chairman, if the gentleman will yield further, it seems to me it is not unlike any other practice that goes on here daily, that an amendment drafted into law is not so specific as to exclude some latitude in interpretation. The House in its wisdom discusses the intent in such legislative drafting to give guidance to the regulatory body. All I am saying is that we are dealing with a bill that is addressing the question of lobbying and lobbying activity. It seems to me clearly the intent has already been described and we did clearly define our intent by the colloquy we have had here.

Mr. KINDNESS. Mr. Chairman, if the gentleman has not been disappointed by prior experiences with legislative history on that basis, the gentleman certainly will be in the future if this amendment passes.

I do not see how we can pass an amendment that says one thing and expect to treat it as meaning something entirely different.

Mr. Chairman, I would urge defeat of the amendment for the very good reasons that it was defeated yesterday.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Mr. Chairman, let me just reiterate what I believe I said yesterday, that is, that the dues or contributions must be expended in whole or in part by the reporting organization on lobbying communications.

Mr. KINDNESS. In what part?

Mr. RAILSBACK. In whole or in part.

Mr. KINDNESS. In what part?

Mr. RAILSBACK. I think the gentleman from Pennsylvania is saying that if someone wants to provide funds, and remember, we are talking about lobbying organizations that trigger the lobbying formula, so it is not as if money can be spent for anything. The money must be spent in whole or in part for communications and they are registered lobbyists.

Mr. KINDNESS. Mr. Chairman, I am sure the gentleman will allow that we cannot call a pickle an onion and expect people to believe it, and that is exactly the problem with the amendment, that it does not allow for that interpretation.

Mr. RAILSBACK. Mr. Chairman, if the gentleman will yield further, I can understand how the gentleman would be concerned if one individual was giving money. I understood the gentleman's argument yesterday. I happen to disagree with it, but now we are talking about not individuals, but organizations that are contributing money, some of which or all of which is being spent for lobbying. Under existing law there is a requirement that even $500 be reported by the contributor.

Mr. KINDNESS. If specifically given for the purpose of lobbying.

Miss JORDAN. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment offered by the gentleman from Illinois.

Mr. Chairman, it is amazing to me as I have listened to this debate that somehow we have cured the ubiquitous infirmity of yesterday's amendment in today's amendment, because yesterday we talked about personal contributions and today we talk about organizations.

I think that it is unfortunate that this novel approach of treating organizations differently under the first amendment than individuals has somehow seemed to gain some acceptance.

The point is the same infirmity is present in today's amendment that was present in yesterday's amendment. And what is that infirmity?

The governmental interest is not there to show any relationship to the information that is sought to be disclosed. There is no requirement whatsoever that this contributing organization which must now be disclosed under this amendment had anything to do with influencing the policy of the lobbying organization.

What the court has said in the cases that we have mentioned more than once is that if, in fact, we are going to erode ever so gently those rights that we say are sound and good and must be upheld, if we choose to do that in this body, then there must be a correlation between the governmental interest and the information which is sought to be disclosed.

Mr. Chairman, I would ask any Member in this Chamber to give us the answer to this question: What business is it on the part of the Government as to which organization contributes to the lobbying organization?

If anything, this amendment would give the Government a license to pry, which it should not have and ought not to have, and I would hope that the amendment is defeated.

Mr. MOORHEAD of California. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, I think we have to look at exactly what the amendment does. It requires that any organization which spends more than 1 percent of its total income for lobbying purposes, to report all of its organizational contributors.

This kind of an amendment, if agreed to, is going to be very harmful on church and religious organizations and on any kind of an organization that lobbies for unpopular purposes. It is going to stagnate the first amendment rights of the people of this country. The net effect of the Railsback amendment is to discourage organizational contributions to all such entities.

Just as was the case yesterday, the $3,000 trigger figure is still far too low. A contribution of $3,000 a year hardly represents an opportunity for the donor to control the policies or views of the organization to which he is contributing. Many times a contributing organization or a contributor will believe in the basic purposes of an organization but will not support all of its lobbying activities. Certainly almost every Member of this organization contributes to churches or groups that may lobby for things that they do not believe in, but they still support the basic purpose of the organization to which they are contributing.

I think the constitutional problem raised with respect to dues and contributions disclosures by individuals can be applied here. Certainly we are still talking about the exercise of freedom of speech, the rights of association, and even the free exercise of religious beliefs.

If we look at the types of organizations that oppose this type of an amendment, we would have to include almost every church in the country. We would also include many other groups such as the American Civil Liberties Union, the National Association of Manufacturers, the Chamber of Commerce, and many environmental groups. We would include, in addition, many groups that have a good and solid purpose but which would lose the support they get if the contributions were reported.

Mr. Chairman, I ask for a "no" vote on the amendment.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I opposed the Railsback amendment last night because I felt that it was damaging to free speech. But this is different.

If I understand it correctly—and I am not yet convinced as to which way I will vote—this would apply only to organizations, and to organizations in regard to contributions of 1 percent of their gross revenue or $3,000, either one.

Mr. Chairman, I have been working—and that is what took me from the floor—in this investigation of the Korean connection to Congress. We are discussing organizations here, and we ought to know when they are contributing to other organizations, that they are part of the picture. I voted against the Railsback amendment last night, because it involved individuals. But I believe we ought to know what organizations are doing. If I am a member of a church and contributing to a church, I would like to know to which organizations my church organization is contributing. Otherwise we will have a system for influencing Congress that we know nothing about. These organizations are being set up every day. They have very fine-sounding names. They may be called Pacific and Asia Development Corp. or Pacific and Asia Foundation. We do not know what they are doing, and we should.

Mr. KINDNESS. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentlewoman for yielding.

Mr. Chairman, do I understand that the concern is that an organization may be able to have an effect on legislation, where an individual would not, through such contributions?

Mrs. FENWICK. No. What I said on that point was that this amendment does not apply to individuals. It applies only to organizations. And when one organization is contributing to another organization which is a lobbying organization, I think we ought to know it.

Mr. KINDNESS. Mr. Chairman, if the gentlewoman will yield further, could it not be stated just as well that an individual contributing to an organization, a lobbyist, could just as readily influence the outcome of legislation?

Mrs. FENWICK. I do not like to apply it to individuals. I am not a lawyer, but I see something there I do not like. I think an organization is different.

Mr. KINDNESS. I would agree with the gentlewoman that there is not the basis for either the individual or the organization to be disclosed.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I urge support of the Railsback amendment to require disclosure of major contributions to lobbying organizations.

There have been some fears that this amendment, or indeed any legislation in this field, would have a so-called chilling effect on the constitutional rights of citizens to petition their legislature. In my judgment, those fears are overblown.

We should always, of course, be alert to potential restrictions of anybody's rights, but we ought not be scared away from needed legislative improvements merely because some people raise the specter of constitutional problems.

For instance, I cannot think of any right more important or fundamental than free speech in the election process. In the election law, we required not only reporting of contributions of individuals and groups, but we have even restricted the right of free speech of individuals and groups by limiting what they contribute to congressional campaigns.

In the Railsback amendment there are no restrictions on contributions. It does not apply to individuals at all. It only requires the reporting of contributions of groups over $3,000.

In the election law we require reporting of contributions over $100 for both individuals and groups. The Railsback amendment, which exempts individuals, sets a reporting limit that is 30 times higher than the election law.

I do not think the rights of free speech are being violated here if they are not violated in the election law. This modest reporting requirement is not chilling. It is not even air-conditioned. It will not affect anyone or anything or anybody except large contributors from fairly large organizations to lobbying groups.

The large contributors ought to be revealed because lobbying may have more effect on the direction or policy of this republic than the very small contributions which we require to be reported under the election law. And if one law makes sense, certainly the other does too.

I believe that the Railsback amendment is a very modest step toward sunshine in lobby disclosure, and I hope that it will be passed today.

Mr. FLOWERS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

I shall be very brief, Mr. Chairman. I would like to ally myself with the remarks of the gentlewoman from Texas.

There is a lack of even-handedness in the approach of my dear friend, the gentleman from Illinois (Mr. RAILSBACK). I think the amendment he offered last evening had merit, but this one is not well balanced and I would oppose it.

Mr. Chairman, there is no rhyme or reason to exempt individuals if organizations should have to make such a report. What is good for the goose ought to be good for the gander. That is my feeling on the matter.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. FLOWERS. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Mr. Chairman, I have the highest respect for my friend, the gentleman from Alabama (Mr. FLOWERS); but I find it rather ironic that the gentleman is the one who in considering the lobbying bill and in creating its major thrust differentiated between individuals and organizations. I really did not want to make that distinction, but the gentleman, in drafting this bill, is really the principal architect of not requiring individuals who retain lawyers to lobby to come under the coverage of the bill.

Mr. FLOWERS. Mr. Chairman, the reason for that, as the gentleman knows, was to create a simple mechanism in this bill insofar as basis coverage is concerned.

I still think that we ought to have a bill that cuts as evenly as possible across the entire spectrum. It would not do that if the gentleman's amendment is adopted, and I urge a no vote on the amendment.

Mr. FISH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment for the views very adequately expressed already. However, a proponent of the amendment has stressed a correlation between the measure before us and the Federal Election Campaign Act.

Mr. Chairman, I wish now to yield to my colleague, the gentleman from California (Mr. WIGGINS), who, in his views in the committee report, took great pains to distinguish that act from the present measure.

Mr. WIGGINS. Mr. Chairman, I thank the gentleman for yielding. I will only take a moment.

I wish simply to say that if first amendment rights are implicated, that does not end the matter. Of course, they were implicated in the elections statute, as they are implicated here. Also, first amendment rights can be regulated.

It is conceded that this bill does implicate first amendment rights; but now we must proceed and decide whether we can regulate them. That requires an analysis of a public evil, and a carefully drafted statute which responds narrowly to that evil. That is the holding of the NAACP and of many other cases.

Given that as the state of the law—and I represent it to be the law—the question here is, then, a factual one: What is the public evil? Where is the record?

At present the abusive conduct has not even been identified with respect to lobbying, as against the massive evidence of abusive conduct in the election field, which provides a clear track record upon which we could regulate such conduct in the election field, a record which is totally absent in this case.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. RAILSBACK).

The question was taken; and on a division (demanded by Mr. RAILSBACK), there were—ayes 27, noes 28.

RECORDED VOTE

Mr. RAILSBACK. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 251, noes 135, not voting 48, as follows:

[Roll No. 242]

Dellums	Mikulski	Traxler
Dent	Nix	Tucker
Dicks	O'Brien	Whitley
Duncan, Oreg.	Pursell	Winn
Edgar	Rahall	
Foley	Rhodes	

The Clerk announced the following pairs:

On this vote:

Mr. Kazen for, with Mr. Shipley against.

Mr. Howard for, with Mr. Jenrette against.

Mr. Teague for, with Mrs. Burke of California against.

Mr. Rahall for, with Mr. Dellums against.

Mr. Runnels for, with Mr. Krueger against.

Mr. Dent for, with Mr. Conyers against.

Mr. Traxler for, with Mr. Whitley against.

Mr. Rodino for, with Ms. Mikulski against.

Mr. John Burton for, with Mr. Stokes against.

Mr. YATES and Mr. LLOYD of California changed their votes from "aye" to "no."

Messrs. VENTO, GREEN, THOMPSON, HANNAFORD, WAGGONNER, and WHITTEN changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. VOLKMER

Mr. VOLKMER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VOLKMER: Page 41, line 7, delete the "." and insert in lieu thereof "; and".

Page 41, following line 7, insert the following new subsection:

"(7) to refer to the Attorney General all apparent violations of any provisions of this Act, or any rule or regulation promulgated in accordance therewith."

Mr. VOLKMER. Mr. Chairman, I will not take the full 5 minutes, because I believe that the amendment has been distributed to both the majority and the minority members of the committee.

The amendment, to briefly explain it, is just a clarification amendment to require any apparent violations coming to the attention of the Comptroller General to be referred to the Attorney General, the Attorney General being, of course, the enforcing agency.

Mr. DANIELSON. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from California.

Mr. DANIELSON. Mr. Chairman, I have looked over the amendment and studied it and I support it.

Mr. MOORHEAD of California. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from California.

Mr. MOORHEAD of California. Mr. Chairman, we have no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. VOLKMER).

The amendment was agreed to.

Mr. DANIELSON. Mr. Chairman, I ask unanimous consent that all debate on the bill and all amendments thereto cease at 5 o'clock p.m. this afternoon.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. KINDNESS. Mr. Chairman, reserving the right to object, there is a question that needs to be presented, and that is: How many amendments are at the desk?

Mr. DANIELSON. Mr. Chairman, if the gentleman will yield, I am not able to respond to the gentleman's question.

The CHAIRMAN. The Chair will advise the Committee that there are 13 amendments at the desk. There are several amendments that have been printed in the RECORD.

Mr. KINDNESS. Mr. Chairman, further reserving the right to object, there are Members of the Committee who still have amendments pending at the desk. For example, I have been seeking recognition for some time without an opportunity to present an amendment.

Mr. MILLER of California. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

MOTION OFFERED BY MR. DANIELSON

Mr. DANIELSON. Mr. Chairman, I offer a motion.

The Clerk read as follows:

Mr. DANIELSON moves that all debate on the bill and all amendments thereto be terminated at 5 o'clock p.m.

The CHAIRMAN. The question is on the motion offered by the gentleman from California (Mr. DANIELSON).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. DOWNEY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 18, noes 215, not voting 61, as follows:

[Roll No. 243]

Frey	Myers, Michael	

Mr. WATKINS and Mr. TRIBLE changed their vote from "aye" to "no."

So the motion was rejected.

The result of the vote was announced as above recorded.

Mr. DANIELSON. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. MEEDS, Chairman of the Committee of the Whole House on the State of the Union,

reported that that Committee, having had under consideration the bill (H.R. 8494) to regulate lobbying and related activities, had come to no resolution thereon.

LEGISLATIVE PROGRAM

(Mr. DEVINE asked and was given permission to address the House for 1 minute.)

Mr. DEVINE. Mr. Speaker, I ask for this time for the purpose of inquiring of the acting majority leader, the gentleman from California (Mr. DANIELSON) the schedule for the balance of the week and for the coming week.

Mr. DANIELSON. Mr. Speaker, will the gentleman yield?

Mr. DEVINE. I am happy to yield to the gentleman from California.

Mr. DANIELSON. I thank the gentleman.

Mr. Speaker, the program for next week will be as follows:

On Monday, the House meets at noon. We have the District Calendar, but there are no bills on that Calendar.

There are no bills on the Suspension Calendar.

We will take up H.R. 11504, Agricultural Credit Act of 1978, which has an open rule and 1 hour of general debate.

Following that, we will take up H.R. 11401, the NASA Authorization Act of 1979, with an open rule and 1 hour of debate.

On Tuesday the House meets at noon.

There are no bills on the Suspension Calendar.

We will consider H.R. 11877, the Peace Corps Act amendments, under an open rule with 1 hour of general debate; to be followed by—

H.R. 1, Ethics in Government Act, under an open rule with 4 hours of general debate. We hope to take up the rule and complete it plus general debate only on Tuesday.

On Wednesday the House meets at 3 p.m., to continue with—

H.R. 1, the Ethics in Government Act, and we hope to complete consideration.

On Thursday the House will meet at 11 o'clock a.m. to consider—

House Resolution 1049. Reorganization Plan One on the EEOC; and

H.R. 11302, the EPA authorizations, fiscal year 1979, under an open rule with 1 hour of general debate.

We also anticipate calling up one committee funding resolution.

On Friday the House will meet at 11 o'clock a.m., taking up—H.R. 11832, Arms Control and Disarmament Agency authorizations, under an open rule with 1 hour of general debate; and

House Joint Resolution 859, supplement appropriations for USRA, subject to a rule being granted.

The House will adjourn by 3 p.m. on Friday and by 5:30 p.m. on all other days except Wednesday.

Of course, conference reports may be brought up at any time and any further program may be announced later.

Mr. DEVINE. Mr. Chairman, I notice a startling absence on the schedule for next week of the Lobby Disclosure Act which we have been debating for the last 2 days. Has the leadership abandoned further consideration of this or put it over for some other time or will it come up again later?

Mr. DANIELSON. If the gentleman will yield further, no, the bill has not been discarded or abandoned and there is no plan to do so. However, because of the heavy schedule already planned, that bill will be taken up the following week.

Mr. DEVINE. The leadership feels the schedule for next week takes priority over the Lobby Disclosure Act; is that correct?

Mr. DANIELSON. It is a heavy schedule for next week, and inasmuch as the manager of the bill felt that it would be desirable to regroup, that bill has been put over until the next week.

Mr. DEVINE. I thank the gentleman for his confession.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule on Wednesday of next week be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

ADJOURNMENT TO MONDAY, APRIL 24, 1978

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

AUTHORIZING CLERK TO RECEIVE MESSAGES AND THE SPEAKER TO SIGN ENROLLED BILLS AND JOINT RESOLUTIONS FOUND TRULY ENROLLED NOTWITHSTANDING ADJOURNMENT

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that notwithstanding the adjournment of the House until April 24, 1978, the Clerk be authorized to receive messages from the Senate, and that the Speaker be authorized to sign any enrolled bills and joint resolutions duly passed by the two Houses and found truly enrolled.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION FOR COMMITTEE ON SCIENCE AND TECHNOLOGY TO HAVE UNTIL MIDNIGHT FRIDAY, APRIL 21, 1978, TO FILE LEGISLATIVE REPORT ON H.R. 12163, DEPARTMENT OF ENERGY AUTHORIZATION ACT, FISCAL YEAR 1979

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the Committee on Science and Technology may have until midnight Friday, April 21, 1978, to file the legislative report on H.R. 12163, Department of Energy Authorization Act for fiscal year 1979.

The SPEAKER pro tempore (Mr. DANIELSON). Is there objection to the request of the gentleman from Washington?

There was no objection.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO FILE REPORTS

Mr. NICHOLS. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services may have until midnight tonight, April 20, 1978, to file reports on the bill (H.R. 11797) survivor benefits for reservists; and the bill (H.R. 11823) pre-1945 reservists.

The SPEAKER pro tempore (Mr. DANIELSON). Is there objection to the request of the gentleman from Alabama?

There was no objection.

STATUS OF TAX REFORM AND TAX REDUCTION ACT

(Mr. VANIK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. VANIK. Mr. Speaker, I would like to start out by reporting to you where the Committee on Ways and Means stands at this moment on President Carter's Tax Reform and Tax Reduction Act.

If at this point the committee had adopted all of the recommendations in the administration proposal, we would have picked up $7 billion in additional revenues. Instead, we are reforming at a negative rate of $300 million to $1.3 billion, depending on the revenue loss incurred by including the charitable deduction in the standard deduction.

There is every indication that the loss of Treasury revenue will increase as we move further along. We have not yet considered the major losers such as capital formation, the deferral of dividend income, the increase in the investment credit, or the proposed relaxation of capital gains taxation.

The administration bill provides for a 1979 deficit of $60.6 billion. If we proceed further with the tax reform bill, we will reform ourselves into a 1979 budget deficit of at least $70 billion or upwards.

There is strong sentiment to cut taxes and very little concensus on acceptable reforms.

The administration's proposal completely disregard temporary tax cuts which expire at the end of this year. These include:

[In billions]

The general tax credit, $35 credit per person	$7.2
The earned income credit	----
Corporate tax rates (small business surtax exemption)	1.1
Jobs credit bill	.7
Total	9.0

The administration's bill closes $6.5 billion in loopholes and opens up $9.5 billion in new loopholes and preferences

such as permitting 90-percent utilization of the investment credit and extending it to real estate.

For an average American family of four with a $15,000 income, the Administration proposal provides a tax cut of of $258 and takes away and terminates an existing tax credit to that family of $35 per person or $140. The net tax cut to such a family would total $118 per year, which is offset two or three times over by the increased rate of inflation the huge deficit will generate.

The proposal offered by Mr. PICKLE and myself would eliminate all tax cuts and all reforms and limit the tax bill to a simple renewal of those previously enacted tax cuts which expire this year. Failure to renew these proposals would result in an across-the-board tax increase by the termination of the general tax credit under which every taxpayer received a $35 credit for himself and every dependent. We cannot increase individual taxes or the taxes on small business. Our proposal would reduce the 1979 deficit from $60.6 or $70 billion to $28 billion.

It will be argued by some economists that without a tax cut we are withdrawing almost 20 percent of the GNP in Federal taxes. The restraint on this percentage can be achieved in either one of two ways: One, reducing Federal expenditures by increasing tax cuts; or two, increasing the gross national product.

The gross national product can be moved upwards. The climate for business and economic growth will be dynamically improved by reducing the inflationary impact of a $60 to $70 billion deficit. The stagnant level of the gross national product in the first quarter is the proximate result of the accelerated rate of inflation. A $28 billion indeficit would signal a massive attack on inflation—it would restore national confidence in the judgment of the Congress.

In the late sixties and early seventies, tax cuts got inflated credit for strength in the economy. In the late sixties, there was the full employment propellant of the Vietnam War. In later years, the Federal revenue items was inflated to include trust fund contributions which were not included in earlier years. Social security taxes were increased and added to Government receipts. In this same period—Federal expenditures were increased to include revenue sharing and massive transfers of revenues to the States which now range between $60 and $100 billion. The ratio between the GNP and government receipts must be amended to include these factors.

The reduction of the administration's 1979 deficit from $60 to $70 billion to $28 billion will insure no increase in the price of imported oil and restore confidence in the dollar—at home and abroad.

If we have the wisdom to move in this direction, I believe it will win the support and gratitude of the American people. It will be a viable congressional initiative on economic policy which can turn this country around. If the proposal of the administration is wrong and massive tax cuts and deficits are incurred—we cannot correct the error. We can always and anytime cut taxes—but history has proven that revenues lost are almost never restored.

FREEDOM ON TRIAL

(Mr. CRANE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. CRANE. Mr. Speaker, it saddens me greatly to have to address you, once again, as I did last year on the case of Pavel Abramovich and his family who are still being held in the Soviet Union and have been refused permission for 7 years to emigrate to Israel.

Today, April 20, 1978, Pavel Abramovich goes on trial for what the Soviets term "parasitism." Parasitism for those not familiar with the term, is an odious classification given to those who do not have a job in the Soviet Union.

These people have either not wanted to work in the job they were placed in and subsequently been fired or they have exercised a freedom—one which we often take for granted—of choosing their own occupation and been punished for it by firing. Once fired, they cannot find work anywhere and are labeled as parasites by the Soviet Union.

Pavel Abramovich, formerly a respected electronics engineer, now lists his occupation as Hebrew teacher. This would be unremarkable in any place but the Soviet Union, where it is impossible to obtain textbooks, training, or the official recognition accorded teachers of other foreign languages. Considered the tongue of anti-Soviet "Zionists," Hebrew is offered only to a few Russians who are studying ancient languages. There is no education for future rabbis, and for most, Hebrew is forbidden. Pavel Abramovich is one of a small band of heroic figures, the Hebrew teacher of Moscow. Most of them are self-taught, and all are dedicated to a future in Israel, the land where their beloved language will be finally put to use.

Throughout the long wait since Pavel, with his wife and young son, applied for a visa to Israel, he has demonstrated amazing courage on behalf of other Soviet Jews. He publicly renounced his Soviet citizenship, claiming instead, Israeli citizenship. He has sent appeals to the United Nations Human Rights Commission, issued press statements, and been arrested on several occasions for demonstrating in protest to the treatment accorded Jews in Russia. His home has been raided and personal property confiscated, including his typewriter and books on Jewish history.

Last May, Abramovich and 20 other activists were visited by agents of the KGB, who warned them that unless they found work within a short time they faced arrest for "parasitism;" this despite the fact that Pavel had been fired when he applied for his visa and has since been refused all work.

During November and December of 1976, his home was again searched and his tape recordings of Jewish songs and Hebrew lessons were taken. Pavel appeared at the offices of Soviet officials with Prof. Benjamin Fain attempting to explain the planned Symposium on Jewish Culture, of which Abramovich was a committee member—but in vain.

Today, if convicted, Abramovich will most likely be incarcerated along with other men and women who have done what he has done in the Soviet Union: pursue basic human freedom and dignity. And what will happen to his family? I hope that I will not have to speak on their behalf next year, but can report instead that the Abramovich family is united and has been given permission to emigrate to Israel.

NO FRIENDS FOR THE UNITED STATES IN LATIN AMERICA

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RUDD. Mr. Speaker, the announcement by Panama's so aptly termed cacique Omar Torrijos, right after Senate ratification of the Panama Canal Treaty, that he might have destroyed the canal if the vote had gone the other way clearly tells the world that the United States caved in to his blackmail.

It is a sad day for the American people and the free world that this now becomes a footnote to the history of this new treaty. Respect for the United States, and the credibility of our leadership in the world, have suffered badly as the result of this treaty and the way it was approved through the process of intimidation. We will feel the adverse effects of this mistake in the future.

The United States certainly made no friends in Latin America as the result of this new treaty despite claims to the contrary. Latin affairs editor Harold Milks of the Arizona Republic wrote an excellent analysis on this point, which appeared in that newspaper yesterday. I would like to include his column at this point in the RECORD:

INSTEAD OF GRATITUDE, CARTER CAN EXPECT TROUBLE FROM SOUTH AMERICA

(By Harold K. Milks)

The flood of gratitude President Carter expects to descend on his head from Latin American countries for steering the canal treaties with Panama through U.S. Senate approval may be a long time in coming.

Treaty supporters have long billed approval as a great victory for hemispheric unity. But Carter has stepped on too many delicate toes of Latin American government leaders, including Panamanian strongman Gen. Omar Torrrijos, to expect any bouquets now that the voting is over.

While publicly expressing their satisfaction in the formal Declaration of Washington last September over the Carter administration's program to hand over the canal to Panama, many had secret reservations.

"These are going to emerge now," said one Latin American diplomat whose own president gave only lukewarm support to the canal pacts. "Many countries will think not of Panama, but of the human rights campaign by which Carter publicly embarrassed them."

The human rights issue is not the only one between Washington and Latin American capitals which could postpone or destroy any honeymoon between the Carter administration and its Latin neighbors. But it is certainly the most general, with most nations of Central and South America having found themselves targets of the Carter arrows against abuse of human rights.

Brazil is far more interested in completing its nuclear pacts with West Germany and

maintaining the world prices on coffee than in what happens to the canal. The Carter administration actively opposed the nuclear agreement.

Chile has had its international credit damaged by Carter pressure on development banks. Uruguay's military-controlled regime reacted hotly to Carter criticism of its handling of political prisoners.

Far from the bottom of the list is Panama itself. While Gen. Torrijos, during last September's visit to Washington, performed as expected by most national leaders from the hemisphere, his position has been changed radically by developments preceding the final Senate vote.

The parade of U.S. senators to Panama for a personal inspection of both the canal and Gen. Torrijos left behind a huge reservoir of ill will. Many Panamanians, including both those for and against the treaties, called these visits Senate interference in Panama's internal affairs.

A major factor in Carter's problems with Latin America goes back over the terms of previous presidents—the great ease with which Latin American leaders raise cries of interference or humiliation whenever Washington adopts a stance opposing their own desires.

The DeConcini reservation giving the United States the right to send troops to Panama if operation of the canal is threatened, either during the interim or after Panama takes control in the year 2000, may haunt Carter, who accepted it to help assure Senate ratification of the treaties.

This reservation by Arizona's junior senator, Democrat Dennis DeConcini, as well as other changes and amendments made after Panama approved the pacts, brought a wave of hostility against both Washington and Torrijos in Panama.

Panama's ambassador to Washington called the treaty amendments humiliating and leftist foes of the pacts in Panama said they represented intervention in Panama's internal affairs.

Senate investigation of drug charges against members of the Torrijos family caused Panamanian dictator to lose face both at home and abroad, though no direct charges were raised against him personally. A proud man, Torrijos probably will remember this embarrassment in future dealings with the United States

"Eventually approval of the Panama treaties may bring President Carter more problems than solutions," said a retired U.S. diplomat long active in Latin America.

"It would be wonderful if the good will predicted to come from giving up the canal really materializes. But look out for trouble in the wake of Senate approval, especially if something happens to interfere with smooth operation of the waterway."

FEDERAL RESERVE MEMBERSHIP ACT OF 1978

(Mr. STANTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. STANTON. Mr. Speaker, today, I have introduced H.R. 12279, the "Federal Reserve Membership Act of 1978." I am deeply concerned about the current decline in Federal Reserve membership and its implications for the vitality of the Fed and the Nation's monetary policy. Significant problems which may result from a continued decline in Federal Reserve membership are: the Fed's monetary control could be weakened; the Nation could face increased risks of liquidity crises; the Fed may encounter difficulties in its predicting and target capabilities; and a substantial loss to Treasury revenues might be experienced. Statistical evidence compiled by the Federal Reserve indicates that both the percentage of banks belonging to the Fed and the percentage of gross deposits held by members have dropped significantly in recent years. Since 1970 over 400 banks have withdrawn from the Federal Reserve System; and in 1977 alone 45 banks left the Fed. While many explanations have been offered for the loss of Fed membership, the monetary cost of membership—chiefly maintaining reserve requirements—is the reason most frequently cited for withdrawals from the system.

Proposals suggested to arrest the downward trend in membership have taken a variety of forms: uniform reserve requirements, decreasing reserve requirements, pricing of system services, or interest payment on reserves. Independently, each of these proposals presents problems which make them unworkable. I feel that the best approach for stopping the current outflow of Fed membership is a combination of pricing and interest payments on reserves. This would insure that the benefits of Fed membership outweigh the costs. Thus, the two major provisions of the bill are: First, the explicit pricing of Federal Reserve payment services; and second, the payment of interest on required membership reserves.

The explicit pricing of Fed payment services would enable members to pay only for those services which they receive. The payment of interest on required reserves would enable members to turn their presently idle reserves into investments producing a market rate of return. Moreover, as another possible means of reducing the membership burden, my bill would direct the Fed to study the feasibility of permitting member banks to keep a portion of their reserves in Treasury securities.

In addition to addressing the Fed membership problem, my bill seeks to promote increased efficiency and competition within the banking industry. Along these lines, the bill requires that all Federal Reserve payment services be priced competitively with those offered by private institutions; and it opens access to Federal Reserve payment services to all depository institutions.

Timely action along the lines of this bill has been publicly suggested by the Chairman of the Federal Reserve Board, William Miller. I realize, however, that this is a highly complex issue which has far-reaching implications not only for the future of the Federal Reserve, but also for the entire banking system. Thus, I am hopeful that the introduction of this bill will encourage the Congress to give the thorough attention warranted by this issue.

Mr. Speaker, at this point I insert the text of the bill as well as a section-by-section analysis.

SECTION-BY-SECTION ON FED MEMBERSHIP BILL—H.R. 12279

TITLE

Federal Reserve Membership Act of 1978.

SECTION 2—PRICING OF SERVICES

Amends section 11 of the Federal Reserve Act to direct the Fed to establish a schedule of fees for payment services by July 1, 1979, and to put that schedule into effect by July 1, 1980. Subsection (c) establishes three pricing principles to be followed in setting the schedule of fees. The three principals are as follows:

(1) payment services priced explicitly;

(2) services priced competitively within private institutions; and

(3) payment services shall be made available to all depository institutions.

SECTION 3—INTEREST ON RESERVES

Amends section 19 of the Fed Act to pay interest on required reserves. The interest rate shall not exceed the 3 month Treasury bill rate during the preceding quarter.

Subsection (2) directs the Fed to submit, by July 1, 1981, to the Congress a study on the feasibility of member banks investing a portion of their required reserves in Treasury securities.

Subsection (3) directs the Fed to provide a full account of the impact of this Act in its annual report.

SECTION 4—DEFINITIONS

Definitions and technical amendments to the Fed Act.

H.R. 12279

A bill to amend the Federal Reserve Act to provide for the pricing of Federal Reserve System services and the payment of interest on reserves

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Reserve Membership Act of 1978."

PRICING OF SERVICES

SEC. 2. (a) The Federal Reserve Act is amended by inserting after section 11 (12 U.S.C. 248) the following new section:

"SEC. 11A. (a) Not later than July 1, 1979, the Board of Governors shall have prepared and shall publish for public comment a set of pricing principles in accordance with this section and a proposed schedule of fees for Federal Reserve System services; and not later than July 1, 1980, the Board shall put into effect a schedule of fees for such services which is based on those principles.

"(b) The Federal Reserve System services which shall be covered by the schedule of fees under subsection (a) are—

"(1) currency and coin services;

"(2) check collection services;

"(3) wire transfer services;

"(4) automated clearing house services;

"(5) net settlement services;

"(6) securities safekeeping services; and

"(7) any new payment services which the Federal Reserve System provides, including but not limited to payment services that effectuate the electronic transfer of funds.

"(c) The pricing principles referred to in subsection (a) and the schedule of fees prescribed pursuant to this section shall be based on the following general principles:

"(1) All services shall be priced explicitly.

"(2) Prices shall be established on the basis of all direct and indirect costs actually incurred in providing the services priced, including overhead, and an allocation of imputed costs that take into account the taxes that would have been paid and the return on capital that would have been provided had the payment services been furnished by a private business firm.

"(3) Services shall be made available to any depository institution at the same fee schedule applicable to member banks.".

INTEREST ON RESERVES

SEC. 3. Section 19 of the Federal Reserve Act is amended by inserting after subsection (b)(3) (12 U.S.C. 461(b)) the following:

"(4) The Board shall pay interest on those reserves required to be held pursuant to this subsection. The rate of interest shall be

periodically determined by an affirmative vote of not less than four members of the Board. The rate of interest shall not exceed the average rate paid during the preceding calendar quarter on United States Treasury bills with maturities of three months.

"(5) Not later than July 1, 1981, the Board shall prepare a study to be transmitted to the House Committee on Banking, Finance and Urban Affairs and Senate Committee on Banking, Housing, and Urban Affairs on the feasibility and impact of permitting member banks to invest a percentage of their required reserves in United States Treasury securities. The study shall examine the impact of such an arrangement on:

"(1) monetary and financial conditions;

"(2) Treasury revenues;

"(3) safety and soundness of member banks;

"(4) impact of benefits and costs of membership in Federal Reserve System.

"(6) In its annual report to Congress the Board shall provide a full account of the changes in membership during the preceding year, the pricing structure for services in effect during the preceding year, and the interest rate structure on reserves in effect during the preceding year.".

DEFINITIONS

SEC. 4. (a) The Federal Reserve Act is amended by adding at the end of section 1 (12 U.S.C. 221) the following new paragraph:

"The term 'depository institution' means—

"(1) any insured bank as defined in section 3 of the Federal Deposit Insurance Act;

"(2) any mutual savings bank as defined in section 3 of the Federal Deposit Insurance Act;

"(3) any savings bank as defined in section 3 of the Federal Deposit Insurance Act;

"(4) any insured credit union as defined in section 101 of the Federal Credit Union Act;

"(5) any member as defined in section 2 of the Federal Home Loan Bank Act;

"(6) any insured institution as defined in section 401 of the National Housing Act; and

"(7) any association or entity which is wholly owned by or which consists only of institutions referred to in clauses (1) through (6).".

(b) The first paragraph of section 13 of the Federal Reserve Act (12 U.S.C. 342) is amended—

(1) by inserting "or other depository institutions" after "member banks";

(2) by inserting "or other depository institution" after "nonmember bank or trust company" each place it appears;

(3) by inserting "and other factors as the Board may deem appropriate" after the words "held for its account by the Federal Reserve bank"; and

(4) by inserting "or other depository institution" after "nonmember bank" in the second proviso.

(c) The thirteenth paragraph of section 16 of the Federal Reserve Act (12 U.S.C. 360) is amended as follows:

(1) by striking out the words "member banks" wherever they appear and inserting in lieu thereof "depository institutions"; and

(2) by striking out the words "member bank" wherever they appear and inserting in lieu thereof "depository institution".

(d) The fourteenth paragraph of section 16 of the Federal Reserve Act (12 U.S.C. 248(o)) is amended by striking out "its member banks" and inserting in lieu thereof "depository institutions".

EASY WAY TO SAVE ENERGY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 15 minutes.

Mr. MILLER of Ohio. Mr. Speaker, In our school days we were all familiar with the geometric axiom "the whole is equal to the sum of its parts." This mathematical statement appropriately underscores the nature of our Nation's present energy problem. There are many areas of neglect that contribute to our overall energy shortage. By themselves they may appear incidental; added together they become very significant.

Today I would like to call your attention to one such area or part. I am going to address a subject that on reflection one would think needs no addressing. But I am concerned that in our search for energy saving techniques and approaches we have often focused on the technical aspects of the energy conservation question and resultantly overlooked some of the more promising and obvious areas of savings common to all.

As we search for energy-saving alternatives we often attempt to reinvent the wheel. What I ask today is that we all simply reexamine the wheel—or should I say wheels. Many of the suggestions and recommendations relative to national conservation programs have a cost factor associated with them that serve as a disincentive. What I propose today costs nothing, only air. What I propose can be accomplished with little effort on the part of those involved and will provide all who take advantage of these recommendations, safety as well as savings. The subject I am going to talk about today is proper tire inflation for the approximately 130 million cars and light trucks that travel America's highways.[1]

This subject has been virtually ignored. If given greater public attention it could save this country the equivalent of as much as 56 million barrels of oil a year.

Guided by various governmental and industry surveys which have been conducted in this regard, my office undertook a study to more specifically define the extent of the problem. Sampling 1,100 car and light truck tires in the Greater Washington, D.C., area we found that 4 out of every 5 automobiles tested were being driven with underinflated tires which on the average were 5 p.s.i. under the normally recommended pressure of 26 p.s.i. and 9 out of every 10 light trucks were being driven with underinflated tires which on the average were 8 pounds under the manufacturer's normally recommended pressure of 32 p.s.i.

Studies show that gasoline mileage will drop approximately one-half of 1 percent for every pound the average automobile tire is underinflated and 0.4 for light trucks.

Therefore, using our average finding of 5 pounds underinflation for automobiles, the estimated 87 million underinflated cars driving on American highways will experience a 2.5-percent loss in gasoline mileage. Treadwise, a car tire driven at 5 pounds under their recommended 26 pounds pressure will experience a 25-percent service loss per tire. With respect to light trucks, using our average underinflation finding of 8 pounds per truck tire, the estimated 19 million light trucks operating with underinflated tires will experience a 3.2 percent loss in gasoline mileage, and an average service loss per tire of 40 percent.

Based on the latest data available from the Motor Vehicle Manufacturers Association, this would mean in national terms that if the estimated 4 out of 5 of the 109 million registered passenger cars that are presently driving with an average underinflation of 5 p.s.i. and 9 out of 10 of the 21 million light trucks driving with an average underinflation of 8 p.s.i. were to bring their tires up to the pressures recommended by the manufacturers, the country could realize an equivalent savings of 56 million barrels a year.[2] This would amount to a national savings of almost 1 percent of our total annual petroleum needs or expressed another way, it would furnish this country its daily petroleum needs for a little over 3 days.

Dollarwise to the consuming American public, it would mean a total savings of approximately $3.2 billion annually.

Expressed in individual terms this would mean that cars driving the national average 9,634 miles per year while consuming an average of 712 gallons of gasoline, priced at 65 cents per gallon would pay on the average an extra $11.57 per year in gasoline costs to operate their vehicle should they be driving with the average underinflation figure of 5 pounds per tire, and an average of $15 in tire wear, for a total extra user cost of $26.57 per year. Light trucks which drive at the previously cited findings of 8 pounds tire underinflation and travel the national average 8,882 miles per year while consuming an average of 887 gallons of gasoline priced at 65 cents per gallon would pay an extra $18.46 per year in gasoline costs, and $32 in tire wear, for a total extra user cost of $50.46.

What is the likelihood of the American public taking action to voluntarily correct this problem? It is my contention that unless a concerted effort is undertaken by Government, the private sector, and the news media to focus attention on this particular aspect of energy conservation, our Nation's drivers will continue their wasteful ways.

This is not to suggest that the average American driver is callous to the President's call for energy conservation, or careless with respect to the practice of good driving habits. It is to suggest that it is a problem of education. The average motorist is not aware of many of the conditions that affect proper tire care. He does not realize that through normal use each tire on his vehicle loses an average of 1 pound of pressure per month regardless of usage. He does not realize that for each temperature drop of 10 degrees Farenheit, his tires lose a pound of pressure. As a result, he does not realize that to maintain proper air pressure in his tires he should check each tire at least once a month under normal driving conditions and when

[1] Heavy duty commercial trucks and busses were not included in our study due to the difficulty in determining relevant load factors.

[2] This figure also includes the 7-gallon-per-tire production savings that will be gained by reducing the demand for new tires.

taking a long trip he should check them daily.

The benefits that drivers will derive from observing good tire maintenance go beyond just fuel savings. Perhaps more importantly, the vehicle will be a much safer vehicle as a result of proper tire inflation. Underinflated tires cause handling problems, as well as uneven and premature treadwear which can lead to unexpected failure.

What are some of the approaches that can be taken to enhance the fuel efficiency of tires and to reduce the safety ramifications associated with this problem?

Much discussion has been voiced concerning the use of radial tires rather than bias tires in that extensive testing has substantiated that radials measureably reduce the rolling resistance a car encounters when in motion and at the same time provides the operator with much better handling and ride characteristics.

I do not know how many of you have manually tried to push a car lately, but believe me, it is like trying to push one up hill or through sand; it is no easy task.

Tests conducted suggest that by converting to radial tires, automobiles can experience fuel savings of 3 to 5 percent depending on the size and weight of the car, while trucks equipped with radials can improve their fuel efficiency by as much as 2 to 4 percent over standard bias tires. Putting this in quantitative terms, should the approximately 60 percent of the American passenger vehicle fleet presently riding on bias ply tires convert to radial tires and the 85 percent of light trucks presently using bias tires do likewise, an aggregate fuel savings of up to 54 million barrels of oil a year could be gained. This on top of the savings that can be attained through proper inflation, could mean a total savings of approximately 1.7 percent of our current national oil needs.

I must qualify that in researching this subject we found the data available from Government, industry, and other related sources insufficient to make a conclusive determination of the full nature of the problem.

However, I feel the preliminary findings we have uncovered are sufficient to justify a much more expansive study of this subject. Toward this end a I am requesting the Departments of Transportation and Energy to initiate detailed studies in this regard. Additionally, I am calling upon those Government agencies with lead responsibility for the care and maintenance of our Government vehicles to give greater emphasis to this promising area for savings.

It is time the American people stop paying lipservice to energy conservation and start practicing better habits. And what better place is there to start but here in Washington. The Federal Government should take the lead and set an example for all to follow.

At present EPA is circulating a fact sheet on automobile fuel economy, which fails to make any mention of proper tire inflation as a means of gaining better fuel performance. The General Services Administration which oversees a fleet of 86,000 general purpose vehicles for the Federal Government, invites the observation of minimal maintenance practices by requesting that the lessees of their vehicles maintain loosely defined owner manual maintenance recommendations. Tire checks at the Postal Service are conducted about every 24 weeks, at the time the vehicles are given their periodic maintenance inspections. The most flagrant cases of poor tire maintenance uncovered in our study were found to exist with Government vehicles; 92 percent of the Government vehicles we surveyed were underinflated an average of 6 pounds per tire. We found postal jeep dispatchers with a recommended rear tire pressure of 29 p.s.i. reflecting such diverse readings as 48 pounds pressure in their right rear tire, and 8 pounds pressure in their left rear tire. We found a heavy-duty six-wheeled truck driving with one of their double rear wheels flat. We found a Government sedan operating with an average inflation pressure of 10 pounds per tire.

Such apparent inattention to this subject suggests that we must undertake an aggressive public awareness program, which would make everyone concerned, much more conscious of the need for proper tire care and inflation. We must encourage the tire, automotive and petroleum industries to give this subject more emphasis in their developmental and consumer orientation programs. We must insure that Government sets the proper example through optimum utilization of present equipment. We need to explore legislative means that could help facilitate the transition to more fuel efficient tires and related equipment.

Conservation is everyone's concern and I hope you will make it yours, and help to promote this potentially significant form of fuel savings with your respective constituencies.

ANNIVERSARY OF PRESIDENT'S NATIONAL ENERGY MESSAGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. CONTE) is recognized for 5 minutes.

● Mr. CONTE. Mr. Speaker, today marks the anniversary of the President's national energy message. As the Members are painfully aware, the proposal still languishes in the conference committee, while the public becomes frustrated over the lack of a comprehensive program.

Mr. Speaker, I supported the President in this ambitious effort last summer. Since then, I have watched the proposal flounder, ceremoniously buried in several instances, and then miraculously resurrected, we are now hearing of the final blow to this desired proposal, while at the same time, others are whispering that it "still lives." Nonetheless, it is easy to understand the public's weariness over these persistent and conflicting reports.

I have been fighting the President's most recent response, designed to facilitate the final approval of this massive proposal, by threatening that if the crude oil equalization tax title is not enacted, he will administratively impose import fees on crude oil. While this appears to be a simple answer to the problem of increasing imports, it begs the realities of who will be penalized by such action. The fee proposal will impose further hardships on the residents of New England, in particular, those who have been paying the high price of our national growing dependency on foreign supplies for years. The average New Englander's energy bill is 30 percent higher than other regions of the Nation. Now the administration, in the name of "good government" is threatening to impose this additional hardship on the New Englanders, which in their logic, will force the Congress to enact the crude oil equalization tax. I submit that this is not a rational conclusion to an irresponsible action. Unfortunately, the New England delegation cannot effectuate the approval of this controversial title. However, we are united in one effort, that is to vigorously oppose this additional injust fee. Such a fee would not result in what the President strives to achieve, the reduction of oil consumption. In New England, due to the current high costs, this conservation has already been achieved. But, this approach to the desired national energy act will force many Members to make every effort to see that this injust fee does not become a reality, thus further abrogating our economic disparity. In the interest of applying "just" and "reasonable" solutions to the complex energy problems, I would respectfully suggest that the administration take another look at the results of this hastily drafted import fee proposal. A minimal effort now may save a monumental effort in the future.

Thank you, Mr. Speaker.●

MARGARET BUSH WILSON OF THE NAACP ON THE RELATIONSHIP BETWEEN ENERGY GROWTH AND JOBS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 10 minutes.

● Mr. KEMP. Mr. Speaker, on April 10 Mrs. Margaret Bush Wilson, chairman, National Board of Directors, National Association for the Advancement of Colored People, the oldest and largest civil rights organization in America, made a brilliant speech to the Edison Electric Institute on the relationship between economic growth and jobs, particularly in the area of energy.

The point of Mrs. Wilson's address was that black Americans have begun to realize that their greatest hope for full equality is to have a vigorously growing economy. She notes that despite all the Government programs for the poor and for minorities, blacks are no better off than they were 10 years ago. The reason is that these same Government policies have led to a slowdown in the economy which has undone minority gains—for the fact remains that blacks are the last hired and first fired.

Thus Mrs. Wilson argues that what black Americans need most is jobs, jobs, and more jobs; and not Government make-work jobs, but productive, meaningful jobs in private industry. The

Carter administration's policies, rather than fostering this goal, is inimical to it. The energy program, she says, is the worst example of this, by emphasizing conservation instead of new supplies. Since economic growth is associated with high energy consumption, she continues, a policy designed to reduce energy use must reduce economic growth, jobs, and hurt blacks most of all.

I could not possibly agree with Mrs. Wilson more and congratulate her for making such an important and courageous statement. She has certainly helped to open my eyes to another dimension of this whole issue of economic growth.

I sincerely hope my colleagues will take note of her remarks and realize at last that the best way to help the poor and disadvantaged of this country is not by redistributing income but by fostering income growth. Mrs. Wilson and the NAACP clearly are on the side of income growth.

ENERGY GROWTH AND JOBS

(Excerpts of Remarks by Mrs. Margaret Bush Wilson, Chairman, National Board of Directors, NAACP of the 46th Annual Convention of the Edison Electric Institute, the Hyatt Regency Hotel, Houston, Texas, Monday, April 10, 1978, 2 p.m. Mrs. Wilson is a practicing attorney and senior partner in the firm of Wilson, Smith, Wunderlich & Smith in St. Louis.)

Good afternoon to all of you assembled for the 46th Annual Convention of the Edison Electric Institute. Quite frankly I was non-plussed when I learned you have been in existence for 46 years—my perplexity stems in part from the fact that I have just recently made your acquaintance!

Indeed, I have been bemused ever since receiving the kind invitation to be one of your speakers for the First General Session. A year ago this time, neither you nor I would have forecast this particular detail, for then it seemed remote that the NAACP and the Edison Electric Institute had a mutually compelling interest.

Somehow, I am reminded of the words of an ancient, unknown mystic, whose words were quoted to me many years ago: "Like driftwood spars that meet and pass on ocean's plain, so on the sea of life, man meets man—nears—and parts again."

What has brought us near, of course, is a rather provocative nine page document which the National Board of Directors of the largest and oldest civil rights organization in the nation adopted unanimously on the 9th day of January of this year. It is entitled simply "Statement of Position on a National Energy Policy by the NAACP National Board of Directors".

You may find the headlines which this statement sparked as intriguing, as I have.

It was the Detroit News which first surfaced the matter with its forthright headline "Energy plan dooms poor, NAACP says". This was followed by the New York Times headline which triggered all the rest: "NAACP Takes Side of the Oil Industry in Energy Struggle". This was amplified a few days later by a curious lead editorial in the New York Times: "Does Civil Rights Include Energy". Then with staccato rapidity all across the country they came: "NAACP hits Carter Energy Plan". "Who's conning the NAACP on Energy?", "The NAACP Turns a Corner", "Big Oil's Black Allies", "Did the NAACP Board Know what it was Voting For". And, in the Congressional Record Sen. Orrin Hatch lambasts "The New Slavery" and supports the NAACP position, while Representative Richard Ottinger of New York calls it "A Travesty for Blacks".

The rhetoric has moved all of the way from the Wall Street Journal's "The NAACP—Free at Last", to Hoyt Fuller's "NAACP Takes a Giant Step—Backward"! Not to mention one of dubious throw-back: "Finding an oil man in NAACP wood pile".

It has been a heady and provocative three months. However, those of us in the civil rights movement who are long distance runners, and I consider myself among them, have mastered the art of endurance and patience and above all to wear controversy "like a loose garment".

Because there have been conflicting and confusing stories, it does seem important for me to give address to the major thrust of the NAACP Energy Policy. Perhaps no one has described that thrust better than our dynamic, new Executive Director, Benjamin L. Hooks and I shall quote him in detail:

"NAACP National Energy Policy is the sum total of seven months of intensive research and review . . . The major thrust of that policy is reflected in the following. . . .:

"The NAACP feels that President Carter's National Energy Program overly emphasizes conservation as opposed to directing national goals to the development of new and alternative energy supplies.

"That the President's emphasis on energy conservation could severely restrict the expansion of the national economy. Historically, energy abundance has gone hand in hand with economic expansion.

"The NAACP believes that a static economy will have the most disastrous effect upon the black community. There can be no new jobs created in a static economy and past record reveals that the job pool actually declines during a period of no growth.

"Black unemployment rates are at their highest level in ten years. Black teenage unemployment has reached such frightening levels that it has become the subject of numerous magazine and newspaper articles. Therefore, the NAACP understands that it will be the black community who will suffer most from the President's energy policies. The most recent experience of environmentalists in their pursuit of stricter environmental laws has demonstrated how adverse the effect can be on the local job market when careful consideration of the consequences are neglected.

"The NAACP also called into question the Administration's complex energy, tax and regulatory proposals. While its report does not oppose regulation or deregulation, it did raise questions as to which approach was best and most compatible with the needs for new energy supply development.

"The NAACP recognized that the National Energy Plan as presented by the Administration contained no input from America's minority community.

"It was in light of the conditions listed that the NAACP's Energy Committee report was adopted."

The primary thrust of this policy is to protect as well as foster the creation of jobs—especially for black Americans. The NAACP believes that any national policy that does not stress the development of new and alternative energy sources will increase, rather than reduce the present high rate of joblessness.

And high it is, indeed.

A decade ago, the National Advisory Commission on Civil Disorders warned that America was moving toward two societies separate but unequal, one white, the other black.

Today, despite much soul searching, the division between the well-to-do and the very poor seems to have widened. No doubt, there has been some progress for blacks. But, on the other hand, there are millions of black Americans who, to a large extent, must be considered to represent a permanent underclass in our society.

The race of the victims most certainly continues to be a primary factor that contributes to this problem. But, another reality has become evident in recent years. That is the economic factor.

Here is the extent of the problem.

Between 1969 and 1974, as a result of deliberately instituted national economic policies and the Arab oil boycott, unemployment rose from 2.8 million to 5.1 million. Blacks, through comprising 11 percent of the population, accounted for 20 percent of this increase.

Consequently, black unemployment for several years has been twice as high as the national average. When we examine this problem from a different angle, we will see that actually white adult males have been enjoying full employment. That is, their unemployment rate has been under 4 percent in recent months.

Statistically, we see that the median income of black families, from 1974 through 1976, adjusted for inflation, remained at $9,242; for whites it increased from $15,478 to $15,537. In 1969 when the real income of blacks was $9,315, it was 61 percent of the average white income.

There were a few blacks, those with incomes above $15,000, who have benefited from recent civil rights gains. But for the masses with incomes below $5,000, the economic situation continues to be dismal. In fact, to a large extent their plight has worsened.

The core problem, of course, is unemployment. While whites in 1977 recovered from the devastating 1974–75 recession, the black economic state is still in a depression. Official white unemployment fell from 7 to 6.5 percent between 1976 and 1977. But for blacks it remained at 13 percent. Translated into numbers, 60,000 more black people, or 1,492,000, were unemployed in 1977 than in 1976.

Unemployment among black teenagers constitutes an even more critical problem. Unschooled, untrained in work habits, and unskilled, black teenagers roam the streets of our urban centers without any hope of ever escaping from their lives of poverty, drugs and crime. In some cities, black teenage unemployment ranges from 40 to as high as 60 percent.

The festering confines of our big cities, where the majority of blacks now live, further increase the critical scope of the American dilemma.

More than a decade ago, when the Great Society programs were launched, our hope for government solutions to these problems was at its highest point. The reversal and failure of much of this effort, however, has led to widespread disillusionment throughout the black community about the strength of America's will to meet the challenges of the "Last Frontier."

After careful review of this history of social progress over the past 50 years, there are those among us who are now more convinced than ever that the solutions to these hard-core social problems do not rest with government alone. Private industry does have, and must play, a crucial role in this area.

The problem, we again stress, is not merely one of civil rights. In fact, having won the enactment of the several Civil Rights, Voting Rights and Housing Acts, blacks now find that the principal civil rights struggle is that of preventing the erosion of these gains. We must also struggle to ensure that these several laws are enforced.

At the same time, though, there is another dimension to the implementation of these gains. This involves bringing the traditional victims of racism into the economic mainstream of our society. The dominant dynamic today is economic.

And the provision of economic advancement can best be accomplished through the availability of an ample supply of jobs and

the assurance of equal opportunities for black workers and black entrepreneurs.

Thus, the principal challenge for black leaders today is to reawaken the concerns of America to the dimensions of these other problems. New jobs come from economic growth in the private sector.

This was another of the goals of the NAACP policy statement on energy. By actively becoming involved in the development of a national energy policy, the NAACP has served notice on our national leaders that a new dimension has been added to our concerns about social programs.

Seeking adequate amounts of welfare and food stamps are fine. But we must go beyond this syndrome since it represents the symptoms of a severe social condition, not a solution. Our broader and long-range perspective must center on closing the gap between black and white income. If we do not do that soon, we will be lost in an economic quagmire for generations to come.

The all-encompassing effects of energy scarcity were made very clear just five years ago when oil supplies from abroad were suddenly disrupted. The nightmare of long gasoline lines still hangs over us. Some still worry that the spigot of Mideast oil may be turned off again as easily as it was then.

There was also the troubling spectre of widespread layoffs of workers by several mid-Western industries in the winter of 1977 because of severe cold that caused shortages in the natural gas supplies. Natural gas supplies, we know, are rapidly dwindling. So the problem rapidly worsens.

A much more pervasive—and evident—problem is the price of these fuels. The poor, who drive the old, inefficient gas guzzlers and live in dilapidated housing already know just how much oil and natural gas prices have skyrocketed. They might still cope now through great sacrifices.

But what will America do when our supplies of oil and natural gas are depleted?

These are questions that affect not only white but black Americans.

These are questions that affect not only American industries but also home owners.

These are questions that affect the poor today; but they will surely affect the wealthy tomorrow.

One of the surest signs of this spreading effect is the rapid decline of the dollar abroad. Buttressed by a $2 trillion annual production level, we at home have hardly noticed the dimension of this problem. For the lowly serviceman abroad, however, or the American tourist scrimping to make ends meet in France or Germany, the effects are very obvious. The dollar today is buying considerably less than it did last year.

And the primary reason for this decline is the widespread lack of confidence that has been generated by America's whopping $20 billion balance-of-payments deficit which has been boosted by our huge oil importation bill.

Ultimately, it is feared that the increasing balance of payments problem will again spur worldwide inflation and its related problems. Then we will again be sent pell-mell into another inflation-depression situation.

Looking ahead, the NAACP would not be so presumptuous as to attempt to dictate to you, the experts, about the best sources of future energy supplies. What we can do, however, is to extend our support for your efforts to explore all possibilities with the goal of developing the most productive and efficient means. This is in the mutual self-interest of the members of the Edison Electric Institute and the constituency of the NAACP.

One question that has been raised about the energy industry concerns the number of jobs that you can provide. We are reminded that unemployed, unskilled blacks cannot expect to find much opportunities in capital intensive nuclear, natural gas and oil industries. So what can blacks expect as a return on their support for policies that directly benefit the industry.

One answer—and this the NAACP Energy Policy Statement sought to address—is a vigorous expansion of the national economy. Such an expansion along the lines of 7 percent a year would, we feel, open up enough opportunities for more blacks to find work.

Another answer directly involves the energy industry. Despite the fact that yours is a capital intensive industry, you do hire people. Comparatively fewer people might work in the industry in relation to dollars spent. But your presence here is ample evidence that electric companies hire people, and so do the oil, natural gas and nuclear production industries.

We are concerned, however, about the complexion of your technicians, engineers and middle and upper management personnel. There are, we all know, very few blacks working in your industries.

As a phase two of the NAACP Energy Policy Statement, therefore, you should expect that the Association will be addressing such issues as job opportunities within the industry for minorities.

The NAACP will be expressing strong concerns about the amounts of industry profits that are plowed back into research, exploration and development of new energy sources.

Let me be quite candid as I conclude these remarks. It would be shortsighted and naive on my part to believe that the overriding concern of those of you present here today is about the plight of a million and a half or so Americans of African descent who are out of work. Particularly, when you and I both know that some 93 million Americans are employed today, and it is estimated that 9 out of 10 new jobs created during 1977 were created by American business. .

What I surmise is that your concern is with inflation and the uncertainties surrounding a yet to be determined energy policy which may aggravate an already spiraling inflationary trend. This creates problems for business expansion, and since capital investment is the engine of economic growth in America the difficulties are obvious. Let me emphasize in the strongest tone possible, however, that "inflation is not caused by too many people working." As my good friend Clarke Watson, who is head of the American Association of Blacks in Energy has said: "There is something very paradoxical about paying the Arabs, the Nigerians and the Mexicans a third to twice as much for their energy, but hesitating to pay Americans to develop their own resources and thus get people back to work."

I share the views of the A. Philip Randolph Institute's Bayard Rustin that "it is going to take economic growth, and lots of it, if we are to realize the ideals of equality, cooperation, and economic justice that fired the American struggle for racial change. This will demand that we remove the current roadblocks which stand in the way of energy development. . . . The imperative of social equity cannot wait for the time when solar energy is available on a mass scale. To build housing, provide meaningful jobs, and make our society run efficiently for the masses of people we must expand the production of electrical energy from traditional energy sources." And, we must do it now! ●

OIL, THE ACHILLES HEEL OF U.S.-SOVIET CONFRONTATION; A CALL FOR RATIONING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. McCLOSKEY) is recognized for 10 minutes.

Mr. McCLOSKEY. Mr. Speaker, our inability to reduce our oil imports is creating a major threat to our national security.

It is time Congress faced up to that threat.

Since the Arab oil embargo of late 1973, we alone of the major industrial nations have increased our reliance on Arab oil. We alone have kept gasoline prices at an artificially low level. Prices last week were 60 cents a gallon in California as compared with $1.02 in England, $1.42 in Germany, and $2.10 in Japan.

Our House and Senate conferees have been bogged down for the past 6 months over the questions of imposing taxes on oil and allowing the prices of oil and gas to increase. The continuing failure to resolve this problem has now become so serious, in my judgment as to justify use of the only alternative our Government can pursue in order to reduce our increasing dependence on foreign oil.

That alternative is rationing.

Congress gave the power to institute rationing to the President under Public Law 94–163 in 1975.

No President has exercised this power.

In an election year, no elected official really wants to discuss the problem.

We should be particularly concerned over the worsening economic position we face, vis-a-vis the U.S.S.R., as a result of Soviet oil surpluses and U.S. oil deficits.

The following facts are not in dispute.

On January 1, 1974, U.S.-proven oil reserves were 35.3 billion barrels. As of January 1, 1978, these reserves had dropped to 29.5 billion barrels. At our current production rate of approximately 3.1 billion barrels per year, we will exhaust our presently proven reserves within 10 years.

In our confrontation with the U.S.S.R., the Soviets are producing perhaps 11.5 million barrels per day (MB/D); we produce 8.5 million MB/D. The Soviets consume only 7.5 MB/D, however, and export 4 MB/D. The United States consumes 17 MB/D and is required to import 8.5 MB/D.

Of total world production outside the Communist countries, and leaving aside U.S. production, there is presently 38.5 MB/D produced, of which 31.5 MB/D is controlled by OPEC, and 20 MB/D by the Arab countries. Saudi Arabia is the largest exporter, roughly 9 MB/D, followed by Iran, 5 MB/D, and a number of countries around 2 MB/D, Iraq, Nigeria, Libya, Kuwait, Abu Dhabi, Indonesia, and Venezuela.

U.S. imports of 8.5 MB/D today come primarily from these countries.

Should a Mideast war erupt again, our assistance to our ally, Israel, will undoubtedly be followed by an oil embargo by the Arab nations. What will this do to our economy?

The 1973–74 embargo provided some guidance. We were then importing 25 percent of our oil from the various Arab States. In 1974 and 1975 we suffered a severe recession with a drop in GNP—in constant dollars—in both years. Unemployment rose to 8.5 percent.

Today, in 1978, we are importing 36 percent of our oil from the Arab States, 11 percent higher than in 1973. An embargo could cause unemployment to rise to a crisis level and our GNP to decline even more substantially than in 1974 and 1975.

The confrontation we face with the Soviets today is economic, as well as military. They understand as well as we do that a military confrontation would very probably bring on a nuclear exchange which would destroy both of our societies and perhaps most civilized nations as well. The Soviets presumably refrain from seizing Berlin, just as we refrain from seeking to restore Estonian, Latvian, and Lithuanian independence, not because there is not sentiment in our respective countries to do both, but because neither country desires to invoke nuclear war.

But no such inhibitions exist in our economic confrontation. If we deny most-favored-nation status to the U.S.S.R.—as we do—they are weakened. If the U.S.S.R. can exert economic pressure which results in a denial of oil to the United States at reasonable prices, we are weakened. Clearly, as we take such steps as ousting Russian ships from competing in U.S. foreign trades (H.R. 9998), we can expect the Soviets to take similar steps to exert economic leverage on us.

At a time when our expenditures to maintain military parity exceed $115 billion per year, it seems almost unforgivable to stand by and do nothing to try to maintain resource parity, particularly in a resource, oil, where our entire economy could be devastated by a Mideast war cutting off 36 percent of our supply.

Under these circumstances, Mr. Speaker, I think we owe duty to call to the President's attention his power under Public Law 94–163, and to strongly suggest that he invoke that power by imposing a fair system of rationing forthwith.

A resolution to this effect is offered for insertion in the RECORD at this point, together with an analysis of current world oil production figures prepared by one of my most valued constituents. I hope these documents will be of interest to our energy conference colleagues as well as to the President:

H.J. Res. —

Whereas Congress in Public Law 94–163 granted specific standby authority to the President, subject to congressional review, to impose rationing; and

Whereas steadily-increasing reliance on imports of foreign oil imperils the national security of the United States: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That it is the sense of Congress that the President exercise the authority under Public Law 94–163 to impose rationing of petroleum products forthwith should imports of foreign-produced oil exceed an average of 8.5 million barrels per day over a period of 30 successive days.

THE UNITED STATES ENERGY SITUATION, WORLD DATA, OIL AND GAS, 1977

The Oil and Gas Journal reports world production of crude oil, and marketed production of natural gas, as follows:

	1976	1977
Crude oil	[1] 20,900,000,000	21,816,000,000
Natural gas	[2] 50,407,500,000	53,883,700,000

[1] Barrels.
[2] Mcf.

On an oil equivalent basis, total *hydrocarbon* production marketed in 1977 amounted to 31,106,000,000 barrels, of which 30% was in the form of gas. The world's proven natural gas reserves amount to 40% of total world hydrocarbon reserves. As the natural gas now being burned at the wellhead is gathered and marketed, and dry gas fields now shut in are put on production, world natural gas production as a percentage of total hydrocarbon production will rise. It is probable that in some future years hydrocarbon consumption will increase in a year in which crude oil production declines.

The following table displays marketed hydrocarbon production by countries. Allowable crude oil production is shown where it has been publicly announced; some major producers, notably Iran and Iraq, have not made any official pronouncements. Where no allowable is shown elsewhere it usually means that 1977 production was essentially at capacity. U.S. production has been at capacity for some years; it is currently up to around 8,500,000 B/D and could reach 9,000,000 B/D in 1978 if there is no problem in moving the capacity of the Alyeska pipeline to market.

Some minor producers are not listed in the table. It should not be assumed that all the figures are precise; there are differences in reporting methods and some statistics have historically been more reliable than others.

	Crude oil (barrels per day)			Natural gas, 1977 (3 ft³)
	1976	1977	1978 allowable	
Russia	10,364,000	10,920,000	11,500,000	12,395,000,000
Saudi Arabia	8,344,000	9,023,000	8,500,000	121,000,000
United States	8,113,000	8,225,000		20,337,000
Iran	5,883,000	5,663,000		
Venezuela	2,290,000	2,234,000	2,200,000	393,000,000
Iraq	2,150,000	2,215,000		141,000,000
Nigeria	2,050,000	2,100,000		30,000,000
Libya	1,921,000	2,065,000	2,100,000	489,000,000
Kuwait	1,915,000	1,783,000	1,800,000	186,000,000
China	1,688,000	1,788,000		1,787,000,000
Indonesia	1,505,000	1,686,000		352,000,000
Abu Dhabi	1,590,000	1,665,000	1,600,000	137,000,000
Canada	1,303,000	1,397,000		3,301,000,000
Algeria	1,048,000	1,091,000		285,000,000
Mexico	801,000	981,000		745,000,000
United Kingdom	247,000	768,000		1,500,000,000
Qatar	487,000	440,000		70,000,000
Argentina	398,000	430,000		250,000,000
Australia	426,000	431,000		237,000,000
Egypt	328,000	418,000		93,000,000
Brunei-Malaysia	364,000	401,000		187,000,000
Neutral Zone	471,000	365,000		
Oman	366,000	341,000		
Dubai	313,000	319,000		31,000,000
Romania	290,000	295,000	305,000	1,006,000,000
Norway	279,000	280,000		66,000,000
Trinidad	211,000	230,000		150,000,000
Gabon	217,000	225,000		3,000,000
Syria	191,000	203,000		69,000,000
India	176,000	199,000		52,000,000
Ecuador	187,000	180,000		21,000,000
Brazil	167,000	167,000		61,000,000
Cabinda	88,000	140,000		
Colombia	146,000	138,000		
Germany	110,000	102,000		907,000,000
Tunisia	78,000	95,000		79,000,000
Peru	75,000	86,000		59,000,000
Yugoslavia	79,000	80,000		59,000,000
Bahrain	58,000	56,000		109,000,000
Bolivia	40,000	45,000		118,000,000
Netherlands	31,000	30,000		2,932,000,000
Sharjah	37,000	28,000		
Chile	23,000	23,000		209,000,000
France	20,000	20,000		257,000,000
Italy	21,000	18,000		449,000,000
Pakistan	7,000	10,000		91,000,000

World hydrocarbon production is seasonal since most are used for heating. The spread between the highest and the lowest monthly world crude oil production in the past 5 years has been:

[In thousands of barrels per day]

	Highest month	Lowest month	Spread
1973	47,828	42,101	5,727
1974	46,773	43,913	2,860
1975	46,252	40,119	6,113
1976	49,465	40,859	8,606
1977	49,050	44,204	4,846

Note: Figures are for all countries except China, Russia, and the satellites. This is the series usually used in discussions of world supply / demand although it is not totally informative since Russia sells oil and gas to Europe, and China sells considerable crude to Japan.

In any seasonal business there is always surplus capacity at the low point in demand, and that is true in the world oil business today. Peak demand has been occurring in the last month of the year, while the low month has been at the start of the year, since the pattern of annual price increases at the start of each year has been in vogue. The figures thus far in 1978 reflect this normal pattern.

All crude oils are different, and each refinery is capable of refining only those specific types for which it was designed. Sulfur is the principal contaminant in crude oils, and most consuming nations impose restrictions on the amount of crudes high in sulfur that can be processed. In 1976 world crude production by sulfur content broke down as follows:

	B/D
Low sulfur crudes	14,700,000
High sulfur crudes	29,900,000

There has been a world surplus of high sulfur crudes for many years, and it exists today. In discussing capacity many make no allowance for capacity to produce high sulful crudes which are often unmarketable, or marketable only at substantial price discounts. This, plus the seasonal factor, is the reason for the conflicting supply/demand forecasts which the general public sees. There is not now, and never will be, any glut of hydrocarbons.

Worldwide availability of hydrocarbons will be vastly below the current level during the lifetimes of hundreds of millions now living; what actual future figures will be in any year depends on just how the world prepares for that day. If this were One World, ruled by a Benevolent Despot, we would now probably be in a mode of reducing world crude oil production around 2% per annum in order to stretch supplies out well into

the 21st century. Actually in 1977 world production was up 4.4% over 1976 to a new global high. If we again eliminate China, Russia and the satellites the 1977 increase was 4%. If we project this 4% growth rate, required oil production would be:

	B/D
1977	46,656,000
1978	48,526,000
1979	50,467,000
1980	52,485,000
1981	54,584,000
1982	56,767,000

Five years hence world crude production would have to be 10,111,000 B/D higher than in 1977 if there were no natural decline in older production.

However, natural decline in production commences in every oil field the day it is first put on production. Writer knows of no world-wide data on the rate of natural decline. Moreover, in nations where there is only one producing entity, as is the case with Russia and Saudi Arabia for example, only certain fields are produced while others are kept on a shut-in status; whatever the rate of natural decline may be currently this is not directly related to world poven reserves. In order to get some handle on the this for purposes of discussion we can perhaps use a natural decline over the next 5 years of 4% for all fields now on production; if this is used, then new production that must be added by 1982 would amount to approximately 12,000,000 B/D.

There is a long lead time in getting new discoveries on production, especially in "frontier" areas where most of the current exploration is taking place. Prudhoe Bay was discovered in 1968 and in 1977 the first production from it moved to market. The billion plus barrel Hondo field offshore Southern California was discovered in 1968 and some small production from it will start in 1978. Only from currently known and proven reserves can the vast bulk of the indicated 12,000,000 B/D needed to obtained. The only country with reserves that could make anything like this increase in production possible in this time frame is Saudi Arabia which in 1977 produced 9,000,000 B/D. Their allowable production for 1982 has been set at 12,000,000 B/D so it is impossible to increase world production at 4% thru 1982.

Competition for what will be available will be ferocious. The following table is designed to show with which nations the U.S. will have to compete. The 1976 consumption figure is the O&GJ estimate. Where a nation's production exceeds its consumption, its production is shown in the "Surplus" column; where production is less than consumption (i.e. nation is an importer) *production* is shown in the "Deficit" column. Nations are listed in order of petroleum products consumption.

[In thousands of barrels per day]

	1976 consumption	1977 "Surplus" countries	1977 "Deficit" countries
United States	16,980		8,225
Russia	7,500	10,920

The United States is the world's largest importer of hydrocarbons.

Japan is the second largest, and the largest single competitor for whatever supplies of hydrocarbons will be available for export in future years.

Combined, Germany and France import more hydrocarbons than Japan. All the industrial countries in Europe import far more hydrocarbons than all the Asian countries combined.

With their newfound wealth, oil exporting countries are increasing their own consumption of oil, reducing the amount available for export.

The surplus countries being overwhelmingly Arab, it is not difficult to see why no nation in the world except the United States supports Israel.

	B/D
Total world production, 1977	46,656,000
Deduct U.S. production, 1977	8,225,000
Balance	38,431,000
Of which OPEC	31,625,000
Of which Arab	19,984,000
Of which Saudi	9,023,000

OPEC producers account for all but a minor portion of all crude oil that is exported, and the bulk of this is Arab.

As noted, world oil consumption cannot continue to increase at the 1977 rate through 1982. Which nations will get what part of any increase that may become available? Obviously one factor will be which nations have the money to pay for increased imports. But a more significant factor, in a sellers' market, is that the oil exporters will possess the power to allocate supplies. Exxon's latest projection of U.S. oil imports for 1982 is around 12,000,000 B/D; there is no way anything like this amount could be obtained from non-Arab sources.

Although the need for a National Energy Policy was obvious 10 years ago we are still debating National Energy Plan No. 1. This is designed to reduce oil imports by 1985 to 7,200,000 B/D. Writer does not know anyone competent in the energy field who believes this is remotely possible. Development of alternate sources of energy requires extremely long lead times—up to 10 years—and we are already into 1978 so that 1985 is only 7 years away.

In the days ahead many popular myths will be shattered.

Myth No. 1 is that the world's oil exporters will produce all the crude oil for which there is a market demand. The fact is that there is not a single oil exporting country whose leaders are not aware of the finite nature of their hydrocarbon resources and who are not planning their depletion on the basis of optimizing the interests of their people. As in any trade, the interests of the oil exporting nations are diametrically opposite the interests of the oil importing nations, and there is no question whose wishes will prevail.

Myth No. 2 is that the Arabs will not use the oil weapon in their centuries old warfare with the Jews. Let us assume some foreign nation seizes New York State. How long would any government in Washington stay in power if it failed to use every weapon available to it to regain New York State? Nothing is different in the Arab world. The fact is that, while publicly decrying resort to the oil weapon, the Arab world has been using it for years while all forward planning is based on its continued use. If it so elected, Saudi Arabia could increase its 1982 allowable production well above the figure set; the message could not be louder or clearer. As the Saudi leaders have consistently emphasized, the United States is the only nation in the world supporting Israel so the United States is all that is preventing the Arabs from regaining the lands seized from them. In allocating available crude will they reduce the quantities being supplied those nations supporting them, diverting these to the only nation that stands in the way of achieving their goals?

Myth No. 3 is that only the U.S. Congress and the media understand the world energy situation. Of course the Arabs have access to the same statistics that we do. So do the Japanese, Germans, French, British and all other nations. Trade publications like the Oil and Gas Journal are sold in every corner of the world. Sundry other organizations collect vast quantities of data on the world hydrocarbon situation which are made available to all with no restrictions. Neither the CIA or any other U.S. organization has any information not available to other nations in the world.

From the Oil and Gas Journal the Arabs, as well as everyone else, can see the trend of proven recoverable crude oil reserves of the United States:

	Barrels
January 1, 1974	35,300,000,000
January 1, 1978	29,500,000,000

During this 4 year interval there were no price ceilings on such oil as could be added to recoverable reserves by installing secondary or tertiary recovery systems in known pools. There have been no price ceilings on newly discovered crude, for all practical purposes. These incentives were adequate to engage every available drilling rig while footage drilled in the United States and money spent has been at record levels. In these 4 years new discoveries, plus additions to existing fields, have fallen 5,800,000,000 barrels short of production. To meet this shortfall imports from the Arab world have been rising steadily, and all major international oil companies have publicly forecast a need for increasing imports from the Arab world in the years ahead.

To pay for higher imports a comparable increase in exports is obviously necessary. But in the face of these facts two states and the federal government have enacted anti-boycott legislation deliberately designed to reduce U.S. exports to the Arab world. Furthermore, with a completely neutral stance obviously necessary in the war be-

tween the Arabs and the Jews, U.S. foreign policy has continued to tilt in favor of the enemy of the nations on whom we will be increasingly dependent if we are to avoid an energy deficiency that could trigger a major depression.

The bloodless verdict of the market place has already been handed down; one U.S. dollar now buys only 2 marks and 238 yen. There are no mysteries that must be unraveled before the trends in the world financial markets can be explained. The only mystery is why corrective changes have not been made in national policies. Even after they have been made it could take years before American exporters could regain the share of foreign markets essential to restoring the value of the dollar.

DEATH IN TRANSIT—IV

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, I have on earlier occasions talked about the catastrophes that have occurred because of train accidents involving hazardous cargo. But deadly cargo is carried by other means, and those other means are not without problems or hazards. Trucks are subject to any number of accidents, and trucks carrying explosive or toxic materials can cause massive, even catastrophic amounts of carnage.

Almost exactly 2 years ago 16 people were killed at Eagle Pass, Tex., when a truckload of liquified petroleum gas exploded upon impact after an accident. Everyone in the area was hurt, and the total casualties were 51 persons.

Almost exactly 1 year ago a truck carrying 7,509 gallons of anhydrous ammonia toppled off an expressway ramp at Houston, Tex., releasing the deadly gas. In that accident six people were killed—five by inhaling the ammonia, which suffocated them. Another 178 persons were injured, and of these 78 had to be hospitalized.

In each case you might think that the accident took place on a rain-slick or fog-shrouded highway. Not so. Both these terrifying crashes occurred on a clear, bright, and sunny day. Driving conditions in each case were perfect.

In the Houston accident, the only saving grace was that it did not take place in a congested downtown area. If that deadly gas cloud had been released in a congested place, there is no way to estimate how many people would have died or been injured. The salvation was that the city of Houston prohibits hazardous cargoes from being moved in certain areas, or by routes other than those designated for hazardous cargo transportation.

But not all cities have designated routes for hazardous cargo, and it is a certainty that there are truckers that ignore the route restrictions that do exist.

In the Eagle Pass accident, the number of victims was limited only by the number of people in the vicinity of the accident. Hard as it is to believe, with 19 people dead and dozens more injured, that accident could have been worse.

What was common about these accidents?

Both took place on bright, sunny, and clear days.

Both involved semitrailers carrying tanks filled with a liquid material under pressure.

And in each instance the truck driver was speeding, moving at unsafe speeds.

In the Houston accident, a truck loaded with anhydrous ammonia, a material pressurized at 92.9 pounds per square inch, was negotiating an expressway interchange. It is estimated that the truck was traveling on the curved expressway ramp at a speed of 55 to 60 miles per hour. Shortly after the truck entered the curved ramp it started up a bridge, and at that point it began to roll to the right, and the wheels of the vehicle hit the curb, at which time the vehicle started to leave the ramp. In the words of the National Transportation Safety Board—

> The upsetting tank crushed and penetrated the bridge rail, and the vehicle fell onto the Southwest Freeway, approximately 15 feet below. As it fell, the tank struck a support column of an overpass that crossed over the ramp on which the truck was traveling.

Nothing could sound more prosaic, this language giving us in verbal slowmotion the deadly sequence of events. But the worst was yet to come.

This was the worst:

> The front end of the tank separated from the main body of the tank. This permitted a sudden and rapid release of the anhydrous ammonia . . .

Instantly the area was filled with a cloud of deadly gas. Five persons who were within 200 yards of the cloud were killed by the ammonia.

These victims included the daughter and small grandchild of a friend of mine.

People who were within 1,000 yards of the accident were in great peril, and of these, 78 had to be hospitalized. Another 100 were injured.

And it could have been worse—if the accident had taken place in a downtown area, or even if it had taken place in a rush-hour traffic situation.

Could the accident have been prevented?

Yes, if the truck had not been speeding.

Yes, if its partial liquid load had not shifted under the stress of the forces generated by the turn on the curved ramp.

And yes, probably, if the ramp barrier had been of an adequate design.

The barrier that this truck crashed through was never meant to contain anything heavier than an automobile.

Tests have demonstrated time and again that a new, concrete railing in the so-called "safety shape" can deflect and redirect a vehicle as heavy as a truck or bus. These barriers are intended to keep heavy vehicles from crashing through ramps—exactly the kind of situation that occurred in Houston.

And yet this kind of expressway barrier is not a standard design in Texas.

The Texas Highway Department could install these safer barriers, but it considers them only as an option.

As the National Transportation Safety Department put it—

> The Texas Highway Department is constructing, on I-610 interchanges, new bridge barrier systems that cannot be expected to redirect schoolbuses or heavier vehicles.

The Board believes that since safe barriers are available, they ought to be required. But the Federal Highway Administration has not adopted performance standards for barrier systems, though it has had more than 4 years in which to do this.

There have been many accidents that could have been mitigated, if safer barriers had been in place on expressways. The Houston catastrophe was just one of them.

And yet, highway builders are hesitant to install these systems.

There are dead and injured people who need never have suffered, simply because safety takes a low priority with transportation officials.

And yet I can think of any number of multilevel interchanges where heavy vehicles can crash through barriers and spill deadly cargoes. And there have been instances when passenger vehicles similarly crashed through barriers, with horrifying results.

Some of the most tragic accidents took place well after engineers knew about safe barrier systems. They will continue to take place, because things can go wrong with trucks and buses, and not even the most skilled driver can prevent accidents under any one of a huge number of circumstances. Highway designs can either reduce the damage or make it greater. At Houston, inadequate design of the highway killed innocent people, who could in no way imaginable find safety.

Yet safe barrier design is an option, even at the site of this most tragic accident.

I will soon discuss the holocaust at Eagle Pass, and another accident involving a dynamite load. There are sober lessons to be learned from each of these. The question is, when will the Department of Transportation learn them?

FREDERICK DOUGLASS—A LEADER OF CIVIL AND HUMAN RIGHTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. LE FANTE) is recognized for 5 minutes.

● Mr. LE FANTE. Mr. Speaker, in the neighborhood tradition which has become part of our American heritage, the Bergen-Lafayette and Greenville Ward Newsletter is published weekly by Political Unity Associates of Jersey City, N.J., which is in my congressional district.

More than 200 civic and political leaders and organizations regularly receive the newsletter which is also distributed by a group of merchants.

I want to call to the attention of my colleagues an article about Frederick Douglass which appeared in a February edition of the newsletter, which marked Black History Month. Mr. Douglass' contributions to the cause of civil and human rights are well known and are outlined in an exhibit at the African Museum, located not far from where we meet today.

Mr. Speaker, I commend the article, which I will include at the end of my remarks, to the Members of both Houses of this Congress. I would suggest that some morning soon before we meet, the Members of the Senate and House visit

the African Museum's exhibit and reflect on exactly how much progress there has been in the area of human rights and civil rights since the days of Mr. Douglass.

FREDERICK DOUGLASS

In commemorating the contributions made to our nation's history by Black Americans, we considered focusing on any one of a number of prominent individuals, Marian Anderson, James Baldwin, Mary McLeod Bethune, Ralph Bunche, Martin Luther King, Jr., Thurgood Marshall, Malcolm X, Adam Clayton Powell, Jr., Paul Robeson, Jackie Robinson, Roy Wilkins, Whitney Young, Jr., and many more. But in each instance the shadow and compelling influence of one nineteenth century giant forced us to realize that whatever each of our contemporary leaders had said and done in their lives, this proud Blackman had said and done nearly a hundred years earlier. It is, therefore, out of an enormous debt of gratitude that this issue is dedicated to the greatest civil and human rights leader of them all—Frederick Douglass.

On a hot day in August, 1864, a prominent politician entered the White House and paused in the President's outer office. "It was dark," Joseph T. Mills wrote later. "And there in a corner I saw a man quietly reading who possessed a remarkable appearance. I was riveted to the spot," he said, adding: "I stood and stared at him; he raised his flashing eyes and caught me in the act. I was compelled to speak. Said I, 'Are you the President?' 'No' replied the stranger, 'I am Frederick Douglass.'" It was an honest mistake. Frederick Douglass was in Washington to see Abraham Lincoln. He was not the President, but under different circumstances, he could have been. He had all the gifts, presence, passion, bearing, brilliance, all the gifts save one: he was non-white. Color—an accident of birth—barred him from the highest prize, but it did not prevent him from becoming one of the most remarkable men of that or any other age.

Born in the lowest position in society, Douglass emancipated himself and became an orator, an abolitionist, an editor, a politician, a seer, and a prophet. Born black and hungry in a society that forbade slaves to read, he lifted himself by his own efforts and became one of the great names of an age that abounds in greatness. For 50 years, from 1845 to 1895, he was in the forefront of the fight for human freedom. During this period he laid the foundation for the Black protest movement.

Although he died 83 years ago, Frederick Douglass is as current as today's headline. One hundred and twenty-five years ago, he was staging sit-ins on Massachusetts railroads. One hundred and twenty-one years ago, he was leading a fight for integrated schools in Rochester, New York. One hundred and fifteen years ago, he was denouncing hypocrisy and fraud with pre-Baldwin fury.

Two of Douglass' quotations should have special meaning and relevance for all of us as we attempt to deal with our society on a day-to-day basis:

"If there is no struggle," he said, "there is no progress. Those who profess to favor freedom, and yet depreciate agitation, are men who want crops without plowing up the ground. They want the rain without thunder and lightning. They want the ocean without the awful roar of its many waters. Power concedes nothing without a demand. It never did and never will. Men may not get all they pay for in this world; but they must certainly pay for all they get."

After a magnificent career as one of the leading abolitionists of his era, Douglass became an elder statesman. He was named Marshall of the District of Columbia and Minister to Haiti. But he continued to press the claims of Blacks. The other memorable quotation (of many) attributed to him was his death-bed answer to a young Black student who asked: "Mr. Douglass, what shall I do with my life?" The old warrior pulled himself up to a sitting position and his eyes blazed with the fury of his youth as he replied: "Agitate! Agitate!"

Too bad most of us only think about our Frederick Douglasses once a year at best.●

FOREIGN INVESTMENT HEARINGS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 10 minutes.

● Mr. BINGHAM. Mr. Speaker, I am pleased to announce that the Subcommittee on International Economic Policy and Trade, which I have the honor to chair, will conduct a hearing on Tuesday, April 25, on the International Investment Survey Act. That hearing will take place at 3 p.m. in room H–236 of the Capitol.

In response to concern about the volume and implications of both foreign investment in the United States—so-called inward investment—and investment abroad by Americans—so-called outward investment—the Congress in 1976 passed the International Investment Survey Act (Public Law 94–472). That legislation requires the executive branch to collect and publish information on international capital flows, to conduct benchmark studies at least once every 5 years of both portfolio and other forms of investment, and to study the feasibility of monitoring foreign direct investment in American agricultural, rural, and urban real estate.

The principal agencies responsible for carrying out this important measure; namely, the Departments of Commerce, Treasury, and Agriculture, have been trying to determine how best to carry out these studies and fulfill the intent of Congress.

Of the $1 million authorized to be appropriated to carry out the act in fiscal year 1978, only about $550,000 was actually appropriated. As a result, responsible agencies have had to divert existing staff from other duties to begin work that will lead to the required benchmark and feasibility studies.

The Department of Agriculture, which has responsibility for the implementation of section 4(d), requiring a feasibility study to monitor and develop data systems with respect to foreign investment in agricultural and other kinds of land, received no funds in fiscal year 1978. In order to get its work underway, Agriculture has recently requested a supplemental appropriation for fiscal year 1978 of $450,000.

In the work that has been done so far, Mr. Speaker, it has become clear that the $1,000,000 authorized to be appropriated for fiscal year 1979 will be insufficient to meet the requirements of the act, and that additional funds will be needed at least through 1981 to assure that all the required studies are produced in a timely and useful form. The task of formulating and launching these studies has proved far more difficult and costly than was initially thought by either the Congress or the executive branch.

With that in mind, Congressman WHALEN, the ranking minority member of the International Economic Policy and Trade Subcommittee, and I will introduce legislation authorizing additional appropriations to carry out the International Investment Survey Act. Instead of the original $1 million authorized for fiscal year 1979, the proposed new legislation would authorize $4 million for fiscal year 1979, $5 million for fiscal year 1980, and $4 million for fiscal year 1981. These figures represent current congressional staff estimates of the costs of implementing the act.

To date, the Office of Management and Budget has authorized the Departments of Commerce and Treasury to request authorizations for fiscal year 1979 totaling $3.938 million. That amount is, I understand, contained in the President's budget submission for fiscal year 1979. No comparable action has been taken with respect to the needs of the Department of Agriculture.

A second provision of the bill that Congressman WHALEN and I will introduce would extend by 1 year the deadline for the feasibility study I mentioned to be conducted by the Department of Agriculture. This study is a most important one, particularly in view of persistent reports of growing foreign takeover of large blocs of American farmlands. Clearly, however, it cannot be completed this year, as presently required, and a 1-year extension is necessary.

In addition to this bill, Mr. Speaker, the subcommittee will also have under consideration House Resolution 1096, introduced by Mr. TUCKER, and identical resolutions calling for the completion of the studies mandated by section 4(d) of the International Investment Survey Act no later than the end of this year.

The subcommittee invites public comment on these proposals. Interested parties wishing to testify or to submit written statements for the hearing record should contact R. Roger Majak, staff director, Subcommittee on International Economic Policy and Trade, room 707, Annex No. 1, House of Representatives, Washington, D.C. 20515 (202–225–3246) as soon as possible.●

SUPPLEMENTARY FISCAL ASSISTANCE ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. FOUNTAIN) is recognized for 5 minutes.

● Mr. FOUNTAIN. Mr. Speaker, at the request of the administration, I am introducing today a bill to authorize a program of supplementary fiscal assistance payments to local governments.

This legislation is a part of the President's recently announced urban program. It would replace the present antirecession fiscal assistance program (more generally known as countercyclical revenue sharing) when the latter expires at the end of this fiscal year. The President's bill would authorize an appropriation of $1.04 billion for fiscal year 1979 and $1 billion for fiscal year 1980—plus administrative costs.

Under the bill, these funds would be allocated annually to eligible local governments but paid in quarterly installments. State governments would not be eligible for this program.

A local government would be eligible for the new program if it is a political subdivision of a State, performs substantial governmental functions, and is experiencing either unemployment in excess of 4.5 percent—the eligibility criterion in the present antirecession fiscal assistance program—or relatively slow growth in any two of the following three statistical indicators—employment, per capita income or population. Indian tribes and Alaskan Native villages performing substantial governmental functions, and certain territories and the Commonwealth of Puerto Rico are also eligible.

The annual share to be allocated to each eligible local government would be based on a formula that incorporates its general revenue sharing allocation, adjusted to reflect the above-mentioned factors relating to excess unemployment or slow growth.

Mr. Speaker, the Intergovernmental Relations and Human Resources Subcommittee, which I chair, will hold hearings on the President's bill beginning on May 4.

Any Members wishing to testify or to submit a written statement on this legislation should contact the subcommittee office.

H.R.—

A bill to authorize a supplementary fiscal assistance program of payments to local governments, and for other purposes

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, that this Act may be cited as the "Supplementary Fiscal Assistance Act of 1978."

FINDINGS OF FACTS AND DECLARATION OF POLICY

SEC 102. FINDINGS.—The Congress finds and declares—

(a) that local governments represent a significant segment of the national economy whose sound fiscal and economic condition is essential to national economic prosperity;

(b) that secular economic decline and national economic problems have imposed considerable hardships on many local government budgets;

(c) that general purpose assistance has been especially helpful to those governments experiencing secular economic problems which are aggravated by severe cyclical fluctuations; and

(d) that a general assistance program which aids local communities requiring fiscal relief is an essential component of a comprehensive urban policy.

AUTHORIZATION OF PAYMENTS

SEC. 103. (a) IN GENERAL.—The Secretary of the Treasury (hereinafter referred to as the "Secretary") shall in accordance with the provisions of this Act make payments to local governments, territories, Indian tribes and Alaskan native villages to provide fiscal assistance to areas experiencing substantial unemployment or a high degree of fiscal strain or secular economic decline as reflected in disproportionately slow growth in employment, per capita income and population.

(b) PAYMENTS TO RECIPIENT GOVERNMENTS.—The Secretary shall pay, not later than five days after the beginning of each calendar quarter, to each eligible local government, territory, Indian tribe and Alaskan native village, which has filed a statement of assurances under section 106, an amount equal to one fourth of the annual amount allocated to such government under section 104. The first quarterly payment shall be made within the first five days of October, 1978. Payments under this Act may be made with necessary adjustments on account of overpayments or underpayments.

(c) AUTHORIZATION FOR APPROPRIATIONS.—There is hereby authorized to be appropriated for payments to eligible local governments, territories, Indian tribes and Alaskan native villages for the fiscal year 1979 the sum of $1,040,000,000, and for the fiscal year 1980 the sum of $1,000,000,000, and such additional sums in each fiscal year as may be necessary for the administration of this Act.

LOCAL GOVERNMENT ALLOCATION

SEC. 104. (a) IN GENERAL.—The Secretary shall allocate to each eligible local government from the amount appropriated for payments for each fiscal year pursuant to section 103, an amount for each such fiscal year equal to such government's local government percentage multiplied by an amount equal to the difference between the amount appropriated pursuant to section 103 and the amounts allocable pursuant to sections 113 and 114. Such allocation shall be made by the Secretary during the September preceding the appropriate fiscal year for which such allocation is made, based on the most current available data, pursuant to rules issued under section 111 of this Act.

(b) LOCAL GOVERNMENT PERCENTAGE.—For purposes of this Act the local government percentage for an eligible local government is equal to the quotient resulting from—

(1) the product of the local distribution index for such eligible local government multiplied by the local revenue sharing amount for such eligible local government, divided by

(2) the sum of such products for all eligible local governments.

(c) DEFINITIONS.—For purposes of this Act—

(1) "local government" means a county, municipality, township, or other political subdivision of a State which is a unit of general government (determined on the same principles as are used by the Bureau of the Census for general statistical purposes), and performs substantial governmental functions. Such term includes the District of Columbia.

(2) "eligible local government" means a local government which satisfies the following conditions:

(A) For a local government with boundaries in whole or in part within a Standard Metropolitan Statistical Area (SMSA), as defined by the Department of Commerce and reported to the Secretary (hereinafter "SMSA governments"), an "eligible local government" is a local government which, in the area under its jurisdiction, either—

(i) has a local unemployment rate as determined pursuant to subparagraph (3)(A) in excess of 4.5 percentage points; or

(ii) satisfies at least two of the following:

(a) the local rate of growth in employment, as determined pursuant to subparagraph (3)(B), is less than the rate of growth in employment in all SMSA's;

(b) the local rate of growth in per capita income, as determined pursuant to subparagraph (3)(C), is less than the rate of growth in per capita income for all SMSA's;

(c) the local rate of growth in population, as determined pursuant to subparagraph (3)(D), is less than the rate of growth in population for all SMSA's.

(B) For a local government with boundaries entirely outside an SMSA (hereinafter "non-SMSA governments"), an "eligible local government" is a local government which meets the unemployment or growth criteria set forth in subparagraphs (2)(A)(i) or (ii), above, except that the term "non-SMSA" is inserted in lieu of "SMSA."

(3) Local rate of employment, and local rate of growth in employment, per capita income and population are determined as follows:

(A) "Local unemployment rate" is the rate of unemployment in the area under the jurisdiction of the local government during the most recent four calendar quarters for which data are available, as determined or assigned by the Secretary of Labor and reported to the Secretary. In the case of a local government for which the Secretary of Labor cannot determine a local government unemployment rate, the Secretary of Labor shall assign such local government the local unemployment rate of the smallest unit of local government or appropriate geographic area for which a local unemployment rate has been determined and within the jurisdiction or area in which such local government is located, unless an unemployment rate has been provided for the local government to the Secretary of Labor by the Governor of the State in which the local government is located and such rate has been determined by the Secretary of Labor to have been developed in a manner consistent with procedures used by the Secretary of Labor and then assigned to the local government.

(B) "Local rate of growth in employment" is the rate of employment growth determined by subtracting from the employment in the area under the jurisdiction of a local government for the most recent four calendar quarters for which data are available, the employment within such area for a four calendar quarter period which preceded such recent four calendar quarters by either five or six years (depending on which prior year data are most useful), as determined by the Bureau of Labor Statistics for the Secretary of Labor, and dividing this difference by the employment within such area for the earlier four calendar quarter period. In the event that data are not available for such earlier period for determining an allocation under this section, the Secretary of Labor shall determine the rate of growth in employment on the basis of data for the most appropriate period of time less than five years preceding the most recent year for which data are available. In the case of a local government for which the Secretary of Labor cannot determine employment for a local government, the Secretary of Labor shall assign to such local government the local rate of growth in employment of the smallest unit of local government or appropriate geographic area for which such rate has been determined and within the jurisdiction or area in which such local government is located, unless a local rate of growth in employment has been provided for the local government to the Secretary of Labor by the Governor of the State in which the local government is located and such rate has been determined by the Secretary of Labor to have been determined in a manner consistent with procedures used by the Secretary of Labor and then assigned to the local government. The local rate of growth in employment shall be determined or assigned by the Secretary of Labor and reported to the Secretary.

(C) "Local rate of growth in per capita income" is determined by subtracting from the per capita income in the area under the jurisdiction of a local government for the most recent year for which data are available, the per capita income within such area for a year which preceded such recent year by either five or six years (depending on which prior year data are most useful), as determined by the Bureau of the Census for the Secretary of Commerce for general statistical purposes, and dividing this difference by the per capita income within such area for the earlier year. In the event that data are not available for such earlier period for determining an allocation under this section, the Secretary of Commerce shall determine the local rate of growth in per capita income on the basis of data for the most appropriate period of time less than five years preceding the most recent year for which data are available. The local rate of growth in per capita income shall be determined by the Secretary of Commerce, and reported to the Secretary.

(D) "Local rate of growth in population" is determined by subtracting from the population in the area under the jurisdiction of

the local government for the most recent year for which population data are available, the population in such area as of a date which preceded the date of the most recently available population data by either five or six years (depending on which prior year data are most useful), as determined by the Bureau of the Census for the Secretary of Commerce for general statistical purposes, and dividing this difference by the population within such area for the earlier year. In the event that data are not available for such earlier period for determining an allocation under this section, the Secretary of Commerce shall determine the local rate of growth in population on the basis of data for the most appropriate year less than five years preceding the most recent year for which data are available. The local rate of growth in population shall be determined by the Secretary of Commerce and reported to the Secretary.

(4) "Local revenue sharing amount" for a local government is the amount determined under section 108 of the State and Local Fiscal Assistance Act of 1972, as amended (31 U.S.C. § 1221 et seq.), for such local government for the most recently completed entitlement period, as defined under section 141(b) of such Act.

(5) "Local distribution index" means:

(A) For each SMSA government, the largest of the quotients resulting from—

(i) subtracting 4.5 percentage points from the local unemployment rate for such government and dividing the difference by the standard deviation weighted by population of all SMSA governments' unemployment rate, using 4.5 percentage points as the midpoint in calculating the weighted standard deviation;

(ii) subtracting the local rate of growth in employment for such government from the rate of growth in employment for all SMSA's (as calculated from data collected by the Bureau of Labor Statistics for the Secretary of Labor and reported to the Secretary for the same time period) and dividing the difference by the standard deviation weighted by population of all SMSA governments' rates of growth in employment for the same time period;

(iii) subtracting the local rate of growth in per capita income for such government from the rate of growth in per capita income for all SMSA's (as calculated from data collected by the Bureau of the Census for the Secretary of Labor and reported to the Secretary for the same time period) and dividing the difference by the standard deviation weighted by population of all SMSA governments' rates of growth in per capita income;

(iv) subtracting the local rate of growth in population for such government from the rate of growth in population for all SMSA's (as calculated from data collected by the Bureau of the Census for the Secretary of Labor and reported to the Secretary for the same time period) and dividing the difference by the standard deviation weighted by population of all SMSA governments' rates of growth in population.

(B) For each non-SMSA government, the same as it does for a SMSA government under subparagraph (5)(A) above, except that the term "non-SMSA" is to be inserted in lieu of "SMSA."

(d) ALLOCATION LIMITATIONS.—

(1) If the amount which would be allocated for any fiscal year to any eligible local government, territory, Indian tribe and Alaskan native village under this Act is less than $200, then no amount shall be paid to such government hereunder.

(2) The maximum amount payable annually to a local government under this Act shall be the lesser of the annual allocation determined under this section or the amount allocated during the period beginning July 1, 1977 and ending June 30, 1978 under title II of the Public Works Employment Act of 1976, as amended (42 U.S.C. § 6721 et seq.), except for those governments which received no allocation under such Act during the period beginning July 1, 1977 and ending June 30, 1978.

(3) Amounts allocated under this section in excess of the maximum allowed under paragraph (d)(2) shall be reallocated to those remaining eligible local governments that have not exceeded the maximum allocation under paragraph (d)(2). Governments with no allocations under title II of the Public Works Employment Act of 1976, as amended (42 U.S.C. § 6721 et seq.), for the period beginning July 1, 1977 and ending June 30, 1978 shall not be eligible for such reallocations under this paragraph.

(e) LOCAL GOVERNMENT LOCATED IN A LARGER ENTITY; BOUNDARY CHANGES AND GOVERNMENT REORGANIZATION, ETC.

(1) ONLY PART OF UNIT LOCATED IN LARGER ENTITY.—If only part of a local government is located in a larger governmental entity, such part shall be treated for allocation purposes as a separate unit of local government, and all computations except as otherwise provided in section 104(c)(2)(A) and appropriate rules, shall be made on the basis of the ratio which the estimated population of such part bears to the population of the larger governmental entity.

(2) Boundary Changes, Governmental Reorganization, Etc.—If by reason of boundary line changes, State statutory or constitutional changes, annexations or other governmental reorganizations, or other circumstances, the application of any provision of this section to a local government does not carry out the purposes of this Act, the application of such provision shall be made, under rules prescribed by the Secretary, in a manner which is consistent with such purposes.

USES OF PAYMENTS

SEC. 105. Each local government, territory, Indian tribe and Alaskan native village shall use payments made under this Act for basic services customarily provided to persons in the area under the jurisdiction of such government, including expenditures for capital outlay and basic governmental operations.

STATEMENT OF ASSURANCES

SEC. 106. Each eligible local government, territory, Indian tribe or Alaskan native village may receive payments under this Act only upon filing with the Secretary a statement of assurances, at such time and in such manner as the Secretary prescribes by rule. The Secretary may not require any such government to file more than one such statement during each fiscal year. Each such statement shall contain—

(a) an assurance that the requirements of section 105 will be complied with;

(b) an assurance that such government will—

(1) use fiscal, accounting, and audit procedures which conform to guidelines established therefor by the Secretary (after consultation with the Comptroller General of the United States), and

(2) provide to the Secretary (and to the Comptroller General of the United States), on reasonable notice, access to, and the right to examine, such books, documents, papers, or records as the Secretary may reasonably require for purposes of reviewing compliance with this Act;

(c) an assurance that reasonable reports will be furnished to the Secretary in such form and containing such information as the Secretary may reasonably require to carry out the purposes of this Act;

(d) an assurance that the requirements of section 107 will be complied with;

(e) an assurance that the requirements of section 108 will be complied with;

(f) an assurance that such government will spend amounts received under this Act only in accordance with the laws and procedures applicable to the expenditure of its own revenues.

NONDISCRIMINATION

SEC. 107. (a)(1) IN GENERAL.—No person in the United States shall, on the ground of race, color, national origin, or sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity of a local government, territory, Indian tribe or Alaskan native village which receives funds made available under this Act, or any program or activity of any State, local or territorial government funded in whole or in part with funds received under title II of the Public Works Employment Act of 1976, as amended (42 U.S.C. § 6721 et seq.). Any prohibition against discrimination on the basis of age under the Age Discrimination Act of 1975 (42 U.S.C. § 6101 et seq.) or with respect to an otherwise qualified handicapped individual as provided in section 504 of the Rehabilitation Act of 1973 (29 U.S.C. § 794 et seq.) shall also apply to such programs or activities. Any prohibition against discrimination on the basis of religion, or any exemption, from such prohibition, as provided in the Civil Rights Act of 1964 (42 U.S.C. § 2000e(2)) or title VIII of the Act of April 11, 1968 (42 U.S.C.§ 3601 et seq.), shall also apply to such programs or activities.

(2) EXCEPTIONS.—

(A) FUNDING.—The provisions of paragraph (1) of this subsection shall not apply where any State, local or territorial government or Indian tribe or Alaskan native village demonstrates, by clear and convincing evidence, that the program or activity with respect to which the allegation of discrimination has been made is not funded in whole or in part with funds made available under this Act or title II of the Public Works Employment Act of 1976, as amended (42 U.S.C. § 6721 et seq.).

(B) CONSTRUCTION PROJECTS IN PROGRESS.—The provision of paragraph (1), relating to discrimination on the basis of handicapped status, shall not apply with respect to construction projects commenced prior to January 1, 1977.

(b) ENFORCEMENT AND REMEDIES.—The provision of subsection (a) of this section shall be enforced by the Secretary in the same manner and in accordance with the same procedures as are required by sections 122, 124, and 125 of the State and Local Fiscal Assistance Act of 1972, as amended (31 U.S.C. § 1221 et seq.), to enforce compliance with section 122(a) of such Act. The Attorney General shall have the same authority, functions, and duties with respect to funds made available under this Act and under title II of the Public Works Employment Act of 1976, as amended (42 U.S.C. § 6721 et seq.) as the Attorney General has under sections 122 (g) and (h) and 124(c) of such first cited Act with respect to funds made available under that Act. Any person aggrieved by a violation of subsection (a) of this section shall have the same rights and remedies as a person aggrieved by a violation of subsection (a) of section 122 of such first cited Act, including the rights provided under section 124(c) of such Act.

LABOR STANDARDS

SEC. 108. All laborers and mechanics employed by contractors on all construction projects funded in whole or in part by payments under this Act or title II of the Public Works Employment Act of 1976, as amended (42 U.S.C. § 6721 et seq.) shall be paid wages at rates not less than those prevailing on similar projects in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act (40 U.S.C. § 276a § 276a–5). The Secretary of Labor shall have, with respect to the labor standards specified in this section, the authority and functions set forth in Reorganization Plan No. 14 of 1950 (15 CFR 3176) and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. § 276c).

WITHHOLDING

SEC. 109. Except as otherwise provided by section 197(b), whenever the Secretary, after affording reasonable notice and an opportunity for a hearing, finds that a State, local or territorial government or any Indian tribe or Alaskan native village has failed to comply substantially with any assurance filed pursuant to section 106 of this Act or title II of the Public Works Employment Act of 1976, as amended (42 U.S.C. § 6721 et seq.), the Secretary shall notify that government, tribe or village that further payments will not be made under this Act until he is satisfied that there is no longer any such failure to comply. Until he is satisfied, no further payments shall be made to such government, tribe or village under this Act.

DATA PROVISION RESPONSIBILITIES

SEC. 110. The Secretary of labor and the Secretary of Commerce shall provide information and data necessary to the administration of this Act. Such information and data shall be provided for each local government, and shall be made available when necessary to the Secretary to assist him in carrying out the provisions of this Act. The Secretaries of Labor and Commerce shall also advise the Secretary as to the availability and reliability of relevant information and data.

RULEMAKING

SEC. 111. The Secretary is authorized to prescribe, after consultation with the Secretary of Labor and the Secretary of Commerce, such rules as may be necessary for the purpose of carrying out his functions under this Act. Such rules shall be prescribed by the Secretary not later than ninety days after the effective date of this Act.

REPORTS

SEC. 112. The Secretary shall report to Congress as soon as is practical after the end of each calendar year during which payments are made under the provisions of this Act. Such reports shall include detailed information on the amounts paid to each local or territorial government, Indian tribe and Alaskan native village under the provisions of this Act and any amounts withheld by the Secretary pursuant to sections 107 and 109.

ALLOCATION TO PUERTO RICO, GUAM, AMERICAN SAMOA AND THE UNITED STATES VIRGIN ISLANDS

SEC. 113. (a) IN GENERAL.—There shall be allocated for each of the fiscal years 1979 and 1980 for the purpose of making payments under the Act to the Commonwealth of Puerto Rico, Guam, American Samoa and the Virgin Islands, an amount equal to 1 percent of the amount appropriated pursuant to section 103, multiplied by the applicable territorial percentage.

(b) ALLOCATIONS.—

(1) TERRITORIAL PERCENTAGE.—For purposes of this section, the territorial percentage is equal to the quotient resulting from the division of the territorial population of a territory by the sum of the territorial populations for all territories.

(2) For purposes of this section—

(A) "territory" means the government of the Commonwealth of Puerto Rico, Guam, American Samoa or the Virgin Islands;

(B) "territorial population" means the most recent population for each territory as determined by the Bureau of the Census for the Secretary of Commerce and reported to the Secretary;

(3) The provisions of sections 103, 104(d)(1), 105, 106, 107, 108, 109, 110, 111, and 112 shall apply to payments to the territories under this Act.

(c) PAYMENTS TO TERRITORIAL LOCAL GOVERNMENTS.—The governments of the territories are authorized to make payments to local governments within their jurisdiction from sums authorized by and received pursuant to this Act as they deem appropriate.

ALLOCATIONS TO INDIAN TRIBES AND ALASKAN NATIVE VILLAGES

SEC. 114. (a) IN GENERAL.—There shall be allocated for each of the fiscal years 1979 and 1980 for the purpose of making payments under the Act to Indian tribes and Alaskan native villages, an amount equal to 0.3 percent of the amount appropriated pursuant to section 103, multiplied by the applicable Indian tribe or Alaskan native village percentage.

(b) ALLOCATIONS.—

(1) INDIAN TRIBE OF ALASKAN NATIVE VILLAGE PERCENTAGE.—For purposes of this section, the Indian tribe or Alaska native village percentage is equal to the quotient resulting from the division of the Indian tribe or Alaskan native village population by the sum of the populations for all Indian tribes and Alaskan native villages.

(2) For purposes of this section—

(A) "Indian tribe or Alaskan native village" means an Indian tribe or Alaskan native village which has a recognized governing body and performs substantial governmental functions.

(B) "Population" means the most recent population for each Indian tribe or Alaskan native village as provided by the Bureau of Indian Affairs for the purposes of the State and Local Fiscal Assistance Act of 1972, as amended (31 U.S.C. 1221 et seq.).

(3) The provisions of section 103, 104(d)(1), 105, 106, 107, 108, 109, 111, and 112 shall apply to payments to the Indian tribes and Alaskan native villages under this Act.

APPLICABILITY TO ANTIRECESSION FISCAL ASSISTANCE

SEC. 115. Except for section 213 of title II of the Public Works Employment Act of 1976, as amended (42 U.S.C. § 6721 et seq.), and except as otherwise provided herein, such title II is repealed and the provisions of this Act shall govern the expenditure by State, local and territorial governments (as defined in title II) of funds made available under title II.●

WE MUST NOT SHRINK FROM DEMANDING A FULL ACCOUNTING OF POW/MIA FROM VIETNAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DORNAN) is recognized for 30 minutes.

Mr. DORNAN. Mr. Speaker, it was in this chamber 11 months ago that I joined with 159 determined colleagues in voting for a Defense appropriations bill amendment which would have effectively preserved the integrity of the full-scale program to seek a complete and final accounting of our POW's and MIA's in Southeast Asia. Specifically, we sought to prohibit the use of any funds which would be used to change the status of military personnel listed as missing in action unless requested by a family member or dependent, or if there was verifiable evidence of death. A skeptical House majority turned down our request. In large part this was because of what many of us were told by "friends" of the State Department. These "friends" and other State Department sources told us it is better to work quietly, that if we scale down our POW-MIA factfinding efforts, the information we seek could be gathered through the quiet filters of hushed diplomacy. It is now many months later, and Vietnam has been long forgotten by all too many. It seems also to have been forgotten by those who traffic in this so-called hushed diplomacy.

Those who have not forgotten it, however, are those who cannot forget it. They live, think, and have nightmares about it, and they will continue to do so until the truth they desperately seek is finally known. They are the wives, the sweethearts, sisters, brothers, parents, and other relatives of the American servicemen who remain missing and unaccounted for. I know dozens of them, and I know of their private anguish.

Since I first came to Capitol Hill as a newsman in the 1960's, and as a Reserve officer in the U.S. Air Force, whose best friends were POW's and are still missing in action, I have tried to help these wonderful people. I try to do so now in recognition of the fact that we, the Congress, have a special obligation to those who suffer for all of us.

My distinguished colleague, the gentleman from Mississippi (Mr. MONTGOMERY) set an example for us all by first leading the charge and opening up his office door for all of us who wanted to help. He ran interference with the State Department bureaucracy, which too often reflected the attitude that they would rather scoff at than read the reports issued by the Congress on the status of our American men missing in action.

The highly decorated former marine colonel, the gentleman from California (Mr. PAUL MCCLOSKEY) from my own State of California also put in long hours burning the midnight oil on this issue. Since his select committee has died prematurely, the leadership in this House for MIA's has been courageously carried forward by the gentleman from Massachusetts (Mr. MOAKLEY), by the gentleman from New York (Mr. OTTINGER), by former naval test pilot and attack pilot, the gentleman from California (Mr. LLOYD), and especially by the gentleman from New York (Mr. GILMAN), by the gentleman from Ohio (Mr. GUYER), and the gentleman from New York (Mr. WOLFF), chairman of one of the important International Relations Subcommittees.

The gentleman from New York (Mr. GILMAN) particularly has begged the support of all my colleagues for House Concurrent Resolution 331, which was reported out by a unanimous vote of the entire Committee on International Relations, which called upon the United Nations to vigorously pursue an accounting of our MIA's in Vietnam.

Mr. Speaker, the "sweep it under the rug" bureaucracy still exists. As a matter of fact, it still grows. It still yawns on the efforts of all of us to get a final accounting. This final accounting will never be gotten until the U.S. Government, as personified by our American diplomatic delegation to the United Nations, decides to put severe political and meaningful economic pressure on the Vietnam conquering regime.

We know there are those who believe that it is all over; they argue that we have gathered as much information as exists and that those who persist in promoting the cause of the missing in action are at best wasting our time, or at worst seeking cheap and sleazy monetary gain,

an ugly and untrue charge that the very best of our American families who have lost their sons and husbands and the very fact they would suggest they are grubbing for Government handouts is a very vicious charge.

I have reserved this time this afternoon to say that they are dead wrong. I have reserved this time in order to read into our RECORD the official Department of Defense briefing material which was presented to the Woodcock Commission prior to that Commission's departure for Hanoi last year. I have deleted many middle portions of this tragic Defense Department report, as I have been requested to do, in order to protect the families of the missing men. As we listen to this incredible intelligence analysis, I know we will begin to understand the sense of urgency with which I speak today.

I hope and pray all of us will understand the necessity of putting sustained and increasing pressure on President Carter, who has made so many promises on this issue, and upon his administration to do more than just issue press statements on the final and complete status of more than 1,300 heroic American servicemen who remain in an unaccounted-for limbo. They answered the call of duty in Vietnam throughout two decades. I believe firmly that every single man among them, dead or alive, would have wagered anything or everything that they possess that this great Nation of ours would leave no stone unturned to learn the fate of those missing soldiers, sailors, and airmen.

We are speaking of our very best citizens. If we allow this missing-in-action issue to die in a slow and ignoble way, what are we telling our young men and women in uniform today? What will we be telling our posterity?

The abridged Defense Department material follows. I will read it, because I do not want any black dots before or after, indicating that these words were not orally spoken in this august Chamber.

Picture, please, the five esteemed members of the Woodcock Commission listening to this briefing and then try to recapitulate, if you will, any of the ABC, CBS, NBC, AP, or UPI stories or newspaper accounts about some kind of tough fight they were supposed to have put up in Hanoi for a full accounting of our men.

Now, Mr. Speaker, I quote as follows:

We in the Department of Defense are pleased to assist you (the Woodcock Commission) as you endeavor to initiate this accounting for our missing men in Southeast Asia. The families of the missing have suffered the pain of uncertainty about our lost men for much too long, and needlessly so in many cases. Some of that doubt could have been alleviated long ago if the Indochinese Governments had cooperated with us at that time. We know they have information about some of our missing people but, for reasons of their own, have withheld it from us. We hope your efforts will ultimately result in increased cooperation between our nations so we might be able to finally close the books on the Vietnam War.

Today, I would like to tell you about some of these missing men and how we know the Communists can account for them. Conversely, we must not be so naive as to think they know about all of them, so any accounting we may get will be less than a full one.

The Vietnam cease-fire agreement contained the most comprehensive provisions to account for the missing ever found in any ceasefire document. Had these provisions been implemented, we would have had our accounting; however, the Vietnamese Communists consistently blocked the resolution of this matter. This is not the time for recriminations. The war is now over so there is no valid reason for the communists to continue withholding information about our people. It should also be noted that most of their earlier objections to implementation of the accounting became moot when the South Vietnamese government collapsed.

During Operation Homecoming in 1973, we repatriated almost 600 Americans who had been prisoners of war, but more than 2,500 other Americans did not return. There are still 2,546 Americans, including 41 civilians, listed as dead with bodies not recovered or as missing or prisoner. Although 758 military personnel are on the books as prisoners of war or missing, the distinction between the terms is probably academic. We have no evidence to indicate that any American servicemen are being held as prisoners in Southeast Asia, but whether a man is alive or dead does not relieve us of the responsibility to seek an accounting for him. We want the fullest possible accounting for the entire 2,546 and, wherein possible, we want the remains of our dead returned. We cannot attain this goal without complete cooperation by the Vietnamese.

It has been suggested that the Communists may be reluctant to give us incomplete remains or sketchy information. Since the cease-fire, the Vietnamese have returned some bodies to us and, in each case, they have been easily identifiable. Consequently, they may think we would be suspect of anything less, but this is not true. They should understand that we do not expect them to have knowledge of every one of our missing, but we do want to know what they do have. The smallest bit of new data may, in some cases, be the missing link to determine the fate of a missing man.

There is a great deal of information we can reasonably expect, but there are some inherent dangers in the exchange of these data. We have established categories to determine which men the Communists should know about, but categorizing is, at best, an inexact science. After the cease-fire, the Vietnamese gave us information about some men we did not expect them to know about. On the other hand, they denied knowledge of some Americans who were known to have been in their custody, some of whom had even been exploited by the enemy for propaganda purposes. Since our categories were devised using the limited data available to us, it was not in our best interest to tell the other side all we thought they should know. In the past, we have preferred to give them only representative information. This allowed us a better method of checking data they might furnish and it did not overwhelm their system for information gathering. This particular technique may or may not be the most advantageous one at this late date.

Now, Mr. Speaker, the five categories designed by the Department of Defense to determine the degrees of information of enemy knowledge of American POW/MIA personnel are roughly as follows:

Category 1: Confirmed. They have a degree of knowledge;

Category 2: Suspect. Degree of knowledge;

Category 3: Doubtful. Degree of knowledge;

Category 4: Unknown. Degree of knowledge; and

Category 5: Unrelated. Degree of knowledge.

Exhibits A through E further explaining each of the five categories are herewith included, to be printed as part of the official RECORD.

Mr. Speaker, I will not read those. They merely flush out those five catebories. But I will include them for the RECORD.

CATEGORY 1—CONFIRMED KNOWLEDGE

This category includes all personnel who were:

A. Identified by the enemy by name

B. Identified by reliable information received from releasees/escapees, or

C. Reported by highly reliable intelligence sources

D. Identified through analysis of all-source intelligence

CATEGORY 2 SUSPECT KNOWLEDGE

This category includes personnel who were:

A. Involved in the same incidents as individuals reported in category 1

B. Lost in areas or under such conditions that they may reasonably be expected to be known by the enemy

C. Connected with an incident which was discussed but not identified by name in the enemy news media, or

D. Probably identified through analysis of all-source intelligence

CATEGORY 3 DOUBTFUL KNOWLEDGE

This category includes personnel whose loss incident is such that it is doubtful that the enemy would have knowledge of the specific individuals (e.g., aircrews lost over water or remote areas).

CATEGORY 4 UNKNOWN KNOWLEDGE

This category includes individuals:

A. Whose time and place of incident are unknown (e.g., aircrew members downed at unknown locations or ground personnel separated from their unit at an unknown time or place), and

B. Who do not meet the criteria of categories 1 through 3

CATEGORY 5 CATEGORY UNRELATED TO DEGREE OF ENEMY KNOWLEDGE

This category includes those personnel whose remains have been determined to be nonrecoverable as outlined in Department of the Army Technical Manual 10-286, January 1964, section 39

Pages with names and photographs of servicemen illustrating categories 1 through 5 in the Defense Department presentation are herewith deleted for reasons I stated earlier.

The Defense Department does not determine the extent to which our nation will go to normalize relations with other governments. We would not presume to say what those limits should be, but we are convinced that there are segments of our population who are not willing to accede to any demands from the other side until they have demonstrated good faith in resolving this humanitarian problem. To Defense—

The Defense Department—

this is not an issue with a price tag. Accounting for our missing and recovering remains have always been a strictly humanitarian issue.

You have met with some families of the missing so you understand why they are distrustful of Communists. The other side's refusal to surrender data to us and the blatant manner in which they used our men for political gain do not engender much faith. We do not think that a single visit to Vietnam and Laos will dispel the disbelief built up by the dismal record of the past so we hope you do not look upon your commission as a one-shot effort.

Of course, that is exactly what it turned out to be.

I continue reading:

In light of this background information, it would be difficult for the families of the missing to accept at face value another statement that they have done all they can do. For the Vietnamese and Laotians to have any credibility in this issue, it is imperative that they address some of these cases of which they undoubtedly have knowledge.

An earlier denial of information by the North Vietnamese appears to be no barrier to later release of that same information. For many years, they have stated they had no additional information to give. Yet, they recently offered us the bodies of 12 of our men as a gesture of goodwill. This offer was withdrawn when a dispute over United Nations membership developed. We knew that they had information on nine of these and two of them—

I use here the names Jim Doe and John Smith—

were frequently used as examples of men for whom we could expect an accounting.

To do the accounting job properly, we should put American teams on the ground to locate and remove the remains of our men because proper recovery can enhance subsequent identification. Realistically, we doubt that the Indochinese would accept an American presence.

During the cease-fire negotiations, we were optimistic that the other side would cooperate in an accounting, and defense established the machinery to accomplish this mission. The four-party joint military team was established for the specific purpose of accounting for the missing. Although that organization is no longer active, the rest of the organizational structure is still in being and operational.

The Joint Casualty Resolution Center and Central Identification Laboratory now located in Hawaii are organizations to assist in recovering and identifying remains and resolving the status of Americans missing in action.

I add here, parenthetically, that I visited those two organizations. They do an absolutely incredible job.

The Center and Laboratory still are prepared to accomplish their mission. Whether it is feasible or advisable to involve JCRC in ground operations is a matter of diplomacy and foreign policy to be decided by the President and you; however, the capability is there to use if this is determined to be a viable option.

Whenever the missing are discussed, we are inevitably asked how many of the missing do we think the other side should account for. If we must give a number, we would say that it would be reasonable to expect an accounting for those men in categories 1 and 2—a total of 1,339 men. Mind you, I said an "accounting," not bodies. We have made mistakes, no doubt, in placing some men in these two categories. Conversely, one of the bodies returned to Congressman Montgomery's group had been listed by us as non-recoverable and one of the twelve names the North Vietnamese released this past September was in our category 5. We were 91 percent correct on our returned prisoners, but this is an area in which statistics and numbers can be completely meaningless. We consider numbers to be dangerous assumptions. There are too many cases we simply don't know about. These data represent our best knowledge of some of the Nation's finest young men. We have an obligation to them, their families, and to the Nation as a whole not to allow them to be used as pawns in a brutal game of diplomacy.

We would hope you are able to convey to the Vietnamese and Laotians our determination and need to account for these men to the fullest possible extent. We would hope that this is the first step in a continuing effort that will allow us to work with the other side to accomplish this goal. . . .

Mr. Speaker, I do not know why this basic report should have been classified. All of my colleagues and any interested family of an MIA can now disseminate this freely throughout the world. I emphasize again that figure of 1,339 in categories 1 and 2 of the 5 categories of accountability.

The parents and the loved ones, the wives and children of these men in these first two categories have a right to some accounting when we see ships of wheat leaving a Texas port, headed for North Vietnam, while the North Vietnamese engage in spying in this country. The Vietnamese arrogantly, as do many other small nations around the world, scoff at any basic humanitarian requests of the United States of America.

Mr. Speaker, as I said in my 1-minute remarks to the House at convening today, I have just finished watching every tragic minute of the NBC-TV series over four nights, totaling 9½ hours, called Holocaust.

I recall during the final night, remarking to my wife and children, that the Russians may have come out looking heroic but that Stalin was guilty of the same type of slaughter as Hitler. The Soviets, to this day, have dissidents escaping from Russia seeking freedom, and they tell of prisoners left over from World War II still in some of their Gulag Archipelago concentration camps. I remember vividly the scenes in the middle 1950's in Germany of prisoners being returned 10 years after World War II from the hell of Communist prisons.

The way the North Vietnamese conducted the torture of our prisoners was exactly as we saw the tortures portrayed on the artist prisoners in episode No. 3 of the NBC "Holocaust" program. I thought of our 566 military men returned, from Hanoi in 1973, particularly the senior Navy, Air Force, and Army officers who had been tortured, men like Lt. Col. Edward Aterbury, whose bracelet I still wear. He was beaten around the clock, 24 hours a day for 8 days until he died.

The North Vietnamese have a record of cruelty in their concentration camps equal to some of the nightmares we saw demonstrated in "Holocaust." We cannot end our Vietnam nightmare allowing the Vietnamese to get away with a Stalin-like refusal to account for thousands of missing people.

I want to see this Department of Defense briefing to the Woodcock Commission disseminated widely, especially since the Woodcock Commission seems to have disregarded it.

I recall seeing on network news some of the members of the Woodcock Commission singing and dancing with women in some of the Hanoi nightspots during that fruitless trip last year. I know one of the people on that Commission got a very wealthy contract to engage in some sort of school program with North Vietnam. This person knew nothing about the missing-in-action program when she was selected to go over there. She probably skipped this DOD briefing because she addressed herself to absolutely no aspect of missing-in-action tragedy when she came home.

Mr. Speaker, the Woodcock Commission has gone down in its short history as an irrelevancy, if not at worst a tragic waste of time and money.

I am not alone in my views on this issue. The gentleman from New York (Mr. GILMAN), the gentleman from Ohio (Mr. GUYER), agree. We all tell these MIA families that we have not forgotten them, that we have not forgiven the North Vietnamese for not accounting, and that we have not forgotten that this horrendous number of 1,339 American fighting men left behind is something that should be burned into every loyal American's brain forever.

Some day I hope to be submitting a resolution to this House that will provide over in Arlington Cemetery an equivalent memorial to that which represents unknown soldiers of World War I, World War II, and the Korean War. Something to represent our Vietnam casualties. Everybody of a killed-in-action casualty from that long war has fortunately been identified due to modern forensic skills.

Most Americans are not aware that we do not have anything at Arlington representing Vietnam such as an unknown soldier. Nothing to represent the dedicated men who fell in Indochina trying to contain communism. However, I believe there should be some memorial over there some day to the thousands of heroes still missing in action. Until that moment when we have absolutely no hope of some sort of accounting, I will hold off that resolution to so honor the 2.5 million veterans of the Vietnam conflict so that they also will be represented in our great cemetery on that hallowed ground at Arlington, across the Potomac River.

I thank the Chair very much for this time, and I yield back the balance of my time.

THE SOCIAL SECURITY HONOR ROLL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BURKE) is recognized for 5 minutes.

● Mr. BURKE of Massachusetts. Mr. Speaker, Once again, I am including in the RECORD my Social Security Honor Roll. This latest roll, with well over 150 cosponors of my bill H.R. 10668, is testimony to the widespread support for a rollback in the regressive social security taxes recently enacted. The concept of using general revenues in the financing of social security is an idea whose time has come. Indeed, the substantial April 6 vote of the Democratic Caucus of 150 to 57, instructing the Ways and Means Committee to explore alternatives to the President's tax package through a rollback in the social security taxes, is further evidence of the support this year for a meaningful tax reform package.

The Joint Economic Committee has made the dire prediction that the logical results of raising social security taxes will be slower economic growth, higher unemployment and a faster inflationary spiral.

The committee's analysis ties the social security tax hike to the loss of 1,300,000 jobs for American workers. I hasten to remind my colleagues that 1.3 million jobs averages out to approximately 3,000 jobs per district. Moreover, this loss of jobs means a reduction in revenue back to the Federal Government, a larger Federal deficit and, of course, a higher rate of inflation.

I urge the Members who have not cosponsored this legislation to reassess their position and to join with over 150 of their enlightened colleagues who have supported this legislation. It is not too late. The Ways and Means Committee is currently considering the major tax reforms we will make this year, a social security tax cut will be part of this effort. A tax-burdened America looks toward Congress for no less.

The Social Security Honor Roll follows:

SOCIAL SECURITY HONOR ROLL

Addabbo, Joseph—New York.

Riegle, Don—Michigan.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Ms. MIKULSKI (at the request of Mr. WRIGHT), for today, on account of illness.

Mr. MARRIOTT (at the request of Mr. RHODES), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MARKS) to revise and extend their remarks and include extraneous material:)

Mr. MILLER of Ohio, for 15 minutes, today.

Mr. DORNAN, for 30 minutes, today.

Mr. CONTE, for 5 minutes, today.

Mr. KEMP, for 10 minutes, today.

Mr. MCCLOSKEY, for 10 minutes, today.

(The following Members (at the request of Mr. GARCIA) and to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. LE FANTE, for 5 minutes, today.

Mr. BINGHAM, for 10 minutes, today.

Mr. FOUNTAIN, for 5 minutes, today.

Mr. BURKE of Massachusetts, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. MARKS), and to include extraneous matter:)

Mr. O'BRIEN.

Mr. RUDD.

Mr. MICHEL.

Mr. MOORE.

Mr. ARMSTRONG.

Mr. COLLINS of Texas in two instances.

Mr. HAGEDORN in two instances.

Mr. RHODES.

Mr. GRADISON.

Mr. WHALEN.

Mr. DERWINSKI.

Mr. KELLY.

Mr. BOB WILSON.

Mr. STEERS.

Mr. DICKINSON.

(The following Members (at the request of Mr. GARCIA), and to include extraneous matter:)

Mr. ANDERSON of California in three instances.

Mr. GONZALEZ in three instances.

Mr. MAZZOLI in five instances.

Mr. HUBBARD.

Mr. LEVITAS.

Mr. WAXMAN.

Mr. ROSENTHAL.

Mr. RYAN.

Mr. UDALL.

Mr. RICHMOND in two instances.
Mrs. LLOYD of Tennessee.
Mr. PRICE.
Mr. NOLAN.
Mr. STOKES in two instances.
Mr. DRINAN.
Mr. EARLY.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 2493. An act to amend the Federal Aviation Act of 1958, as amended, to encourage, develop, and attain an air transportation system which relies on competitive market forces to determine the quality, variety, and price of air services, and for other purposes; to the Committee on Public Works and Transportation.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 2452. An act to authorize funds for the Hubert H. Humphrey Institute of Public Affairs and for the Everett McKinley Dirksen Congressional Leadership Research Center.

ENROLLED JOINT RESOLUTION SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 649. Joint resolution to authorize the President to call a White House Conference on the Arts, and to authorize the President to call a White House Conference on the Humanities.

ADJOURNMENT

Mr. GARCIA. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 36 minutes p.m.), under its previous order, the House adjourned until Monday, April 24, 1978, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3908. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to approve the sale of certain naval vessels and for other purposes; to the Committee on Armed Services.

3909. A letter from the Assistant Secretary of the Army, transmitting a draft of proposed legislation to amend section 2575 of title 10, United States Code, to provide for more efficient disposal of lost, abandoned or unclaimed personal property that comes into the custody or control of military departments; to the Committee on Armed Services.

3910. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to change the size, weight and design of the $1 coin, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

3911. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to authorize a supplementary fiscal assistance program of payments to local governments, and for other purposes; to the Committee on Government Operations.

3912. A letter from the Comptroller General of the United States, transmitting a report on the Federal Government's use of automatic data processing standards (FGMSD-78-23, April 19, 1978); to the Committee on Government Operations.

3913. A letter from the Chairman, Interstate Commerce Commission, transmitting a report on the Commission's activities under the Government in the Sunshine Act during the period March 12, 1977 to March 12, 1978, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

3914. A letter from the Administrative Director, Arms Control and Disarmament Agency, transmitting notice of a proposed new system of records for the Agency, pursuant to 5 U.S.C. 522a(o); to the Committee on Government Operations.

3915. A letter from the Assistant Director for Information, Office of Governmental and Public Affairs, Department of Agriculture, transmitting an amended report on the agency's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3916. A letter from the Chief Counsel Designate, National Telecommunications and Information Administration, Department of Commerce, transmitting a report on the Office of Telecommunications Policy's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3917. A letter from the Chairman, National Endowment for the Arts, transmitting a report on the agency's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3918. A letter from the Acting President, Overseas Private Investment Corporation, transmitting a report on the Corporation's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3919. A letter from the Secretary, Commission of Fine Arts, transmitting a report on the Commission's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3920. A letter from the Executive Director, Federal Communications Commission, transmitting a report on backlog of pending applications and hearing cases in the Commission as of August 31, 1977, pursuant to section 5(e) of the Communications Act, as amended; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DELANEY: Committee on Rules. House Resolution 1143. Resolution providing for the consideration of H.R. 11401. A bill to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes. (Rept. No. 95-1072). Referred to the House Calendar.

Mr. MURPHY of Illinois: Committee on Rules. House Resolution 1144. Resolution providing for the consideration of H.R. 11832. A bill to authorize appropriations for fiscal year 1979 under the Arms Control and Disarmament Act. (Rept. No. 95-1073). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. House Resolution 1145. Resolution providing for the consideration of H.R. 11877. A bill to authorize supplemental appropriations for fiscal year 1978, and to authorize appropriations for fiscal year 1979, for the Peace Corps, and to make certain changes in the Peace Corps Act. (Rept. No. 95-1074). Referred to the House Calendar.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. BOLAND: Select Committee on Intelligence. H.R. 12240. A bill to authorize appropriations for fiscal year 1979 for intelligence and intelligence-related activities of the U.S. Government, the Intelligence Community Staff, the Central Intelligence Agency Retirement and Disability System, and for other purposes (Rept. No. 95-1075, Pt. I). Referred to the Committee on Armed Services and to the Committee on the Judiciary for a period ending not later than May 10, 1978, for concurrent consideration of such provisions of the bill as fall within the jurisdictions of those committees under Rule X, clause 1(c) and clause 1(m), respectively, and ordered to be printed.

Mr. NICHOLS: Committee on Armed Services. H.R. 11823. A bill to amend section 1331 (c) of title 10, United States Code, to allow certain otherwise ineligible reservists to become eligible for retired pay, and for other purposes (Rept. No. 95-1076). Referred to the Committee of the Whole House on the State of the Union.

Mr. NICHOLS: Committee on Armed Services. H.R. 11797. A bill to amend title 10, United States Code, to grant survivors of Reserves who retire for nonregular service and died before becoming entitled to retired pay eligibility for certain survivor benefits (Rept. No. 95-1077). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE: Committee on Science and Technology. H.R. 12163. A bill to authorize appropriations to the Department of Energy in accordance with section 261 of the Atomic Energy Act of 1954, section 305 of the Energy Reorganization Act of 1974, section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and section 660 of the Department of Energy Reorganization Act, for energy research and development, and for other purposes (Rept. No. 95-1078). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON of California (for himself, Mr. BEILENSON, Mr. LAGOMARSINO, Mr. MILLER of California, and Mr. SISK):

H.R. 12248. A bill to authorize a study of the feasibility and desirability of establishing a national recreation area to be known as the Santa Margarita National Recreation Area in the area in San Diego, Calif., which presently constitutes Camp Pendleton; to the Committee on Interior and Insular Affairs.

By Mr. ANDERSON of Illinois (for himself, Mr. AUCOIN, Mr. CORNWELL, Mr. LEACH, and Mr. MCCORMACK):

H.R. 12249. A bill to amend title XIV of the Public Health Service Act to provide Fed-

eral grants for small public water systems to meet national primary drinking water regulations; to the Committee on Interstate and Foreign Commerce.

By Mr. PHILLIP BURTON (for himself, Mr. VENTO, Mr. NOLAN, Mr. UDALL, Mr. KASTENMEIER, Mr. BINGHAM, Mr. BYRON, Mr. TSONGAS, Mr. FLORIO, Mr. KREBS, Mr. KOSTMAYER, Mr. SEIBERLING, Mr. WEAVER, Mr. CARR, Mr. MILLER of California, Mr. HOWARD, Mr. RONCALIO, Mr. BLOUIN, Mr. BRODHEAD, Mr. HARKIN, Mr. BROWN of California, Mr. PEASE, Mr. OTTINGER, Mr. BEILENSON, and Mr. CONYERS):

H.R. 12250. A bill to designate the Boundary Waters Canoe Area Wilderness, to establish the Boundary Waters Canoe Area National Recreation Area, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. AUCOIN (for himself, Mr. LUNDINE, Mr. HANLEY, Mr. LAFALCE, Mr. PATTISON of New York, Mr. PATTERSON of California, Mr. MITCHELL of Maryland, Mr. TSONGAS, Mr. BARNARD, Mr. MCHUGH, Ms. HOLTZMAN, Mr. KRUEGER, Mr. BEDELL, Mr. CORRADA, Mr. MINETA, Mr. PANETTA, Mr. FRASER, Mr. BRECKINRIDGE, Mr. PERKINS, Mr. BEVILL, and Mr. LONG of Louisiana):

H.R. 12251. A bill to amend title V of the Housing Act of 1949 to increase and extend authorities thereunder, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BEARD of Rhode Island (for himself, Mr. CARNEY, Mr. HILLIS, Mr. ROBERTS, Mr. HAMMERSCHMIDT, Mr. DANIELSON, Mr. BRINKLEY, Mr. CORNELL, Mr. APPLEGATE, Mr. BARNARD, Mr. HANSEN, Mr. SAWYER, Mr. TEAGUE, Mr. SATTERFIELD, Mr. EDWARDS of California, Mr. MONTGOMERY, Mr. WOLFF, Mr. MOTTL, Mr. HEFNER, Mr. HANNAFORD, Mr. EDGAR, Mr. HALL, Mrs. HECKLER, and Mr. WYLIE):

H.R. 12252. A bill to amend title 38 of the United States Code in order to require the Administrator of Veterans' Affairs to pay a $150 allowance to any State or any agency or political subdivision of a State in reimbursement for expenses incurred in the burial of each veteran in any cemetery owned by such State or agency or political subdivision of a State, if the cemetery or section thereof is used solely for the internment of veterans; to the Committee on Veterans' Affairs.

By Mr. BEARD of Rhode Island (for himself, Mr. ABDNOR, Mr. WALSH, and Mr. GUYER):

H.R. 12253. A bill to amend title 38 of the United States Code in order to require the Administrator of Veterans' Affairs to pay a $150 allowance to any State or any agency or political subdivision of a State in reimbursement for expenses incurred in the burial of each veteran in any cemetery owned by such State or agency or political subdivision of a State, if the cemetery or section thereof is used solely for the internment of veterans; to the Committee on Veterans' Affairs.

By Mr. BLOUIN (for himself, Mr. QUIE, Mr. BAUCUS, Mr. BEDELL, Mr. FRENZEL, and Mr. ROYBAL):

H.R. 12254. A bill to provide for grants to tribally controlled community colleges, and for other purposes; to the Committee on Education and Labor.

By Mr. BRADEMAS (for himself, Mr. JEFFORDS, Mr. PERKINS, Mr. QUIE, Mr. BEARD of Rhode Island, Mr. PRESSLER, Mr. MILLER of California, Mr. KILDEE, Mr. HEFTEL, Mr. HAWKINS, Mr. BIAGGI, Mr. SARASIN, Mr. THOMPSON, Mr. GOODLING, Mr. DENT, Mr. PURSELL, Mr. FORD of Michigan, Mr. PHILLIP BURTON, Mr. GAYDOS, Mr. CLAY, Mr. ANDREWS of North Carolina, Mr. BLOUIN, Mr. CORNELL, Mr. SIMON, and Mr. ZEFERETTI):

H.R. 12255. A bill to amend the Older Americans Act of 1965 to provide for improved programs for older persons, and for other purposes; to the Committee on Education and Labor.

By Mr. BYRON (for himself, Mr. LUJAN, Mr. BEVILL, Mr. CAVANAUGH, Mr. CHAPPELL, Mr. DUNCAN of Tennessee, Mr. GUYER, Mr. HOLLENBECK, Mr. HYDE, Mrs. LLOYD of Tennessee, Ms. MIKULSKI, Mr. MOAKLEY, Mr. MURPHY of Pennsylvania, Mr. STOKES, and Mr. YATRON):

H.R. 12256. A bill to amend the Railroad Retirement Act of 1974 with respect to benefits payable to certain individuals who on December 31, 1974, had at least ten years of railroad service and also were fully insured under the Social Security Act; to the Committee on Interstate and Foreign Commerce.

By Mr. CARNEY (for himself, Mr. HILLIS, Mr. ROBERTS, Mr. HAMMERSCHMIDT, Mr. DANIELSON, Mr. BEARD of Rhode Island, Mr. BRINKLEY, Mr. CORNELL, Mr. APPLEGATE, Mr. BARNARD, Mr. HANSEN, Mr. SAWYER, Mr. TEAGUE, Mr. SATTERFIELD, Mr. EDWARDS of California, Mr. MONTGOMERY, Mr. WOLFF, Mr. MOTTL, Mr. HEFNER, Mr. EDGAR, Mr. ALLEN, Mr. HALL, Mrs. HECKLER, and Mr. WYLIE):

H.R. 12257. A bill to amend title 38, United States Code, to authorize the Administrator of Veterans' Affairs to furnish cemetery memorial headstones or markers to commemorate veterans who die after being honorably discharged and whose remains are not recovered or identified; to the Committee on Veterans' Affairs.

By Mr. CARNEY (for himself, Mr. HILLIS, Mr. ROBERTS, Mr. HAMMERSCHMIDT, Mr. DANIELSON, Mr. BEARD of Rhode Island, Mr. BRINKLEY, Mr. CORNELL, Mr. APPLEGATE, Mr. BARNARD, Mr. HANSEN, Mr. SAWYER, Mr. TEAGUE, Mr. SATTERFIELD, Mr. EDWARDS of California, Mr. MONTGOMERY, Mr. WOLFF, Mr. MOTTL, Mr. HEFNER, Mr. HANNAFORD, Mr. EDGAR, Mr. ALLEN, Mr. HALL, Mrs. HECKLER, and Mr. WYLIE):

H.R. 12258. A bill to amend title 38, United States Code, to increase the maximum amount which the Administrator of Veterans' Affairs may pay for the funeral expenses of a veteran from $250 to $350; to the Committee on Veterans' Affairs.

By Mr. CARNEY (for himself, Mr. ABDNOR, Mr. WALSH, and Mr. GUYER):

H.R. 12259. A bill to amend title 38, United States Code, to increase the maximum amount which the Administrator of Veterans Affairs may pay for the funeral expenses of a veteran from $250 to $350; to the Committee on Veterans Affairs.

H.R. 12260. A bill to amend title 38, United States Code, to authorize the Administrator of Veterans' Affairs to furnish cemetery memorial headstones or markers to commemorate veterans who died after being honorably discharged and whose remains are not recovered or identified; to the Committee on Veterans' Affairs.

By Mr. CARNEY (for himself, Mr. HILLIS, Mr. ROBERTS, Mr. HAMMERSCHMIDT, Mr. DANIELSON, Mr. BEARD, OF RHODE ISLAND, Mr. BRINKLEY, Mr. CORNELL, Mr. APPLEGATE, Mr. BARNARD, Mr. HANSEN, Mr. SAWYER, Mr. TEAGUE, Mr. SATTERFIELD, Mr. EDWARDS of California, Mr. MONTGOMERY, Mr. WOLFF, Mr. MOTTL, Mr. HEFNER, Mr. HANNAFORD, Mr. EDGAR, Mr. ALLEN, Mr. HALL, Mrs. HECKLER, and Mr. WYLIE):

H.R. 12261. A bill to pay tribute to those members of the U.S. Armed Forces who served honorably in Southeast Asia during the Vietnam conflict; to the Committee on Veterans' Affairs.

By Mr. CARNEY (for himself, Mr. ABDNOR, Mr. WALSH, Mr. GUYER, and Mr. HYDE):

H.R. 12262. A bill to pay tribute to those members of the U.S. Armed Forces who served honorably in Southeast Asia during the Vietnam conflict; to the Committee on Veterans' Affairs.

By Mr. CONABLE:

H.R. 12263. A bill to amend the Internal Revenue Code of 1954 with respect to individuals to defer gain on the sale of certain securities, to eliminate certain restrictions on the deduction for investment interest, and to remove limitations on offsetting capital losses on certain securities against taxable income; to the Committee on Ways and Means.

By Mr. CORNELL (for himself, Mr. KASTENMEIER, Mr. ZABLOCKI, Mr. OBEY, Mr. ASPIN, Mr. BALDUS, and Mr. REUSS):

H.R. 12264. A bill to designate certain lands in the State of Wisconsin as wilderness; to the Committee on Interior and Insular Affairs.

By Mr. DRINAN (for himself, Mr. BLOUIN, Mr. CORRADA, Mr. EDGAR, Mr. EILBERG, Mr. ERTEL, Mr. FRENZEL, Mr. LEDERER, Mr. LE FANTE, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. MURPHY of Pennsylvania, Mr. OTTINGER, Mr. WHITEHURST, Mr. WOLFF, and Mr. YOUNG of Alaska):

H.R. 12265. A bill to amend the Office of Federal Procurement Policy Act to require the payment of interest by Federal agencies on overdue payments to small business concerns; jointly, to the Committees on Government Operations, and Small Business.

By Mr. EDWARDS of California:

H.R. 12266. A bill to extend the Commission on Civil Rights for 5 years, to authorize appropriations for the Commission, to effect certain technical changes to comply with changes in the law, and for other purposes; to the Committee on the Judiciary.

By Mr. HANNAFORD:

H.R. 12267. A bill to amend the Older Americans Act of 1965 to establish a National Commission on Housing for the Elderly; to the Committee on Education and Labor.

By Mr. HARRINGTON:

H.R. 12268. A bill to amend title IV of the Higher Education Act of 1965 to establish a system of student tuition advances to be repaid as an income tax imposed by the Internal Revenue Code of 1954, and for other purposes; jointly, to the Committees on Education and Labor, and Ways and Means.

By Mr. HUGHES:

H.R. 12269. A bill to provide for the merit selection of U.S. attorneys and U.S. district court judges; to the Committee on the Judiciary.

By Mr. MCCORMACK (for himself, Mr. ULLMAN, Mr. JENKINS, Mr. COHEN, Mr. STOCKMAN, Mr. AUCOIN, Mr. CAVANAUGH, Mr. BAUMAN, and Mr. PATTISON of New York):

H.R. 12270. A bill to amend the Internal Revenue Code of 1954 with respect to the employment of full-time students under the age of 16 as hand harvest laborers in an agricultural operation; to the Committee on Ways and Means.

By Mr. MCDADE:

H.R. 12271. A bill to establish an incentive program for producers to cull dairy cattle; to the Committee on Agriculture.

By Mr. MILLER of California:

H.R. 12272. A bill to amend the act of June 3, 1960 (74 Stat. 156), to provide additional authority for the Secretary of the Interior to construct the San Luis Unit, Central Valley Project, California, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MURPHY of Pennsylvania:

H.R. 12273. A bill to amend title II of the Social Security Act to provide that any fully insured individual may qualify for disability insurance benefits (and the disability freeze) if he has 40 quarters of coverage, regardless of when such quarters were earned, even if he does not have 20 quarters of coverage during the 40-quarter period immediately preceding his disability; to the Committee on Ways and Means.

By Mr. PRESSLER:

H.R. 12274. A bill to amend the Rehabilitation Act of 1973 to establish programs for training interpreters and for providing interpreter services to deaf individuals, and for other purposes; to the Committee on Education and Labor.

H.R. 12275. A bill to amend the Older Americans Act of 1965 to provide for the distribution of information relating to transportation services for older persons and to require the Federal Council on the Aging to conduct a study of such services; to the Committee on Education and Labor.

H.R. 12276. A bill to improve rail freight transportation; to the Committee on Interstate and Foreign Commerce.

By Mr. RINALDO (for himself, Mr. PEPPER, and Mrs. MEYNER):

H.R. 12277. A bill to amend title XIX of the Social Security Act to permit States to provide home health care service and other services to individuals who would otherwise be eligible to receive medical assistance if they were institutionalized; to the Committee on Interstate and Foreign Commerce.

By Mr. ROBERTS (by request):

H.R. 12278. A bill to amend section 3103 of title 38, United States Code, to extend the time period within which the board of review concerned, on its own initiative, shall determine whether a person who has been awarded a general or honorable discharge under revised standards for the review of discharges as specified in clause (A)(i), (ii), or (iii) of paragraph (2) of subsection (e) of such section 3103 would be entitled to an upgraded discharge under standards meeting the requirements of paragraph (1) of such subsection; to amend section 5 of Public Law 95-126 to extend the time during which a former serviceperson may continue to receive Veterans Administration benefits pending such determination; and for other purposes; to the Committee on Veteran's Affairs.

By Mr. STANTON:

H.R. 12279. A bill to amend the Federal Reserve Act to provide for the pricing of Federal Reserve System services and the payment of interest on reserves; to the Committee on Banking, Finance and Urban Affairs.

By Mr. WALKER:

H.R. 12280. A bill to amend title 5, United States Code, to deny Federal retirement annuities to individuals convicted of any felony, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. WHITEHURST (for himself and Mr. FRENZEL):

H.R. 12281. A bill to amend the Ports and Waterways Safety Act of 1972, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. WHITEHURST (for himself and Mr. BLOUIN):

H.R. 12282. A bill to amend the Internal Revenue Code of 1954 to provide tax-saving incentives for savings accounts established for the purpose of purchasing a home; to the Committee on Ways and Means.

By Mr. CHARLES WILSON of Texas (for himself and Mr. GAMMAGE):

H.R. 12283. A bill to amend the Occupational Safety and Health Act of 1970 to prohibit restrictions on work rules in locations in which there is hunting, recreational fishing, or recreational sport shooting, and for other purposes; to the Committee on Education and Labor.

By Mr. ASHBROOK (for himself, Mr. DEVINE, Mr. KINDNESS, Mr. LATTA, Mr. SPENCE, Mr. BAUMAN, Mr. CARTER, Mr. KETCHUM, Mr. MCDONALD, Mr. BADHAM, Mr. DORNAN, Mr. ROUSSELOT, Mr. YOUNG of Florida, Mr. MARRIOTT, Mr. MILLER of Ohio, Mr. HALL, Mr. GUYER, Mr. JEFFORDS, Mr. EDWARDS of Oklahoma, Mr. SYMMS, and Mr. ARCHER):

H.J. Res. 862. Joint resolution proposing an amendment to the Constitution of the United States relative to force and effect of treaties; to the Committee on the Judiciary.

By Mr. BONIOR:

H.J. Res. 863. Joint resolution authorizing and requesting the President to issue a proclamation designating the period from October 8, 1978, through October 14, 1978, as "National School Bus Safety Week"; to the Committee on Post Office and Civil Service.

By Mr. GAYDOS:

H.J. Res. 864. Joint resolution extending the deadline for the ratification of the equal rights amendment; to the Committee on the Judiciary.

By Mr. PRESSLER:

H.J. Res. 865. Joint resolution proposing an amendment to the Constitution of the United States to limit the number of consecutive terms that Representatives and Senators may serve; to the Committee on the Judiciary.

By Mr. CONTE (for himself, Mr. AMMERMAN, Mr. BINGHAM, Mr. BONIOR, Mr. CARTER, Mr. CLAY, Mr. COHEN, Mr. COTTER, Mr. D'AMOURS, Mr. DAVIS, Mr. DOWNEY, Mr. DRINAN, Mr. EMERY, Mr. FLOOD, Mr. FLORIO, Mr. FRENZEL, Mr. HORTON, Mr. JEFFORDS, Mr. KREBS, Mr. KRUEGER, Mr. LEACH, Mr. LE FANTE, Mr. MIKVA, Mr. MITCHELL of Maryland, and Mr. MOAKLEY):

H. Con. Res. 565. Concurrent resolution condemning the slaughter of dolphins by Japanese fishermen; to the Committee on International Relations.

By Mr. CONTE (for himself, Mr. MURPHY of Pennsylvania, Mr. PATTEN, Mr. PICKLE, Mr. PANETTA, Mr. RODINO, Mr. SANTINI, Mrs. SCHROEDER, Mr. WEISS, Mr. WHITEHURST, and Mr. YOUNG of Florida):

H. Con. Res. 566. Concurrent resolution condemning the slaughter of dolphins by Japanese fishermen; to the Committee on International Relations.

Mr. DE LA GARZA:

H. Con. Res. 567. Concurrent resolution disapproving proposed regulations of the Department of the Treasury requiring centralized registration of firearms and other matters; jointly, to the Committees on the Judiciary, and Ways and Means.

By Mr. JEFFORDS (for himself, Mr. BINGHAM, Mr. BONIOR, Mr. EDGAR, Mr. FORD of Michigan, Mr. GIBBONS, Mr. LENT, Mr. OTTINGER, Mr. PRICE, Mr. RANGEL, and Mr. STARK):

H. Con. Res. 568. Concurrent resolution expressing the sense of the Congress that the United Nations should convene a World Alternate Energy Conference having as its major purpose the establishment of an International Alternate Energy Commission to facilitate the transfer among countries of information relating to alternate energy sources and to otherwise encourage the use of alternate energy sources; to the Committee on International Relations.

By Mr. SANTINI (for himself, Mr. ASHBROOK, Mr. ABDNOR, Mr. CHAPPELL, Mr. CLEVELAND, Mr. DAN DANIEL, Mr. DICKINSON, Mr. HALL, Mr. HUCKABY, Mr. KINDNESS, Mr. LOTT, Mr. LUKEN, Mr. MCDONALD, Mr. MONTGOMERY, Mr. JOHN T. MYERS, Mr. ROBINSON, Mr. SATTERFIELD, Mr. SPENCE, Mr. STOCKMAN, Mr. STUMP, Mr. TREEN, Mr. WAMPLER, and Mr. WATKINS):

H. Con. Res. 569. Concurrent resolution disapproving proposed regulations of the Department of the Treasury requiring centralized registration of firearms and other matters; jointly, to the Committees on the Judiciary and Ways and Means.

By Mr. VOLKMER (for himself, Mr. ASHBROOK, Mr. BROWN of Ohio, Mr. CORCORAN of Illinois, Mr. DUNCAN of Tennessee, Mr. ERTEL, Mr. FLYNT, Mr. GRASSLEY, Mr. HARSHA, Mr. HUBBARD, Mr. LATTA, Mrs. LLOYD of Tennessee, Mr. MATHIS, Mr. PERKINS, Mr. QUAYLE, Mr. QUILLEN, Mr. REGULA, Mr. SEBELIUS, Mr. SKELTON, Mr. SNYDER, Mr. STANGELAND, Mr. THONE, Mr. TAYLOR, and Mr. WAGGONNER):

H. Con. Res. 570. Concurrent resolution disapproving proposed regulations of the Department of the Treasury requiring centralized registration of firearms and other matters; jointly, to the Committees on the Judiciary, and Ways and Means.

By Mr. KETCHUM:

H. Res. 1146. Resolution to amend the rules of the House; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

374. By the SPEAKER: A memorial of the Assembly of the State of New York, relative to the kidnapping of former Italian Prime Minister Aldo Moro; to the Committee on International Relations.

375. Also, memorial of the Legislature of the Territory of Guam, relative to supporting proposed legislation to authorize U.S. international air carriers to carry domestic traffic between U.S. cities, to the Committee on Public Works and Transportation.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. QUIE introduced a bill (H.R. 12284) for the relief of Susan Katherine Adamski, which was referred to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

446. By the SPEAKER: Petition of the city council, Philadelphia, relative to the printing of a brochure for the Kiev Agricultural Exhibit in the native Ukrainian language; to the Committee on International Relations.

447. Also, petition of the Cyprus Library Association and Pnevmatiki Stegi (Cultural Society), Cyprus, relative to the proposed lifting of the Turkish embargo; to the Committee on International Relations.

EXTENSIONS OF REMARKS

LAY OFF OUR DERBY

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. HUBBARD. Mr. Speaker, I would like to share with my House colleagues the following editorial entitled "Come On, Senator, Lay Off Our Derby," which appeared in the Monday, April 17, 1978, edition of the Louisville Times.

This humorous, tongue-in-cheek editorial was written by Warren Buckler, an associate editor of this fine Kentucky newspaper. It is as follows:

LAY OFF OUR DERBY

Now let's not carry this thing too far, Senator Kennedy.

We agree with you wholeheartedly that ordinary taxpayers shouldn't have to subsidize three-martini lunches and other forms of "business" entertainment. We are as shocked as you are by reports that businessmen claim trips to the Masters Golf Tournament and the Superbowl as tax-deductible expenses.

But you were way off the beam when you listed our Kentucky Derby as one of those "notorious magnets" for pleasure-loving plutocrats who have no qualms about billing the public treasury for a weekend of revelry.

It's true, of course, that just before the first Saturday in May corporate jets soar over Louisville like doves over a baited field.

But your indignant letter to Jerome Kurtz, commissioner of the Internal Revenue Service and a sworn enemy of tax breaks for high living businessmen, makes a li'l ol' two-minute horse race appear to be an orgy of party-going or an exercise in debauchery.

You talk, for instance, of the "promiscuous use of private corporate jets for personal pleasure trips." Of "pleasure jaunts." And of "luxury sporting event trips." Some citizens might get the impression that our quaint little spring outing is a hedonistic hoedown that would rival the worst excesses in the reign of Caligula.

Certainly you don't think that Derby week is something other than work, work, work for the folks who jet in for business meetings. Don't you realize Louisville hostesses despair of luring visiting bigshots away from their conference tables? The Derby itself is incidental. Surely you don't begrudge our guests an afternoon at the races after long hours of poring over sales charts and balance sheets.

Your insistence that Mr. Kurtz either disallow business deductions for Derby trips or require that the value of the trip be added to the executives' taxable income would hurt the little people, too.

Many of the "ordinary taxpayers" who are alleged to be the victims of all this unbridled hilarity actually profit handsomely from the influx of corporate executives. Who would pay inflated rates for hotel rooms or exorbitant prices for watery juleps or give big tips to taxi drivers if the IRS followed your advice?

Couldn't you agree, senator, after looking at the facts, that Derby trips are actually in the national interest? All Americans surely benefit when the nation's top managers spend a long weekend in Louisville keeping the economy vital. In fact, we'd be in a hell of a fix economically if it weren't for the first Saturday in May and the days preceding it.

Just think, our construction industry got a $1.5 million plum this year adding a floor to Churchill Downs that gives it 640 more seats, most of which the state—that means the taxpayers of Kentucky—is buying so Governor Carroll can entertain businessmen he's trying to woo to the commonwealth.

So crack down, senator, on boozy lunches and frivolous flights to golf games. But allow the Derby to thrive as the legitimate business event it unquestionably is.

If you still aren't convinced, our "notorious magnet" may pull you here for an on-site inquiry. And don't worry about the cost. In accordance with congressional tradition, just put it on the old expense account.●

NATURAL FOODS MONTH—REPRESENTATIVE MARGARET HECKLER, REPRESENTATIVE FRED RICHMOND

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. RICHMOND. Mr. Speaker, April has been designated as "Natural Foods Month" to remind Americans that their diets have changed considerably during the past five decades to the detriment of their health. For the first time in history, Americans are consuming more processed convenience snack foods than fresh foods. Natural foods are relatively unprocessed and contain no additives such as artificial coloring, flavoring, and preservatives. If more Americans were aware of the benefits of a nutritious diet, we believe that as a Nation we could begin reversing the tragically high personal and economic cost of malnutrition. Accordingly as members of the only Subcommittee on Nutrition in the House we wish to commend to our colleagues the following resolution which has been presented to us by Dr. Arnold Pike, of the National Nutritional Foods Association, and a distinguished advocate for making consumers aware of the relation of diet to health.

The resolution follows:

NATURAL FOODS MONTH SUGGESTED PROCLAMATION/RESOLUTION

Whereas the food supply in the United States has become more artificial and less nutritious than when our nation was founded,

Whereas we have reached a point in this country where more convenience, snack and processed food products are purchased than fresh foods to the detriment of the nation's health,

Whereas the importance of using all natural resources for the maximum benefit humanity requires that we give increased attention to the food and farming practices of our nation;

Be it resolved that April 1978 is hereby designated as Natural Foods Month and that each citizen is hereby encouraged to consider the relationship we each have with the environment which supports our natural lives, and

That we establish home gardens where possible, improving the soil by working in harmony with nature, and

That we seek to improve our diets and our nation's health by assuring the body of all nutrients needed for good health with foods as close to their natural state as possible, and

That we commend the National Nutritional Foods Association for its leadership in initiating Natural Foods Month to encourage better nutrition among all age groups.

With concern for the state of our nation's health I (we) do hereby proclaim April as Natural Foods Month.

(To be signed by: Governor, mayor, city council, board of supervisors, or others).●

TRIBUTE TO CHARLES AVERY

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. RUSSO. Mr. Speaker, on June 15, 1978, Charles Avery, chairperson of the foreign language department of Thornridge High School, Dolton, Ill., will retire. The people of my district and of Thornton Township District 205 schools will express best wishes to a fine educator, who for the past 26 years has dedicated himself to the study and promotion of the French and Spanish languages and their respective cultures.

Mr. Avery's work in the field of foreign language is as vast as his scholastic preparation. Prior to his employment by district 205, he studied and/or received degrees at both American as well as European universities. Among some of the universities attended in this country are Oberlin, Missouri, and Middlebury. He has also traveled and studied extensively in Europe.

From 1942 to 1945 he served his country in the Armed Forces in French Morocco, Algeria, Italy, and France.

Before beginning his teaching career at Thornton, he was on staff at Stephens College. From 1950 to 1952 he was the department chairperson of French at Chicago Latin School. He has also been an active member and officer of the American Association of Teachers of French. He has served as secretary-treasurer of that organization.

During the summer of 1977 Mr. Avery was recognized in a special way by the French Government. He attended the 50th annual convention of the American Association of Teachers of French in Paris, which met under the auspices of the French Government, the International Federation of French Teachers, and the International Center of Pedagogical Studies. The academic highlight for Mr. Avery was attending a dialog between Ionesco and Barrault on French theater.

Mr. Avery was also honored by an invitation for a radio interview on the state of French studies in the United States. He was particularly pleased to be able to point out the role of the French Government in Louisiana where French studies are assuming a renewed importance.

It is with great pride that we recognize an individual who has so unselfishly dedicated himself to the promotion of understanding among people of different cultures and I know my colleagues join with me in congratulating Mr. Avery. His students have benefited, not only from his vast knowledge of languages, but from his indepth understanding, love, and respect of the peoples and cultures whose languages he has promoted for so many years. His personal achievements as well as the wealth of knowledge he has imparted to students and colleagues will long be remembered.●

PASSOVER MESSAGE 1978 (5738)

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. WAXMAN. Mr. Speaker, the observance of Passover has a special poignance and urgency for the Jews who live in the Soviet Union. Passover's message of freedom and redemption in the Promised Land stands in stark contrast to the daily indignities and intimidations which visit those in the Soviet Union who are seeking to affirm their Jewish identity and destiny in Israel.

In March I visited the Soviet Union with the Armed Services Committee. In each city, my wife, Janet, and I sought out refuseniks whose names had been given us in the United States. Our conversations with them confirmed our worst fears over the extent of the personal and human tragedies with which they are forced to live each day. Jobs are revoked as soon as applications are made to emigrate. Families are shunned by their associates. Bureaucrats are singularly unresponsive to repeated pleas for answers as to when, or even whether, these potential emigres will ever be permitted to leave. Legal obstacles such as possession of "state secrets" are erected by the authorities. The most vocal among them are arrested and held incommunicado for months before being tried for "parasitism" or other insidious charges.

The result of his campaign appears to have the purpose of deterring any hope among the tens of thousands who wish to leave that they will ever be permitted to do so. And all because they are Jews who wish to live another life in another place.

Jews are enjoined on the Passover to recount the Exodus from Egypt as if they themselves had been enslaved. In recognition of the desperate conditions of Jews in the Soviet Union, and the compelling parallel to the present day, a fourth matzah, the Matzah of Hope, has been added to the Passover service.

I, therefore, wish to share with my colleagues on this Passover the message of Eugene Gold, chairman of the National Conference on Soviet Jewry, which reiterates our commitment to their freedom:

PASSOVER MESSAGE 1978 (5738)

(By Eugene Gold)

As we celebrate the deliverance of Jews from Egypt, we must remember that we Americans—Jews and non-Jews—are the tools of deliverance for the Jewish minority in the Soviet Union.

This past year we have witnessed the USSR's sensitivity to world criticism with harsh attacks on Soviet Jews, as well as a welcomed increase in Jewish emigration. While the plight of Jewish activist Anatoly Shcharansky has dominated the headlines, his case is only one facet of the overall situation confronting Soviet Jews. Harassments, a spate of trials on alleged charges of "parasitism" and an increasingly overt spread of anti-Semitism as a tool of Soviet propaganda threatens all Soviet Jews. Indeed the evil of Soviet anti-Semitism threatens all people, everywhere.

Jews in the USSR cannot freely profess and exercise their religious rites; nor fully develop their cultural heritage. Nor can they live without fear of reprisal and without prejudice to their work or study, should they decide to exercise their full right to leave the Soviet Union and live as Jews in Israel or elsewhere.

But there is strength in the courage shown by thousands of Soviet Jews who continue their struggle. Though everyday they live in fear, every hour they also live with hope.

We must continue to demonstrate our courage to show that we will join them in their struggle. This is the best way to give them the hope that they will share the next Passover holiday with their friends and their families in the free world and will live free from fear. As the NCSJ Matzah of Hope says, "We pause for a moment during this Seder to reaffirm our solidarity with Soviet Jewry. We pledge ourselves to continue to work for their freedom. We vow that, once they are free, we will help them rebuild their lives. We will not rest until the task is complete, for until all Jews are free, no Jew is free."●

HOLOCAUST: SAD CHAPTER OF HISTORY

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. MAZZOLI. Mr. Speaker, while I was unable to watch each segment of this week's television series, "Holocaust," I saw enough of the show to be revulsed and deeply moved by the unfolding of one of recorded history's bleakest and most savage chapters.

That human beings could have so systematically, methodically and remorselessly butchered other human beings whose sole crime was that they were Jewish is monstrous and stands as a heinous crime against God and nature.

Why the world did not respond more quickly and fully to the special plight of the Jewish people perplexes me.

There is shame enough in this sad chapter of history for us all, Mr. Speaker, as well as a lesson: The world community cannot let another Holocaust occur. Life is too precious.●

SALUTE TO EXCELLENCE IN SPECIAL EDUCATION PROGRAMS OF COMMUNITY SCHOOL DISTRICT 12, THE BRONX, N.Y.

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. BIAGGI. Mr. Speaker, and my colleagues here today, I would like to take a few minutes of your valuable time to alert you and interested Members of your constituencies throughout the Nation to the efforts of talented New York educators who are working daily to bring the vistas of knowledge and experience to children handicapped and afflicted with learning disabilities. At the same time, I would like to offer in tribute our fondest wishes and support to the disadvantaged children in Bronx District 12, and all within our country, that they can grow and achieve through our understanding of their needs and our offers of assistance.

I am happy to have this opportunity to salute Bronx special education leaders and their students of Community School District 12, and to highlight some of their valuable programs which have contributed so much to the Bronx community and youth.

It was my privilege to receive on their recent trip to our Nation's Capital, a dedicated educator, Paul Arilotta, supervisor of the Bronx Special Education Regional Office, and my friend and the gracious Lady Anne Dunbar, chairperson of special programs for the handicapped in Community School District 12. Just as importantly, it was my warm pleasure to greet the special objects of their attention, some 30 expectant and energetic pupils of District 12 schools, along with their chaperones. I want to mention their names as submitted by Mr. Arilotta. I appreciated the opportunity to work with Mr. Arilotta on some of the trip details:

MASTER LIST—WASHINGTON TRIP, MARCH 20–21, 1978

GROUP A

1. Mr. Joseph Hickey, Chaperone
2. Anthony Hill, I.S. 116
3. Clifton Watts, I.S. 167
4. Jose Feliciano, I.S 167

GROUP B

1. Mr. Richard Tardalo, Chaperone
2. William Caban, C.S. 50
3. Corey Ford, C.S. 50
4. Michael Malone, C.S. 50

GROUP C

1. Mr. Philip Santise, Chaperone
2. Philip Crooms, I.S. 158
3. Richard Burton, I.S. 158
4. Frank Singleton, I.S. 158

GROUP D

1. Mrs. Mercorella, Chaperone
2 Carl Mercorella
3. Christopher Dunbar
4. Melvin Velasquez, C.S. 61

GROUP E

1. Mrs. Nicolosi, Chaperone
2. Joseph Nicolosi, C.S. 102
3. Jose Valentin, C.S. 102
4. Stephen Walters, P.S. 198

GROUP F

1. Ms. Dorissa Choudbury, Chaperone
2 Beaufort Anderson, C.S. 198

3. Carlos Gonzalez, C.S. 198
4. David Green, C.S. 198

GROUP G

1. Ms. Cassandra Lyons, Chaperone
2. Ms. Virginia Karl, Chaperone
3. Sonya Rodriguez, I.S. 116
4. Maribel Gonzalez, I.S. 158

GROUP H

1. Ms. Iris Tufts, Chaperone
2. Greta James, C.S. 198
3. Michelle Levi, C.S. 92
4. Iris Rivera, C.S. 198

GROUP I

1. Jacqueline Couret, Chaperone
2. Wanda Gonzalez, C.S. 150
3. Robin Simmons, C.S. 150
4. Yolanda Llenza, I.S. 167

GROUP J

1. Ms. Carol Silverstein, Chaperone
2. Wendy Ocasio, C.S. 102
3. Wanda Turner, C.S. 102
4. Nancy Romero, C.S. 99

GROUP K

1. Mamie Terrel, Chaperone
2. Carmen Martinez, C.S. 57
3. Barbara Stevenson, C.S. 57
4. Christine Valez, C.S. 61

GROUP L

1. Mr. John Reehill, Chaperone
2. Mr. Joseph Leonzio, Chaperone
3. Mr. Paul Arilotta, Chaperone

It is interesting to note that their visit to Washington originated when Lady Anne Dunbar read of President Carter's people program, whereby community members can visit the White House. Lady Anne then contacted White House officials, and their special arrangements to visit the Presidential mansion were underway. It is also particularly noteworthy to mention that Nancy Jordan at the White House expressed a special interest in the children, and concern for their welfare. For Mrs. Jordan's kindness, I extend my personal gratitude and the appreciation of all the trip members and Bronx School District 12.

During the balance of their stay in Washington, the group enjoyed a tour of the Capitol and visits to the National Air and Space Museum, the Bureau of Printing and Engraving, and Monument Park.

This wonderful trip was made possible through the assistance of sponsors: Ben Lafiosca, president of the Parkchester Management Corp.; Donald Dimuro, assistant vice president at Bankers Trust Co.; and John F. Dunn, district manager of the New York Telephone Co. They should be commended as well by all who are involved in special education for their sincere interest in and devotion to our handicapped youth.

In January of this year, Community School District 12, spearheaded by Mrs. Dunbar, held their first annual reception and recognition awards ceremony to honor nearly 50 of their handicapped children. It was the first event of its kind in the borough of the Bronx. I was delighted to be a part of the presentations to the children for academic excellence and special achievements, and also to parents and community residents for their services to the handicapped. Notable respresentatives of local industries, charitable and fraternal organizations participated in the festivities. And more than 200 people attended, including public service and educational leaders.

In concluding, I want to add that both the privilege of making the trip and being honored at the awards ceremony were earned by the children as rewards for their accomplishments, despite their individual handicaps. Such is the good work of the District 12 special programs on the handicapped under the guidance and leadership of Lady Anne Dunbar, and the program vice-chairperson, Mrs. Couret.

I know that my colleagues will join with me in congratulating Mrs. Dunbar and her coworkers for their keen awareness of the importance in recognizing the milestones reached by children who have special needs, and who must make extra efforts to succeed educationally. Without the loving care and concern of individuals like Mrs. Dunbar, the achievements of these children might not otherwise be known. We can all agree that children are our country's most treasured and powerful resource. But it is all important to support our special educators in their work to develop and shape young minds so that all of our children can have the opportunity to grow in a natural and positive direction.

I wish all in the District 12 family well in continuing their good work. I note that the District 12 special fund for the handicapped will be aided from the proceeds of an upcoming "Styles Extravaganza Follies and Dance" honoring Lady Anne Dunbar, and featuring fashion designer, Cassandra Lyons, at the Roosevelt Hotel, New York City, on April 23, 1978.●

ONE-SIDED PRESS

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. RHODES. Mr. Speaker, despite the long-running debate over whether the news media is politically biased, and if so, in whose favor, the myth has seemed to endure that editors and publishers of the Nation's newspapers remain generally pro-Republican.

Last week there was an event in Washington which, as the Phoenix Gazette has said, should finally "put to rest" that myth. As the Gazette has noted, the American Society of Newspaper Editors managed to hold a 3-day convention here and find room on its program for only one Republican.

It is natural that such an organization would be strongly interested in the views of spokesmen for the party in power. However, I am appalled that this organization, consisting of editors with considerable say over what millions of people will or will not read about their Government and its policies, should have virtually no interest in the views of the other party.

The Gazette editorial raises this and other points that should be of concern to all of us, especially in an election year, and I insert it in the RECORD.

[From the Phoenix Gazette, Apr. 14, 1978]

ONE-SIDED PRESS

Republicans suffered the ultimate insult at the hands of the American Society of Newspaper Editors at its annual convention in Washington this week. They were ignored.

During a three-day program loaded with government officials, editors from around the nation heard from only one GOP figure, Rep. Barber Conable of New York, who appeared on a panel for a few minutes of instant analysis following President Carter's speech on inflation.

Of course, where both the administration and Congress are solidly in the hands of the Democratic Party, it is to be expected that a program on national affairs would tend to be dominated by the party in power.

But, in the name of simple fairness, it would seem that at least a little rebuttal time ought to have been given to the minority.

One thing can be said for certain: The idea that the nation's press is dominated by Republican-oriented editors and publishers ought to finally be put to rest.

The monopoly the Democrats enjoyed on the ASNE program testifies to the fact that they have the print media definitely on their side.●

SOCIAL SECURITY ROLLBACK

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. DERWINSKI. Mr. Speaker, the debate is continuing to wage in the House and specifically in the Ways and Means Committee, over the rollback of the social security tax.

Having voted against the imposition of the new social security tax, I can appreciate the headaches that those Members have who voted to impose this additional burden on the public. Therefore, I wish to insert the following editorial broadcast over Chicago's WBBM radio station on April 7, which very effectively discusses the problems involving the social security tax:

SOCIAL SECURITY ROLLBACK

Surprisingly enough, there is good news coming out of Washington about the Social Security tax. Well, perhaps it's not really surprising news at that. After Congress upped the ante individuals and employers have to put into the Social Security fund there was a thunder of protest. Congressmen and Senators, back home in their states, couldn't help but hear the complaints. And they were made to understand that this time around they had reached the long arm of the government too far into people's pocketbooks.

Social Security benefits were never meant to fill the total financial needs of retired people, but in these days of spiraling inflation the benefits are coming to count for less and less while they take a bigger and bigger bite out of workers' paychecks. And, of course, as the population pyramid becomes top heavy as more of us live longer and fewer babies are born, there is growing concern that the Social Security system can't keep pace—at least not without taking a crippling amount from the paychecks of those who are working and those who employ them.

The stop-gap tax increase Congress enacted last year is an inadequate response to

the problem. And, as the legislators found, it's infuriating to the public. It may be that some of the benefits will have to be paid from the general revenue fund or that some benefits will have to be cut back down the road. But whatever the solution is, it had better come soon.

We're pleased, if surprised, that Congress recognized its mistake and intends to correct it.

That's our opinion. We'd welcome a reply.●

FRAUD AND ABUSE IN FEDERAL PROGRAMS

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. LEVITAS. Mr. Speaker, the extent of fraud and abuse in Federal programs is alarming. The American people are getting sick and tired of seeing their hard-earned tax dollars being wasted, or going down a rat hole, or lining the pockets of thieves.

GAO estimates anywhere from $12 billion to as much as $25 billion may be lost in a year through fraud and abuse in Federal economic assistance programs. What is equally as disturbing is the serious deficiencies in resources and procedures most Federal agencies and departments use to detect and recover these losses.

During the last Congress, my Subcommittee on Intergovernmental Relations of the Government Operations Committee conducted extensive hearings on fraud and abuse within HEW. As a result of those hearings, legislation was enacted establishing an Office of Inspector General within HEW. Although it has only been in operation for the past year or so, the HEW Office of Inspector General has begun to prove to be effective in fighting fraud and abuse in HEW programs. The law creating the new Department of Energy contains provisions for an Office of Inspector General similar to the one at HEW.

This week, the House passed legislation, H.R. 8588, providing for the establishment of Offices of Inspector Generals in 11 other Federal departments and agencies. The vote was an overwhelming 388 to 6. The need for these Offices of Inspector Generals has been clearly documented by my subcommittee and the Members of the House apparently agree.

In addition, I would like to call to the attention of my colleagues a series of articles which appeared in the New York Times over the past few days. I am inserting in today's RECORD the first of these articles entitled, "Fraud in Federal Aid May Exceed $12 Billion, Experts Say." The other articles will follow. The series further illustrates the extent of fraud and abuse within Federal programs and the necessity for improved methods of dealing with it. We cannot continue to let billions of taxpayer dollars be lost. The Inspector General legislation is an important factor in changing this sordid picture.

The articles follow:

FRAUD IN FEDERAL AID MAY EXCEED $12 BILLION ANNUALLY, EXPERTS SAY

(By Anthony Marro)

WASHINGTON, April 15.—Fraud in Federal aid programs has grown to the point at which, some experts say, its annual cost may exceed $12 billion. But many agencies have not yet established the mechanisms to detect, let alone prevent, fraud in their programs.

That is the assessment of a cross section of prosecutors, Congressional investigators and Government officials who said in recent interviews that the Federal Government has been so negligent in monitoring its own grants that it has permitted itself to become a major victim of white collar crime.

For the most part, the fraud is occurring in programs designed to provide services, training and aid to the disadvantaged: food stamps, health care, job training and housing aid

But it is not the classic case of the welfare mother who cheats. Much of the fraud is committed not by the poor persons receiving the benefits, but by relatively well-to-do doctors, pharmacists and businessmen who have contracted with the Government to provide services and then set out to defraud it intentionally and systematically.

There are no precise figures for the amounts lost each year because of fraud, Mark M. Richard, chief of the fraud section of the criminal division of the Justice Department, says that the mechanisms for detecting fraud in many agencies are so weak that "the data base just isn't there."

"FRAUD, ABUSE AND WASTE"

But a recent report by the Inspector General of the Department of Health, Education, and Welfare estimates that at least $6.3 billion to $7.4 billion was lost through "fraud, abuse and waste" last year in that agency alone.

And at a recent seminar on white collar crime, an official of the General Accounting Office, the investigative arm of the Congress, estimated that outright fraud in Federal economic assistance programs could amount from $12 billion to $15 billion a year and perhaps as much as $25 billion a year. The current annual budget of the State of New York is $12 billion.

Largely because of attention generated by a series of dramatic Congressional hearings and a string of critical audits by the accounting office, there has been a growing awareness of the extent of such fraud.

Among the problems and weaknesses cited repeatedly by persons familiar with fraud against the Government were these:

Relatively few resources have been committed to fight the problem. The fraud section of the Justice Department's civil division, for example, has only 13 staff attorneys and three supervisors to handle a load of about 1,200 active cases and a backlog of about 4,000 referrals.

Although the great bulk of the money in these programs comes from the Federal Government, the primary responsibility for policing them is often left to state and local prosecutors, who may lack the resources and expertise, and sometimes the enthusiasm, to do it. "The fact is that the public is more concerned with so-called street crime," Mr. Richard says.

With the exception of the Department of Housing and Urban Development, which was the victim of major program frauds in the early 1970's, few agencies have redesigned their programs to minimize the potential for fraud or to make detection easier.

DIFFERENCES ON SCOPE OF OFFENSES

There is some evidence that many of those engaged in fraud do not consider it theft, or at least see it as a crime less serious than robbery or mugging.

"There's a feeling that people have that they can rip off the Government and it doesn't matter, that it isn't really a crime," says John Ols, the G.A.O. official who cited the $12 billion to $15 billion estimate. "But the fact is that every dollar lost in this way is a dollar that doesn't go to someone who needs it and who is entitled to it."

Mr. Richard, the Federal prosecutor, says that fraud against the Government results in social costs beyond the money involved.

"It's not only a violation of law, but it's an attempt to subvert a program, and this sort of things affects us all," he said. "When someone manages to subvert a Federal program, he's done something to undermine the integrity of the system over and above the actual dollar cost."

Some evidence of the extent to which the "integrity of the system" has been subverted can be seen in the report by H.E.W., in prosecutions and civil suits by the Justice Department, in Congressional hearings and in audits by the G.A.O.

THOUSANDS COMMITTING FRAUD

Taken together, they present a picture of thousands of persons—many of them well-educated, middle-class citizens—engaged in schemes that range from pennyante abuses of food stamp programs to alleged fraud in massive, multimillion-dollar grain deals.

They include William C. Sibert, a former employee of the Department of Transportation who was charged with embezzling some $856,000 by putting his own name on checks intended for the construction of a subway in Atlanta.

Asked by a judge how this could happen, the Federal prosecutor is said to have replied: "Your honor, he posed as a subway system."

The cases include that of a doctor who allegedly billed H.E.W. for seven tonsillectomies on the same patient; the daughter of a Civil War widow who continued to collect "widow's benefits" for two decades after her mother had died and the officials of a health plan in California who persuaded some people to sign enrollment forms by telling them that they were signing petitions to impeach Ronald Reagan, who then the Governor.

They also include the case of William F. Wilson, a dentist in South Carolina who is now in prison after being charged with, among other things, extracting healthy teeth from poor children so that he could collect fees from a Medicaid dental plan.

"It was just awful," said Joel W. Collins, the Assistant United States Attorney who prosecuted that case. He said the dentist had been found to have billed the Government for thousands of dollars worth of work not actually performed as well as for work that was not required.

"BROKE YOUR HEART"

"There was one girl about 13 years old who only had about three teeth left in her mouth," Mr Collins said. "Looking at her just broke your heart."

Many of the case disclosed in recent prosecutions and investigations are far more complex and involve large sums of money.

Item: The Federal Government is trying to recover $24 million in damages from Cook Industries, which it contends defrauded the Government on grain shipments to 32 foreign countries. The suit, which is the largest civil suit the Justice Department is pressing in a fraud case, charges the company with having shortweighted, misgraded or adulterated grain shipments.

Item: The H.E.W. report, while saying that the estimates of dollars lost through "fraud, waste and abuse" might not have been more than 5.4 percent of its total budget of $136.1 billion, nonetheless concedes that the percentage was far higher in some programs. It said, for example, that at least 24 percent of

its Medicaid funds had been misspent and concluded on the basis of a preliminary and hurried investigation that "criminal prosecution potential" exists in cases involving at least 290 physicians and 245 pharmacists.

Item: After paying nearly $5 million in vocational training benefits for veterans enrolled in a "barber's school" in Puerto Rico, the Veterans Administration discovered that the bulk of the 1,000 veterans it intended to aid had never actually taken the courses and that the "school" was little more than a storefront.

The proprietor, Romanita Garcia, eventually was jailed, and the Government has since recovered about $500,000 through a civil suit But the rest was lost in what Federal prosecutors say was a classic case of fraud, much of it going to veterans who were not taking the courses they had reported taking, and much of it going to the businesswoman who was not providing the instruction she had promised.

Many fraud cases are fairly uncomplicated, relying less on careful planning than on the assumption that the Government cannot or will not audit its expenditures.

In many of the Medicaid fraud schemes, for example, doctors simply billed the Government for services not rendered or overcharged for services that were rendered. In many of the vocational education frauds, schools, sometimes with the aid of "students" who shared their Government benefit checks, simply enrolled veterans and billed the Government for training, even though the veterans never attended classes.

Often, this has involved some collusion with persons in the bureaucracy. In its investigation of prepaid health plans in California, a subcommittee headed by Senator Sam Nunn, Democrat of Georgia, discovered an official of H.E.W. who allegedly had accepted money and a car from a contractor whose grants he had approved. And as a result of an investigation of fraud in its educational training programs last year, the Veterans Administration, according to a recent report; meted out to its employees "one suspension, two demotions, 16 reprimands, 15 admonishments and 36 counselings."

FEW INSIDE ACCOMPLICES

Virtually all of those familiar with the programs agreed, however, that outsiders did not need, and in most cases did not have, inside accomplices to help them defraud the Government.

The fraud is not confined to social welfare and economic assistance programs. Although there are no estimates of fraud in military contracts and other forms of procurement, J. Roger Edgar, the head of the fraud section of the Justice Department's civil division, estimates that fraud in defense contracts accounts for 30 percent to 40 percent of his workload.

One typical case handled by his office resulted in the Government's recovery of $600,000 from a contractor who had been accused of using scrap metal rather than new materials in the catapults that launch aircraft from the carrier U.S.S. *Forrestal*.

In the past, Government officials say, the public and law enforcement figures were more concerned with other crimes, particularly organized crime and narcotics and street crimes, and fraud was not perceived as a major problem.

Even where there was heavy policing of fraud programs, they said, it often focused on welfare mothers who were believed to be obtaining benefits to which they were not entitled rather than on calculated and sophisticated fraud.

According to Richard L. Thornburgh, a former head of the criminal division, the Department of Justice did not even have a strategy for dealing with program fraud before 1972 and thus failed to detect many of the schemes to defraud Federal programs that are now known to have taken place.

"ERROR" OR "ABUSE"

One reason that estimates of the amount of fraud are so vague, sources said, is that many Government officials refuse to call fraud what it is, preferring to dismiss it as "error" or "abuse."

Another is that Federal audit cycles are so long that often fraud is not detected until years after it has taken place. In the case of Mr. Sibert, who allegedly embezzled the $856,000 from the Department of Transportation, the program that the money was taken from was not scheduled to be audited until eight years later, though the applicable statute of limitations runs only five years.

"It was a fluke that we caught him," said one Federal prosecutor. "If he hadn't aroused so much suspicion by spending so much money, the statute of limitations would have lapsed before we even knew the money was gone."

According to many of the sources, the problem is not just with the agencies, but with a lack of commitment by the Justice Department.

An indication of this can be seen in the limited resources of the civil fraud section headed by Mr. Edgar. Last year, it managed to recover about $8 million through civil suits against persons accused of defrauding the Government. It won numerous other suits against persons who did not have the resources to pay.

This, according to colleagues in other parts of the department, was an impressive performance for so small a staff, though it accounted for only a tiny fraction of the billions estimated to have * * *.

"There are a lot of cases that are going to have to be handled, and I'd like to know who is going to handle them," said one recently retired prosecutor. "If you start talking about a $6 billion problem at H.E.W., where are the bodies going to come from?"

A number of prosecutors and former prosecutors agree, noting that last year H.E.W. found suggestions of fraud by more than 13,000 persons in one welfare program alone and that since then several other agencies have begun similar internal investigations.

Griffin B. Bell, the Attorney General, has said repeatedly since taking office 14 months ago that fraud against the Government is a major concern and will be a top priority of the Justice Department.

To date, he has assigned nearly 200 agents of the Federal Bureau of Investigation to audits of health care programs and has added 13 staff lawyers, at least temporarily, to the 33-person staff in the criminal fraud section headed by Mr. Richard.

Although most of those interviewed argued that many more resources would be needed at both the State and Federal level, Mr. Richard said that he believes a strong commitment has now been made.

"You're dealing with an area that has been virtually ignored over the years in deference to other priorities," he said. "We are playing catch-up ball, and it's not going to be done overnight." ●

PERSONAL EXPLANATION

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. MAZZOLI. Mr. Speaker, on April 18, 1978, I was unavoidably detained in a meeting of the House Select Committee on Intelligence.

Had I been present, I would have voted "yes" on rollcall No. 234, H.R. 11400, to authorize the appropriation of specified dollar amounts for each of the National Science Foundation's major program areas and certain subprograms, and to provide requirements relating to periods of availability and transfers of the authorized funds.●

MIDEAST: "THE ISSUE IS STILL ISRAEL'S RIGHT TO EXIST"

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. ROSENTHAL. Mr. Speaker, at a time when there is immense pressure on Israel, particularly from our own Government, to withdraw from the West Bank of the Jordan in favor of a Palestinian "entity" or "homeland," it is important to once again look at the impact of such a move.

As Israelis like to point out, for Americans the question is a matter of policy, but for Israelis it is a matter of survival.

That "entity," in the view of most, would soon fall under the domination of the PLO, an organization which boasts of its role in murdering 37 innocent Israeli civilians on a bus near Tel Aviv last month, and, more importantly, a terrorist organization whose basic tenet of faith is the destruction of the State of Israel.

"The paramount issue is still Israel's right to exist in peace and freedom behind secure boundaries," declares David Hyatt, president of the National Conference of Christians and Jews in a recent letter to the editor of the New York Times.

His letter states the issue clearly and forcefully. The "inevitable result" of the PLO occupying the West Bank, he writes, would be "another Middle East war."

Because I feel what Mr. Hyatt has to say is important and essential to an understanding of the Middle East situation, I am inserting it in the RECORD at this point in the hope that all my colleagues may read it.

The letter follows:

MIDEAST: "THE ISSUE IS STILL ISRAEL'S RIGHT TO EXIST"

To the Editor: I write this as a Catholic concerned about the survival of my Jewish brothers and sisters in Israel and the preservation of human rights in the Middle East.

Those at the very top level of our Government who deplore the so-called "intransigence" of present Israeli leadership regarding its terribly precarious security and call upon the Begin Government to hand the West Bank over to the Palestinians are simply not facing up to a number of frightening facts—particularly frightening facts to any Israeli who has had his country invaded three times in the last 25 years. These facts should make it clear to any reasoning human being that such a move without safeguards of great magnitude, backed by U.S. guarantees of force, could jeopardize not only peace in the Middle East but world peace itself. The shocking and utterly damaging facts are these:

The P.L.O. would obviously be the new ruling elite of a Palestinian government of

the West Bank, for it is, unfortunately, still deemed by a majority of the Arab world and other governments and the U.N. as the authentic voice of the Palestinians.

The West Bank under P.L.O. police-state rule would very soon become a Soviet-dominated, Soviet-armed satellite next door to Israel—not unlike Castro's Cuba. When tiny Cuba, a full 90 miles away from our coast, appeared to be threatening the giant, powerful U.S.A. simply by the presence of Soviet arms, although there were no Cuban guerrillas invading our country, blowing up our buses or killing our children, we mounted a major military solution to the problem. What would stop the P.L.O. from continual terrorist incursions? What guarantees to date does Israel have from the U.S. or the U.N. for its future security? What is left except self-protection through retaliation, such as its invasion of Lebanon?

The P.L.O. was driven from Jordan by King Hussein after its members attempted to assassinate him and destroy his Government. They then retreated to Lebanon and proceeded to turn that beautiful country into a battleground betwen Moslems and Christians.

Is not the lesson clear? With the P.L.O. occupying the West Bank, would not its next victim be Israel? And would not the inevitable result be another Middle East war?

The most recent madness of the P.L.O. in killing 35 people and injuring 76 in a sneak attack upon a public bus is but one of 14 such P.L.O. attacks in the past eight years. Israelis cannot easily forget the thousands of its people who have been murdered, maimed and injured by these terrorist assaults. To speak of establishing a Palestinian state next door to Israel to be headed by such murderers is sheer madness.

Every thinking American must be aware of the relentless Soviet pressure in the Middle East, but too few Americans appear to realize that it is our (U.S.) arms and Israel's guts, to put it buntly, that have prevented and continue to prevent a Soviet takeover of the whole Middle East. Israel is the one bulwark against Soviet aggression in the Middle East, a point too little emphasized in discussing U.S. Israeli relations. The sons and daughters of Israel who are now giving their flesh and blood to keep the Soviet Union at bay and to insure the freedom and peace and sovereignty of Israel deserve the applause of the entire free world.

Neither our Government nor any other has yet suggested any credible means of guaranteeing Israel the necessary safeguards for the true peace it so fervently desires and prays for. The paramount issue is still Israel's right to exist in peace and freedom behind secure boundaries.

As the minimal first step toward achieving a real peace, let all to whom captured territory is to be returned first recognize Israel and her right to exist. Then let the U.S. and others who truly believe in democracy and freedom guarantee the necessary stringent military enforcement steps to insure Israel's genuine security and peace, and Israel will no longer be intransigent but will welcome such an accord.

DAVID HYATT,
President, National Conference of Christians and Jews.

NEW YORK, *April 10, 1978.*●

ISAAC H. TAYLOR

HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. BYRON. Mr. Speaker, I would like to take this opportunity to honor the memory of an Ellicott City, Md. resident, Isaac H. Taylor.

A highly respected citizen of Howard County, Mr. Taylor was the president of Taylor Manor Hospital, and held offices and memberships in the Ellicott City Rotary Club, Howard County School Board, the Dag Hammarskjold College, Howard County Public Library, the Howard County Fire Department and the Howard County YMCA, to name just a few.

Mr. Taylor was internationally recognized for leadership and support of social welfare, education, medical, and youth activities, giving, at the very minimum, tireless direction, and encouragement to all who sought his assistance.

His numerous contributions are too numerous to mention here, but his services will long be remembered, appreciated, and missed by his family, friends and coworkers. I know you will join me in extending the official sympathies of the impact of inflation upon a progres- the House in honor of this unselfish, diligent, and well-loved American.●

ONE CONSTITUENT AND "TAX REDUCTION"

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. HAGEDORN. Mr. Speaker, the following letter from a constituent of mine, Mrs. Ralph Stevens of Albert Lea, Minn., illustrates well the confusion felt by many hard-working, middle-class individuals whose tax burdens grow heavier each year despite the passage of one piece of "tax reduction" legislation after another. While many members of this the "silent" tax increase resulting from body continue to look favorably upon sive tax system, letters such as the following give me hope that the people are catching on.

The letter follows:

MARCH 7, 1978.

DEAR REPRESENTATIVE HAGEDORN: I am writing once more to express my opinion about the issues of tax cuts and the Carter "Simplifications".

When I picked up our tax papers from the preparer, I was stunned to find that we owed federal $840, the state $123. With the cost of preparation ($35), it came to $2 short of $1000.

We have had two difficult years, with some bad luck and big bills. I think that Carter's zero base income tax package hurt us. The tax preparer, who is thoroughly schooled, said that almost everyones tax he computed this year got a much lower refund, or people who had never paid in, previously, like us, had to pay.

When we had some rough times, I, who hadn't worked outside the home for 12 years, went out and got a part-time job, in order to help out. My husband drives 30 miles (one way) to work. He puts in 60-65 hours a week on a salary, not an hourly wage. We work hard for our money.

I work in a grocery store, doing everything from checking out groceries, stocking shelves, carrying groceries out, to part-time bookkeeper in the office 1 day a week. Yesterday, I checked out a food stamp order that totaled $105. In that order was 4 T-bone steaks, and an expensive boneless rump roast, 6 boxes of sugared cereal, our leanest ground beef, etc.—and when I got home, I looked over our tax papers.

My Gross Salary, $4,200.00.

Our joint taxes: Federal, $2,805.00; State $1,305.00; S.S., $12.11.

We paid more in taxes than what I even earned. I cannot feed my family nearly as well as the lady does with her $105 food stamp order. Something is wrong here. I am just making a comparison to draw to your attention the enclosed news editorial. On our federal return we got a $150 medical deduction, $63 gasoline deduction, $148 sales tax deduction. It isn't fair to keep on taking hard earned dollars from the middle income taxpayer. If we didn't desperately need my income (for the next 2 years) to help pay our bills, I would quit my job tomorrow.

The "working poor" will stay that way, if our gov't just encourages more and more benefits and tax cuts for low income people. If everyone paid 5 percent of their income for taxes—that is from the minimum wage earner to the largest corporation, I believe there would be more than enough money brought in to pay our country's bills. It can't be that simple, I realize. But please stop some of these "tax cuts" and the "Simplifications" because every time there is one, my husband and I end up paying more.

Sincerely,

MRS. RALPH STEVENS.

ALBERT LEA, MINN.●

WHAT ARE WE LEARNING FROM SKOKIE?

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. O'BRIEN. Mr. Speaker, in the last few months, there has been a great constitutional controversy swirling around the village of Skokie, Ill.

Much has been said about the first amendment question of whether or not a march by a small group of American Nazis should be permitted. My own view is that this is solely for the judicial branch to determine, but there remains the significant question of what messages are we to glean from the outcry from Skokie. We know that this village, many of whose citizens are survivors of Nazi concentration camps and remember all too vividly what Nazism really stood for, does not care to have that symbol displayed within its boundaries. Certainly this reaction is a normal response, but, apart from the personal sensitivities of the people there, it seems to me there is also an important message to all our citizens everywhere, regardless of their ethnic or religious background.

Thomas Jefferson wrote :

If a nation expects to be ignorant and free in a state of civilization, it expects what never was and never will be.

Today I fear that our society is ignorant of the many freedoms that it possesses. The people of Skokie are imploring us to value our freedom and to remember a time in the all too recent past when much of the world had no freedom from the Nazi brutality that reigned supreme; when Kaimkaplan wrote the diary he entitled "Scroll of Aging" of the Warsaw ghetto:

Is there any revenge in the world for the spilling of innocent blood . . .? The abominations committed before our eyes cry out from the earth: "Avenge me!"

Many of us have revisited that scene this week as we have watched the moving portrayal of the "Holocaust" on television. Perhaps in the wake of that program we can feel with new understanding the passionate concern of the villagers of Skokie as they face the prospect of swastikas marching in their streets.

What happened in Europe 40 years ago cannot happen here. We all believe that. But what we must never, never forget is just how fortunate we are that it cannot. That is the message from Skokie, Ill.

All of us would do well to pay attention to that message, and the outcry from our neighbors in Skokie, and value anew the freedoms we possess as Americans.●

GEORGE C. MARTIN RETIRES FROM WORCESTER VA HOSPITAL

HON. JOSEPH D. EARLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. EARLY. Mr. Speaker, it is a privilege for me to offer my very best wishes upon his retirement to Mr. George C. Martin, supervisor of medical administration at the Veterans' Administration Outpatient Clinic in Worcester, Mass. Mr. Martin is retiring after 37 years of Government service, 32 of which he has completed with the Veterans' Administration.

Mr. Martin started as a clerk at the VA Regional Office in Boston in February of 1946, and transferred to the Boston VA Outpatient Clinic in 1948. He participated in supervisory training programs, and in August 1960, he was appointed supervisor of medical administration at the Worcester VA Outpatient Clinic.

During his more than 17 years at the Worcester clinic, his name became synonymous with the clinic. Mr. Martin brought not only extensive knowledge of medical administration to the Worcester clinic, but also broad knowledge of all VA programs, procedures, and regulations. His advice was constantly sought from veterans, their families, and various service organizations throughout the State, in addition to VA employees.

Mr. Martin's position frequently made it necessary for him to inform veterans that they were not entitled to specific benefits. On these occasions he sometimes became the target of veterans' frustrations which he always handled in a professional manner. He would always take the time to explain avenues of appeal or recommend community resources to the veteran or his family.

Mr. Martin was personally aware of the problem of veterans, having served his country on three occasions. He served in the Army Air Force from January 7, 1942, to January 3, 1946, doing air rescue work in the China-Burma-India war theater. During this period of service, he participated in the first helicopter Air Force rescue. He was discharged a sergeant.

During the Korean war, he was recalled to active duty and served from May 1951 until January 1953, being discharged as a staff sergeant. In October of 1962 he was again recalled to active duty during the Cuban missile crisis.

Mr. Martin plans to take a well-earned rest and pursue his interests in fishing, gardening, and gourmet cooking. He resides at 37 Harriet Avenue, Shrewsbury, Mass., with his wife, Anna, and their two teenaged children, Sandra and Richard.●

LOCAL GOVERNMENTS PARTICIPATE IN FREE ENTERPRISE WEEK

HON. W. HENSON MOORE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. MOORE. Mr. Speaker, as I indicated in my remarks in the CONGRESSIONAL RECORD of December 15, 1977, the first annual Free Enterprise Week celebration took place in my congressional district during the week of January 8 through 14, 1978. There are a number of local governments within that congressional district and it was determined that a complete celebration of Free Enterprise Week would not be possible without their participation.

Accordingly, a number of the local government entities issued proclamations stating their support for the free enterprise system and their participation in Free Enterprise Week. The following is the text of one such proclamation from the largest city in the Sixth Congressional District of Louisiana, Baton Rouge, which is also the State capitol:

PROCLAMATION

Whereas, free enterprise in the United States has produced the highest standard of living in the world for our citizens; and

Whereas, without economic freedom there can be no personal freedom; and

Whereas, the free market system is dedicated to providing the greatest number of consumers with the highest quality goods at the lowest possible price; and

Whereas, the free market system is based on the concept that profit motivates an individual to produce to the best of one's ability, that an individual should be rewarded in relation to productivity, and that only through a free market can an individual achieve full potential; and

Whereas, public faith in capitalism requires understanding of how it works and what it works and what it accomplishes; and

Whereas, confusion and lack of information about the free market system endangers our right to private ownership of property, right to choose our own profession, and the right to equal opportunity without regard to background; and

Whereas, free enterprise is everybody's business.

Now, therefore be it resolved, that the citizens of the City of Baton Rouge and Parish of East Baton Rouge do hereby support the Free Enterprise system through recognition of January 9–14, 1978, as Free Enterprise Week.

Local governments are far closer to the people than is that of the Federal Government. Perhaps local governments understand the free enterprise system better than we in the Congress do as they appear to be far more concerned about its destruction by Federal taxation and Federal regulations than we are.●

ALASKA LANDS LEGISLATION IMPORTANT TO MARYLANDERS

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. UDALL. Mr. Speaker, on April 7 the Committee on Interior and Insular Affairs filed its report on H.R. 39, the Alaska National Interest Lands Conservation Act—the most important land conservation bill which this House will consider during this Congress and perhaps during our lifetime.

The bill as reported is a carefully drawn compromise which recognizes the importance of allowing economic growth and development in Alaska and at the same time takes the actions which are indispensable if we are to protect the great scenic, wildlife, wilderness, and other values of the "crown jewels" of the public lands in Alaska which are the property and the heritage of all the American people.

During last session's extensive hearings and field trips in Alaska, numerous Members of our committee had an opportunity to see firsthand the areas involved and to hear from the people who know Alaska closeup. One of the Members who took a particular interest in this matter, and who worked hard to produce this bill in which we can take pride, is the gentleman from Maryland, Mr. BYRON. As reported in the March 16th issue of the Columbia (Md.) Flyer, his work on this bill "has demonstrated a solid support for protecting selected areas in Alaska * * * In supporting preservation for these lands in order to balance great development pressures in the State, Mr. BYRON has played a very important role."

Because the newspaper report and an accompanying article by our colleague Mr. BYRON so clearly depicts the importance of this legislation to his constituents and to the Nation, I am here having reprinted these extracts from the Columbia Flyer of March 16.

ALASKA'S FATE IN CONGRESS

(By Joan Moody)

The Interior Committee of the U.S. House of Representatives is now deeply engaged in revising the proposed Alaska National Interest Lands Conservation Act. Our congressman, Rep. Goodloe E. Byron (D-6th) serves on this committee.

Detached observers seem to be comparing the showdown between conservation interests on the one hand and loggers, miners and developers on the other hand to something resembling a giant game of Monopoly. How anyone can remain detached when so much is at stake for all of us escapes me.

Byron's work on the committee during the first round of mark-up sessions has demon-

strated a solid support for protecting selected areas in Alaska by adding them to the National Park System, National Wildlife Refuge System, National Wild and Scenic Rivers System, and National Forest System. In supporting preservation of these lands in order to balance great development pressures in the state, Byron has played a very important role—especially because many of the key votes have been quite close.

Nevertheless, I've heard this reaction to Byron's action from several dubious Columbia residents: "What does he have to lose? It's all up in Alaska." In fact, Byron and the people of Maryland will have much to lose if this legislation, H.R. 39, does not pass Congress this year.

For one thing, wild areas in Alaska serve as nesting and breeding grounds for millions of waterfowl and other birds that descend every major flyway to winter all across the lower 48 states. H.R. 39 and its Senate companion bill (S. 1500) would protect nesting habitat for many migratory species that populate the Eastern Shore of Maryland and the estuaries, rivers, streams and fields of our state.

For instance, this spring the whistling swans of the Chesapeake Bay area will head for western Alaska, where they will join clouds of geese, swans and myriad other birds streaming in from several continents to nest in the vast wet expanses of tundra in the proposed Yukon Delta Wildlife Refuge. Thousands of canvasbacks, lesser and greater scaup, redhead, and wigeon ducks will leave Maryland for interior Alaska, where the lakes ponds and streams along the wild floodplain of the Yukon River produce a lush growth of aquatic plants and summer temperatures reach into the 80s.

Mallard and other species from this state will head for other Alaskan areas proposed for protection under the legislation as well. These birds are valued by Maryland naturalists and sportsmen alike.

In addition to protecting key habitat for birds and other wildlife, the legislation now before Congress would preserve wilderness, recreational areas, subsistence-living resources, and scientific and cultural resources in the national interest. It would protect an incredible variety of landscapes—tundra lands alive with caribou, Swiss Alps-type scenery, wild rivers and salmon runs where brown bears fish, sand dunes above the Arctic Circle.

The package sent to the interior Committee for consideration proposes a total of 97.5 million acres of the state for addition to the four federal conservation systems. This acreage can be seen in the proper perspective only when one considers that under its statehood act, Alaska already has been promised 104 million acres for its 400,000 citizens—a California-sized birthday present going to a Fresno-sized population. Native peoples have claim to an additional 44 million acres under the Alaska Native Claims Settlement Act (ANCSA) of 1971.

What the Interior Committee is considering now is how the remaining federal lands in Alaska should be managed and protected. In ANCSA Congress gave itself until December 1978 to decide which public lands should be preserved for the benefit of all Americans. If the present bill were enacted, about two-thirds of the 365 million-acre state would be either state or native lands or public lands open to multiple uses and thus to development.

The revised version of HR 39 is a compromise bill. Following exhaustive studies of the resources of the proposed conservation areas, an Interior subcommittee drew boundaries to exclude the great majority of areas with potential for mining or oil and gas leasing from the conservation systems. In addition, a special process was devised to allow mining within many conservation areas in cases of national need.

About 85 per cent of Alaska will still be open to mineral and other development under the bill. The Forest Service has determined that the current level of timber production and related job market would not be adversely affected; the agency supports designation of some national forest areas in southeast Alaska as wilderness, which would protect commercial fishing and tourism.

Yes state and development interests continue to mount a massive media campaign to convince us that HR 39 and S 1500 represent nothing more than a big federal land grab instead of a chance for the American people to preserve part of our own lands as our last wilderness frontier. Some legislators actually are debating whether to preserve places such as Admiralty Island, an island in southeast Alaska that supports more nesting bald eagles than all the lower 48 states put together. (Meanwhile, in February the Interior Department finally declared the bald eagle, our national symbol, officially "endangered" in 43 of those states and "threatened" in the rest of them.)

The full Interior Committee is under much pressure to delete acreages, protect less of the land in question as official wilderness areas, weaken the orderly minerals process, and afford many areas a less protective status than they currently would receive under the bill. In light of these pressures, the importance of Rep. Byron's support for the legislation should not be underrated.

Let's give credit when credit is due! This is the biggest land conservation battle in our nation's history. What is most amazing about Alaska is that it is big and blessed enough to support both the conservation effort embodied in HR 39 and development as well.

NOTE: (Joan Moody, Swansfield resident, is assistant editor of National Parks & Conservation Magazine, which has closely followed the Alaskan land issue.

A CRITICAL DECISION

(By Representative GOODLOE E. BYRON)

The work of the House during the past two weeks provides a good opportunity to illustrate how legislative action is often shaped in committees rather than on the House floor. While the House passed a number of bills, including a constitutional amendment to give the citizens of the District of Columbia voting representation in Congress, action on several major bills was taking place in the various House committees. . . .

While the House Education and Labor Committee approved a revised version of the Full Employment and Balanced Growth Act, more commonly referred to as the Humphrey-Hawkins bill, the House Interior Committee held its first two weeks of drafting sessions on HR 39, the Alaska National Interest Lands Conservation Act. The Alaskan lands issue is the top environmental priority of the Carter Administration and has been termed "the most important conservation program in the history of this country" by Interior Secretary Cecil D. Andrus.

The Alaska Native Claims Settlement Act of 1971 gave Congress until the end of 1978 to determine which Alaskan land should be afforded federal protection through designation as wilderness, national parks, wildlife refuges, national forests, wild and scenic rivers, etc. Alaska contains 365 million acres of land and 10 million acres of inland waterways. This represents 38% of the country's shoreline and 65 per cent of the U.S. continental shelf. Much of this land is rich in both scenic beauty as well as potential mineral wealth. Deciding what level of protection to give to the approximately 100 million acres of Alaskan land included in HR39 is obviously an issue of critical importance to the general public as well as the environmental groups, timber and mining interests, and the Alaskans themselves.

This bill has been the subject of more extensive hearings than any other conservation bill in history. Twenty-three days of hearings were held in all sections of the country, as were numerous town meetings throughout Alaska. Over the last year, several alternative proposals have been presented which would protect as much as 115 million acres or as little as 25 million. The Carter Administration proposed protection for 92 million, while the bill currently being considered by the Interior Committee includes 98 million acres.

Last week during an Interior Committee meeting, the first important vote on this issue was taken. An amendment had been proposed which would have opened up nearly 50 million acres of Alaskan wilderness to economic exploitation. I joined with 21 of my colleagues on the Interior Committee to narrowly defeat this amendment by a vote of 22–20.

I felt this proposal was environmentally damaging to Alaska and undermined the unique opportunity America has, through this bill, to protect entire ecosystems, watersheds and critical wildlife habitats. This is an opportunity which is generally no longer available in any other state except Alaska, due to past development and population pressures.

The work of the committee on this issue is far from over. We are now in the process of "marking up" the bill, that is, considering amendments to it page by page and section by section. After the committee completes the bill, it will be sent to the House floor for consideration by the full House. The work of House committees on issues such as this one usually greatly influences the action taken by the full House when the bill comes to the floor.●

HUBERT H. HUMPHREY

HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. DE LA GARZA. Mr. Speaker, in the annals of mankind, there are but a very few individuals who surpass the goals and expectations of their time and generation—most receiving said recognition years after their demise.

In the history of our country, again a very few have achieved this stature. One of these was Hubert H. Humphrey.

In him there was a combination that could not be reproduced. His chemistry was such that it fit no formula, nor could all the elements be readily identifiable. All that can be said is that there was and could only be one Hubert Humphrey. How sad this is—for we need so many—but yet how lucky we were that we had at least one.

The friend, the father, the husband, the politician, the "Happy Warrior." The energy, the wit, the basic honesty, the intelligence, the spark of life. The loyalty to friends, the reverence to basic human rights, the unyielding loyalty to his beloved country, and at the last, the graceful acceptance of the will of God.

What a great man, yet how humble, how kind, how understanding—the adjectives could be endless. Let it suffice for now to say—the world, our country, mankind—all of us collectively and those of us fortunate enough to know him personally are better citizens, better persons, because there once came our way, a man named Hubert H. Humphrey.

Yes, like the old lamplighter of old: "He made the world a little brighter wherever he would go." In behalf of his many friends in south Texas I say, we were so fortunate that our friend, Hubert H. Humphrey, "paso por aqui." ●

THE NATIONAL GRANGE SEEKS DEAF ADVOCACY

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. RICHMOND. Mr. Speaker, the deaf community in America has not had a national advocacy program from a nondeaf organization comparable to that of the blind through the Lion's Clubs or the crippled children through the Shriners. Now, however, the National Grange has initiated a support program for the deaf and hard-of-hearing.

The National Grange is our Nation's oldest farm organization. Currently, Grange organizations exist in 42 States. Over 500,000 individuals are affiliated with the Grange. The organization has long been involved in programs to accelerate agricultural progress and to promote community improvements.

The vast resources of this outstanding national organization are now being directed toward improving services to the deaf and hard-of-hearing.

In an effort to assist the deaf community throughout the United States to broaden communication systems, the Grange has become involved in many worthy projects. Members of the Grange are encouraged to volunteer their services to local agencies involved with the deaf. Scholarships to Junior Grange camps are provided for deaf children.

The Grange will provide hearing dogs, each worth $2,500, to needy deaf individuals. These dogs are trained to act as the ears of deaf people. The dogs alert the deaf person of such sounds as fire alarms, smoke detectors, burglars, alarm clocks, a baby's cry, and dozens of other sounds. In January, I introduced the Hearing Dog Training Act, H.R. 10442, which would provide $2 million to establish 10 regional centers to train these dogs. Approximately 500 dogs will be made available each year through this program and the cost to the deaf individual will be reduced to $25.

The Grange is actively involved in research and education programs for the deaf. A Grange-financed film entitled, "I Hear Your Hand" has been distributed to over 300 TV stations across the country. In 1976, the Grange published "Lift Up Your Hands," a song book in sign language, the first book of this kind to be produced. This book of 10 inspirational and patriotic songs is designed both for the use of the deaf and to encourage hearing people to learn sign language.

By recognizing the often overlooked needs of the deaf and hard-of-hearing, the Grange is making great progress toward breaking down the psychological and social barriers which have often kept deaf people from fully participating in the mainstream of American life.

The National Grange and I will be working together closely to expedite the enactment of legislation specifically aiding the deaf and hard-of-hearing. It is hoped that in the very near future the Grange will utilize its resources to make telecommunication devices (TTY's) available to emergency communication centers including hospitals and fire and police stations as well as the offices of elected officials.

I sincerely hope my colleagues will join with me in supporting this most commendable, humane effort of the National Grange.●

DOMESTIC VIOLENCE ASSISTANCE ACT OF 1978 NEW LEGISLATION TO HELP VICTIMS OF FAMILY VIOLENCE

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. STEERS. Mr. Speaker, today Congresswomen LINDY BOGGS and BARBARA MIKULSKI and, under the auspices of Congressman GEORGE MILLER of California are sponsoring legislation to help victims of family violence. "The Domestic Violence Assistance Act of 1978" sets up an Office of Domestic Violence within the Department of Health, Education, and Welfare to assist community grassroots efforts to provide emergency shelter and counseling and to coordinate existing Federal, State and local government initiatives which are currently attempting to meet the needs of family members who are forced to flee violent homes.

Ten months ago, on June 21, 1977, Congresswoman LINDY BOGGS and I introduced H.R. 7927, "The Domestic Violence Prevention and Treatment Act of 1977," to set up a demonstration grant program within HEW to assist groups providing direct services to families in crisis. Senators WENDELL ANDERSON and TED KENNEDY simultaneously introduced an identical version of that legislation, S. 1728 in the Senate. Shortly thereafter, Congresswoman BARBARA MIKULSKI introduced an innovative measure which set up a training and stipend program within ACTION for volunteers to work with local communityy groups serving victims of family violence.

Our efforts have received broad bipartisan support. Last summer, Congresswoman BOGGS and I worked closely with the Office of Public Liaison at the White House on this issue. To its credit, the White House spearheaded several meetings with community shelter groups, agency officials and Hill staff to help us gain nationwide recognition for the need to enact Federal legislation to assist victims of family violence.

In addition to the White House, Mary Crisp, cochairman of the Republican National Committee, took an active interest in our bill. Congressman AL QUIE, ranking minority member of the House Education and Labor Committee was an early cosponsor of our bill.

In the Senate, both Senator ALAN CRANSTON, chairman of the Child and Human Development Subcommittee and ranking minority member, Senator SAM HAYAKAWA, supported family violence legislation. In fact, Senator CRANSTON chaired hearings on the matter and subsequently introduced his own bill.

The legislation we are introducing today is a result of House hearings by the Select Education Subcommittee held on March 16 and 17 of this year chaired by Congressman GEORGE MILLER of California. Mr. MILLER has been extremely gracious to invite input on a number of occasions from Mrs. BOGGS, Ms. MIKULSKI and me both as to the March hearings and the legislation being introduced today.

This bill is an attempt to respond to the needs of family violence service providers. There are over 300 such programs existing in our country today in 44 States and Puerto Rico.

These programs are primarily providing emergency shelter to women and their children who must flee a violent home environment. When times get rough at home, when the husband loses his job, or when an unexpected new baby is coming, the wife becomes a scapegoat for societal pressures. Frequently, the battered wife is not readily employable, has no money in her own right and simply has no place to go. Tragically, this includes such women as the woman who lost her kidney, during a beating, who then went back to her husband after that beating and nearly lost her second and only remaining kidney in another beating. It includes the woman who lost an ear at the hands of her husband and the woman whose husband attempted to abort his own unborn child.

This legislation would set up a coordinating unit in the new Office of Domestic Violence within HEW to, first, develop and maintain a national clearinghouse on domestic violence, second, make an annual report to the Congress with respect to the status of Federal, State, and local programs relating to domestic violence, including recommendations for improved coordination; and, third, make recommendations to the Congress concerning the need for modification of Federal programs which may affect victims of domestic violence, including public assistance housing, legal and medical service, and job training.

A council including victims of domestic violence, persons who are experienced in the operation of community-based shelters and service programs and Federal agency representatives will approve grants to domestic violence programs which can demonstrate community support and past experience in treating victims of family violence.

A ceiling on the amount of a grant is designed to see that programs use Federal money as a supplement to other local sources of funding. This is why no grant may exceed $50,000 or 25 percent of a program's annual budget in a given year. In addition, no program may receive funding under this bill for more than 3 years. These funds are intended to be used for a broad range of services such as counseling, job training, legal services, shelter, emergency hotlines, transportation and, followup services.

In addition to direct grants, a second grant program is established to provide personnel training and technical assistance to individuals and organizations involved in establishing and maintaining community shelters. Not more than 20 percent of any amount appropriated for this bill may be used for this purpose. Funds may cover expenses and training programs including costs of first, dissemination of information regarding treatment of victims of domestic violence; second, technical training of shelter personnel, including transportation and living expenses for a period of no more than 2 weeks; third, production of media information programs concerning the problem of domestic violence and the availability of community services for victims of domestic violence; and fourth, shelter-based research programs concerning the need for shelters or other services for victims of domestic violence and their children, utilization of such a program, or related subjects.

The ultimate goal of Federal legislation should be to encourage and continue local efforts through some type of service funding.

Leland Bergstron, director of the family court services division of the Fresno, Calif., family court, summed up the need for legislation in a letter to me:

Regular funds are hard pressed by inflation and attitudes against start up of new services . . . . our best hope for a project is to fund it in the private sector, but until the public awareness both to the problem of battering and the help possible in treating this social ill have been raised to a sufficient level, the private funds are not sufficient to meet this challenge.

Mr. Speaker, when I first became involved with this problem in January of 1977 at the urging of my legislative assistant, Roberta Avencena, who works with a local District of Columbia shelter, the House of Ruth, I had no idea of the magnitude of this problem. Today I am thoroughly convinced that it has reached epidemic proportions, that it knows no social, racial, religious, or economic boundaries and that help is desperately needed now. I urge speedy enactment of this legislation we are introducing today.●

CONGRESSIONAL PAY RAISE?

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. MAZZOLI. Mr. Speaker, I note that Members of Congress are due to receive a cost-of-living pay adjustment in October.

I think Congress should forgo all or a substantial part of its pay raise in order to set an anti-inflation example for the whole country.

Federal workers may be required to forgo a part of their cost-of-living adjustments to battle inflation and to set an example for noninflationary wage settlements in the private sector.

Should not Congress do at least as much on its own part? ●

HOW OUR NUCLEAR POLICY BENEFITS THE KREMLIN

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mrs. LLOYD of Tennessee. Mr. Speaker, I wish to insert the following article from the Washington Post for the benefit of my colleagues. I am, of course, very interested in the topic of this article which is nuclear power:

HOW OUR NUCLEAR POLICY BENEFITS THE KREMLIN

Partly obscured behind the shock waves of President Carter's neutron "bomb" decision, a crisis on nuclear power is building in the Western alliance over the creeping U.S. embargo against export of raw material for nuclear power plants, with the Soviet Union benefiting directly.

The limit on exporting U.S.-produced enriched uranium comes out of the new Nuclear Nonproliferation Act, with this unintended result: Soviet nuclear power becomes preeminent. Since breeder-reactor technology is regarded by oil-starved Europe as vital to future energy needs, our European allies may turn eastward for their enriched uranium and technology exchange.

Even without the new act, the president's abhorrence of the breeder reactor points to Soviet domination—as was pointed out in a confidential letter delivered to Carter April 4 from Rep. John W. Wydler of New York. The senior Republican on the House Science Committee, Wydler warned the president that "it is frightening to speculate on the degree of control of the world market [for breeder-produced nuclear power] that the Soviet Union might achieve by implementing" its fast-moving nuclear power program.

Economic and political stakes in the rush for nuclear energy by the Western democracies and Japan are awesome. Considering that, the Carter administration's nuclear nonpolicy could contribute to another global victory for the expansive masters of the Kremlin.

The Nuclear Nonproliferation Act, signed into law March 10 by Carter, adds to the danger. It gives the nine Western European countries who belong to EURATOM 30 days to start negotiations with the United States. The law bans U.S. exports of enriched uranium to Western Europe unless EURATOM agrees to U.S. control over spent fuel manufactured in European plants.

That is vitally important, giving Washington veto power over reprocessing spent fuel and, hence, over Europe's power to build breeder nuclear power plants. The breeder, making its own fuel as it manufactures power, is nearly indispensable to Europe's future power needs.

This unilateral change in existing agreements dating back to the mid-'60s infuriated the European nations. Forced to play the high-stakes nuclear power game the Washington way, their first reaction was symbolic retaliation. With the French taking the lead, they simply ignored the provision in the new U.S. law giving them 30 days to start negotiations for new licenses to import enriched uranium.

The EURATOM nations will surely agree, probably soon, to negotiate new enriched-uranium contracts. But thumbing their noses at starting the talks within the 30 days is a symbol of their anger.

Carter's deeply rooted fear is that reprocessed fuel—which is weapons-grade fuel—could be turned illegally into bombs. That is understandable when considered in a political vacuum. Unfortunately, however, the Soviet Union has no parallel concerns. The Soviets are far ahead of the breeder reactor curve today and picking up ever more speed.

Rep. Wydler drafted his warning to the president after talks with the International Atomic Energy Agency in Vienna, the French Atomic Energy Commission and finally with the Russians in Moscow last month. A congressional expert on nuclear power, Wydler predicted to Carter that we are "on the verge of an atomic Sputnik"—a sudden Soviet advance.

He warned the president that his opposition to the Clinch River experimental breeder reactor signals all other nations that the United States is not serious about preserving the breeder as a long-range option; that has undermined U.S. nuclear power credibility abroad "and made us an unreliable nuclear partner."

Over Carter's protest, Congress has kept the Clinch River "breeder" from dying a premature death. But that does not relieve the president from getting his act together and taking on the formidable, richly financed anti-nuclear lobby (with its equally formidable agents ensconced as officials deep inside his administration). Otherwise, the West may be doomed to fall behind the communist bloc, never to recover.

For example, the Soviets now operate a 350-megawatt experimental "breeder" on the Caspian Sea and will complete a 600-megawatt plant in 1980. Design is beginning for a 1,600-megawatt plant, which the Russians told Wydler would take only seven years to build.

No wonder, then, that the new law limiting export of U.S. enriched uranium is creating consternation. Following EURATOM's symbolic refusal to start new talks within the 30-day period, West Germany will soon increase its purchase of enriched uranium from the Russians. More attacks on the exposed flank of President Carter's nuclear power policy will surely follow.●

IN HONOR OF CHET HOLIFIELD, IN MEMORY OF HERB ROBACK

HON. MELVIN PRICE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. PRICE. Mr. Speaker, last Thursday, April 13, a special honor was bestowed on my special friend and former colleague in the House, Chet Holifield. He was awarded the first annual Herbert Roback Memorial Award. This award was established by the National Contract Management Association to honor the memory of the late Herb Roback. Herb was well known to many of us for his great contributions to good Government during his long service as

an outstanding professional staff assistant to committees of the House of Representatives.

I cannot think of a person who is more deserving of this special honor than our esteemed friend, Chet Holifield. I know firsthand of his dedicated efforts to advance good government and to protect the best interests of the citizens of this Nation. I am sure all of the Members of this body who knew and worked with Chet Holifield before he retired in 1974 join me in congratulating him on the receipt of this special honor. I also want to take this opportunity to wish him and his gracious wife, Cam, many years of pleasure and satisfaction in their retirement. I also want to express the wish that they continue to visit us regularly to provide us with the pleasure of their company and the benefits of their thoughts and counsel.

I also want to take this opportunity to express my best wishes and respect to Arlene Roback. I am sure that, in no small measure, the outstanding career, which the establishment of the Herb Roback award recognizes is due to the help which Arlene has provided.

I would like to include at the close of my remarks the statement our esteemed colleague FRANK HORTON made on the occasion of this award to Chet Holifield. I commend to all of you the remarks FRANK made since they concern a very important problem which Chet and many of us in this Chamber have devoted a great deal of effort to solve: Energy.

Statement follows:

ACTION ON ENERGY: THE MORAL EQUIVALENT OF RING-AROUND-THE-ROSY

(Text of Congressman Horton's remarks at the first annual Herbert Roback Memorial Award dinner, NCMA, Sheraton International Conference Center, Reston, Va.)

Chairman Chet and Cam, General Staats, Arlene, fellow Procurement Commission alumni and friends of the National Contract Management Association. This evening is a wonderful reunion indeed.

Tonight, in honoring Chet Holifield, you are really paying tribute to one of the best teams of people ever to be found on Capitol Hill, the Holifield-Roback team. Regardless of what the subject matter or the problem was, whenever that team of two mustaches and four twinkling eyes was working together, the results were always good for the American people.

As all of you from Procurement Commission days know, if it had not been for the foresight of Chet and the late, beloved Herb Roback, there would never have been a Government Procurement Commission, or an Office of Federal Procurement Policy. The state of federal purchasing would have remained in the sorry state it was in prior to 1969. As you know, the work of the Procurement Commission is still very much alive today. Through the incredible perseverance of Elmer Staats, Senator Lawton Chiles, Les Fettig, Don Sowle and countless other believers in the creed of our Commission, major work is still underway to implement the landmark recommendations of our Commission. I will always view my work with all of you on the Procurement Commission as one of the high points of my own Commission-studded career in the Congress.

One of my very finest privileges was to enjoy the services of Herb Roback as Director of Studies of the Commission on Federal Paperwork, where his contribution of objectivity, judgment and leadership left its indelible mark on the more than 800 recommendations we made to reduce the burden of bureaucracy and red tape on the American people.

When Don Sowle and Harry Tayloe asked me to speak to you tonight, they said I should feel free to discuss any subject I saw fit. Procurement legislation is a topic which nearly everyone here is well versed in, so I hope you will permit me to speak to you on a subject which I am far more intimately involved with these days, and which is very dear to the heart and mind of Chet Holifield.

The topic of my address this evening is: Action on Energy: The "Moral Equivalent" of Ring-Around-the-Rosy.

Every American is fortunate indeed that our deepening energy and economic crisis is not the equivalent of war, for if it were, our nation would have by now experienced the most devastating defeat in its history.

My legislative work in the energy field dates back to happier days when Chet Holifield and I helped to accomplish the first steps toward organizing the federal government to deal with the energy problem. We fostered the bills which created ERDA, the Nuclear Regulatory Commission and the Federal Energy Administration. All of these bills were products of the House Government Operations Committee under Chet's Chairmanship.

In the current Congress, as ranking minority member of Government Operations, I worked hand in hand with the Administration and with my colleagues in the majority party to fashion a bill creating the new Department of Energy.

During the current Congress, Government Operations was one of five House Committees to which various portions of the "National Energy Act" were referred. We reported out an infamous little provision of the President's bill which would have authorized the purchase of 6,000 vans to be used to shuttle federal employees back and forth to work, in the name of energy conservation. This provision, as well as many equally dubious and more onerous provisions of the Administration's energy policy survived consideration by the partisan express train otherwise known as the House *Ad Hoc* Committee on Energy, on which I also serve.

When the energy bill reached the House floor, only one amendment sponsored by a minority Congressman carried the day—that was my amendment to knock out the van pooling provision.

Perhaps you can sense that House consideration of the energy policy bill was neither as harmonious nor as bipartisan as the successful legislative effort to create a new Energy Department earlier in this Congress.

For the past six months, I have had the dubious honor of serving as a member of the august House-Senate Energy Conference Committee, where the fate of our nation's energy and economic future has been stalemated for over four months.

Actually, I am critical of the Conference Committee only because it has been run as a closed-door, partisan process. I do not envy the work of the Conference Committee, for it must somehow sort out the results of a flawed Presidential energy policy proposal which has muddled its way through a flawed series of legislative procedures on both sides of the Capitol.

The possibility of the Conference Committee coming out with a legislative product which amounts to good, sound energy policy is almost nil, given these circumstances. It is to our credit that we have reached at least shaky agreements on three imperfect compromises dealing with the three relatively minor portions of the President's plan. The energy conservation, coal conversion and public utility regulation portions of the bill have basically been agreed to. The current stalemate concerns the centerpieces of the Carter plan—natural gas pricing and new energy taxes, including the crude oil equalization tax, with the latter not having been considered seriously at all at this point.

Why am I so critical of the President's energy policy proposals? I assure you that partisan considerations play no part in my objections to this Rube Goldberg proposal. As most of you know, I have never hesitated to cross party lines to support legislation proposed by Democratic Presidents or by Democratic legislators which I viewed as being constructive or necessary for the nation.

But President Carter's energy policies, as contained in the House energy bill are not constructive, they are destructive in effect. The flaws in this plan are perhaps best known to Chet Holifield, who may be the greatest living student of energy ever to serve in the Congress.

Over six years ago, nearly two full years before the Arab oil embargo, Chet had behind his desk in the Rayburn Building, and near his right hand, charts showing just what was going to happen to this nation's domestic energy supplies, and to our demand for foreign crude oil resources. He knew then, in 1972, and he advocated then, national policies that would incentivize much greater domestic energy production. He had the foresight to realize that between the late 1970's and the 1990's we would have to rely to a much greater degree on nuclear-electric generating plants. He knew that the supply of uranium was finite, and that the design and construction of breeder reactors and of nuclear fuel reprocessing facilities could stretch endlessly the effective availability of relatively low-cost nuclear fuel. He knew that we would have to change federal regulatory policies to incentivize greater production of domestic natural gas. He saw the need to accelerate the exploration for crude oil and gas on the Atlantic shelf, and to expedite the construction of the Alaska pipeline. He understood then what our potential vulnerability would be economically and politically if we were to allow our dependence on other nations for oil to grow out of hand.

Chet knew that there would be a need to substantially increase reliance on coal resources, and he knew that as energy prices edged upward, market forces would begin to encourage conservation and an end to the wasteful consumption patterns of energy for which the United States had become famous.

Chet always did have the ability to think clearly when it came to arriving at solutions to complex problems. Chet, it is too bad that you were not asked to help draft this Administration's energy policy proposals last year.

What, then, is wrong with the proposals Jimmy Carter made to a Joint Session of Congress exactly 51 weeks ago tonight? What is wrong is that Jimmy Carter's energy policies do not do all the things which Chet Holified identified six years ago, it does not even do some of these things. Only one, the obvious need to rely on greater use of coal managed to survive the closed-door brainstorming which produced this plan.

The plan does not encourage or incentivize greater domestic energy production. It does not rely sensibly on market forces to increase conservation or to produce reliance on more available fuels. Instead, it contains the largest single mass of increased government intervention in the form of taxes and regulation ever sought by a President from the Congress of the United States. The plan does not address constructively the need for

breeder technology or for nuclear fuel reprocessing. It does not address the need for accelerated progress on safe nuclear waste disposal. It pays only lip services to the need for more reliance on nuclear power by proposing a model plant licensing procedure.

The breeder technology has the ability to increase the value of our domestic uranium ores by a factor of 70. The present estimate of the life of uranium ores is 50 years. The breeder would multiply the 50 years to 3500 years.

The Congress kept the breeder program going against President Carter's opposition. Our friend, Comptroller-General Staats, has been working hard to see to it that the Administration obeys the laws and expends properly the funds allocated for the breeder project.

Yesterday the Space and Technology Committeee kept the breeder in the pending authorization bill by a vote of 27 to 14. I believe we can pass that bill in the House and I understand that the Senate will also support it.

President Carter claims he wants the United States to set an example by refusing to use plutonium as an electric generating fuel—because it can be used in weapons. Six nations overseas who possess nuclear weapon technology have publicly rejected this Carter philosophy. England, France and the Soviet Union are now demonstrating breeder plants using plutonium as a fuel. The Soviets and French are now constructing their third advanced breeder plant.

International cooperation is the only way to control the spread of nuclear weapon materials and technologies. The Congress and several Presidents have supported this approach by establishing the International Atomic Energy Agency and the International Non-Proliferation Treaty.

A lone example of self denial of plutonium fuel usage will not reverse the work of these international agencies for the past 20 years.

We have heard of the dangers of inflation—and there is an average inflation of 5 to 6% per year.

Our balance of trade deficit grew in 1977 to $26.6 billion.

Our export of American dollars for imported oil was $45 billion. No wonder the dollar is slipping in value all over the world.

If we were pushing nuclear fuel to replace the cost of imported oil, we could strengthen the dollar.

The President's plan does not encourage more domestic oil production. It discourages this by taxing domestic oil to the level of the OPEC price without plowing back into exploration or new production any of the proceeds of the tax. The plan stifles new natural gas exploration and production by continuing an antiquated maze of federal price controls on gas.

The plan not only does not provide the kind of farsighted policies that can solve our energy problem, it would, in fact, stifle our already fragile economy by holding down energy demand growth to 2 percent, and by further taxing the American people.

I am not alone in feeling frustrated and bitter about the gyrations which the President and Congress have gone through for the past year on energy. Many other Members of Congress, both Republicans and Demorcats, see the same problems with this energy plan. That is why Congressional consideration of this hodge-podge has seemed like the "moral equivalent" of ring-around-the-rosy, with five House Committees and five Senate Committees dancing to a very discordant tune composed by the President.

It may, in fact, be best for the nation at this stage of the Capitol Hill energy merry-go-round that the questions of natural gas pricing and energy taxes remain unresolved until the American people have a chance to work their will in the upcoming Congressional elections.

What we need is an energy plan that will move us toward gas and oil deregulation, treading carefully to avoid excess energy company profits. What we need are incentives and perhaps tax credits for investment and research into new energy resources.

What we need is a pledge not to overregulate the coal industry.

What we need is a Presidential change of heart that will enable him to exercise responsible leadership on nuclear energy, instead of leading our nation into a dense fog of myth created by the shrill minority of anti-nuclear voices. Our nation cannot afford even one more year of huddling alone in fear of safe and careful development of nuclear technology, while the rest of the industrialized world gallops ahead of us in the breeder and fuel reprocessing fields.

What we need is an energy policy that will recognize and do something about the devastating effect of spending $45 billion annually on imported oil, which has produced the largest balance of payments deficits and the weakest U.S. dollar in recent history. We do not need an energy policy which shrouds our economy in stifling regulation and confiscatory taxes all designed around the fear that the energy industry in our private enterprise economy might earn a profit.

There are, to be certain, some hopeful signs in this muddled picture. Market forces, despite our policy-makers' apparent ignorance of them, are beginning to work. American people and businesses have begun to respond on their own to higher energy costs by conserving energy. The demand for insulation and heat and cooling control equipment is one indicator of this healthy trend. Also, our domestic production of crude oil, thanks to Prudhoe Bay in Alaska to secondary and tertiary recovery methods in older oil fields, has begun to climb Imports have even dipped slightly from their peak levels. Also, the international cartel-established price for oil has temporarily stabilized—not because we promised some military tinker toys to the Saudi Arabians, but because, at present, there is a world oil glut.

Further, the Supreme Court has taken a major step toward putting some brakes on the seemingly endless series of courtroom challenges to which each newly proposed nuclear-electric plant has been subjected.

There are also hopeful signs that the Congress, in the wake of its misguided imposition of 5 rounds of Social Security tax increases, is not anxious to follow suit in an election year by passing the new energy taxes proposed by the President.

These are some hopeful signs. Unfortunately, they do not point to the adoption of the kind of constructive energy policies which Chet Holifield envisioned six years ago, and which are even more desperately needed today.

For the time being, the energy game of ring-around-the-rosy will continue.

At this very moment, the United States has no viable energy policy, and adoption of the obvious and positive solutions which have been apparent and badly needed for the past six years seems, at best, a remote possibility. Our dependence on foreign energy has jumped from under 20 percent of our needs to nearly 50 percent of our needs in half a decade.

Despite the pleas of three Presidents, Congress is still pussyfooting on energy. The pussyfooting must stop, and stop now, before our nation and our economy are so irreparably damaged that no solution will bring us out of the energy tailspin we have drifted into.

Perhaps the American people are beginning to see the true meaning of what their federal policy-makers are doing to them on energy. Perhaps in the near future, perhaps on election day, 1978, they will say to us in the immortal words of cartoonist Walt Kelly,

"Why do we stand here confronted by insurmountable opportunities?"

Why, indeed?

Thank you.●

WORLD REFUGEE REPORT SURVEYS REFUGEE SITUATION IN AFRICA

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. DRINAN. Mr. Speaker, the 1978 World Refugee Report notes that civil war, tribal genocide, and racial unrest threaten to increase substantially the already large numbers of refugees in Africa. The largest growth in refugee population has taken place in Africa which 1.5 million people have been displaced by civil war in Angola. Another 800,000 persons have fled the growing conflict within Ethiopia. Because of severe human rights violations half the population of Equatorial Guinea—145,000 people. has fled the harsh rule in Macias Nguena Biyogo; 50,000 refugees have entered Algeria, fleeing the guerrilla war in Western Sahara and tens of thousands of new refugees from Uganda and the heightening conflict throughout Southern Africa have swelled the African refugee roster in 1978.

The growing number of refugees in virtually all parts of the continent have outpaced the capacity of government and international agencies to respond to their needs. Although the World Refugee Report notes some positive developments, it also observes that the refugee situation in Africa will continue unabated.

I commend to my colleagues the following survey from the 1978 World Refugee Report on the refugee situation throughout the African Continent:

AFRICA

The world continues to be shocked by large scale killings and torture in Equatorial Guinea and by tribal genocide in Uganda. In the Horn of Africa, a military junta is fighting for survival against internal assassinations, Eritrean rebellion and a major war with ethnic Somali insurgents in the Ogaden. The Polisario Front is fighting for independence of the phosphate-rich territory of Western Sahara, which was divided between Mauritania and Morocco, after independence from Spain in 1976. Angola remains a divided country as the civil war drags on. Fighting continues in the absence of a settlement to bring majority rule to Rhodesia (Zimbabwe) and protests against apartheid in South Africa have met with greater repressive measures by the South African government. Despite pressure from the international community, South Africa continues its illegal occupation of Namibia, Southwest Africa, and military pressure has been brought to bear on South Africa by SWAPO (Southwest African People's Organization) guerrillas.

All of these situations show few signs of abating in 1978. Yet some positive develop-

ments have also occurred for refugees in the African continent. Since Guinea Bissau won its independence in 1975, more than 50,000 persons who had fled the liberation struggle have been repatriated under the auspices of the United Nations High Commissioner for Refugees (UNHCR). Resettlement continues for those who were internally displaced by the war as well as those who had fled to Senegal. Negotiations are currently in progress for the transition to majority rule in Rhodesia (Zimbabwe). Many black refugees displaced by Mozambique's struggle for independence have returned.

Mozambique's economy, however, still reels from the deleterious impact of the flight of 200,000 Portuguese Mozambicans, who fled the country after its independence.

Recent Rhodesian army incursions deep into Mozambique—aimed at destroying guerrilla training bases and military depots—have also put a great economic and military strain on the Frelimo government.

Unlike Angola, Ethiopia and Guinea, which have been closed to the Western press, some Western, non-Marxist journalists have been allowed to tour Mozambique rather freely to see what is going on for themselves. Reporters have been impressed by the Frelimo government's dedication to overcome 400 years of colonialism, the post independence economic collapse, and the new ravages of the Rhodesian war.

EQUATORIAL GUINEA

According to recent reports by the international press, thousands of persons have been killed or have disappeared since Equatorial Guinea gained its independence from Spain a little over nine years ago. It is also estimated that 145,000 refugees—almost half of the country's original population—have fled to various countries of Central Africa and to Spain.

The Anti-Slavery Society, Amnesty International and the World Council of Churches have all denounced the regime of Macias Nguena Biyogo as "among the most brutal in the world." These international human rights organizations have reported systematic killings, torture and forced labor.

Macias, who rules Equatorial Guinea in constant fear of assassination, is reportedly backed by a ruthless militia comprised of members of his own tribe (the majority Fang Tribe) and by hundreds of Cuban, Chinese and Russian advisors. All American diplomats have been expelled.

With nearly all the opposition dead or in exile, the largely illiterate population is resigned to accepting the regime.

UGANDA

In 1972, 40,000 people poured out of Uganda when President Idi Amin Dada, who had come to power in a 1971 military coup, expelled all non-citizen Asians from the country. Now, a second wave of political refugees is coming out of Uganda into Kenya, Tanzania, and Zaire.

These new refugees are primarily from the Lango and Acholi tribes, part of the Christian minority in Uganda. They have been accused by Amin of continued support for Milton Obote, the former President ousted by Amin, now living in exile in Tanzania. Many government officials and military officers who fear Amin are also fleeing the country.

On the night of January 25, 1977, an attempted coup reportedly took place in Uganda. Since then, reports coming out of Uganda, and from refugees in Kenya, have indicated mass killings, disappearances and beatings by the State Research Bureau, Amin's secret police force.

Uganda radio reported the death of the Anglican Archbishop Janani Luwum, an Acholi. The Archbishop, accused of complicity in a coup attempt, allegedly died in an "auto accident." This story, however, has been widely disputed by knowledgeable observers and refugees; it is generally believed that the Archbishop was murdered by Amin's secret police.

As the death toll mounts in Uganda, hundreds continue to seek refuge in neighboring countries. Ugandan sources in Kenya have estimated close to 10,000 Ugandan refugees in Kenya, compared to an official estimate of 3,000. Many refugees, apparently do not register with the UN High Commissioner for Refugees (UNHCR) for fear of exposure to Amin's State Research Bureau. In Tanzania, the UNHCR recently completed a self-sustaining project for the settlement of 1,500 of the 3,000 refugees registered there.

Observers outside Uganda feel that the death of Archbishop Luwum, the exile of five of the eighteen bishops in Uganda and the failure of the January 1977 coup (and the subsequent military purge) indicate the desire of the Amin regime to eliminate all possible sources of dissent.

WESTERN SAHARA

After the death of Generalissimo Franco in Spain, the Spanish government agreed to relinquish its claim to the phosphate-rich Western Sahara. Under the Madrid Agreement of 1975, the territory was divided between Morocco (two thirds) and Mauritania (one third.)

In response to the division of their land, a popularly-backed guerrilla movement, the Polisario Front, began a hit-and-run war against the occupying powers. Polisario (Popular Front for the Liberation of Saquia el Hamra and Rio de Oro) has not only held its own but has scored some notable successes against more experienced Moroccan and Mauritanian troops. In the desert, the guerrillas are able to avoid the Moroccan columns and stage surprise attacks on supply depots and transport columns.

The fighting has resulted in severe hardship for the Saharan population. Major towns are still occupied by Moroccan and Mauritanian troops. Those Saharans who wish to flee to Algeria (about 50,000 have done so), must do so at night in order to avoid Moroccan troops and the Moroccan Air Force, which has been known to bomb refugee columns.

Once in Algeria, life is harsh. Most of the refugees live in one of twenty-two refugee camps in southern Algeria near Tindouf. Tents are their only protection against the blazing sun of the day, and the freezing cold of the desert night; they live on bread and semolina, and medical supplies are in short supply.

It is difficult for international organizations to assist these refugees. Tindouf is 1,200 miles from Algiers, making communications and transportation difficult. The Algerian government is reportedly spending $50,000 dollars a day on refugee relief.

And end to the fighting does not appear likely in the near future.

THE HORN OF AFRICA

Few countries are faced with the kind of political instability that has beset Ethiopia in recent years. Assassinations and assassination attempts of government leaders and various opposition elements have become commonplace in Addis Ababa, the capital. Numerous insurgencies continue throughout the country, the two most significant of which are the Eritrean drive for secession in the north, and the Somali-Ogaden claims for autonomy in the east.

The Somali people have a history of intense nationalism in spite of divergencies within their own society. As a people, the Somalis stretch from northern Kenya to the newly independent Djibouti on the Red Sea. Split up by colonial borders, the Somalis have always harbored a desire to unite in a "greater Somalia" organized and united under one government. Some observers feel that the Somalis saw in Ethiopia's internal problems, an opportunity to press their claims on the Ogaden Desert region which they claim as their own.

Eritrea, the coastal province in northeast Ethiopia, was once the ancient kingdom of Axum and has always remained distant from the highland government in Addis Ababa. Until 1962, the province was an autonomous region of Ethiopia. In that year, Emperor Hailie Selassie annexed the province into Ethiopia, repealing the autonomy of the Eritrean provincial government. Discontent and sporadic violence against the government have always existed, but observers and members of Eritrean support groups in the US feel that the 1973 drought and the government's failure to help are what led to the increased rebel activity in Eritrea in the last three years. At present, the government controls only the cities in Eritrea, and US State Department officials and other observers report that the cities are under siege by insurgents pressing on government forces who are fighting a two-front war in the Ogaden and in Eritrea.

The combination of drought, famine and fighting has thus far produced hundreds of thousands of refugees both within Ethiopia and in the surrounding countries of the Horn. The most serious problem is in Eritrea where an estimated 600,000 people have had to flee their homes.

While Eritrean forces control most of the province, the government has resorted to indiscriminate air attacks on Eritrean villages. Those whose homes have been destroyed, reportedly have been forced to seek shelter in caves or under trees. Food is a problem because many crops have been destroyed by the fighting. Moreover, relief efforts have been prohibited by the Ethiopian government and major international agencies have not been allowed to operate inside Eritrea.

Relief efforts are being carried out by the Eritrean Relief Committee which, with support from voluntary agencies and fund raising activities in the West, provides blankets, shelters, food, medical care, and clothing for the displaced. This aid must enter Eritrea via the southern Sudan on trucks and Land Rovers.

Since the beginning of severe fighting in Eritrea, over 150,000 people have fled to the southern Sudan. There, the UNHCR has been able to help some refugees find jobs or become self-sufficient farmers. The UNHCR also has two camps housing about 32,000 people. However, the $1,246,000 UNHCR program at the Esh Showak and Wad-el-Hileiwu camps cannot provide all the Eritrean refugees in need of housing and food. The UNHCR estimates that at least 55,000 refugees remain for whom no settlement assistance is available.

SOUTHERN AFRICA

In 1978, Southern Africa faces war, civil unrest, racial oppression and tribal strife. The resulting flight of refugees is bound to increase.

Angola remains a country divided and engaged in a bitter civil war rooted in ideological and tribal differences. The Popular Movement for the Liberation of Angola, supported by the Kimbundu tribe, the urban intelligensia, and twenty thousand Cuban troops, remains in control of the capitol, Luanda, and the central portion of the country. But the MPLA power faces a serious threat from Jonas Savimbi's National Union for the Total Independence of Angola (UNITA), supported by the Ovimbundo tribe (33 percent of the population), controlling much of the southern countryside.

In the north, the National Front for the Liberation of Angola (FNLA), headed by Holden Roberto, though far less active than UNITA, still holds the loyalties of the Bakongo tribe, which comprises 25 percent of

the population. In Cabinda, the oil-rich enclave north of the Zaire River, Cuban troops have been protecting the oil refineries from guerrillas who seek independence for Cabinda.

The unsuccessful invasion of Zaire's copper-rich Shaba province by Katangan exiles, who had been living in Angola, in March and April of 1977, has caused the flight of some 200,000 refugees into remote districts of Angola. These refugees, living in the remote bush, have strained relief operations, already taxed by the hundreds of thousands of persons internally displaced by the Angolan civil war.

Within Angola, these displaced persons are aided by several relief organizations. The UNHCR, WHO, UNICEF, World Food Program and the International Red Cross are working in a coordinated effort to provide food, shelter, clothing, communications and transport facilities. These efforts, however, have been severely hampered by war, lack of facilities and the remote location of some refugee groups.

In neighboring countries such as Zaire and Zambia, however, there are thousands more refugees. In Zaire, l'Eglise du Christ and l'Association International de Development Rural Outre-mer administer UNHCR programs for over 500,000 Angolan refugees. In Zambia, where there are 30,000 Angolans, UNHCR works in tripartite agreement with the Zambian government and the Lutheran World Federation/Zambian Christian Refugee Service has set up a settlement for Angolans at Meheba funded with 72,000 dollars and serving 11,000 refugees.

Attacks by Rhodesian security forces on refugees in southern Mozambique have claimed at least 1,000 refugee lives in a Rhodesian attempt to destroy guerrilla bases. There are 35,000 black Rhodesian refugees in southern Mozambique, most housed in three Mozambican-run and UN-assisted camps. In 1977, the UN provided around 2 million dollars worth of assistance to refugees in Mozambique and is projecting a budget of 3 million for 1978. In addition, voluntary agencies and governments will contribute another 1.4 million.

In Rhodesia the political situation remains tense. Recent reports, however, indicate a greater Anglo-American willingness to accept the plan. To date over 8,000 people have been killed in the six-year guerrilla war. In addition to the black Rhodesian refugees in Mozambique, there are large numbers of refugees from the guerrilla war in Zambia and Botswana. The refugees in Botswana are largely self-supporting and live in temporary refugee settlements at Francistown or in the Selebe Pikwe settlement. In 1977, the government of Botswana asked the UNHCR for 800,000 dollars to build a new emergency settlement which would house 2,000 more refugees. The government of Zambia, which hosts some 7,000 refugees from Rhodesia, is now renovating its Maleni refugee center to accomodate new arrivals from Rhodesia.

The exodus of whites from Rhodesia was 12,000 people in 1977, compared to 7,200 in 1976. These whites are emigrating to Western countries rather than staying to face the continued economic decline of Rhodesia, mandatory military service and a dubious future for the privileged white life style. The emigration of white Rhodesians, while relatively small, compared to the number of black refugees who have fled, is increasing monthly. A sharp increase could severely strain the already taxed resources and capacity of major countries of asylum and the various voluntary agencies that aid in resettlement abroad.

The continuing struggle between the Southwest African People's Organization (SWAPO) and South African troops, coupled with the police repression of student political organizers, has led to the flights of hundreds of Namibians to neighboring countries.

The question of Namibia has been on the UN General Assembly Agenda since 1946, when the Assembly refused a South African request to annex the territory. Under the League of Nations, Namibia became a mandated territory and South Africa was given the authority to govern it, and "promote to the utmost, the material and moral wellbeing and social progress of the inhabitants." The UN has charged that South Africa has violated this principle by introducing apartheid into the territory.

In 1966, after 20 years of UN efforts to bring about a change in South Africa's racial policy, the United Nations General Assembly revoked the League of Nations Mandate and placed the territory under UN control, declaring South African occupation of Namibia illegal. A special session of the General Assembly was called in 1967, to set up the Council for South West Africa and later changed the name to Namibia.

Namibia is a territory rich in copper, lead, zinc, uranium and diamonds. Most of the profits are exported as shareholders' dividends and taxes to South Africa; the Africans are demanding at least a portion of that income tax for distribution in Namibia to better the standard of living for the black majority.

For young students exiled for their political activities, the United Nations High Commissioner for Refugees (UNHCR), the Botswana Council of Churches and the International University Exchange Fund (IUEF), provide schooling, and scholarships. The UNHCR has built a secondary and a junior secondary school, each of which accommodates 480 students.

The government of Botswana is also letting Namibian students attend the University of Botswana. The American Friends Service Committee, through the Botswana Council of Churches, UNHCR, and IUEF is now raising funds to assist some students in attending universities in Europe and West Africa. Simlar efforts are being undertaken in Zambia, and in Angola, the UNHCR has provided $100,000 for the restoration of a SWAPO hospital destroyed in an attack.

In South Africa, a wave of "bannings" of black activists, the closing of the liberal press, and the tragic death of Steve Biko while in detention, brought South Africa to the attention of the international community this year. In response, the United Nations passed a resolution banning arms sales to South Africa (supported by the U.S. and the West) and threatened to impose an economic boycott.

One of the most salient symbols of the rising black consciousness in South Africa has been the student strike protesting inferior education for black students. Because of the Soweto violence, many black student leaders have been forced underground, and some have been forced to flee the country because of fear of police repression.

In Botswana, Lesotho, Swaziland, Mozambique and Tanzania, these students are assisted in continuing their education. Involved in the effort are: the Botswana Council of Churches, the Lesotho Christian Council, the IUEF, UNHCR and other voluntary agencies concerned with the education of South Africa's future black leaders.

White professionals are also leaving South Africa. Concerned about the future in racially separated South Africa, they are leaving at the rate of 1,000 a month (in contrast to a net inflow of 2,300 people in 1976). Many go to England or other European countries. As the level of tension in South Africa rises, more whites will undoubtedly choose to emigrate.●

RURAL POLICY INITIATIVES

HON. RICHARD NOLAN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. NOLAN. Mr. Speaker, on March 20, 1978, representatives of the National Association of Towns and Townships and I met with Mr. Stuart Eizenstat, Assistant to the President for Domestic Affairs and Policy. The purpose of this meeting was to discuss the rural policy initiatives of the Carter administration in anticipation of the President's urban policy statement which was subsequently announced on March 27, 1978.

This meeting was successful in that it served to open channels between the White House and Capitol Hill and foster a spirit of cooperation between our respective offices as we move to formulate a significant national policy for rural development in balance with its urban counterpart. In this regard, I would like to take this opportunity to submit for the RECORD the statement of the National Association of Towns and Townships as presented to Mr. Eizenstat:

STATEMENT OF THE NATIONAL ASSOCIATION OF TOWNS AND TOWNSHIPS ON THE CARTER ADMINISTRATION'S PROPOSED NATIONAL URBAN POLICY

"Small towns and rural areas cannot be excluded from any financial aid program devised. To do so would penalize citizens who remain (in such communities)."—Jimmy Carter.

"Although urban areas in this country have serious problems, their problems really pale in comparison to those faced by residents of rural areas. In terms of housing, transportation, energy, jobs, income, and almost any other measurement of economic well-being, rural Americans are worse off than are urban Americans."—Senator Lloyd Bentsen.

"There is always the danger that rural areas will become a residual part of the national geography, receiving only leftovers from an urban strategy."—Academy for Contemporary Problems.

"Is it really so difficult to figure out that the problems of the cities cannot be solved without simultaneously attacking the problems of the rural areas?"—Karl Van Asselt, New England Municipal Center.

INTRODUCTION

The National Association of Towns and Townships (NATaT) is a federation of state organizations representing over 13,000 local governments. The majority of NATaT's members are small (under 50,000 in population), non-metropolitan communities. Considering that over half of all Americans live in such localities, NATaT provides the focus for a vital intergovernmental perspective.

NATIONAL URBAN POLICY: SERIOUS NEEDS EXIST BEYOND METROPOLITAN BOUNDARIES

While there is no question that some of the nation's big cities are having serious problems which demand the attention of our national policy-makers, there can be no doubt that many of the country's smaller communities are also experiencing hard times. Local officials in non-metropolitan townships can attest to the fact that economic and social problems are not limited to the big cities. Rural localities contain twice as many substandard housing units as metropolitan areas. The median income of

non-metropolitan families is almost one-third less than that of metropolitan families. Four-tenths of the nation's elderly live in rural areas, and one-third of them have incomes below poverty level.

Minimal or non-existent infrastructure is also a fundamental problem for many smaller communities. They lack adequate roads and bridges, sewer and water plants, and other basic facilities which are taken for granted in the larger cities. Without a certain minimal level of capital development, citizens of rural areas can never hope to achieve economic well-being.

NATIONAL DEVELOPMENT: THE NEED FOR BALANCE

Balanced national development is an idea whose time has come. Yet, without consideration of small communities, there can be no balance, no equity. To focus exclusively on the plight of the inner city is to ignore the equally serious problems which exist in small towns all over America. To target new dollars or redirect current programs towards the big cities is to overlook the community development needs of thousands of this country's non-metropolitan communities. In short, conditions of deprivation exist in rural America which deserve immediate attention and require special, appropriately scaled solutions.

FEDERAL POLICY: A LACK OF EQUITY

Small towns receive a very limited and disproportionate share of federal grant-in-aid dollars. Since it has been established that a high level of human need exists in rural communities, it must be concluded that non-metro local governments lack the political clout necessary to receive equitable treatment in the federal decision-making process.

The Public Works and HUD Small Communities programs are examples of current federal activities which arbitrarily discriminate against non-metropolitan towns. These programs, and others, employ arbitrary population cut-offs and selection criteria which place heavy emphasis on the absolute number of unemployed represented by a given locality.

During the initial stages of the Urban Policy development process, some officials suggested that current programs such as Revenue Sharing be restructured to target money to the inner cities. Since it has been clearly documented that small towns and rural areas are already receiving a very small share of the federal dollars and are usually forced to compete for scarce discretionary funds, it would be a grave injustice to develop new funding formulas which are even more biased towards urban localities.

If the administration's policy theme of balanced national growth and economic development is to have integrity, the White House must examine and reshape existing programs which arbitrarily place non-metropolitan communities at a disadvantage in the intergovernmental system. It must also ensure that such communities are not considered as an afterthought in the implementation of the so-called urban policy and in the allocation of new dollars.

A NEW ROLE FOR THE STATES: LOCAL GOVERNMENTS MUST BE GIVEN THE LEAD

While the National Association of Towns and Townships supports the concept of a greatly improved state-local partnership for sub-national development, it is concerned about the administration's plans for involving local officials in that process, especially as it relates to non-metropolitan communities.

In the past, there has been a serious void in the policy-making structure of most states in terms of involving and assisting small towns and rural areas. A national development policy must address this problem and ensure that local officials serve in more than an advisory role. Simply encouraging the states to consult with local officials, especially those from rural areas, does not work. A review of the list of participants chosen by state governors to attend the White House Conference on Balanced National Growth and Economic Development is indicative of the problem: only one out of five hundred represented non-metropolitan local government interests.

If a state-local partnership is to produce results, incentives must be created to guarantee participation in state growth planning decisions. Otherwise, a "top-down" process will result and we will continue to see substate development programs dominated by urban interests.

NATIONAL DEVELOPMENT BANK: COMMERCE DEPARTMENT SHOULD HAVE JURISDICTION

If the purpose of the National Development Bank is to attract businesses to depressed areas generally, and not to the big cities exclusively, then the Commerce Department should oversee this important new program. This Department, through its Economic Development Administration, has a long history of experience with depressed communities of all types and is not biased in its approach to community development. HUD, on the other hand, has already expressed its interest in working exclusively with large urban centers; consequently, this department would be unable and perhaps unwilling to conduct a truly national development effort.

If it is to be the centerpiece of this administration's domestic development policy, a financing mechanism of this nature will work best as a function of the Commerce Department.●

NEEDED: A U.S. MARITIME STRATEGY

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. BOB WILSON. Mr. Speaker, the administration's defense budget has been the subject of a great deal of discussion particularly as it addresses the buildup of the Soviets in Central Europe. It emphasizes strengthening our ground forces in Europe and our airlift capability at the same time that it downgrades the mission of our Navy to support such conflicts as may arise outside the NATO arena.

I do not argue with improving our airlift capability, but at the same time, it cannot be ignored that the bulk of resupply or reinforcement must come by sea. Over 90 percent of our resupply effort to Southeast Asia was water-borne, but without an adequate merchant marine and Navy, any major resupply effort will be feeble at best.

In a recent article in Shipmate magazine, Rear Adm. George H. Miller, USN (retired), warns of the consequences of our having an inadequate Navy and merchant marine, and I believe his words would be of great value to all of us.

The article follows:

NEEDED—A U.S. MARITIME STRATEGY

In the history of the more successful—more lasting—civilizations of the past—Greece, Carthage, Rome, Spain, England, to cite a few examples, one notes a common threat. Their early years, the growth years, were characterized by the development of an expanding foreign trade, a trade carried to distant lands by merchant ships. Rival peoples built navies to protect—and disrupt—this trade. Thus the growth phase of these civilizations might be characterized as the maritime phase.

Eventually, as these civilizations stabilized, they began to send armies overseas to maintain stability and protect distant trading markets from intrusion. Getting mired down in overseas land wars bled nations of their wealth and manpower, and decline accelerated.

Navies take on the characteristics of the nations they serve. Growing nations, the traders, had what might be called maritime navies, whose primary concern was protection of shipping and control of the sea-lanes. Civilizations in the affluent, declining stage had what might be called land-war navies, whose primary occupation was to supply and support overseas land wars.

The rapid growth of Soviet foreign trade, along with their merchant marine and navy, is clear evidence that the Soviets understand how trade and maritime strength built many of the most successful and lasting civilizations of the past. The Soviets have carefully avoided committing Soviet forces to overseas land wars. Instead, they use foreign trade and their merchant marine to spearhead expansion, which is proceeding on a scale and at a rate unprecedented in history.

Meanwhile, the United States has thus far proved unable to cope with the maritime strategy of the Soviet Union. Instead, U.S. decision makers seem to occupy themselves with preparing for Soviet armies to storm the ramparts of NATO. But the land attack does not come. The Soviets are busy conquering the world without war. They find it cheaper and safer to conquer foreign trade with merchant ships than to conquer territory with troops.

The fact is that the United States, since World War II, has adopted a land-war strategy, very similar to that adopted by notable civilizations of the past in their declining years.

The U.S. Defense establishment, since passage of the National Security Act of 1947, has been structured primarily for land war. It is based principally on the theory that each of the Armed Services—Army, Air Force and Navy-Marine Corps—must have its share of the budget, its share of the action. So structured, the United States can employ its armed forces only when land war is involved. The United States at present has no maritime alternative to land war.

For those nations which think primarily in terms of land wars, it is easier for budget purposes to plan for short wars than for long ones. The usual procedure is to create a scenario for a land war, select an area where the war could logically occur, assume certain weaponry, together with quantities and capabilities on both sides, and run it through the war-gaming procedure, computerized or otherwise. One comfortable aspect of war-gaming a short land war, or sea war for that matter, is that our side usually wins. People who participate in these exercises usually don't address the uglier possibilities.

Short war planning also creates the rationale for buying missiles, tanks, aircraft and other land-war equipment and for avoiding the purchase of ships, which require longer construction lead-time and more money than land-war weaponry.

The campaigns of World Wars I and II were delayed again and again primarily because of a shortage of merchant ships. The United States embarked on massive emergency shipbuilding programs upon entry into both World War I and World War II.

Many of those ships, however, were not completed before the wars ended. Fortunately, in those days, strong allies held off the opponents while we organized and prepared. Today, the rapid growth of the Soviet Navy and Merchant Marine is clear evidence that the Soviets give high priority to the construction of both navy and merchant ships. Their shipbuildng program also suggests that they are preparing for a long war and do not intend to accommodate to the short war thinking of U.S. planners.

The record of the short war planners is not very good. Something goes wrong; people miscalculate; the opponent does not realize that the war is supposed to be short and fails to surrender according to the war-game scenario. One common characteristic of short war planners is that they almost invariably make a case for more land war forces and weaponry; they rarely make a case for more ships of any kind. A common conclusion among U.S. short war planners has been that we always have enough ships.

The German short war planners were proved wrong in World War I. They were wrong again in World War II. U.S. short war planners were wrong in the Korean war. They were wrong again in the Vietnam war. Those who think in terms of future short wars are probably just as wrong now, unless the U.S. itself plans to surrender according to the scenario.

A protracted war turns primarily into a sea war of attrition, a struggle for world resources, human and material. A sea war turns on who has the ships, on who can load those ships and shepherd them to the strategically and geographically important areas of the world. A sea war means persuading the populations of the world and the resources they control to join the struggle. It is the side with the ships, the side with the ability to keep those ships afloat and moving, the side with the persistence to carry on that usually wins the protracted struggle, a principle which land war strategists historically have seemed unable to comprehend. The nuclear war, hypothesized by today's land war scenarists, looks suspiciously like a warmed-over version of the blitzkreigs of World Wars I and II.

The fact is that since the late 1940s the U.S. has had a tendency to become involved in land wars, wars which have bled America of her treasure and her potential young leaders and competitors, wars which have undermined public confidence in our government's ability to provide for the common defense.

The U.S. Constitution and the U.S. Merchant Marine Act of 1936 do contain language which, if supported by the responsible government officials, provides the means to develop a U.S. maritime strategy alternative to land war.

The Constitution states that the Congress shall provide and maintain a Navy. It goes on to state that Congress shall raise and support armies but no appropriation for this purpose shall be for longer than two years. This raises a question concerning present Defense Department policy of giving higher priority to procurement of land war weaponry than to the procurement of ships.

The Merchant Marine Act of 1936–1970 states that a U.S. Merchant Marine is necessary for national defense and development of U.S. foreign and domestic commerce. The Merchant Marine Act specifies that the United States shall have a Merchant Marine sufficient to carry its domestic water-borne commerce and a substantial portion (interpreted as at least 50 percent) of the foreign waterborne export and import commerce of the United States, and to provide shipping service essential for maintaining the flow of such domestic and foreign waterborne commerce at all times. The Merchant Marine Act goes on to state that the U.S. Merchant Marine shall be capable of serving as a naval and military auxiliary in time of war and national emergency; that it is the policy of the United States to foster development and encourage the maintenance of such a merchant marine.

Under the Merchant Marine Act the Secretary of Commerce is responsible for carrying out the foregoing national policy and for adopting a long-range program for replacements and additions to the American merchant marine. The Act further directs the Secretary of Commerce to cooperate closely with the Secretary of Defense and the Secretary of the Navy on a number of matters concerning the U.S. Merchant Marine.

On the other hand, the National Security Act makes no mention of the Merchant Marine, or of need for cooperation between the Navy and Merchant Marine. The National Security Act makes no provision for development of a national maritime strategy to serve the Nation's interests without resort to land war. But the National Security Act does make the Navy responsible for "prompt and sustained combat incident to operations at sea." The National Security Act also makes the Navy generally responsible for protection of shipping.

Today, the U.S. has only 470 Navy ships and 577 merchant ships, capable of carrying only 6 percent of U.S. export and import trade, only 3 percent of U.S. petroleum imports. By comparison, the Soviet Union has 1919 Navy ships and 2420 merchant ships capable of carrying over 50 percent of Soviet export and import trade. This gives the Soviet Union an overall total of 4339 Navy and merchant ships, as compared to the U.S. total of a little over a thousand, a Soviet superiority of 4 to 1. As an example of how desperately short we are of ships, over 1700 merchant ships served as part of the U.S. Navy in World War II, over 100 of them as auxiliary aircraft carriers.

In World War II, the United States served as the arsenal of democracy. Today, however, the United States must import unprecedented quantities of petroleum and other critical raw materials. Interruption of the inflow of U.S. critical materials in time of war could force our war industries to shut down and could prevent U.S. armed forces from operating overseas. The Soviet Union, on the other hand, is virtually self-sufficient in critical raw materials.

America's post-World War II policy of neglecting shipbuilding and favoring large nuclear retaliation and land war forces has raised the possibility of defeat of the United States. The Soviet nuclear buildup assures destruction of the U.S. in event of a nuclear exchange. At the same time, the Soviet Union avoids a direct attack on areas occupied by U.S. land forces. With U.S. armed forces thus stalemated, the Soviet Union has been free to use its foreign trade and merchant marine assets in an organized campaign to achieve world domination.

Meanwhile, the U.S. has a paralyzing shortage of shipping, with neither plans nor organization capable of rebuilding and marshalling its maritime and foreign trade assets in the national interest.

It is a fact that foreign trade is now and always has been a major factor in a nation's world influence, economic strength and national security. Why is it then that almost any foreign flag ship can participate in U.S. seaborne trade, while foreign air transports can participate in U.S. airborne trade only on a *quid pro quo* basis under agreements negotiated by the U.S. Government? The current practice of squandering America's enormous seaborne foreign trade assets, with scant consideration for the national interest, offers little organized competition to the Soviet campaign of world conquest.

U.S. international efforts over the past three decades have been characterized by rationalized accommodation and retreat. Shall we go on fighting ourselves with the raised-in-America specter of instant nuclear retaliation? Shall we continue to accommodate to Soviet-inspired "wars of national liberation," in Southeast Asia, in the Middle East and Africa, in Central America? Or shall we forge an integrated, no-nonsense political-economic-maritime strategy to compete with Soviet imperialism now?

Land war strategy is contributing to the decline of U.S. world influence, economic strength and public confidence. The most important national security issue confronting the U.S. Government today is how to organize, develop and put into motion a U.S. maritime strategy. If Americans still prefer liberty to bondage, there may yet be time to turn the tide.●

CLEVELAND PHYSICIAN CITES DISPARITIES IN HEALTH CARE BETWEEN WHITES AND NONWHITES

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. STOKES. Mr. Speaker, recently, Dr. Edward L. Wilkerson, one of the most respected and distinguished physicians in Cleveland, Ohio, presented a paper at the Lake Front City Forum on health delivery in the innercity.

In his remarks, Dr. Wilkerson points out numerous disparities in health care delivery between whites and nonwhites, the affluent, and the poor in Cleveland. Mr. Speaker, I was particularly interested in Dr. Wilkerson's statistics since they so closely relate to the findings of the Congressional Budget Office report which I requested on the "Health Differentials Between Whites and Nonwhites in America." Dr. Wilkerson's paper further underscores the need for administrative and legislative initiatives to rectify this distressing situation.

At this time, Mr. Speaker, I submit Dr. Wilkerson's remarks for the RECORD, and I urge my colleagues to give careful consideration to this speech:

HEALTH DELIVERY IN THE INNER CITY

My subject is of vital concern to everyone here this afternoon—as it has to do with a matter of life or death, many Americans feel that health care is an American right although at this time, we are painfully aware that not all Americans are equitably exposed to the presently available health delivery system.

When we take a look at current vital statistics dealing with life expectancy, causes of death, births, and morbidity tables, it is tragically clear that in America today, economics and race are still primary factors in determining the length and quality of life. Let us take a critical look at our own community.

The last census showed the population of Cleveland to be 750,903, with 458,084 white and 292,819 nonwhite (mostly black). In 1976 we had 10,269 births and 7,732 deaths. Leading causes:

1. Heart Disease	3,071
2. Cancer	1,511
3. Cerebral Hemmorhage (Strokes)	628
4. Accidents	296
5. Diseases of Arteries	236
6. Cirrhosis	233
7. Homicide	228

The life expectancy for the Black male is 63.6 years and the white male is 69.4 years (9.1% lower than WM). The life expectancy for the Black female is 72.3 years while for her white counterpart it is 77.2 years (6.8% lower than the WF).

Births: White, 5,325, at a rate of 11.6 per 1,000; black, 4,944, at a rate of 16.9 per 1,000.

Infant Deaths: White, 80 (or 15.0 per 1,000 live births); black, 110 (22.2 per 1,000 live births).

When we look at statistics like the ones I have just given you, we tend not to associate them with ourselves, our family, or our friends. Certainly, we do not attach any economic significance to them.

Well—just for a moment, let us take a close look at the differential between blacks and whites as far as infant mortality is concerned, and project the economic impact on the black community.

The figures show that in 1976 we lost 30 more babies who were born alive than the white community.

Aside from grief, family disruption, the economic loss due to burial costs, their potential income was lost to the family and the community.

If we would assume that each of these babies, when grown, had a 30-year work potential, and if we assumed that each could generate at least $8,000 annually (taking into account the differential between white and black), then we see that the financial loss to the black community just for 1976 was $7,200,000.00!! Or enough money to send 600 people to college for 4 years.

Those of us who are left, if we are truly concerned about our community and our future, must be concerned about the system and quality of health care in the Inner City Area which allows this inequity in our daily life.

The present health delivery system in the Central City is primarily structured around outpatient clinic systems sponsored by hospitals or government funded clinics . . .

There are very few physicians, dentists, and podiatrists in private practice remaining in predominately black communities.

Most of the hospitals, including the V.A. Hospital, Mt. Sinai, St. Lukes, and Cleveland Metropolitan are under the control of or are affiliated with University Hospital and Case Western Reserve Medical School . . . Hough Norwood Clinic and the Kenneth W. Clement Health Center are likewise controlled by or affiliated with the University Hospital Complex.

Unless an inner city resident has a private physician, their health care will most likely be provided by the Clinics or emergency rooms of one of these institutions.

Most of these facilities have full time physicians who supervise the intern and resident staff as well as personally see patients on a private basis. University Hospital has a private office building on Green Road for serving the suburban areas and Mt. Sinai is trying to build a similar facility in an eastern suburb for its full time staff and visiting staff to service their private suburban patients.

It is significant that there are no minority physicians involved in these programs.

Health care is now the 3rd largest industry in the U.S. with an annual expenditure of approximately 150 billion dollars. The Federal Government provides about 50 billion of these dollars using our tax dollars.

Most of these federal dollars flowing into the Cleveland area are controlled and spent by the existing medical complexes.

From this brief overview of the present system, it is apparent that improvements in the quality and availability of responsive health care in the Inner city must evolve from community concern and demands.

To achieve this, the community must be involved in the planning and implementation of all programs designed to bring more and improved health services into our area . . . especially where federal funding is provided.

Secondly, every effort must be made to attract more physicians into private practice in the Inner City. Over the last decade there has been a serious decrease in the number of minority physicians, dentists and podiatrists practicing in the Cleveland area.

Latest figures for Cuyahoga County show that there are 3,857 physicians of whom 61 are Black—representing just over 1% of the physician pool or 1 Black physician for every 4,800 Black persons . . . ideally there should be at least 1 physician for every 7–800 people.

Similarly, there are 1,076 Dentists—50 of whom are black.

And 161 Podiatrists—12 of whom are Black.

To attract these new minority practitioners, the existing health institutions must offer opportunities for full time staff appointments as well as teaching appointments in the medical school.

New methods for rendering health care must be developed and implemented. Toward this end, the HMO movement as exemplified by the Buckeye Health Plan, must be encouraged and promoted.

Health is a national priority . . . and we must get our fair share.

For the sake of our families, our community, and our Race, none of us can afford the luxury of dying before our time.●

"ENERGY: WHERE DID THE CRISIS GO?"

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. MAZZOLI. Mr. Speaker, much has been made of the failure of Congress and the President to enact a national energy plan.

An article in Sunday's edition of the New York Times suggests that the failure to enact a national energy program has not had a deleterious effect on our Nation. As a matter of fact, the delay may well have served a public good.

The following article is well worth our careful attention:

ENERGY: WHERE DID THE CRISIS GO?

(By Steven Rattner)

WASHINGTON.—It is just a year since Jimmy Carter launched his national energy plan, under the banner, "the moral equivalent of war." As it turned out, a more propitious year could have been chosen.

Instead of wrenching shortages to provide a political push, there were surpluses large enough to be embarrassing. Instead of soaring prices, there was stability, and even some decline. The energy plan has faded almost as quickly as the natural gas crisis that had given the plan an early, glorious springboard.

For critics of the plan, the events of the year served as vindication of their proposition that forces already in motion could solve the nation's energy problems.

"The year has shown that without any super package—without any part of it passed—we have been able to conserve energy, reduce oil imports and maintain natural gas production," said John Lichtblau, executive director of the Petroleum Industry Research Foundation.

The Administration has been taking pains, however, to dismiss talk of gluts and price cutting, seeing them as a diversion momentarily hiding the vast energy upheavals it believes must surely lie ahead. Others agree with that view. "I think the whole world two years from now will not look anywhere as good," said an oil industry executive.

Energy Secretary James R. Schlesinger, in an interview last week, endorsed that view. "The fact that you don't have a visible shortage tends to mask the longer-range shortage. The things you cite have been used as an excuse for postponing until tomorrow what we ought to do today."

Among the developments:

The abundance of natural gas this winter, despite unusually cold weather. At the same time, a three-year decline in natural gas production appears to have been halted and several gas utilities are once again accepting new residential customers.

Imports of crude oil from the Organization of Petroleum Exporting Countries are down sharply—nearly 9 percent this year—as a result of new supplies from the North Sea, Alaska and elsewhere. Prices, particularly after adjustment for inflation, are also down.

Coal production rose last year despite the long strike, and industry and utilities have begun to convert to coal in droves. Electric power remains ample, partly as a result of increased nuclear supplies.

Energy consumption and gross national product in the United States formerly increased at almost the same rate. The relationship between the two has been changing and last year, energy growth totaled less than 65 percent of economic growth.

To be sure, not all the signs were hopeful. There were increased indications of production problems in Saudi Arabia and of an inclination among Saudis to limit their oil production. And the dollar plummeted on foreign exchange markets, in part reflecting a European perception that America had failed to deal with its energy problems.

"The long-term things all look worse now than we thought they would," said Alvin L. Alm, Assistant Secretary of Energy Policy.

The principal force behind the self-correction cited by a number of energy experts is higher prices; oil prices are up fivefold since 1973 and natural gas prices have more than tripled during the same period. At the same time, the effect of several pieces of legislation enacted by Congress in the wake of the Arab oil embargo—such as automobile mileage standards—is now beginning to be felt.

Perhaps the most dramatic demonstration of the shift involves natural gas. Hundreds of companies across the Middle West in the winter of 1976–77 lost their gas because of the short supply and residential priority. Hundreds of thousands of workers were temporarily unemployed.

This winter, which was equally cold on a national basis, saw not a single layoff due to gas supply problems. Moreover, the Texas Railroad Commission, which regulates energy production in the state, was forced to order a cutback because of excess supply. Prices in several gas-producing states were extremely weak.

In part, this reflects increased storage by the natural-gas utilities to prepare for any future shortages. In part, it represents widespread efforts by industry to speed conversion to other fuels, including coal.

But it also is indicative of the early effects of quickly rising prices. In 1973, 7,466 wells were drilled in the United States in search of oil and gas. By 1977, the total had climbed to 9,961.

The impact of all this drilling on gas production has become evident. From 1973 to 1976, natural gas production declined by 12 percent but last year it did not decline at all and several companies expect it to rise in 1978.

The improved gas outlook has also led a

number of utilities to accept new customers. New hookups have been tightly restricted for the most part since the early 1970's, when a coming gas shortage became apparent. Last year, about 550,000 new customers were hooked up, according to industry estimates.

"We've always thought there would be plenty of gas available for residential use if we could limit industrial use," said Theodore R. Eck, chief economist of the Standard Oil Company (Indiana).

The oil industry has experienced similar changes. Imports are down 16 percent for the first two months of this year while production is up 7.4 percent, chiefly reflecting the flow of Alaskan oil, which recently topped 1.1 million barrels a day. The upsurge in drilling has also helped oil production. Domestic production not including Alaska has continued to decline, but at a slower rate.

The improved domestic oil picture has actually led to a glut on the West Coast as Alaskan oil arrives by tanker. Crude oil supplies there are more than double year-ago levels and California, which produces nearly a million barrels a day, is warning that some of its wells may be forced to shut down.

Similar conditions pervade Europe. Oil imports hardly grew last year, reflecting weak economies, increased oil production from the North Sea and larger supplies of gas from Northern Europe.

As a result, demand for OPEC oil was down nearly 9 percent during the first two months of this year, to less than 30 million barrels a day. By comparison, OPEC production at its peak in 1973 totaled 31 million barrels a day.

The worldwide glut has in large part been responsible for an increasingly moderate stand on prices by the OPEC cartel. Prices appear to be frozen for 1978 and substantial quantities of oil have been moving at discounts as high as 30 cents a barrel.

To all appearances, supplies of other fuels are equally ample. In spite of the coal strike, coal miners were still able to produce 673 million tons last year, up from 665 million tons a year earlier, according to the National Coal Association. The frantic rush by coal users last fall to increase stockpiles before the strike pushed production in some weeks to 16 million tons a week, an annual rate of 840 million tons.

Moreover, industry and utilities, fearful of an eventual shortfall of oil and gas, appear to be moving of their own accord toward coal. A survey by the National Electric Reliability Council turned up plans by utilities to install 241 coal-fired boilers by 1985, which are expected to consume 400 million tons of coal a year.

Electric power is similarly abundant, partly because of increased nuclear supplies. According to the Atomic Industrial Forum, nuclear power increased its share of total generation by two-tenths of 1 percent last year, to 9 percent. Meanwhile, nuclear generation will nearly triple over the next decade as a result of power plants already under construction.

Perhaps more important is the pronounced shift toward conservation. Once energy consumption and the economy grew in lockstep; now, thanks to higher energy prices, that relationship appears to have been broken, or at least bent.

According to Mr. Lichtblau, the oil industry expert, the energy-to-G.N.P. ratio fell to between 60 and 65 percent last year from 70 percent in 1976.

Another calculation, by Henry S. Rowen, former president of the Rand Corporation, showed that G.N.P., after adjustment for inflation, has grown by 11 percent since 1973, while energy consumption increased by only 3 percent.

"In short," Mr. Rowen told an American Petroleum Institute seminar recently, "we are using 8 percent less energy than we would have if energy consumption had grown proportionately with G.N.P. as it did in the period from 1956 to 1970."

Conservation has taken a variety of forms: Homes have been insulated, industry has switched to more energy-efficient processes, improved airplane engines are coming into use, lights are being turned off.

Some of this conservation is being achieved by legislation. Sharp increases in automobile efficiency—to 27.1 miles a gallon on average by 1985—are expected to send gasoline consumption into decline by the early 1980's. Last year, gasoline demand was up by only 2.4 percent from a year ago, according to the American Petroleum Institute. This has kept gasoline prices essentially unchanged and in the Northeast they are even down by about 2 cents a gallon.

John G. Buckley, vice president of Northeast Petroleum Industries, calculated that 2.7 million homes were insulated in 1976 and six million last year. This year insulation is off to a slower start, Mr. Buckley said, because home owners are waiting for Congress to approve tax credits for the job.

"The market is working," he said. "Prices are high enough to encourage people to do it without tax credits."

Despite all these favorable developments, energy officials insist that the need for a national energy plan has not diminished.

For example, although many nuclear reactors are now under construction, few are on order and a number of energy experts believe it is nearly impossible to win approval today for a new nuclear facility. Similarly, the Administration believes that the potential for industrial coal conversion is not being realized.

Most important, the outlook for world oil supply is cloudy. The official Administration position is that a severe oil shortage will strike in the early 1980's, causing oil prices to double, not including increases to match inflation. Private economists are skeptical of this early date, although they agree that oil supplies are certainly limited.

For example, the Exxon Corporation's domestic subsidiary this year cut its estimate of United States oil imports in 1985 to 11.4 million barrels a day from last year's forecast of 11.7 million barrels a day.

"When exactly the oil crunch is going to strike is one of those incalculables," Schlesinger said, "but you know it's coming."●

ANOTHER EXAMPLE OF REGULATORY OVERKILL

HON. WILLIAM L. ARMSTRONG

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. ARMSTRONG. Mr. Speaker, despite all the rhetoric recently about the need to reduce unnecessary regulations and paperwork, the impact on small business has not changed. And all too often, the absolute literal interpretation of laws Congress passes and the regulations promulgated by various agencies result in ridiculous and unfair situations.

Sometimes people in my home State of Colorado are forced to comply with regulations which have little or no relevance to the climatic and geographical conditions which exist or to the size of the business involved.

Unfortunately, what we often fail to realize is that the business does not pay the costs associated with these inappropriate regulations. That business's customers do. Virtually all costs imposed by Federal regulations are passed on to the consumer. So ill-considered regulations are basically anticonsumer.

The following letter illustrates all too well some of these problems, and I commend it to my colleagues:

ACORN PETROLEUM, INC.,
Colorado Springs, Colo., March 9, 1978.

Hon. WILLIAM L. ARMSTRONG
U.S. House of Representatives,
Washington, D.C.

DEAR MR. ARMSTRONG: Acorn Petroleum, Inc., today paid a $500 fine to the U.S. Environmental Protection Agency for our failure to comply with EPA's Oil Pollution Regulation, 40 CFR 112, at our small bulk plant facility in Colorado Springs as disclosed by EPA inspection on April 15, 1977. Originally EPA assessed a $2,000 civil penalty for our violation, but they mitigated to $500 since we promptly complied with the requirements of 40 CFR 112, and requested such mitigation.

Our compliance consisted of engineering work, legal assistance, excavation, forming and concrete work, tank relocation, plumbing, grading, and back filling at our small five tank, above ground, bulk plant. This work cost us approximately $5,000 plus some sixty hours of managerial time.

The EPA people were polite and businesslike. They are enforcing the law as it presently exists, and we can not blame them for that.

We are deeply troubled that the law is grossly unfair. It imposes much the same requirements on our 60,000 gallon bulk plant as it does on a 100,000,000 gallon facility at Bayonne, New Jersey. By the general applicability section of the rules and regulations it establishes proceedures, etc., ". . . to prevent the discharge of oil from non-transportation-related onshore or offshore facilities into or upon the navigable waters of the United States or adjoining shorelines." This sounds worthwhile, does it not?

The big problem, however, is that the rules and regulations, as promulgated by the agency as directed by the enabling legislation passed by the U.S. Congress and signed by the President, have interpreted navigable waters to include waters in small or even intermittent streams located many hundred miles away from navigable waters.

Come to Colorado Springs and look at Fountain Creek. Except during floods or exceptionally heavy run offs, a person could not even float a kayak in its waters. A good share of the year in the spring, summer, and fall irrigating season, not one drop of its water leaves El Paso County. The stream is completely dammed off in at least a half dozen places and all of the water is diverted during the irrigation season.

This total diversion makes no difference according to EPA regs. Fountain Creek runs into the Arkansas River at Pueblo, Colorado, and the Arkansas River runs thru Eastern Colorado, Kansas, and down into Oklahoma where the Arkansas River has been dredged and locks have been built near Tulsa. The fact that any oil spill which we may suffer would never get some 500 miles down the Arkansas River to where it is navigable is apparently not worthy of mention.

Our company is a small family owned and operated business in existence for twenty years. Our officers do not know the meaning of the forty hour week. We are struggling for our very existence at a time of our lowest profitability in many years. We have never had an oil spill. The $5,500 in costs and fines that we have spent in no way increases the utility or value of our bulk plant. The money spent does not increase our productivity: it can only be considered a monument to government misfeasance.

Small business cannot survive the present onslaught of government rules, regulations, and controls. By the time we take care of our responsibilities to the Department of Energy, the IRS, OSHA, the wage and hour people, EPA, Department of Transportation, Bureau of Census, HEW Social Security regs and to so many other government requirements, we have precious little time left to effectively manage our business.

Now we didn't spend the time and effort necessary to write this letter just to cry the blues and ask for sympathy. You can do something about our problems and those of other small businesses; at the same time you will be doing your country a favor. Here is what we suggest:

(1) Reduce the volume of legislation being passed in our congress; there is so much that it cannot be well done.

(2) Stop passing legislation that is "open-end", that relies on government agencies to promulgate the rules and regulations, publishes them in the Federal Register, holds hearings, then adopts them. We cannot afford a staff person whose only duty is reading the Federal Register and advising us on it. Can you?

(3) Work hard to reduce the role of the federal government and the number of people working for it. In spite of its ever increasing role, it is apparent to any fair minded person that the effectiveness of the federal government in accomplishing good for the country is continuing to rapidly decline.

(4) Address specific inequalities in existent law and work to remove them. Work to remove the "paper load" from individuals and businesses.

(5) Consider the effect of any proposed or pending legislation on the free enterprise system. A free marketplace is still the hope of survival of democracy in this country. Our marketplace is suffering from foundation cracks and settling caused by the burden of government taxes and regulation; too much will cause our marketplace to collapse. This phenomenon warrants everyone's concern. The present state of the stock markets and world currency markets show the vast numbers of people and institutions who are aware of the problem.

Thank you for spending your time reading our letter. We earnestly solicit your help in creating a better climate in our beloved land for the prosperity of business and individuals not only financially, but more freely in pursuit of all worthwhile objectives Give us a chance. The results will be astounding.

Sincerely yours,

KENNETH P. OCHS,
Secretary and Treasurer.●

ANOTHER OPPORTUNITY TO DEFEAT SO-CALLED LABOR LAW REFORM

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. RUDD. Mr. Speaker, currently awaiting consideration by the Senate is S. 2467, which allegedly would reform the National Labor Relations Act.

It would do no such thing. This bill is an ill-advised attempt to disguise special interest legislation for big labor bosses as reform legislation. Here in the House, we had our chance to defeat this legislation, but a majority of our Members unfortunately approved its companion measure, H.R. 8410.

While the issue is now the Senate's, it is certainly far from dead for us in the House. It may not survive Senate debate, but if it is passed by that body it will return to haunt us. We will be called upon to approve or reject the Senate version of the bill, and very possibly to make a decision on a House-Senate conference report. We must therefore keep a close watch on developments in the Senate.

Meanwhile, the American people continue to be deeply concerned about this so-called reform bill. As evidence of this concern in my own State of Arizona is a continuing dialogue in The Phoenix Gazette about this proposed legislation. The most recent letter to the Gazette from Mr. Stephen W. Pogson of the highly respected law firm of Evans, Kitchel, & Jenckes clearly makes some cogent points about this proposal to benefit Big Labor organizers.

I hope that this will serve to remind my colleagues of the fact that we may very well have another opportunity to reject this ill-conceived legislative proposal. I would like to include Mr. Pogson's incisive comments at this point in the RECORD:

[From the Phoenix Gazette, Mar. 27, 1978]

"REFORM" LAW WOULD AID BIG LABOR

(By Stephen W. Pogson)

I would like to respond to Stanley Lubin's "Emphasis" article in the March 7th *Gazette*.

Mr. Lubin attempted to defend Big Labor's so-called labor law "reform" bill, S. 1883, in response to a letter previously printed in your paper from a Mr. Charles Bailey, vice president of the *National Right to Work Committee*.

There are several inaccuracies contained in Mr. Lubin's letter which should not go unchallenged.

First, Mr. Lubin contends that while the bill would "increase the risk faced by employers who illegally resist union organizing campaigns, it will in no way increase any risk faced by workers or employers who legally resist union organization efforts."

One of the primary objectives of S. 1883 is to arm union organizers with strong new legal weapons with which to coerce employers into reorganizing unions without a secret ballot election.

In addition, Section 8 of the bill contains severe new penalty provisions which can be imposed upon any employer who resists union demands.

Ruinous penalties such as debarrment from federal contracts and government-imposed wage settlements would make many employers feel compelled to knuckle under to an agency shop demand in non-Right to Work states, or an irrevocable renewable dues check-off demand in Right to Work states, rather than risk his business by refusing to negotiate away his employees' freedom of choice.

This points up another difficulty with the misnamed "reform" measure—namely, the failure of the bill's authors to clearly define what constitutes a violation of the law.

The question of "bargaining in good faith" is very ill-defined and is ultimately decided on a case by case basis by the National Labor Relations Board (NLRB), a government agency characterized as "an adjunct of organized labor," by news commentator David Brinkley.

Mr. Lubin attempts to refute the assertion made by opponents of S. 1883 that passage of the bill would pave the way for congressional repeal of existing state's Right to Work laws. Mr. Lubin contends that this law (S. 1883) will have nothing to do with repeal of Right to Work laws."

On this point, I defer to AFL–CIO President George Meany, who testified on September 8, 1977 before a congressional committee that speedy enactment of the "reform" bill was "only the first aspect of labor law revision." Pass it quickly, Meany said, "then let's get on to . . . Section 14(b) (of the Taft-Hartley Act)." Repeal of Section 14(b) would take away the right of states, such as Arizona, to enact Right to Work laws.

Mr. Lubin's contention that S. 1883 will not affect state Right to Work laws also contradict statements made by the bill's principle sponsor, Rep. Frank Thompson, D–N.J., who openly admits that the bill is aimed at "doing away with open shop havens (i.e. Right to Work states)."

In his letter, Mr. Lubin demands to know why the National Right to Work Committee has "repeatedly ignored a Supreme Court order requiring the committee to produce in connection with litigation its lists of corporate contributors."

While I am not employed by the National Right to Work Committee, I do know that the Supreme Court has never ordered the committee to reveal its contributors' names, and I am surprised that Mr. Lubin would make such an error in his recitation of the "facts."

I am also surprised at Mr. Lubin's statement that ". . . when the National Right to Work Committee is willing to operate in the public eye, as unions do as a matter of course . . ."

The suggestion that a national citizens' lobby, with more than 1.25 million members, operates in secrecy is almost as preposterous as the notion that unions "tell all" to the public.

It is a well known fact that unions can easily circumvent laws such as those requiring disclosures of contributions to political campaigns. While public interest lobby groups have to report every nickel contributed to candidates. Big Labor lavishes its favored politicians with inestimable (and unreported) "in-kind" contributions using its rank and file dues paying members' compulsory dues to finance its operation.

In conclusion, I find nothing in the facts presented by Mr. Lubin (or any other advocate of the so-called labor law "reform" bill) which substantiates his conclusion that the working people of this country would be well served by this kind of 'reform." Rather, the bill is simply another attempt to disguise special interest legislation as "reform" legislation.●

TAX CREDITS FOR COLLEGE TUITION: SOLUTION OR PLACEBO?

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. DRINAN. Mr. Speaker, as the Rules Committee prepares to debate the circumstances under which the House will consider tax credits for college and vocational school tuition, it is an appropriate time to reflect on the equity and usefulness of this approach to supporting postsecondary education.

In this regard, I highly commend the following critical analysis of college tuition tax credits which was authored by

Thomas J. Reese, a tax attorney affiliated with the citizens group Taxation With Representation, and a contributing editor of America magazine, the National Catholic Weekly.

The article follows:

[From America, Apr. 22, 1978]

TAX CREDITS FOR COLLEGE TUITION: SOLUTION OR PLACEBO?

(By Thomas J. Reese)

The supporters of a college tuition tax credit say that it will alleviate the financial burden of middle-income families who must bear the high costs of putting their children through college, without either the resources of the rich or the aid programs available to the poor. They also argue that the credit will help private colleges and universities. In fact, however, the credit is nothing but a placebo. It will not help the middle class or private education. This is true for a number of reasons.

TUITION COSTS HAVE NOT RISEN DRAMATICALLY

A presupposition in all the arguments in favor of the college tuition tax credit is that educational expenses have risen dramatically. This is simply not true when compared with the relative increase in median family income. Between 1967 and 1976 college charges for tuition, fees, room and board rose about 75 percent. But at the same time median income has increased almost 89 percent. As a result the relative financial burden for putting a student through college is actually less than it was 10 years ago. During the same period Federal appropriations for the major student-aid programs grew 262 percent per full-time-student equivalent. Although most of the appropriations went as aid for lower-income students, the Guaranteed Student Loan Program (G.S.L.P.), which is the primary source of assistance for middle-income families, also grew. G.S.L.P. appropriations rose by 433 percent and the volume of loans grew by 121 percent on a full-time-student equivalent basis. This does not mean that some families might not need help, but it does show that a general tax subsidy to everyone is no more necessary today than it was 10 years ago.

AID TO MIDDLE-INCOME FAMILIES

Another fallacy supporting the credit is the argument that middle-income families are not helped by the current programs. Again this is not true. In fiscal 1977 the Federal Government provided $8.5 billion in student aid in the form of direct outlays and tax expenditures. Students from families with incomes between $10,000 and $20,000, who account for 33 percent of all students, received 36 percent of this total, although they received a smaller share (21 percent) of the $2.3 billion provided under the programs based on need. Middle-income families are, therefore, already getting their fair share of Federal educational aid.

CREDIT HELPS WEALTHY

From the statements of the proponents of the tax credit for college expenses, one would think that the credit will only help middle-income families. But, in fact, 54 percent of the benefits of a $250 nonrefundable credit will go to taxpayers with incomes in excess of $20,000, who make up the richest third of the population. Middle-income families, those with incomes between $10,000 and $20,000, receive only 34 percent of the benefits from the credit. If the college tuition tax credit is aimed at middle-income families, it misses its target.

CREDIT MEANS HIGHER TUITION

One of the major uncertainties of the credit is its effect on tuition costs. Some people argue that the credit will allow colleges to raise their tuitions at a faster rate than they would have otherwise. To the extent that tuition costs are increased, the credit's benefits for taxpayers are reduced as the colleges capture some or all of the benefits through higher charges. If this happens, the tax credit will be an aid to colleges and not to taxpayers.

On the other hand, if one argues that the colleges will not be able to raise their tuitions, then one must also recognize that they will receive no benefits from the credit. Both the colleges and the students cannot enjoy the same benefits. To the extent that one gets the benefits, the other does not.

The only way that both colleges and students could enjoy the same benefits from the credit is if the credit allowed students to go to college who would not have been able to go without the credit. The number of students for whom this is true is so small that a study for the American Council on Education concluded that a tax credit is an inefficient means of promoting access to post-secondary education.

CREDIT HURTS PRIVATE INSTITUTIONS

Many people believe that the college tuition tax credit is especially helpful to private institutions. This is not the case. In fact, a flat credit will hurt private institutions. Although the credit will reduce the absolute cost of attending a private or public institution by an equal amount, the relative price of attending a private institution will be increased.

For example, if it costs $2,000 to attend a private college and $1,000 to attend a public institution, and absolute cost difference is $1,000 and, in relative terms, the private school costs twice as much. A $500 tax credit would reduce the net price of attending these schools to $1,500 and $500, respectively. While the subsidy would not change the absolute cost difference, it would raise the relative price of attending the private institution to three times the price of attending the public institution.

Another way to illustrate the bad effect of the credit on private colleges is to look at its effect on the average cost of attending a private versus a public institution. A tuition tax credit of $250 would reduce a family's total student charges from an average of $3,981 to $3,731, or about 6 percent. However, it would reduce the total student charges of attending an average public institution from $1,882 to $1,632, or by 13 percent. Thus the percentage reduction for public schools would be greater than for private. and the relative cost of attending a private college would increase when compared with the relative price of attending a public college. These changes will induce some students to attend public institutions whose relative price has fallen. This is why the Coalition of Independent College and University Students (COPUS) has called the tuition tax credit the Trojan Horse of independent higher education.

If the goal of the tax-credit supporters is to aid the independent colleges and universities, the credit does not do it. As Joseph A. Califano Jr., Secretary of Health, Education and Welfare, pointed out in analyzing one tax-credit proposal: "Only 30 percent of the benefits would go to families sending their children to private colleges, although they have almost 50 percent of the financial need. . . ." Why should a millionaire sending his child to a low-tuition institution get the same credit as a worker whose child attends an expensive independent college?

TAX CREDITS ADD COMPLEXITY

Tax credits for college educational expenses will complicate the lives of students and their families. It will provide new regulations, new forms, new requirements that they will have to be familiar with in order to benefit from the program. In addition, they will have to figure out how the credit relates to other educational aid programs. Will it reduce their scholarships and eligibility for loans?

Many people claim that the red tape involved in tax gimmicks is less than that involved in direct-expenditure programs. This is only true if the requirements for qualifying for the credit are simpler than for the spending program. In addition, the administrative cost of the program for the Government is less only because the Internal Revenue Service audits less than 3 percent of tax returns. If H.E.W. only checked on less than 3 percent of the students who applied for educational aid, its administrative costs would also be low.

CREDIT MEANS HIGHER TAX RATES

Some conservative supporters of the college tuition tax credit favor any tax credit or deduction that will lower taxes for the middle class because they feel that those taxes are too high. This approach is simplistic. The tax system will raise as much money as Congress determines is necessary no matter how many credits, deductions and exclusions are available. What these gimmicks mean is that tax rates must be higher than necessary. If Congress adopts a college tuition tax credit costing approximately $2 billion in revenue, that will be $2 billion that will be available for generated tax cuts for all taxpayers. Thus, this credit will mean higher taxes for the elderly, for people who have already put their children through college, for childless couples, for single persons, for people in vocational schools, for everyone who does not qualify for the credit.

LOANS HELP MORE THAN CREDITS

The college tuition tax credit is supposed to help families who are burdened by college expenses. They will be more than happy to receive a $250 credit, but it will not help very much those who are really burdened by the cost of education. A credit of $250 provides little relief to students or their families, who now face average tuition costs of $3,300.

College expenses cause a short-term cash flow problem to students and their families, which will be followed with higher earnings by the students or with lower expenses for the family. The best way to deal with a short-term cash-flow problem is with a loan. Loans provide a subsidy larger than could be provided through a tax credit at the same cost to the Government. Some of the cost of these loans can be borne by students when they are earning more after their education is completed; or the cost can be borne by parents whose expenses are reduced when the student is out of school and independent.

Before 1976, eligibility for Federal interest subsidies on Guaranteed Student Loans (G.S.L.P.) was lost when family income reached $15,000. The 1976 amendments lifted this ceiling to $25,000 (equal to about $31,000 of adjusted gross income) and thus expanded the eligibility to about 85 percent of all students. The 1976 amendments also raised from $10,000 to $15,000 the total amount that a student can borrow for undergraduate and graduate training. The 7-percent interest on the G.S.L.P. loans is not payable until a year after the student finishes his education. In addition, there is a National Direct Student Loan (N.D.S.L.) program for which the interest rate is only 3 percent payable beginning nine months after the student finishes school. An expansion of these programs would make much more sense than a new college tuition tax-credit program.

CONCLUSION

Congress should not adopt a college tuition tax credit. Such a program would benefit those with high incomes more than the middle class or the poor. It will require that tax rates be kept artificially high in order

to raise the billions of dollars needed to fund the program. It is questionable if the credit will even benefit families with college students, since colleges may be able to raise tuition charges and thus wipe out any savings to taxpayers. In addition, it is likely that the credit will upset the current balance between private and public higher education in favor of public education. Finally, the credit will add new complexity to an already complex area of educational aid when more help could be given through a fuller funding and simplifying of already existing programs.

[Thomas J. Reese, S.J., a consultant for Tax analysts and advocates, a public-interest law firm based in Washington, D.C., is a contributing editor of America.]●

A LINK TO APARTHEID?

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. STOKES. Mr. Speaker the perplexing question of divestiture of corporate investments in South Africa has long been a bone of contention for both Government officials and business executives. On one hand, many corporations feel that their dollars improve wages and living conditions for the Nation's 21.7 million nonwhites, while on the other hand, it is that very same dollar which continues to support the South African Government's vicious policy of apartheid.

In regard to this subject, Mr. Speaker, I would like to bring to your attention two articles which appeared in a recent edition of a Cleveland publication. Reporter David T. Abbott has interviewed corporate heads in Ohio on their South African policies. I am certain that my colleagues will find these articles to be both interesting and provocative.

Therefore, Mr. Speaker, I submit for the RECORD the following articles which appeared in the Sunday, April 16, 1978, edition of the Cleveland Plain Dealer:

[From the Cleveland Plain Dealer, Apr. 16, 1978]

A LINK TO APARTHEID?—DEBATE GROWS OVER U.S. CORPORATE ROLE

(By David T. Abbott)

When South African police crushed the series of anti-apartheid demonstrations that began nearly two years ago, killing more than 400 black men and women in the process, it is likely that many of the police rode to and from their work in American-made trucks on American-made tires.

It is that kind of participation in the enforcement of South Africa's racist laws that fuels the growing debate over the role of American corporations and banks in South Africa.

About 300 American firms, including 16 in Ohio, have more than $1.5 billion invested in South African subsidiaries and affiliates. About 50 American banks, including at least four from Cleveland, have combined outstanding loans and credits of at least $2 billion in South Africa, much of it with the government, according to U.S. Senate and private reports. In the eyes of an increasing number of churches, universities, unions and other groups, these financial ties to the government are immoral because they strengthen the South African economy and help preserve rule of 4.3 million whites over 21.7 million nonwhites.

These groups contend that loans and investments should stop or even be withdrawn.

Businessmen respond that their contribution to apartheid is insignificant, indirect and unavoidable. More importantly, they argue, their aid to the government is outweighed by corporate efforts to improve the lives of nonwhites.

Those who do not accept the business argument have applied pressure ranging from boycotts to shareholder resolutions. And in recent months they have acquired numerous converts. Among them:

The AFL-CIO demanded in February that American business ties to South Africa be severed.

Citibank of New York City, the nation's second largest bank and the leading overseas lender, announced last month that it will no longer make loans to the South African government.

The Michigan Legislature passed a resolution in February urging President Carter to impose economic sanctions on South Africa and suggested a ban on investment as one option.

Smith College sold $687,728 worth of stock in the Firestone Tire & Rubber Co. last October when Firestone did not adequately explain to the college what it was doing in South Africa.

In a referendum last month, voters in Davis, Calif., urged the city to withdraw its money from banks and corporations that do business in South Africa.

"There is a whole new phase of organizing beginning," said Timothy H. Smith, director of the Interfaith Center on Corporate Responsibility in New York City. "Things are happening so fast it's hard to keep up with them."

Smith's enthusiasm can be misleading, however. Corporations are not rushing to pull out of South Africa. In recent interviews, spokesmen for the 16 Ohio companies expressed their intention to remain in South Africa and to work for what they view as a gradual social change there.

Banks, however, concerned by the economic risk posed by South Africa's increasing political instability, are more receptive to demands that they stop making loans there.

The responses of Ohio corporations to critics' charges that they assist apartheid ranged from thoughtful concern to angry denunciation.

One executive wondered, "At what point do I say, 'I understand the problem but I've got a fiduciary obligation to enhance the equity holdings of the shareholders?' It's so damn complicated."

Less temperate was the response of one Cleveland official who would not talk about the issue unless his name and his company's name were not revealed. He repeatedly referred to South African blacks as illiterate savages and defended segregation, saying, "You can't expect whites to live in the same place as a native with a bone through his nose and carrying a spear, can you?"

In between these two views were several shades of two basic contentions: American investment does more good than harm. And withdrawal would especially hurt blacks through their loss of jobs.

American firms employ about 100,000 workers in South Africa, about 70% of whom are black, according to estimates by the Investor Responsibility Research Center in Washington, D.C.

"The problems there would not be solved by our walking away from them," said Alan Easton, vice president for communications of Addressograph-Multigraph Corp., a company with about 350 employes in South Africa.

Questions about South African investment unsettle some publicists and executives who are concerned about their company's image. One Ohio firm, Timken Co. of Canton, would not discuss the issue at all.

"Because there has been so much misunderstanding of South Africa, we've tended not to get involved in discussions of this type with the general public. That's all I'm going to say," said Donald E. Eagon, a company spokesman.

But most businesses defend their investment primarily in moral, not economic, terms.

"We're helping the country," said Michael O'Connor, manager of community relations for Lubrizol Corp. of Wickliffe. "When we are in a country, we help. There's nothing wrong with helping the country."

Critics agree that American investment helps the country and they condemn it. They say foreign investment and loans help South Africa by providing critically needed capital, technology, trade and taxes. The United States is the second largest foreign investor in South Africa. Great Britain is first.

According to a study by the Congressional Research Service, loans to South Africa have enabled that country to fortify itself against a hostile world. Loans "directly supported the South African government in its desire for greater economic and strategic self-sufficiency," the study reported.

That may be so, companies respond, but to pull out American dollars would set back the cause of South Africa's blacks by putting many of them out of jobs and by removing a force for orderly social change.

"Withdrawal would hurt South Africa in general, but it would hurt the lower racial classes the most," said James Lochridge, an international vice president of Cleveland's Ferro Corp., which makes plastics at its 200-employe plant in South Africa. "They would lose jobs and it would hurt their movement more."

"If they pulled out, sure there would be a lot of unemployed," said Dr. Kenneth Grundy, professor of political science at Case Western Reserve University. "But a lot feel that change can only come from the domestic front, by bringing things to a point of desperation so they take the situation into their own hands."

Grundy also expressed skepticism shared by other critics of the moral terms in which corporations defend their investment.

"Labor in South Africa is cheap," he said. "The government still maintains a fairly stable investment climate. That's why they're there. They aren't altruistic."

"Christ!" retorted one businessman. "We've got money invested down there. We don't want a revolution."

Nevertheless, since the violent uprisings of 1976, several companies have denounced apartheid. And Polaroid Corp. stopped selling its products in South Africa late last year because its distributor secretly broke the company's policy of not selling to the government.

Polaroid adopted that policy in 1971, after a furor over the use of Polaroid pictures in identity passbooks that all black South Africans must carry.

But Polaroid was a small operator in South Africa. Firms with much more to lose have not shown the same willingness to leave. Instead, they point out they have adopted a set of six employment principles drawn up by a Philadelphia minister who is on the board of General Motors Corp.

About 60 firms have signed the list since it was proposed last year by the Rev. Leon H. Sullivan. Principles call for corporations to do such things as desegregate plants, pay equal pay for equal work and train nonwhites for supervisory jobs.

Akron's Firestone and Goodyear Tire &

Rubber Co., two of the largest American investors in South Africa, signed the principles after some initial reluctance.

Goodyear contended the principles should be applied worldwide and not directed just at South Africa. Firestone said it feared that the principles would spark confrontation rather than promote social progress.

For one reason or another, 11 Ohio companies with investments in South Africa have not signed the principles. But they all said they endorse the philosophy the principles embody.

Most firms echoed the words of Goodyear's spokesman, William B. DeMeza, who said, "It's not completely possible to implement all of them overnight. We still must live within the framework of South Africa."

And that's the rub, critics charge.

"The principles are unobjectionable on the surface," said Jennifer Davis, research director of the American Committee on Africa of New York City. "The catch lies in what they exclude. There is no demand for any fundamental change in the structure of apartheid, no demand for black political rights and no commitment to negotiating with black unions."

Smith, of the Interfaith Center on Corporate Responsibility, calls the principles "virtually irrelevant in terms of social change."

"First of all, South Africa even embraces them. And Sullivan's personal position is to support withdrawal if the principles do not result in meaningful change. But he wants more time to test them."

Sen. Dick Cark, D-Iowa, recently concluded after research and testimony before his subcommittee on African affairs that American corporations have not helped weaken apartheid.

"Rather, the net effect of American investment has been to strengthen the economic and military self-sufficiency of South Africa's apartheid regime," Clark wrote in his report.

Smith has helped organize a campaign to make corporations go beyond the Sullivan principles by bringing resolutions on South African investment before stockholders' meetings.

A coalition of colleges and church groups have filed resolutions this year with 23 companies in which they have stock with a combined value of $9.5 million.

Last April, a church-sponsored resolution to make Goodyear close its South African tire-making operation was opposed by management and was overwhelmingly defeated.

Although no major corporations have been willing to go any further than the Sullivan principles, activists have had greater success in their drive to halt bank loans to private enterprise and government agencies in South Africa.

"Citibank's decision to stop loans to the government is sure to accelerate a re-thinking of policy at other banks," Smith predicted.

That view is shared by Stephen E. Wall, vice president of Cleveland's Central National Bank and manager of its international division.

But Wall and spokesmen for National City Bank and the Cleveland Trust Co. said their banks adopted similar policies in the last two years.

Wall said several considerations, including political instability in South Africa, the Carter administration's opposition to apartheid and ethical concerns, prompted Central to stop lending money to the Government.

Wall said Central has about $5 million in outstanding loans in South Africa, some of them to government agencies. He said loans to private concerns in South Africa seeking to import American goods would still be considered, although they would be unlikely.

National City and Cleveland Trust said they no longer make such private loans to South African companies.

"We feel the political situation is really so unstable that it is not wise to put any money in there," said Jerry R. Loth, vice president of Cleveland Trust and deputy manager of the international division. He said the bank has about $3 million in outstanding loans in South Africa.

Union Commerce Bank said it has no policy dealing specifically with South Africa and refused to say if it has any loans there.

Loans to support American exports to South Africa are still possible at Society National Bank, said Albert O. Schupp, senior vice president. Schupp said Society has about $2 million in outstanding loans in South Africa.

Some bankers said such loans would be possible as long as they are legal.

"We deal with U.S. corporations who export goods," explained Roger H. Hippsley, Central's public relations chief. "Who are we to say you can't do business like that when the U.S. government has not said it is wrong? But if the government clamps down, then that is a different matter."

CWRU's Grundy agreed. "The United States government must carry the ball and apply the pressure to force corporations to function with greater conscience. Even if that happens, it may not immediately alter South Africa. But at least it would put us on the side of the angels."

OHIO COMPANIES' STAKES IN SOUTH AFRICA

It's not surprising that the world dominance of Akron-based rubber companies should extend to South Africa. Three of the four major tire manufacturers based in Akron are big investors in the white-ruled country.

Goodyear Tire & Rubber Co., with about 2,600 employees, and Firestone Tire & Rubber Co., with about 2,400, are two of the largest American employers of South Africans.

General Tire & Rubber Co. has no subsidiary in South Africa, but a company spokesman said General owns 26.4 percent of the stock in a company that operates with the same name. General of South Africa, which employs 211 persons, owns another South African rubber producer, Pigott Maskew & Co. Ltd.

Critics of U.S. investment in South Africa have special disdain for Goodyear and Firestone. According to the firms' responses to a survey by a U.S. Senate subcommittee wages they paid in South Africa barely covered basic living expenses.

Both Firestone and Goodyear were intially reluctant to sign a list of fair employment principles, which critics contend are ineffectual to begin with.

But spokesmen for both companies said they have made strides toward improving the lot of nonwhites who work for them.

According to information provided to a Senate subcommittee by the U.S. consulate in South Africa, other Ohio corporations with subsidiaries in South Africa are:

NCR Corp. of Dayton, which markets business machines through seven offices. It has about 800 employees.

Addressograph-Multigraph Corp. of Cleveland, which is moving to Los Angeles this year, employs about 250 South Africans, mostly in sales, the company said.

Hoover Co. of North Canton owns 55 percent of the stock of Hoover Ltd., which is based in Great Britain, the company said. Hoover Ltd. owns the South African subsidiary and controls policies dealing with its 298 employes.

Ferro Corp. of Cleveland, which makes plastics at its plant and employs about 200 persons.

Champion Spark Plug Co. of Toledo has 92 employes.

TRW inc. of Cleveland employs 60 persons in the production of automotive components.

Parker Hannifin Corp. of Cleveland has 54 employes who distribute hydraulic and pneumatic systems.

Lubrizol Corp, of Wickiffe employs 48 South Africans in the production of oil additives.

Timken Co. of Canton makes roller bearings, but the company would not reveal how many South Africans it employs.

Three other Ohio companies hold sizable amounts of stocks in companies operating in South Africa. They are:

Owens-Illinois Inc. of Toledo, which owns 20 percent of Consolidated Glass Works Ltd., which has 6,000 employes.

Owens-Corning Fiberglas Corp. of Toledo, which owns 25.5 percent of Fibre-Glass (South Africa) Ltd., which has 689 employes.

Preformed Line Products Co. of Cleveland, which owns 45 percent of Dulmison Preformed Line Products (South Africa) Ltd. That company employs 83 persons.

One other Ohio company—Ernst & Ernst, the Cleveland accounting firm—operates in South Africa. It has a partnership with a South African accounting firm called Steyn' Douglas & Co. and does work for American investors in South Africa. ●

GIVING UP THE GAME

HON. RICHARD KELLY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. KELLY. Mr. Speaker, within the next few weeks Congress will be called upon to vote on a second Federal bailout for New York City. The first one, the 1975 New York City Seasonal Financing Act was designed and represented to us as a one-time rescue effort. That effort failed to cure the city's financial crisis because vote-hungry politicians refused to take the necessary steps to bring spending in line with what the city could afford by: Cutting wages, reducing welfare payments, removing rent controls, and adopting sound accounting practices.

Despite protestations to the contrary during recent oversight hearings, conducted by the Economic Stabilization Subcommittee, it appears the present administration of New York City is doing little to change the situation. The reported offer by the city of a $600 million wage increase to be funded out of "found" money only serves to stretch the credibility gap.

An editorial, appearing in the April 6 edition of the Wall Street Journal, aptly describes the city's current situation. I commend the article to my colleagues' attention.

The article follows:

Talk about a New York City bankruptcy has seemed unsporting while Mayor Edward Koch is in the middle of make-or-break negotiations with his municipal unions, but the weekend's transit worker settlement may leave no other choice.

Even the city's potential benefactors are coming to realize as much. Congressman William Moorhead, sponsor of the main federal rescue plan for the city's finances, is wisely holding up his bill until he sees how much the city is forced to pay in labor contracts. In spite of Mayor Koch's game assertion there will be "no linkage" between the state's transit settlement and his own negotiations, the ultimate costs are almost certain to destroy Washington's hope that the

city is serious about healing itself. Without some dramatic turn, Congress should recognize that the administration's plan to guarantee New York City bonds would quickly be transformed into a continuing subsidy.

If applied to the 225,000 city workers still negotiating their contract, the terms for the 32,700 transit workers will cost the city more than $900 million for the two-year contract. The municipal unions have already declared they won't accept less. This figure would come on top of the one billion dollar annual deficit the city is already facing for the next four years. This means that the federal government could come through with all the aid the city has been asking; it could take over the local share of welfare costs and nationalize Medicaid to boot; and the city budget would be right back in the hole where it started.

Now Mayor Koch can argue that the transit talks were rigged to frustrate his "hang tough" labor policy, because of former Mayor John Lindsay's irresponsible decision to put the city bus and subway lines under state control. Gov. Hugh Carey, up for reelection, was willing to pay to avoid a strike, and Mayor Koch was limited to the last-minute choice of being the spoiler or the patsy. He chose to be the patsy. With the city's finances at stake, he should have played the spoiler.

Even before the Transit Authority upped the stakes, the city's own talks were reviving the fiscal irresponsibility of the past. The city was offering its workers a $600 million wage increase to be paid from "found" money. This package included the projected year-end "surplus" in the cash account, which isn't a surplus at all but money left over because the city has been slow in paying its bills. Using this already committed money for wage increases is just another form of borrowing.

But the transit settlement raises problems that go far beyond money. At stake is the city's ability to manage its work force. Under Mayor Landsay, the city allowed many traditional prerogatives of management to be incorporated into labor contracts, and this one chance to win them back is slipping away. The "give-back" issue, meaning cost-cutting revisions in existing contracts, is an absolutely essential element of the city's bargaining position, but the Transit Authority capitulated to the union on this point.

The transit contract does say that the second-year wage increase will be paid for by productivity improvements but this provision is, to be blunt, a fraud. The productivity agreements already in effect have been so weakened that only a third of the Transit Authority's current cost-of-living adjustment is being paid for by improved work efficiency.

More broadly, the transit situation is completing the erosion of New York State's controls over city labor contracts. One of the more distressing aspects of the settlement was the apparent readiness of Gov. Carey and Mayor Koch to turn the Emergency Financial Control Board, the city's fiscal monitor, into a rubber stamp. The EFCB has not yet held hearings on the contract, but everyone seems to feel its approval is a foregone conclusion. The precedent means it will take more than just the promise of a continued fiscal monitor to restore investor confidence in New York City.

The transit talks have underlined the fact that the city crisis goes far beyond the question of investor confidence or access to the bond market. New York is in trouble because it can't belance its budget. It has failed to put its house in order, and by now it should be clearer than ever that any federal bond "guarantees" to ease the consequences of this failure are going to be a permanent drain on the national taxpayer.●

TAX "LOOPHOLE" MYTHS

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. HAGEDORN. Mr. Speaker, increasingly the pejorative term "tax loophole" has come to refer to virtually any instance in which the Internal Revenue Code permits individuals to retain any portion of the income which they have earned. As with the term "'tax expenditure," the basic premise seems to be that the entire pool of income earned in this country rightfully belongs to the Government and that it is only through their good graces that individuals are allowed to retain a part of it.

It is this thinking which seems to motivate some of the hostility toward tuition tax credits, and which certainly motivates those who sponsor legislation to require "tax expenditures" to be subject to the formal procedures of the appropriation process.

While some critics might liken it to a defense of "child molesting," Prof. Murray Weidenbaum has some interesting things to say in defense of "tax loopholes" in a recent issue of Nation's Business. Director of the Center for the Study of American Business at Washington University, and a former Assistant Secretary of the Treasury, Dr. Weidenbaum notes:

To sum up, tax expenditures or "loopholes", in the main, are not special benefits to the highest income classes or the product of ingenious accountants or attorneys. The typical tax expenditure primarily benefits middle and lower-income groups.

Nor are the major benefits obtained by engaging in unusual activities. They are received in connection with such prosaic activities as paying state and local taxes, owning a home, and working for a company that provides group insurance and other extra benefits . . .

All in all, tax incentives may in this imperfect world often be the most realistic economic method of strengthening the country.

Following is the complete text of Professor Weidenbaum's statement:

IN DEFENSE OF TAX LOOPHOLES

Tax loopholes is a pejorative term. It implies that some special advantage is gained by certain individuals or groups at the expense of the general public.

And we are told repeatedly that elimination of all tax loopholes would permit a massive reduction in tax rates without any overall decline in revenues.

The implicit trade-off sounds so desirable that we may wonder why the change has never been made. An obvious answer comes quickly to mind: The special interests have prevented it.

Although that rationale may possess some explanatory value, a strong case can be made for these so-called loopholes, based on a broader view of public policy.

A NEED FOR BALANCE

In defending tax loopholes, I would not, of course, defend every raid on the U.S. Treasury. Nor would I support every special provision of the Internal Revenue Code which permits some taxpayers to depart from the basic structure used for taxing income.

As a general proposition, I favor the principle of horizontal equity—equal treatment of taxpayers in similar circumstances. It should be recognized that a cleaner tax code—one with fewer special provisions—could help achieve a greater degree of horizontal equity. At the same time there is room for legitimate quibbling as to who actually are the equals to be treated equally.

The taxpayer who voluntarily contributes a portion of his income to charitable institutions may quite properly be viewed differently than the taxpayer who has an identical income, but who devotes all of it to his personal gratifications. This would seem to be one of the many instances where sensible results are more likely to be achieved by carefully balancing a variety of important considerations than by single-mindedly attempting to pursue just one.

In the main, a tax loophole is not the product of an ingenious attorney or accountant laboriously studying the minutiae of the Internal Revenue Code. Rather, the typical loophole is something deliberately placed in the law by Congress to achieve a public purpose.

To belabor the obvious, the charitable deduction was not inserted in the tax system to provide a windfall for the wealthy, but to foster philanthropy.

AN ACT OF GRACE?

In recent years the term tax expenditures was developed to describe the cost to the government of what have been labeled loopholes. A formal definition is somewhat formidable: "Revenue losses attributable to provisions of the federal tax law which allow a special exclusion, exemption, or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of tax liability."

On the surface, the phrase tax expenditure may seem to be an anomaly. Either something is a tax, or it is an expenditure. The tax expenditure concept, however, is based on the implicit assumption that the state is entitled to as much of the individual's income as it desires. Hence, the individual's claim on his income is secondary. Any reduction in the flow of private income to the public Treasury is viewed as an act of grace by a benevolent sovereign.

And yet a tax expenditure—if the concept is to have any justification—signifies less taking of private funds by the government.

This is a simple but powerful point. In my view, tax expenditures should be seen in the context of the substantial taxes which are paid by individuals and corporations. To tell a person who is paying out more than one third of his income in federal taxes that he is unduly benefiting from some tax expenditure reflects a strange view of tax equity.

IF THERE WERE NONE

From a purely fiscal viewpoint, a dollar less paid in taxes has the same effect on the budget position as a dollar more disbursed by the government. But different consequences may flow from reducing the tax than from increasing the disbursal.

Many tax expenditures, as they are intended to do, increase private spending in certain categories. Therefore, economic conditions are altered. The elimination of the tax expenditures might require offsetting changes in federal spending or in other aspects of the tax system, in order to avoid undesirable effects.

The tax exemption of interest received on state and local bonds is a case in point. On the surface, this exemption appears merely to provide tax relief to the holders of these securities. On that basis, prompt elimination of the exemption is urged in some quarters.

But, in reality, this tax expenditure enables states and localities to issue bonds at lower interest rates than other borrowers can.

The purchasers of these securities would certainly turn to higher-yield issues if the interest on state and local bonds were taxable. Thus, the tax expenditure implicitly

involves a substantial subsidy to the governmental units issuing the securities. In fact, sophisticated proposals to eliminate or to reduce the number of tax-exempt securities call for federal subsidies to state and local governments to offset the higher interest payments they would have to make if their securities were taxable.

THE PUBLIC SPOTLIGHT

Depending on the subsidy level, there could be a net loss or a net gain to the Treasury from the combination of closing the tax exemption loophole and simultaneously enabling state and local governments to continue selling bonds at low interest costs.

While certain tax expenditures, such as the bond interest tax exemption and depletion allowances, have been in the public spotlight, they comprise a relatively small portion of the $95.3 billion of tax expenditures reported by the Treasury Department in fiscal 1976. Most of the $95.3 billion consists of items which many people never think of as loopholes.

One of the largest is the deductibility of mortgage interest and property taxes on owner-occupied residences. This accounts for $8.9 billion of revenue forgone in fiscal 1976.

MIDDLE CLASS BENEFITS MOST

Other significant special provisions include deducting charitable contributions ($5.4 billion of revenue loss to the Treasury), excluding from taxation employer and self-employed contributions to pensions ($8.4 billion) and medical insurance premiums and medical-care programs for employees ($4.5 billion), excluding from taxation Social Security and unemployment benefits ($7 billion), and deducting personal state and local taxes other than those on homes ($8 billion).

The bulk of tax expenditure benefits is received by lower and middle-income taxpayers—an estimated $56.5 billion out of the $95.3 billion in fiscal '76.

Taxpayers in the middle-income category benefit more than any other group. The figures are $38.6 billion for this category in fiscal '76 as compared to $17.9 billion for the lower-income category and $15.9 billion for the upper-income category. Tax expenditure benefits for corporations, it is estimated, came to $22.9 billion.

Several large tax expenditures primarily benefit lower-income taxpayers. Examples include tax exemption for veterans' disability compensation payments ($595 million of revenue forgone in fiscal 1976), Social Security benefits ($2.7 billion), and unemployment benefits ($3.3 billion).

At the same time, of course, several important types of tax expenditures primarily benefit corporations and relatively high-bracket income earners. Examples include the special tax treatment of capital gains ($7.9 billion), the investment credit ($9.5 billion), the exclusion of interest on state and local debt ($4.8 billion), and the excess of percentage over cost depletion ($1.3 billion).

Justifications put forward for special tax provisions are extensive. Objectives cited range from fostering employment and economic growth to supporting worthy private institutions and state and local governments.

PROMOTING INVESTMENT

The special treatment of capital gains, the investment credit, and similar items are justified by the need to promote investment. We should be aware of the obvious: To the extent that the private sector is unable to raise funds to finance economic growth, pressure rises for greater governmental involvement in business affairs.

Surely, in recent years, the federal government has become an important competitor for investment funds. The Treasury's financing of budget deficits plus a growing array of federally owned or federally sponsored credit agencies have obtained one third or more of the funds flowing through the nation's capital markets. Viewed from this perspective, the various tax expenditures devoted to encouraging private investment may merely offset the effects of the government's spending and borrowing activities.

A FORM OF REVENUE-SHARING

The deductibility of state and local taxes furthers the objective of strengthening state and local government through federal sharing of the burden of the taxes levied by these jurisdictions. This can be viewed as an early revenue-sharing effort in the federal system.

Numerous reasons are cited for the tax deductibility of charitable contributions. The private institutions thus supported provide diversity and free choice. They can experiment and enter fields too controversial for government agencies. They often take on responsibilities which otherwise would be financed entirely by tax revenues.

The deductibility of interest paid by individuals on mortgages on owner-occupied homes encourages home ownership, it is pointed out. The deterioration of many central cities in recent years has increased the desirability of such ownership as a means of enhancing family and neighborhood stability.

However, the deductibility of interest on general consumer debt may be more difficult to defend. It is hard to see why the general taxpayer should subsidize families that go into debt to buy a new refrigerator or second car. The interest which individuals receive on their savings is, of course, fully taxable. Perhaps this provision illustrates the tax system's tendency to tilt in favor of consumption rather than saving.

Some personal deductions are really reasonable refinements of gross income that were made to obtain a fair taxable-income base. Cases in point are the deductions of such expenses related to earning income as union dues, child care for working wives, and fees on safe-deposit boxes for securities.

A few corporate tax exemptions—notably those for credit unions and for some of the income of cooperatives—are an aid to nonprofit institutions organized in the corporate form.

WHAT CRITICS SAY

Many special tax expenditures have been attacked as being regressive because they reduce the tax burdens of upper-income taxpayers more than those of lower-income taxpayers. Deductions from income clearly do have that effect—an upper-income taxpayer receives a larger tax reduction than does a lower-income taxpayer for making the same dollar amount of charitable contribution or payment of state and local taxes.

In effect, the government subsidizes 14 percent of the state and local taxes and charitable contributions of the lower-bracket taxpayer when the taxpayer itemizes rather than taking the standard deduction. The government subsidizes 70 percent of these expenditures for taxpayers in the top bracket.

From the viewpoint of achieving public-policy objectives, special tax provisions lack some of the compelling characteristics of direct government expenditures. In typical direct-expenditure programs, the public can have a clearer picture of the flow of federal assistance. Congress can exercise annual control over the size and distribution of benefits, and the financial aid given to private individuals and groups can be weighed against the desirability of government agencies taking direct responsibility for the programs in question.

This idyllic view, however, is not readily reconcilable with the reality of federal budget trends. In recent years relatively uncontrollable expenditure programs such as Social Security pensions, interest on the public debt, and welfare have come to dominate federal spending.

As pointed out earlier, this is not a plea for retention of every special provision in the tax system. It is reasonable to contrast the costs and benefits of various mechanisms for achieving public-policy objectives. Certainly, in some cases, direct expenditures may be a more desirable alternative than tax incentives. In some cases, credit assistance, regulatory programs, or other approaches may be preferable.

The advantages and disadvantages of each mechanism should be weighed, and the most desirable one used to achieve a specific objective, be it encouragement of business investment or discouragement of environmental pollution.

MORE FEDERAL CONTROL

However, the implications of moving from indirect support through the tax system to direct federal expenditure subsidies are profound, especially in the many instances of aid to private and state-local government institutions. Taken literally, as has been suggested by some tax reformers, this move would mean putting private hospitals, orphanages, schools, and similar social service and charitable institutions in the federal budget. The resulting opportunities for federal control over the conduct of these private organizations are obvious.

The choice between tax incentives and direct federal expenditures thus turns out to involve more than selection among technical financing mechanisms. The choice involves altering the balance between public and private power in our society.

ALTERNATIVE TO THE DEDUCTION

Use of the tax incentive route does not require adhering to the tax expenditures now in use. For example, the deduction from taxable income is not the only way in which the tax system can be used to encourage people to spend some of their money in a manner which accords with national interests.

An alternative to the deduction is available—the tax credit, which is a deduction from ultimate tax liability rather than from taxable income. While ordinary deductions are implicitly regressive because of the progressive nature of the personal income tax structure, credits can be more flexible. A credit can be given in terms of a percentage of an expenditure, and a ceiling may be put on the amount of the credit. Moreover, credits can be used by the vast number of low and moderate-income taxpayers who do not itemize individual contributions, but use the standard deduction.

The credit concept is widespread in the corporate tax structure, where its use ranges from encouraging employment of welfare recipients to expanding business plant and equipment. In the individual tax system, credits are now provided for child and dependent-care expenses, retirement income, and political contributions. Suggestions that tax credits replace personal exemptions—the present $750 deduction for each taxpayer and dependent—have been made by President Carter and others.

SAME AT DIFFERENT LEVELS

Although the value of a deductible dollar varies with the taxpayer's bracket, this is not so in the case of a fixed percentage credit. With the credit a given dollar of charitable outlays would generate the same amount of tax saving, regardless of the taxpayer's income level. Of course, upper-bracket taxpayers might make a larger donation and thus qualify for a larger tax benefit in the absolute, but they would receive the same benefit proportionally.

The tax credit mechanism could be important in strengthening the role of voluntary organizations in our national life by

making them more democratic. Because the tax credit would operate to the advantage of lower and moderate-income taxpayers, it could help create a potential new constituency for private institutions, freeing many of them from their present dependence on the wealthier.

Unlike the alternative of direct support through government expenditures, substituting tax credits for personal deductions would be a modest step toward decentralizing decision-making in America and encouraging diversity in the way social objectives are achieved.

A MORE EFFECTIVE APPROACH

The fundamentally adverse impacts of government action on the private sector should never be overlooked in formulating tax policy. The simple elimination of tax expenditures often would leave unfulfilled the objectives they are designed to foster.

A more effective approach to public policy might be to deal with the basic conditions that often prevent private institutions, business and nonprofit alike, from performing their intended functions—conditions that frequently result from the expansion of governmental activities. Dealing with those basic conditions would have the added advantage of avoiding the revenue losses and equity problems that may result from using tax incentives.

It is cavalier, to say the least, for tax reformers to blithely ignore all the adverse impacts of government action on private institutions and then pick on one of the few areas of public policy—tax expenditures—where the public sector tries to undo the damage.

As noted earlier, the tax expenditure mechanism serves a variety of public purposes, ranging from promoting business investment and economic growth to encouraging private, voluntary organizations.

Indeed, the growth of tax expenditures may be viewed as a reaction to the severe obstacles that the expansion of government power and activities have placed in the way of private-sector institutions.

CONCLUSIONS

To sum up, tax expenditures, in the main, are not special benefits to the highest-income classes or the product of ingenious accountants or attorneys. The typical tax expenditure primarily benefits middle and lower-income groups.

Nor are the major benefits obtained by engaging in unusual activities. They are received in connection with such prosaic activities as paying state and local taxes, owning a home, and working for a company that provides group insurance and other extra benefits.

To be sure, not all tax expenditures are of this nature—and not each one needs to be defended. But the entire category should not be condemned.

All in all, tax incentives may, in this imperfect world, often be the most realistic economic method of strengthening the country.

TAFT-HARTLEY AND THE COAL SETTLEMENT

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. GRADISON. Mr. Speaker, now that the coal strike has been settled, and coal production is returning to full capacity, the time is right to assess the consequences of this recordbreaking strike. The 112-day interruption in coal supplies caused considerable hardship in terms of suspended production and lost employment opportunities. In addition, the strike served to raise considerable doubt concerning the feasibility of the administration's commitment to double coal production by 1985.

However, even more importantly, Mr. Speaker, the events of this past winter's strike reflect a disheartening ambivalence on the part of the Government toward the active employment and dutiful enforcement of labor laws constructed to protect our national interests. I would like to call attention at this time to an article which appeared on April 18, 1978, in the Cincinnati Post. I feel this cogent analysis serves well to detail the consequences of this noncommital approach to labor relations. The author, J. Mack Swigert, is a prominent Cincinnati attorney who was instrumental in the drafting of the Taft-Hartley Act:

TAFT-HARTLEY AND THE COAL SETTLEMENT

(By J. Mack Swigert)

Before we wrap up the coal strike and send it off to Memoryville, it might be well to take a goodbye look at what happened.

First of all, who won? That answer is easy. Nobody won. The operators failed to gain the efficient safeguards which seem essential if productivity is to be brought back to at least the levels of a few years ago. The miners won a 12 percent increase and the best contract in their history—but they lost their shirts in the process. Lifetime savings went down the drain and individual miners are in hock to their creditors for a year or so to come. The union treasury has been largely drained. The union itself is a shambles.

As for the public, which was the hostage in the heist—also, no gain. For its inconvenience sustained, and patience exemplified, during one of the coldest winters in history, the public's compensation will be permanently higher energy prices.

Another loser was President Carter, who left the impression of "too little and too late." His credibility on inflation was impaired by his commendation of a 12 percent wage increase, making this a probable new floor for big unions such as the Teamsters.

Possibly the biggest loser was the federal court system. Belatedly, a federal district court judge in Washington was asked to enjoin the strike under Section 206 of the Taft-Hartley law. He did so, but Attorney General Griffin Bell bobbled the service of the injunction and then took no steps to enforce it. A day or so earlier, President Carter, in a television interview, had commended the strikers, expressly reminding them that they had never gotten anything in their lives without "fighting" for it.

Even before the injunction was issued, the media sang a Cassandra chorus of "it won't work." It is not surprising, therefore, that when the restraining order was first issued, there was some delay on the part of the strikers in getting back to their jobs. Some of the union officials cosmetically complied by telling the men to go back to work but others, perhaps sensing administration weakness, arrogantly defied the court.

All complied, however, with that portion of the injunction which directed the parties to resume negotiations immediately in a good faith effort to reach an agreement ending the strike. Agreement was reached within the 10-day period of the restraining order, and a ratification vote was set to take place within a day or so after the date set for the hearing on a preliminary injunction.

Fearful that revelations in an injunction hearing might provide fodder for rabble-rousers and tip the scales against ratification of the critical third agreement, the government asked the judge to extend the restraining order without a public hearing. The judge refused and simply allowed the restraining order to expire.

Unfortunately, in apparent pique, the judge said, "No one is paying any attention to my order anyway." This statement shocked the country and damaged the prestige of federal courts. It sounded as though if a union doesn't choose to obey a federal court order the court will just rescind the order. The ordinary citizen isn't treated quite so considerately. In future strikes, federal judges will have to crack down hard to regain credibility in injunction situations.

But there was a good side to the injunction. It immediately ended the picketing of non-union mines and interference with the distribution of coal by barge, train and truck. One hundred and fifteen non-union mines reopened within a week. A great torrent of coal moved toward the Midwest's generating plants. In fact, distribution swelled to 60 percent of normal. Obviously the strike had become ineffective, so the third contract was ratified. Thus, the Taft-Hartley injunction did help, but not quite as much as if it had been obtained sooner and effectively enforced.

Finally, what of the future?

Non-union mines have proved that they can produce and deliver coal under UMW strike conditions. Big users will want to develop more non-union sources. Conversely, UMW mines appear to be an unreliable source of vital energy. President Carter had hoped that they would become a growing substitute for Arab oil. But now there is a question mark. A good many UMW members, fed up with irrational work stoppages and restrictions, will seek work in non-union mines not plagued by UMW wildcat strikes. The future of that strife-torn union appears bleak.

In view of what has happened, it seems unlikely that President Carter's recent appeal to hold future wage increases to 5.5 percent will be well received by big unions. From the day he intervened in the coal strike, the Secretary of Labor put pressure on the operators to make concessions to the UMW. It was this pressure in part which got the settlement figure up to better than 12 percent.

Few unions are likely to buy the idea that the UMW is a special case. They have seen once again that it's the squeaking wheel which gets the grease and that sweet reason has few rewards. Also, they may have a diminished concern for any 80-day injunction obtained from a federal judge by this particular administration.

Should the law now be amended? I think not. It is the quality of enforcement and not the words of the statute, which must be improved.●

THE CUBAN FOREIGN LEGION IN AFRICA

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. MICHEL. Mr. Speaker, the presence of over 42,000 Cuban fighting troops in Africa is one of the most amazing military and political stories of this decade. From the 25,000 Cubans now in Angola to the handful of Castro's soldiers in such countries as Uganda and Benin and Cape Verde, the Cuban presence is currently a powerful force in African af-

fairs. It is no exaggeration to say that Fidel Castro's decisions to use his troops as a Communist foreign legion in Africa has had more of an effect on developments in that troubled continent than any other factor in recent years.

Bonner Day, senior editor of Air Force Magazine, has written a concise and informative account of this phenomenon. He points out that most experts agree that Castro has sent Cubans to fight in Africa for three reasons: First, the Soviet Union has ordered Castro to do this because Castro owes billions of dollars to Moscow and is now "repaying" his friends—by aiding their geopolitical aims; second, Castro is a dedicated revolutionary and wants to export revolution wherever and whenever he can; and third, Castro enjoys the prestige that comes with winning military ventures.

At this point I want to insert in the RECORD, "The Cubans in Africa," by Bonner Day, from the April 1978 issue of Air Force Magazine.

THE CUBANS IN AFRICA

(Fidel Castro's armed forces—trained and equipped by the USSR—have been organized into a foreign legion bent on waging war far from Cuba's shores.)

The war in Ethiopia has focused the world's attention on Cuba and its military adventures in Africa.

Clearly a tool of the Soviet Union, Cuba nevertheless is making its foreign legions felt from the Algerian desert in the north to the coasts of Mozambique on the southeast edge of Africa.

From an island-bound force of guerrilla-led troops, the Cuban armed forces have become an important military organization to be reckoned with around the world. With continued Soviet support, and in the absence of opposition from the US, the Cubans, under Fidel Castro as commander in chief, are on the move.

In Ethiopia, Cuban troops are in the forefront of the battle for control of the strategic Horn of Africa. Raul Castro, second only to Fidel in Cuba, flew to Ethiopia the first week of January. Within a month, the Ethiopian armed forces, backed by Cuban air and ground forces, launched an offensive against Somali guerrillas, supported by neighboring Somalia, in Ethiopia's Ogaden Province.

An estimated 12,000 Cuban troops were put into the early fighting. Cuban pilots, flying US-built F-5s that were sold to Ethiopia or provided under grant aid prior to 1975 and recently delivered Soviet-built MiG-21s, quickly gained control of the skies in the first days. On the ground, Cuban soldiers armed with Soviet T-54 tanks were sent into the battle.

Assisting the Ethiopians have been several thousand East German and Russian military advisors. Russian ships, according to some reports, shelled Somali troops from the Red Sea. The Russians are reported to have pledged more than $800 million worth of arms and ammunition to Ethiopia, much of it delivered by a major Soviet airlift that began late last year.

But it was the Cubans who provided the most combat troops. Many were brought in from Angola. Others came from Aden in the Arabian Peninsula. As the Ethiopian offensive developed, the question among African diplomats was whether Ethiopia and its allies would be content with recovering its Somali-occupied territory, or would push on into Somalia. Somalia created an enemy in the Soviet Union when it broke relations last fall and ordered Soviet troops out of the Russian sea base and two airfield at Berbera on the Red Sea.

It is in Angola, however, that Cuba has had its biggest success so far. As many as 25,000 Cuban troops and another 6,000 technians have been brought in to prop up the government of Agostinho Neto, in charge following the withdrawal of Portugal from its former colony. Up to 4,000 troops and some Cuban noncombatants have been killed or wounded in the war, which still continues. Wounded Cubans apparently are being sent to East Germany and the Soviet Union in an effort to play down war news in Cuba.

Most of the Cuban troops in Angola are fighting two antigovernment armies that control about one-third of the countryside, but no major cities. The rest of the Cuban forces are engaged in training guerrillas for insurrections in nearby African countries.

CONTINENT-WIDE CAMPAIGN

The Rhodesian government of Ian Smith is a major target of the Cuban forces and the guerrilla movements Castro backs. To the north of Rhodesia are some 400 Cubans in Zambia, charged with supervising the transfer of Soviet-supplied weapons from stockpiles in Angola to the camps of Joshua Nkomo's anti-Rhodesia guerrilla movement. Convoys of Soviet-made military trucks transport weapons and Nkomo guerrillas from training camps in Angola. The whole operation is run by a military team working from the Cuban Embassy in Lusaka, Zambia.

To the east of Rhodesia, up to 1,000 Cubans operate another set of training camps in Mozambique. Some soldiers are trained for the Mozambique government. Others are trained as guerrillas for Robert Mugabe, another black anti-Rhodesian revolutionist.

In Tanzania, the Nyerere government hosts 500 Cubans who are training troops for the Tanzanian government and also are preparing guerrillas to fight in Rhodesia.

In Congo (Brazzaville), there are some 1,000 Cubans. Some are used to support the Agostinho Neto government in Angola.

In Guinea, President Sekou Touré has a permanent garrison of 1,000 Cuban soldiers to keep him in power.

Guinea-Bissau has another garrison of several hundred Cuban troops, mostly military advisors.

In Libya there are 1,000 Cubans. Egypt claims they have been used to fight Egyptian troops in recent border skirmishes.

Cuban soldiers act as advisors to Sierra Leone's Internal Security Unit. About 200 Cuban troops are stationed in the suburbs of the capital, Freetown.

Cubans based in Algeria have been supporting the Polisario Front in the western Sahara region of Morocco and Mauritania. The guerrillas have been fighting government forces of both Mauritania and Morocco, which now claim the territory.

Altogether, there are up to 42,000 Cuban troops in Africa, plus as many as 6,300 doctors and technicians. Other countries that have accepted Cuban troops and advisors include Cape Verde, São Tomé and Principe, Uganda, Equatorial Guinea, and the Malagasy Republic.

The Cuban armed forces have not been working alone. They have been supplied, encouraged, and, when necessary, transported to African battlefields by the Soviet Union.

CUBAN CHALLENGE—U.S. RESPONSE

Why is Castro, who has severe economic problems at home, sending troops to Africa?

United States experts on Cuba give three reasons.

First, the Cubans were ordered to Africa by Moscow. Castro, the beneficiary of billions of dollars of Soviet military and economic aid, could not refuse. Western analysts say there is evidence that Castro is being allowed to repay Moscow for its aid through these military operations, though it is unclear how the payments are calculated.

Second, Latin American experts consider Castro a dedicated revolutionary with a fanatical desire to export communism wherever possible.

Third, Castro enjoys the prestige that comes with a successful military venture. Castro's timely and vital role in helping to power Agostinho Neto, a fellow revolutionary, has whetted his appetite for similar victories.

Says one government expert: "Castro will try to improve his relations with the U.S. and at the same time continue his African adventurism. But if forced to choose, he will turn his back on the U.S. with little hesitation."

The U.S., under both the Ford and Carter Administrations, has limited its response to public criticism for the most part, and held back support of African forces opposing the Cubans.

Many in the present Administration, following the lead of Sen. George McGovern (D-S.D.), want the U.S. to mend its relations with Cuba and restore diplomatic and economic ties. The feeling is that with restored relations, the U.S. can exert more influence on Cuba. Some, such as Ambassador to the U.N. Andrew Young, have gone further, arguing that the Cubans in Africa can be a "stabilizing" force.

Other advisors have warned the President that the Cuban presence, with its Soviet support, represents a dangerous threat to the freedom and independence of African nations, a threat the U.S., as leader of the free world, cannot ignore.

While the debate continues within the Carter Administration, the Cuban invasion of Africa shows no sign of drawing to a close.

From Castro's point of view, the African adventures have to be considered a major success and have returned him, personally, to the center of the world stage after some frustrating setbacks.

CASTRO'S NEW STRATEGY

After his takeover in 1959, Castro focused his attention first on consolidating his hold on Cuba, and later on exporting revolution to Bolivia, Venezuela, Guatemala, and other Latin American countries.

There has been a Cuban military presence in Congo (Brazzaville) since the mid-1960s, and for years Castro has flirted with the radical leaders in Algeria and Libya. But his main early efforts, assisted by the Soviet Union, were in Latin America.

Then, after the death of Ernesto (Ché) Guevara in Bolivia in 1967, Cuban attempts to export revolution seemed to diminish in Latin America. In Cuba, economic problems increased and the people continued to suffer food, clothing, and other shortages.

Shortly after Ché's death, Moscow stepped in to take a stronger hand in Cuban military and foreign affairs. In 1970, the Cuban armed forces were reorganized along Soviet lines. Under the direction of Soviet advisors, the large standing army was cut forty percent in size, discipline in the reserves was tightened, training was improved, and equipment was modernized with the addition of the latest in Soviet tanks and planes. Cane-cutting duties, once a major occupation of the Cuban Army, were transferred to the newly created Youth Labor Army, and regular soldiers were freed to concentrate on their military jobs.

At about the same time, Castro, apparently under Soviet guidance, adopted a new strategy for exporting revolution. In Latin America, his earlier attempts to support guerrilla movements had been made without the backing of neighboring countries that might have been able to provide sanctuaries.

In Africa, however, Castro won invitations to several countries and the host countries in turn have been used as sanctuaries for supporting guerrillas.

Congo (Brazzaville), for example, was a sanctuary for Cubans and African guerrillas fighting in Angola, and now Angola is a sanctuary for Cuban efforts against Rhodesia, Namibia, and Somalia.

The strategy's success so far has made Castro a popular revolutionary in Africa, and given him new confidence. In response to questions about renewing diplomatic relations with the US, Castro has said:

"Our relations with Africa—that we cannot discuss, that we cannot negotiate. . . . It has nothing to do with the United States."

Whether the US can continue to stand aside militarily while Cuba and the Soviet Union increase their hold in Africa is a question the Carter Administration and Congress will address in the months ahead.

What is sure is that the Cuban armed forces have come of age. Their invasion of Africa, and the subsequent victories, pose a danger much larger than numerical strength would suggest.

WHERE THE CUBANS ARE IN AFRICA

Algeria—35 technicians.
Cape Verde—15 technicians.
Guinea-Bissau—200 soldiers.
Sierra Leone—200 soldiers.
Guinea—1,000 soldiers.
Benin—20 soldiers.
Sao Tome and Principe—100 technicians.
Equatorial Guinea—500 soldiers.
Congo (Brazzaville)—1,000 soldiers, 200 technicians.
Angola—25,000 soldiers, 6,000 technicians.
Libya—1,000 soldiers.
Ethiopia—12,000 soldiers.
Uganda—25 soldiers.
Tanzania—500 soldiers.
Zambia—400 soldiers.
Malagasy Republic—30 soldiers.
Mozambique—1,000 soldiers.●

CONGRESSMAN WHALEN ANNOUNCES THIRD OHIO DISTRICT POLL RESULTS

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. WHALEN. Mr. Speaker, I am pleased to insert at this point in the RECORD the results of my 12th and final survey of residents of the Third Ohio District.

The replies totaled slightly more than 14,500 at the time the tabulation was done. While that figure is down somewhat from the last few years' returns, it is, nonetheless, a significant number and reflects the generally high level of interest which prevails in the greater Dayton, Ohio.

The questions posed this year covered a variety of areas with emphasis on the subject of tax reform.

For the information of my colleagues, Mr. Speaker, I list herewith the results of my survey expressed in percentages rounded to the nearest 10th of a percent.

(1) Should the Senate ratify the Panama Canal Treaties? Yes, 34.7; no, 47.7; undecided, 17.6.

(2) Should Congress impose gas rationing to conserve energy and reduce our balance of payments deficits? Yes, 25.6; no, 59.9; undecided, 14.5.

(3) Should Congress create a Consumer Protection Agency? Yes, 56.2; no, 36.7; undecided, 7.1.

(4) Should Congress establish a tax return "check-off" of $1.00 to finance House and Senate general election campaigns aimed at minimizing the influence of special interest groups? Yes, 60.6; no, 34.3; undecided, 5.1.

(5) Should Congress authorize payment of Medicare funds to the poor for the cost of abortions? Yes, 37.1; no, 53.5; undecided, 9.4.

(6) Should Congress extend the deadline (March 29, 1979) for state ratification of the Equal Rights Constitutional Amendment? Yes, 35.2; no, 57.7; undecided, 7.1.

(7) Should Congress enact a Tax Reform Law which includes:

(a) Elimination of deductions for mortgage payments? Yes, 9.5; no, 85.9; undecided, 4.6.

(b) Elimination of deduction for state gasoline tax payments? Yes, 19.2; no, 76.8; undecided 4.0.

(c) Elimination of present exemption for state and local government bond interest received? Yes, 29.6; no, 56.4; undecided, 14.0.

(d) Elimination of the business luncheon deduction? Yes, 61.1; no, 35.1; undecided, 3.8.●

DICKINSON'S BILL TO HELP MILITARY AIR TRAFFIC CONTROLLERS

HON. WILLIAM L. DICKINSON

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 20, 1978

● Mr. DICKINSON. Mr. Speaker, I am pleased to report that I, along with Mr. Jerry Byrd, Data Systems officer, Cairns Army Radar Approach Control, Fort Rucker, Ala., and officials from the Administration, Department of Defense, and the Civil Service Commission, testified before the House Subcommittee on Compensation and Employee Benefits in support of H.R. 8503, on April 17.

This legislation, which I have sponsored, would give civilian air traffic controllers at the Department of Defense the same rights and benefits with regard to retirement and job retraining that were accorded air traffic controllers of the Federal Aviation Agency at the Department of Transportation under Public Law 92–297 which was enacted on May 6, 1972.

Mr. Carl Clewlow, Deputy Assistant Secretary of Defense for Civilian Personnel Policy, testifying in support of the bill said:

Recent studies conducted by the Civil Service Commission and the Department of the Army have shown that civilian air traffic controller positions of the Department of Defense have duties, responsibilities, and qualification requirements which are substantially similar to those of Department of Transportation air traffic controller positions.

He concluded that in the interest of equity, Department of Defense civilian air traffic controllers should be treated the same as controllers in the Department of Transportation.

This is the same position I have held for the past 5½ years, and am gratified to report our agreement on this important issue.

This bill, I believe, is simply a matter of providing equity. The Congress has recognized the special problems encountered by the 17,000 FAA air traffic controllers and the need for a legislative remedy. The 200 DOD air traffic controllers have the same physical and mental stresses as the FAA controllers and ought to be accorded the same treatment under the law.

I was very pleased with the gracious and courteous reception from my distinguished colleague who chairs the subcommittee, the Honorable GLADYS N. SPELLMAN of Maryland. It was especially gratifying to hear her indicate that she was in agreement with the purposes of my bill. I am very hopeful that her subcommittee and the full Post Office and Civil Service Committee will act favorably on this bill so that it can be brought before the House for consideration.

I am very pleased to present the following statement by Mr. Jerry Byrd on behalf of the DOD air traffic controllers:

STATEMENT BY JERRY BYRD

Most Honorable Chair, Honored Subcommittee members, Honorable Congressman Dickinson, Distinguished Counsel, for me to be here today is an example of the American dream come true. For I come to you from the grassroots level of government, appealing to your sense of fairness and to your conscience, as the representative of the civilian air traffic controllers at Fort Rucker, Alabama, and also as the unofficial voice of approximately 200 Department of Defense controllers—who—possibly through oversight, as much as any other reason, have undeniably been discriminated against by not being included under the provisions of P.L. 92–297. This hearing is what democracy is all about—and I am extremely pleased and proud to be here.

At the outset I would like to make it clear that my views and comments have been developed by my own research, as well as the research of others, and they are influenced by knowledge and experience gained in over 22 years of government service in the field of air traffic control.

These opinions may or may not reflect the position of my employer—the Department of Army or the Department of Defense—for I am appearing here at the invitation of Congressman Dickinson, simply as a private citizen, on my own time, but with an avowed purpose of doing all within my power to convince you of the critical and legitimate need for this legislation.

This is not a matter of providing Public Law 92–297 benefits to DOD controllers simply because FAA controllers are covered—but rather because there is a crying need for the DOD controllers to be covered. The Department of Army Report on the Study of the Profession, completed in August of 1977 documents and affirms this need.

I do not speak to you as a layman, but rather as a professional air traffic controller with experience in many types of facilities, at all levels of operation—from a basic nonradar tower controller, to a radar controller, to a supervisor, and finally to the staff position which I now occupy in the U.S. Army's busiest air traffic control facility.

I do speak as one who has personally experienced the mental and physical strain of controlling aircraft in and out of busy airports; as one who has experienced the stress of staying on the radar scope or in the tower

for long periods of time without a break; as one who has been confronted with the necessity of making successive decisions carrying life and death consequences—where the standard is always perfection; and finally as one who has experienced the day-in-day-out wear and tear on the individual and the disruption of a normal family life and social relationships, brought on by frequently changing shift requirements.

I also speak as one who has seen controllers break down and weep, on the job, as the result of the intense pressure and constant demand to speed the flow of air traffic—knowing full-well that the impending rush of air traffic will exceed his reasonable capacity, but also knowing that he will operate at the limits of his capabilities, on the brink of human disaster, for as long as necessary.

I've seen a controller get up from hours at a busy radar scope, walk to a wall and stand with his face only inches away, staring blankly at nothing, and unconsciously remove his necktie—and not realize what he is doing!

I have seen the most confident, even-mannered, self-possessed and calm spoken controller turn into a growling, irritable, irascible controller—who snaps at other controllers and pilots as well, as the intense control pressure builds.

I have also seen the most boring, tedious air traffic situation change in a twinkling to the most tense, harrowing and grueling contest between man, machine and time. As a controller and a pilot lock hands in a frightening effort to stave off an impending disaster in an emergency situation. And I have seen man lose.

Don't let anyone try to tell you that the DOD air traffic controllers job is any different from the FAA controllers job—it's not—and the Department of Army study completed in August of 1977 proves it. Who would know best whether there was any difference between DOD and FAA controller duties and responsibilities but a controller who had worked for both! Section III, page 22, of the Report which I have submitted to you gives the result of just such a questionnaire. 100% of those surveyed believe that there is absolutely no difference between them.

Surely these demands of the job are present, in one degree or another, in some other jobs. Yet, as pointed out in a report prepared for the FAA in 1970 by a blue-ribbon study committee, at the direction of the Senate Post Office and Civil Service Committee, "the controller work force is unhappily distinctive in the concentration of such demands." An accompanying report by Senator Fong contained an even stronger statement. "The nature of air traffic controller service is simply too great a strain on the mental and physical capabilities of a human being to stay on the job until attaining age 55 or 60."

I sincerely hope that this Committee will not consider my motive for testifying as self-serving—for this is certainly not the case. Since 1973 I have occupied a staff position which precludes my being covered by the proposed amendment. I am, however, prejudiced in my support of the DOD controllers need and right to fair and equitable treatment under the law.

Another extremely compelling reason for including DOD controllers under the provision of Public Law 92-297 is that some major insurance companies will not "write" disability income protection for air traffic controllers solely due to their occupation. Page 29 of the Report which I have presented to this Subcommittee contains a copy of a letter one of our controllers received from the Prudential Insurance Company. I quote from the letter: "Our underwriting rules prohibit us from considering Air Traffic Controllers for disability pay coverage. Please be assured that no adverse medical information was received and that your application was declined solely due to your occupation."

If an employee of the Federal government cannot obtain necessary insurance to protect his income because of the inherent debilitating aspects of the occupation, then surely the federal government has an obligation to provide appropriate protection. P.L. 92-297 affords this protection.

Unquestionably, there exists a precedent for providing P.L. 92-297 benefits to air traffic controllers staffing facilities located at military installations. In fact, the FAA itself staffs at least 21 air traffic control facilities located on military installations. Figure 3, page 31 of my Report lists these facilities.

It is particularly interesting to note that one of these facilities, Kwajalein ATCT, is actually located at an Army installation. Of this list only four exceed the annual instrument operations count at Fort Rucker, Alabama Whereas all of the FAA controllers at these facilities are covered under the provisions of Public Law 92-297. It is untenable that our government would knowingly continue the discriminatory practice of providing Public Law 92-297 benefits to FAA controllers at military installations and not providing them to DOD controllers at identical facilities.

In conclusion, this committee holds the fate of a relatively miniscule number of DOD controllers in its hands. These controllers have long gone overlooked because their small number does not give them any political "clout"; because they do not have the powerful voice of the FAA, or the representation of a national labor union. But their need is real—it is irrefutably documented and unquestionably justified. Any objections presented to this Committee will be illusory at best. The case of the DOD controller cannot be assailed on the basis of moral or ethical considerations; it cannot be attacked on the basis that the need is not documented; it cannot be attacked on the basis that the duties and responsibilities of the DOD controller differ from those of his counterpart. It cannot be said that the DOD controller's job is easier than the FAA controllers; it cannot be said that he is not subject to the same psychological and physiological debilities as the FAA controller. The DOD study completed by the Department of Army in August of 1977 affirms everything that I have said and unequivocably recommends that the DOD controller be covered by the law.●

HOUSE OF REPRESENTATIVES—*Monday, April 24, 1978*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

*I am the Lord your God * * * who leads you in the way you should go.*—Isaiah 48: 17.

Eternal Father, the unfailing refuge of all who put their trust in Thee and the unfaltering strength of those who turn to Thee for help, breathe Thy spirit upon us as we at the beginning of another week bow at the altar of prayer. We bring our restless hearts to the refreshing springs of Thy renewing grace. Guide us through the duties of these disturbing days that we may make wise decisions, speak sound words, and live good lives. Together may we cultivate the flowers of understanding and good will which climb over all dividing walls and make the nations one in spirit, one in purpose, and one in friendliness of mind and heart.

In Thy holy name we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On March 21, 1978:

H.R. 8803. An act to amend the National Trails Act, and for other purposes.

On March 27, 1978:

H.J. Res. 715. Joint resolution proclaiming May 3, 1978, "Sun Day";

H.R. 1432. An act for the relief of Mrs. Desolina Sciulli;

H.R. 1939. An act for the relief of Meda Abilay Florin;

H.R. 2761. An act for the relief of Su-Huan Choe;

H.R. 3081. An act for the relief of Mrs. Chong Sun Yi Rauch;

H.R. 3813. An act to amend the Act of October 2, 1968, an act to establish a Redwood National Park in the State of California, and for other purposes

H.R. 4401. An act for the relief of Kwi Sok Buckingham (nee Kim);

H.R. 6975. An act to amend title 5, United States Code, to provide that hearing examiners shall be known as administrative law judges, and to increase the number of such positions which the Civil Service Commission may establish and place at GS-16 of the General Schedule; and

H.R. 11518. An act to extend the existing temporary debt limit.

On April 4, 1978:

H.J. Res. 796. Joint resolution making an urgent supplemental appropriation for disaster relief for the fiscal year ending September 30, 1978; and

H.R. 10982. An act to rescind certain budget authority contained in the message of the President of January 27, 1978 (H. Doc. 95-285), transmitted pursuant to the Impoundment Control Act of 1954.

On April 6, 1978:

H.R. 5383. An act to amend the Age Discrimination in Employment Act of 1967 to extend the age group of employees who are protected by the provisions of such act, and for other purposes.

On April 7, 1978:

H.R. 9169. An act to amend title XI of the Merchant Marine Act, 1936, to permit the

guarantee of obligations for financing fishing vessels in an amount not exceeding 87½ per centum of the actual or depreciated actual cost of each vessel; and

H.R. 11055. An act relating to the year for including in income certain payments under the Agricultural Act of 1949 received in 1978 but attributable to 1977, and to extend for 1 year the existing treatment of State legislators' travel expenses away from home.

On April 17, 1978:

H.J. Res. 770. Joint resolution to authorize and request the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A.";

H.R. 2960. An act to authorize the Secretary of the Interior to memorialize the 56 signers of the Declaration of Independence in Constitution Gardens in the District of Columbia;

H.R. 5981. An act to amend the American Folklife Preservation Act to extend the authorizations of appropriations contained in such act; and

H.R. 8358. An act to amend title 44, United States Code, to provide for the designation of libraries of accredited law schools as depository libraries of Government publications.

On April 18, 1978:

H.R. 2540. An act pertaining to the inheritance of trust or restricted lands on the Umatilla Indian Reservation.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill and joint resolution of the following titles, in which the concurrence of the House is requested:

S. 1566. An act to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information; and

S.J. Res. 128. Joint resolution designating July 1, 1978, as "Free Enterprise Day."

AMERICAN PRESENCE NEEDED AT WORLD WAR I MILITARY CEMETERIES OVERSEAS

(Mr. HILLIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HILLIS. Mr. Speaker, I have just learned that in an attempt to improve our balance of payments, President Carter is considering a further reduction in overseas personnel assigned to the American Battle Monuments Commission—the need for American superintendents at our World War I military cemeteries overseas is again being questioned.

I am strongly opposed to the use of foreign personnel as superintendents or assistant superintendents at the permanent American military cemetery memorials in foreign countries. The men and women interred in these cemeteries gave their lives for their country. I believe the least we can do is to have an American present at these cemeteries to insure their resting place is maintained properly, to greet relatives and escort them to the gravesite, and to demonstrate to all by their presence that our country truly cares. It is my firm belief these shrines and the American superintendents who operate them generate more goodwill within the areas they are located than any other U.S. governmental activity overseas.

There are also other important reasons for not using foreign superintendents. The superintendents of our World War I cemetery memorials administer annual budgets averaging $180,000 and are responsible for property, equipment, and structures with an average value of $2,700,000. These shrines for the most part are located in rural areas some distance from the field office. Consequently, they receive little direct supervision. I believe such monetary and supervisory responsibilities should be entrusted to American personnel.

I would, therefore, favor legislation to amend the ABMC's enabling legislation to provide that superintendents and assistant superintendents at their permanent American military cemeteries overseas shall always be U.S. citizens.

PERMISSION FOR SUBCOMMITTEE ON INVESTIGATIONS AND REVIEW OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO SIT DURING 5-MINUTE RULE TODAY

Mr. CORNWELL. Mr. Speaker, I ask unanimous consent that the Subcommittee on Investigations and Review of the Committee on Public Works and Transportation be permitted to meet this afternoon during the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 11504, AGRICULTURAL CREDIT ACT OF 1978

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1140 and ask unanimous consent for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1140

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11504) to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider, clause 7, rule XVI to the contrary notwithstanding, the amendment printed in the CONGRESSIONAL RECORD of April 19, 1978, by Representative Jones of Tennessee. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from California, Mr. SISK, is recognized for 1 hour.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA). Pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1140 provides for the consideration of the bill, H.R. 11504, the Agricultural Credit Act of 1978.

This is a simple, open rule, allowing 1 hour of general debate. The time is to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture.

The rule also provides one waiver. An amendment to be offered by Representative JONES of Tennessee and printed in the CONGRESIONAL RECORD of April 19, 1978, is specifically made in order and points of order pursuant to clause 7 of rule XVI, the germaneness rule, are waived.

Although the amendment deals with payments to farmers for emergency conservation measures, an area of great economic concern to farmers hard-pressed by drought and floods, there was concern that it would not be germane to the bill since the program category is not included under the statutes amended by the bill. Consequently, the waiver was granted so that the amendment could be considered.

Mr. Speaker, the Agricultural Credit Act of 1978 is of vital interest to farmers. All of us have become actutely aware over the past few months of the distress in which farmers view their economic situation. The anger and frustration which they expressed about their financial condition is certainly not without substantiation. Net farm income has fallen from $33 billion in 1973 to $20 billion in 1977. Their indebtedness is staggering in many instances. Nationally, farmers' ratio of debt to income has more than doubled in the past 4 years, increasing from 218 percent in 1973 to 503 percent in 1977. Obviously, some measure of Federal assistance must be forthcoming or the Nation faces the prospect of thousands of farmers being forced off their land. Such events would have long-term effects on our country both economically and socially.

The bill seeks to meet the needs of farmers and ranchers by updating the lending authority of the Farmers Home Administration and by providing a short-term emergency loan program.

The levels for individual farm operating and farmownership loans would be increased to reflect the costs of modern-day farming. Eligibility for these loans would be expanded. A special program would be established for low-income small family farmers to provide low interest rates for farmownership and operating loans. The bill also changes FmHA renewal provisions to allow consolidation and refinancing of loans. Interest rates on emergency disaster loans are adjusted.

The bill also provides an emergency loan program to be extended through 1979 to help farmers meet the immediate financial crunch. Insured and guaranteed loans would be available to refinance existing debt for farmland and operating expenses incurred after January 1, 1973, and before the enactment of the

bill. Operating loans would be available for essential needs. Family farms would be given preference under this program, and the farmers would be required to show that they could not obtain credit without the assistance of the program. The program would be authorized funding for $2 billion in fiscal year 1978 and $4 billion in fiscal year 1979.

In addition, the bill extends the Emergency Livestock Credit Act which would expire on September 30, 1978.

Mr. Speaker, H.R. 11504 represents a reasonable and rational approach to the crisis facing our Nation's farmers. It does not include everything demanded by our most vocal farm groups. Like most legislation, it is a compromise between the competing demands of different sectors of our economy and society. This bill should help avert wholesale bankruptcies in our agricultural communities. It is legislation desperately needed by our farmers and ranchers. This bill, however, is not something just for the farmers. It is a bill for consumers, too, for they are the ultimate losers when farmers are forced out of business. When commodities become scarce, as they must eventually as the farm population dwindles, the consumer will pay the price at his grocery checkout counter.

Mr. Speaker, I urge my colleagues to adopt House Resolution 1140 so that we may proceed to the consideration of H.R. 11504, the Agricultural Credit Act of 1978.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this rule provides 1 hour of general debate for the consideration of H.R. 11504, the Agricultural Credit Act of 1978. The bill will be open to all germane amendments.

In addition, the rule makes it in order to consider a nongermane amendment to be printed in the CONGRESSIONAL RECORD of April 19, 1978, by the gentleman from Tennessee (Mr. JONES). This amendment would authorize funds for the emergency conservation measures program.

Mr. Speaker, the purpose of H.R. 11504 is to revise and update the traditional credit programs of the Farmers Home Administration and provide a short-term emergency loan program for farmers and ranchers in the United States.

Mr. Speaker, the Congressional Budget Office has estimated that this bill, excluding the water and waste facility grants, will result in direct outlays of $24 million in fiscal year 1978, and net cost savings to the Government for subsequent fiscal years. The cost savings would be $13 million in fiscal year 1979, $52 million in fiscal year 1980, $36 million in fiscal year 1981, and $46 million in fiscal year 1982. The cost savings will result from a reduction of interest subsidies on farm loan programs. Net outlays in fiscal year 1978 result from economic emergency insured loans made by Farmers Home Administration in that period, but resold to the public after the end of the fiscal year.

In addition, the cost of the water and waste facility grant program would be $8 million in fiscal year 1979, $31 million in fiscal year 1980, $66 million in fiscal year 1981, $91 million in fiscal year 1982, and $100 million in fiscal year 1983.

Mr. Speaker, I support the rule and the bill and urge the passage of both.

Mr. Speaker, I reserve the remainder of my time.

GENERAL LEAVE

Mr. SISK. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Resolution 1140.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. SISK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 11401, AUTHORIZING APPROPRIATIONS TO THE NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules I call up House Resolution 1143 and ask for its immediate consideration.

The Clerk read as follows:

H. RES. 1143

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11401) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from California (Mr. SISK) is recognized for 1 hour.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA). Pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1143 provides for the consideration of H.R. 11401, authorizing appropriations for the National Aeronautics and Space Administration for fiscal year 1979.

This is a simple, open rule. General debate time is to be limited to 1 hour and equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology. The bill will be read under the 5-minute rule for amendment by section and any germane amendment will be in order.

Mr. Speaker, H.R. 11401 authorizes appropriations of approximately $4.4 billion for NASA in fiscal year 1979. This is a 9-percent increase over fiscal year 1978 funding. The Committee on Science and Technology made some 10 line item changes in the administration's request which resulted in a net increase in the NASA budget of some $43.7 million.

Among other major changes, the committee added some $4 million to retain the option for a fifth Space Shuttle orbiter without incurring penalty costs. The administration withheld funding for procurement for the fifth vehicle, but the committee restored the $4 million so as to keep the option for the fifth vehicle and thereby avoid liability for penalty costs for not producing it. The committee also added some $3 million for the solar power satellite program and $39.5 million in increases for the aeronautics program.

The major emphasis of the NASA budget reported by the Committee on Science and Technology is for the encouragement of practical applications of space technology to problems on Earth.

Mr. Speaker, this is a program from which we may all benefit and I would urge my colleagues to adopt House Resolution 1143 so that we may proceed to consideration of H.R. 11401, the NASA authorization bill.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a routine rule providing 1 hour of general debate for the consideration of H.R. 11401, the authorization for the National Aeronautics and Space Administration for fiscal year 1979. There are no waivers of points of order in this rule. The bill will be open to all germane amendments.

Mr. Speaker, the bill made in order by this rule authorizes a total of $4.4 billion for fiscal year 1979. The largest single item in this budget is $1.4 billion for the Space Shuttle program.

Mr. Speaker the Committee on Science and Technology reported this bill by a vote of 31 to 0.

Mr. Speaker, I support the rule so that the House may proceed to consider the merits of this legislation. I do not support the passage of the bill as it is $43.7 million more than the amount requested by the administration.

Mr. SISK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ANNUNZIO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 332, nays 0, not voting 102, as follows:

Mr. YOUNG of Missouri changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FIFTH REPORT OF UNITED STATES SINAI SUPPORT MISSION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on International Relations:

To the Congress of the United States:

In conformity with Section 4 of Public Law 94–110 of October 13, 1975, I am pleased to transmit herewith the Fifth Report of the United States Sinai Support Mission. It describes the continuing operation of the United States early warning system in the Sinai and its contribution to maintaining the disengagement arrangements between Egypt and Israel under the Sinai II Agreement signed on September 4, 1975.

The estimated cost for operating and maintaining the U.S. early warning system in Fiscal Year 1978, including all contractor and headquarters expenses, is expected to be about ten percent less than the $12.2 million appropriated. For Fiscal Year 1979, the budget is estimated at $11.7 million.

During the six-month period covered in this report, twenty-two minor violations of the Sinai II Agreement were detected. In each instance the violation was an unauthorized aircraft overflight. None of these incidents was serious.

Both parties to the Agreement recently reaffirmed to the Director of the Sinai Support Mission their full confidence in the manner in which the U.S. is discharging its responsibilities in the Sinai and wished this effort to continue as it is at present.

Dramatic developments in the Middle East over the past six months expanded hopes for a comprehensive peace settlement. While the diplomatic process is underway, I believe it imperative that the U.S. continue to meet fully its obligations under existing agreements. The activities of the Sinai Support Mission play an important part in fulfilling these obligations, and I urge continued Congressional support for this effective peacekeeping mission.

JIMMY CARTER.

THE WHITE HOUSE, *April 24, 1978.*

REPORT OF HOUSE SELECT COMMITTEE ON ASSASSINATIONS RECOMMENDING THAT THE CASE OF CLAUDE POWELL, JR., BE CERTIFIED TO THE U.S. ATTORNEY FOR CONTEMPT OF CONGRESS

Mr. STOKES. Mr. Speaker, I rise to submit a privileged report (Rept. No. 95-1080) on a matter concerning the Select Committee on Assassinations. It is a matter I first brought to the attention of the House on February 28, 1978. At that time, and as may be reviewed in the CONGRESSIONAL RECORD at H1596 of that date, I informed the House that the committee might recommend to the House that it cite for contempt a witness who refused to appear despite being subpenaed. The speech on February 28, 1978, was the final effort to induce the witness to appear. Despite all the committee's efforts, the witness has refused to obey the subpena. Accordingly, pursuant to a resolution of the select committee, I am submitting a privileged report recommending that Claude Powell, Jr., be certified to the U.S. attorney for contempt of Congress in accordance with section 194 of title 2 of the United States Code.

The privileged report was referred to the House Calendar and ordered to be printed.

AGRICULTURAL CREDIT ACT OF 1978

Mr. FOLEY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11504) to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act.

The SPEAKER. The question is on the motion offered by the gentleman from Washington (Mr. FOLEY).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 11504, with Mr. FUQUA in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Washington (Mr. FOLEY) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. MADIGAN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the bill, H.R. 11504, The Agricultural Credit Act of 1978.

H.R. 11504 revises and updates the traditional credit programs of the Farmers Home Administration and provides a short-term emergency loan program for farmers and ranchers in the United States. It is the result of many weeks of work of the Agricultural Committee.

I

Title I is similar to legislation submitted to the Congress by executive communication and introduced by request as H.R. 8315. There are a few differences but we have retained the basic thrust of the administration's proposal. Title I is also similar to legislation which was introduced by the former chairman of the Conservation and Credit Subcommittee, the Honorable Bob Bergland.

Under title I, the levels for individual farm operating and farm ownership loans would be increased to make them responsive to the requirements of modern-day farming. In addition, the interest subsidy on farm ownership loans would be eliminated except for a special category of small low-income farmers who cannot meet the regular terms for FmHA loans.

The limit on farm ownership loans would be increased from $100,000 to $200,000 for insured loans and to $300,000 for guaranteed loans. The limit on farm operating loans would be increased from $50,000 to $100,000 for insured loans and to $200,000 for guaranteed loans. The interest rates for farm ownership and operating loans would be, in the case of guaranteed loans, a commercial rate as negotiated between the borrower and lender, and in the case of insured and direct loans would not exceed the cost of money to the Government, plus up to 1 percent added at the discretion of the Secretary. The interest rate for community facility loans to public bodies and nonprofit associations would be retained at 5 percent as in existing law.

There exists a special category of low-income farmers, especially young farmers, who cannot meet the regular credit terms of the Farmers Home Administration programs with the increased interest rates. Accordingly, the committee authorized the Secretary to establish a special program for this category of borrowers providing lower interest rates; namely, a maximum of 3 percent on operating loans and of 5 percent along with a reduced repayment schedule during the first 10 years for farm ownership loans. These borrowers would graduate to regular FmHA credit terms as their financial condition improves.

The committee believes that by reducing the cost of the program, the Congress and the administration would be more inclined to make greater funds available for farm ownership and operating loans. The funding level for the program has not kept pace with the need as production costs and farmland prices have skyrocketed in recent years.

The committee has attempted to address the changing pattern of farm management and ownership by extending eligibility for Farmers Home Administration programs to corporations, partnerships, and cooperatives, if they are controlled by farmers and ranchers and engaged primarily and directly in farming and ranching. The stockholders, members, or partners holding a majority interest would have to meet the family farm criteria and the test for credit the same as required of individual farmer applicants. This change will enable FmHA to help more individuals who rely on farm income for a living.

Another important change made was in the community facility program to increase the maximum grant for individual rural water and sewer systems from 50 to 75 percent, and to increase the limit on total annual funding of the program from $300 million to $400 million. Many small communities simply cannot afford the water and sewer system that are necessary for a decent standard of living and which must meet acceptable environmental pollution control standards. This particular change is important to rural areas and those concerned with rural development programs.

An amendment has also been made in the provisions that relate to FmHA emergency loans. Effective October 1, 1978, H.R. 11504 would delete the provision added a little over a year ago that requires the interest rate for such loans not to exceed the interest rate for Small Business Administration loans on loans of up to $250,000 for businesses and $40,000 for homeowners.

The result of this provision is that the interest rate for the entire amount of the actual loss would be 5 percent and for amounts in excess of the actual loss, interest would be at the prevailing market rate.

There are a number of other miscellaneous changes which have been made in the regular FmHA credit programs to facilitate the administration of the programs.

II

Title II, the Emergency Agricultural Credit Act, is designed to provide assistance to farmers and ranchers experiencing critical financial problems caused by skyrocketing production costs, low commodity prices, and a lack of credit from their normal credit sources. The Secretary of Agriculture has the authority and has acted to prevent foreclosures by the Farmers Home Administration of its regular borrowers. However, this represents a small percentage of the farm community. H.R. 11504 would provide similar assistance to farmers who have loans outstanding from private lenders by providing farmers the credit necessary to survive the temporary cost-price squeeze.

Title II authorizes insured and guaranteed loans to bona fide farmers and ranchers, including those organized as corporations, partnerships, or cooperatives. Eligibility would be limited to farmers who are temporarily unable to obtain sufficient credit from their normal credit sources to finance actual needs because of the stressed economic conditions. Preference would be given to the owners and operators of not larger than family farms but assistance would not be limited to this category.

Loans are authorized to repay debt incurred for real estate and operating purposes after January 1, 1973, but not later than date of enactment of the act with certain exceptions. Loans could cover particular principal and interest installments due or refinancing or consolidation of entire outstanding debt.

Loans could also cover operating expenses needed to assure repayment of outstanding debt. Such loans could be made for essential farm needs. However, loans could not be used to purchase or lease additional real estate.

Loans could be made for up to 30 years

if they are secured primarily by real estate. If secured by personalty, they would be for a term up to 7 years, renewable for an additional 5 years. These loans would be at a negotiated rate for the guaranteed loans and at the cost of money to the Government, plus an additional 1 percent at the discretion of the Secretary in the case of insured loans.

Loans for individual borrowers could not exceed $400,000. Authority to make loans would expire December 31, 1979. The total amount of loans outstanding at any one time in 1978 could not exceed $2 billion and the total amount of loans outstanding at any one time in 1979 could not exceed $4 billion.

The committee worked closely with the Farmers Home Administration, with private lenders, the Farm Credit Administration, and the major banking associations. The committee had difficulty in obtaining specific figures on credit needs in the farm sector. However, net farm income has fallen from around $33 billion in 1973 to $20 billion in 1977. It is showing some limited improvement thus far in 1978, but there is still a critical need for the program in many areas of the country. The ratio of debt-to-income has increased from 218 percent in 1973 to 503 percent in 1977. The thousands of farmers who have visited each of us in the last 3 or 4 months have impressed us with the serious nature of their financial crunch. The economic emergency loan program in title II does not represent the entire answer for farmer needs but it is an important and necessary tool to deal with the current crisis.

III

Title III of the act simply extends an existing emergency program, the Emergency Livestock Credit Act of 1974, which otherwise would expire on September 30, 1978. The program has had regional successes and in those areas where it has been used it has been effective. We think it should be continued for 1 year.

The Congressional Budget Office has estimated that H.R. 11504 will result in total direct outlays of $24,000,000 in fiscal year 1978, and net cost savings to the Government for subsequent fiscal years. The cost savings would be $13,000,000 in fiscal year 1979, $52,000,000 in fiscal year 1980, $36,000,000 in fiscal year 1981, and $46,000,000 in fiscal year 1982. Cost savings will result from a reduction of interest subsidies on farm loan programs. Net outlays in fiscal year 1978 result from those economic emergency insured loans which are made by FmHA in that period but not resold to the public until after the end of the fiscal year. In addition to the foregoing, the cost of the water and waste facility grant program would be $8,000,000 in fiscal year 1979, $31,000,000 in fiscal year 1980, $66,000,000 in fiscal year 1981, $91,000,000 in fiscal year 1982, and $100,000,000 in fiscal year 1983.

Mr. Chairman, H.R. 11504 is vital to the well-being of the agricultural sector. It balances the need to provide assistance to farmers within the bounds of the limited resources of the Federal Government.

I urge the Members to join me in voting in support of this measure.

Mr. MOORE. Mr. Chairman, would the gentleman yield for a question?

Mr. FOLEY. I yield to the gentleman from Louisiana.

Mr. MOORE. Mr. Chairman, I appreciate the gentleman yielding. I want to associate myself with the gentleman's remarks. I think this is a fine bill and I compliment the gentleman and the gentleman from Tennessee for preparing this bill. I am a cosponsor of it.

Mr. Chairman, I have two questions for purposes of legislative history. First, under title II of the bill, particularly section 204(b) as it relates to rates of interest on guaranteed loans, would the Farmers Home Administration be able to guarantee loans made by Production Credit Associations and Federal Land Banks, which are a part of the Farm Credit Administration, even though they are made carrying variable interest rates?

Mr. FOLEY. Yes; it would be able to do so.

Mr. MOORE. Second, Mr. Chairman, if the gentleman will yield further, under title I of this bill, would the Farmers Home Administration be able to guarantee Production Credit Association operating loans and Federal Land Bank farm ownership loans, even though such loans were made at variable interest rates?

Mr. FOLEY. Yes, it would be able to do so.

Mr. MOORE. Mr. Chairman, I thank the gentleman.

Mr. MADIGAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I intend to offer a substitute to title II of H.R. 11504. I believe this substitute will improve the bill and make it more acceptable to Members, farmers, farm organizations, lending institutions, and those who are concerned about inflation.

Title I of this bill contains many provisions which I endorse and which "track" very closely the provisions in bills introduced by Chairman JONES of Tennessee and myself last year.

As many of you know, we considered a farm credit bill in the 94th Congress, but we did not have time to act upon it in the House before adjournment. Meanwhile, the emergency nature of the credit needs of farmers and ranchers have deteriorated over the ensuing months.

This bill addresses the high inflation rate affecting farmers. All of you know that you may be living in the same house you were living in 10 or 15 years ago, but your real estate taxes and utility bills have soared. The same thing has happened on the farms.

Title I and title III are almost unanimously supported by farm organizations and farmers. Title III extends the Emergency Livestock Credit Act of 1974 until October 1, 1979. Testimony established a need for this extension, and certainly it was supported in the committee.

Title I provisions are also largely noncontroversial. Title I increases loan limits for farm ownership and farm operating loans to a level more in keeping with today's inflation ridden economy. Eligibility for family farm corporations and partnerships are provided for such that as long as the farm operator or a majority of the stockholders or partners are family farmers or are related—eligibility is not denied by FmHA loans.

Low-income owners and operators of family farms—those unable to obtain credit under regular FmHA credit programs—are provided for in title I. This would presumably address the problem of new—including young, middle-aged, or old farmers—farmers who want to embark on a farming operation.

Direct and insured loan recipients are made subject to the "graduation" provisions of the basic law—in other words, if their economic situation improves, they must refinance their loans with conventional lenders—however, guaranteed loan recipients are exempt from the "graduation" provision.

Heretofore, if the county committee passing on FmHA loan applications denied an application for a particular borrower, there was no appeal procedure provided for review of that decision. This bill—correctly, in my opinion—provides for an appeal procedure for those determinations.

The bill also permits Federal departments and agencies to participate with FmHA in providing financial assistance to persons eligible under the farm credit laws.

Mr. MOORE of Louisiana inserted language in the bill which expressly establishes the Secretary's authority to grant moratoriums for payment of principal and interest and to forego foreclosures on FmHA loans under the Consolidated Farm and Rural Development Act.

These are illustrative of the many amendments in this bill to the Consolidated Farm and Rural Development Act which will improve on the loan services which FmHA can utilize in helping their clients.

The eligibility requirements of title I are still the family farm standard, and FmHA continues in title I as a lender of last resort.

I commend to your vote title I and title III of this bill as they are written because I believe them to be in most instances improvements on existing law.

As I stated earlier, I am troubled by title II as it appears in the bill, and I find it unacceptable. I, therefore, intend to offer a substitute to title II which I hope you will support.

As I stated in a "Dear Colleague" letter addressed to each of you today, I am of the opinion that title II of the bill promises more than it can deliver to farmers and ranchers based on the programs it provides and the funding limitation it contains.

I will ask the House to bring title II in line with the funding provided in the bill, and will have more to say about this later when I offer my amendment.

In conclusion, I urge you to support my amendment and adopt it and to pass H.R. 11504, once amended.

Mr. FOLEY. Mr. Chairman, I yield such time as he may consume to the distinguished chairman of the subcommittee, the gentleman from Tennessee (Mr. JONES).

Mr. JONES of Tennessee. Mr. Chairman, rarely does any committee bring a bill to the floor of the House which will not only provide great assistance to our citizens but will save the taxpayers money as well. Primarily H.R. 11504

deals with the farm loan programs of the Farmers Home Administration including establishing a new economic emergency loan.

I stress that by eliminating the interest subsidy on the farm loans we will be saving American taxpayers $13 million in fiscal year 1979, save $52 million in fiscal year 1980, save $36 million in fiscal year 1981, and save $46 million in fiscal year 1982.

Another unique feature on this particular bill is that it has the general support of the administration.

Perhaps this bill has broad support because the need is so apparent. We all know that more loans will not solve our critical farm problem, but this bill addresses both the need to revise our outdated FmHA credit programs and also tries to come to grips with economic conditions in the agricultural sector resulting from production costs which have skyrocketed and commodity prices which have nosedived.

Using the value of the dollar in 1967 as a constant, realized net income from farming per farm has dropped from $7,980 in 1973 to $4.010 last year.

Any set of statistics you look at comparing the agricultural economy in 1973 with 1977 shows an almost unbelievable decline.

A function of this decline is that adequate credit is simply not available in the agricultural sector. Several factors account for this including: the high capital requirements of modern day farming; the volatility of agricultural commodity prices; the hesitancy of private lenders to venture into agricultural loans; the impacted liquidity positions of small local banks; the high cost of entry into farming and the outdated provisions of some Federal loans and regulations.

The Subcommittee on Conservation and Credit and the full committee worked hard to write provisions which will remove these barriers to credit availability. Particularly we are interested in the utility of the guaranteed loan program.

By using the guaranteed concept we encourage private lenders, local banks, and the Farm Credit System, to be more active in agricultural lending.

In particular, we are eager for the FmHA to participate with the Production Credit Associations and Federal Land Banks in serving individual borrowers. Under this bill, loans made with variable interest rates agreed to by the borrower and lender can be guaranteed. This provision will facilitate cooperation especially with the Farm Credit System.

H.R. 11504 represents the culmination of months of work which actually began in the previous Congress when a similar bill was sponsored by our former colleague, Bob Bergland.

Title II of the bill is a new emergency program which specifically addresses the current agricultural situation and while the authorized loan level is substantial, it is important to keep in mind that the assistance is in the form of loans only and the loans are not made at subsidized interest rates but at the cost of money to the Government for insured loans and a commercial rate for guaranteed loans.

Without a doubt this program will aid thousands of farmers and do so at a cost savings to the taxpayer.

I urge my colleagues to support this bill.

Mr. MADIGAN. Mr. Chairman, I yield such time as he may consume to the gentleman from Kansas (Mr. SEBELIUS).

Mr. SEBELIUS. Mr. Chairman, for nearly a year and a half, I have been warning my distinguished colleagues that something would have to be done to alleviate the severe price, credit, and cash-flow crisis in High Plains farm country.

I am thoroughly aware that what many farmers do not need is more credit. Farmers in my district are almost unanimous in their beliefs that more credit is not the sole answer to our farm problem and that piling credit upon credit will only prolong the agony of the current cost-price squeeze. What they really want are higher farm prices.

Hopes for much needed cash-flow assistance were dashed on April 12 when the Emergency Agricultural Act of 1978 was defeated. Now, until profitable prices return, many hard-pressed farmers must reluctantly resort to their available credit sources to remain in business. This bill, with its modernization of loan limits, debt consolidation features, and expansion to include farm partnership and family farm corporations, is a courageous effort at making Farmers Home Administration more responsive to the needs of today's farmer.

Title I would amend the Consolidated Farm and Rural Development Act pertaining to the limitations for farm ownership and operating loans which is badly needed to compensate for inflation over the past several years. Title II, the Emergency Agricultural Credit Act of 1978, would respond to those farmers who have incurred sizable debts since 1973 and are in desperate need of consolidating and refinancing loans—both insured and guaranteed—of up to $400,000. Title III would extend the Emergency Livestock Credit Act of 1974 until September 30, 1979, so that farmers and ranchers who have substantial livestock operations may benefit from this program during the temporary adverse economic period.

I would like to point out that in January of 1977, I introduced H.R. 1973, an emergency farm credit bill, that would have done many of the things that are contained in H.R. 11504. At that time, it was my hope that action of this nature could have been expedited prior to considerations of the 1977 Food and Agriculture Act. I can not help but think that inaction on this important matter coupled with the administration's implementation of the 1977 act resulted in the widespread farmer discontent of the past 6 months.

Mr. Chairman, I support H.R. 11504 and urge its passage.

Mr. MADIGAN. Mr. Chairman, I yield such time as he may consume to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Chairman, I just wish to rise and commend the chairman of the subcommittee, the gentleman from Tennessee (Mr. JONES), for his usual outstanding work in bringing this very fine bill before the committee. I know he has worked very extensively and hard on it, as has the committee.

Mr. Chairman, I also want to commend the gentleman from Illinois (Mr. MADIGAN) for his very able and excellent work on this bill.

In 1975 this body adopted an amendment which I proposed that provided for flexibility within FmHA. I am most pleased that the same flexibility is established in this legislation here today. In 1975 the administration was successful in striking this feature during the House-Senate conference, however, the administration today is supportive.

At that time it was our dairy farmers who were faced with severe cash-flow problems. Today it is our western wheat and feed grain farmers that are faced with similar problems. This legislation will allow FmHA flexibility with operating loans, particularly in the consolidation and refinancing of these loans.

Also FmHA can now be responsive to "partnership" and "corporation" setups.

This legislation will allow our American farmer, particularly our younger farmers, more progressive farmers to survive a very rough economic period.

Again, I want to commend both Mr. JONES and Mr. MADIGAN for their outstanding leadership on this legislation.

Mr. JONES of Tennessee. Mr. Chairman. I yield such time as he may consume to the gentleman from Oklahoma (Mr. ENGLISH).

Mr. ENGLISH. Mr. Chairman, on January 25, 1978, I urged my colleagues to support emergency legislation which I had drafted to provide our Nation's farmers with some desperately needed financial assistance. That measure, H.R. 10539, was designed to enable family farmers who could not find adequate credit in the private sector to get emergency refinancing through the Farmers Home Administration. My original proposal included provisions which would allow farmers to refinance their agricultural indebtedness, and defer their first payment of principal and interest for up to 5 years.

During the Conservation and Credit Subcommittee's consideration of H.R. 11504, my legislation was revised with the help of Chairman ED JONES and the Farmers Home Administration, and was then included in the bill we are debating today as title II.

I believe that the provisions of title II are essential if we are to avoid losing an entire generation of family farmers. Without this legislation, we stand a very real danger of losing up to 10 percent of our farmers to bankruptcy this year—which can only lead to economic disaster throughout rural America.

But I would like to emphasize to my colleagues who are rightly concerned about holding down spending that participating farmers will pay an interest rate equal to the cost of money to the Government, plus a one percent surcharge to cover the program's operating costs. Yet even though there is no drain on the treasury, these much-needed loan provisions will give the Farmers Home Administration the tools it wants and needs to keep family farms producing quality food and fibre at reasonable prices.

The choice today is simple—by passing this legislation, we will give farmers a chance to survive their current economic crisis. I strongly urge every Member of the House to support the future of family farming by voting for H.R. 11504.

Thank you very much.

Mr. MADIGAN. Mr. Chairman, I yield such time as he may consume to the gentleman from Minnesota (Mr. STANGELAND).

Mr. STANGELAND. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in strong support of the Agricultural Credit Act of 1978.

I would agree with the distinguished gentleman from Kansas (Mr. SEBELIUS) when he says that what we need for the farmer is price and not more loans. However, we also need loans, and we need the ability in the agriculture community to finance operations in the future.

Mr. Chairman, this bill recognizes what inflation has done not only to the values of land but also to the cost of operations.

In Minnesota we have a family farm corporation act recognizing the right and need for family farmers to incorporate. The fact that title I now recognizes the need to make partnerships and these types of corporations eligible for loans from FmHA is certainly a progressive step.

I would also like to draw attention to title II, the temporary loan section which is a very much needed place of legislation at this time. Many farmers, young and old alike, have been severely injured economically through adverse weather conditions and farm prices in very recent years to the point that they are on the verge of bankruptcy. Until the price structure improves, they need some temporary loan program to tide them over. Perhaps hardest hit are the beef-cow-calf operators who have suffered low prices from the period of 1973 through 1977. The prices are just now recovering but are not at an adequate level to establish a cash flow which will allow them to reduce their debt. This is a program that will allow them to consolidate their loans and extend the amortization until they can get back on their feet. It is amazing that we find people with more than adequate valuation to cover their liabilities who cannot get loans because of a cash flow problem. Many of these cow-calf operators are on land that is not suitable for any other type of agricultural operation. If we do not provide a mechanism to help them stay afloat, we can be in very serious danger in the future of being short of beef for the consuming public. This is a much needed strengthening of the FmHA program which has come to be a very much needed tool in the field of financing agricultural operations.

Again, I urge this House to strongly support this piece of legislation.

Mr. JONES of Tennessee. Mr. Chairman, I yield 3 minutes to the gentleman from Kansas (Mr. GLICKMAN), a member of the committee.

Mr. GLICKMAN. Mr. Chairman, I rise in support of this bill and for the same reasons as those offered by everybody who has spoken before.

However, Mr. Chairman, I would also like to repeat the reason given by my colleague, the gentleman from Kansas (Mr. SEBELIUS), who indicated that the real answer to farm problems is raising prices.

Mr. Chairman, this is not a bill aimed at raising prices.

While this may help, we need to improve the underlying foundations that will go to the heart of the problem and make sure that rural America will continue to survive.

Mr. Chairman, I will offer an amendment to this legislation designed to incorporate language into the bill before us to provide that mortgage guarantees offered by the Farmers Home Administration would be subject to conditions no less favorable than those governing the comparable program administered by the Department of Housing and Urban Development.

However, Representative NEAL SMITH and I feel this is an issue which definitely warrants further attention. As we pointed out in our dear colleague, several major differences exist in the requirements for participation in the Farmers Home and HUD programs; differences which appear to us to put rural Americans at a real disadvantage. Just to name a few: the HUD program has no income ceiling on eligibility whereas the Farmers Home program does, the HUD program insures 100 percent of the eligible loans whereas Farmers Home insures only 90 percent, the HUD program has a $60,000 mortgage limit whereas Farmers Home limits the mortgage to $33,000. We are talking about programs designed to provide the same assistance, but what has resulted is more assistance being available to urban applicants with almost no help to rural residents. What we have, therefore, is a question of equity: of providing real access to comparable housing programs for rural and urban citizens alike. Which brings me to my next point.

HUD's focus on urban needs is understandable, in that that agency has traditionally been operated by urban-oriented administrators with a knowledge of and concern for the well-being of urban areas. However, the Department does have the authority to extend many of its programs to benefit rural areas, but yet to permeate those areas—in 1976 rural America received less than 1.5 percent of the mortgage guarantee program in question's benefits.

Therefore, we must justifiably rely on Farmers Home for attention to the unique needs of the rural population. However, it bothers me greatly that Farmers Home is not even implementing the mortgage guarantee program which Congress deemed necessary in approving the Rural Development Act 4 years ago.

We need to get the program moving. However, just implementing the program is not enough. The Farmers Home mortgage guarantee program should be made available to rural applicants on the same basis as the comparable urban program. Without making the program more reasonably available to rural applicants, the Government will continue to ignore a need equally if not more urgent in rural areas as in our cities.

While clearly other steps are needed to get the Farmers Home program moving, I feel this amendment should be approved today so there will be no question that the Congress expects nothing short of equal treatment of rural and urban Americans.

The amendment we are offering has considerable support from organizations who understand the problem that exists: the National Association of Counties, the National Association of Regional Councils, the National Association of Home Builders, the National Farmers Union and the National Rural Electric Cooperatives.

I urge you to join those groups and the 36 Members of the House who have already decided to cosponsor the Smith legislation in an effort to eliminate the present inequity, and to let rural Americans know that the Congress believes that they deserve equal treatment from their Government.

Mr. MADIGAN. Mr. Chairman, I yield such time as he may consume to the gentleman from Iowa (Mr. GRASSLEY).

Mr. GRASSLEY. Mr. Chairman, I thank the gentleman from Illinois for yielding to me.

Mr. Chairman, members of the committee, this bill addresses itself to two categories of people who need help. No. 1, the people who have real need because of the farm credit crunch; the very people that we want to help start farming, the young farmers. It helps farmers who rent and have not had the benefit of the appreciation of farmland in the last decade, and it helps farmers hit simultaneously by low prices and no crops to harvest.

Second, this bill addresses itself to a whole category of new and innovative business arrangements that have become dominant in farming in recent years, which the original Farmers' Home programs could not legally address; particularly, family farm corporations and partnerships. These have evolved because of the credit crunch and the high machinery and land cost associated with the 1970 decade of agriculture.

For these reasons, this bill ought to be passed for the benefit and preservation of family farm agriculture in this country.

Mr. Chairman, I rise in support of H.R. 11504, the Agriculture Credit Act of 1978.

This legislation makes several needed changes, such as increasing the limitation of farm ownership and operating loans to a level which reflects the large increases in recent years in the cost of getting into and operating a farm. As a result of the increased cost of buying and operating a farm there has been a growing number of partnerships and family corporations involved in farming. This measure makes these two groups also eligible for Farmers Home Administration programs which I consider a desirable change.

In addition, this bill addresses the credit needs of farmers who are in a financial crunch because of low commod-

ity prices and, in some cases, adverse weather conditions. Farmers from all sections of the country came to Washington these past few months telling their elected officials of their financial problems and giving details of how they were selling their commodities at below the cost of production. Many farmers, especially young farmers who have just recently gotten into farming, need assistance and this measure provides help.

Hopefully, Congress will act quickly on this legislation and then the U.S. Department of Agriculture will move promptly to administer this important program. Mr. Chairman, I urge my colleagues to join me in support of H.R. 11504, and vote in favor of this legislation.

Mr. JONES of Tennessee. Mr. Chairman, I yield 4 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Chairman, I rise in support of the bill H.R. 11504, and I wish to commend the chairman of the subcommittee, the gentleman from Tennessee (Mr. JONES), as well as the senior minority member on the subcommittee, the gentleman from Illinois (Mr. MADIGAN), for their work in producing this legislation. I feel this bill represents a sound and responsible approach to the financial crisis facing our farmers today.

A few weeks ago this Congress considered an emergency farm bill. It was defeated by the House for I think a number of reasons. Some felt it was wrong legislatively. Some felt it was wrong economically. Others felt it was wrong because it targeted at certain areas of agriculture.

This bill comes to the House in strong contrast to that legislation. This bill is the result of weeks of hearings and deliberations by the House Agriculture Committee, both the Subcommittee on Conservation and Credit as well as the full committee. Economically it does not involve additonal Government spending or inflationary costs, but it involves loans to farmers, loans to assist farmers, loans that they in turn will pay back plus interest. Lastly, it does not affect just one sector of our agricultural economy. It affects all of agriculture regardless of the crop one raises and regardless of whether one's operation is large or small. In that sense it tries to serve all of agriculture rather than a portion of it.

As a member of the subcommittee and the committee, I want to assure my colleagues that this bill will offer real relief to the farmers in rural communities that are being hit by the present credit squeeze. This bill represents a compromise between Members representing both large and small farmers growing a variety of crops from diverse areas of the country.

Make no mistake about it. Our Nation's farmers are in desperate need of help. There are thousands of farmers from several States throughout the country that are facing bankruptcy. Credit is not available to private lenders or through the Farmers Home Administration. The bill H.R. 11504 will respond to this need.

In addition to broadening eligibility for loans, increasing loan limits, and adjusting interest rates of regular FmHA programs, this bill establishes a new emergency credit program to provide immediate assistance to bona fide farmers and ranchers suffering from the present agricultural credit crunch that is taking place.

I believe title II is an essential component to this credit bill, for it demonstates our commitment to a comprehensive solution to the current credit problems.

In my opinion, the key to resolving our agricultural difficulties centers around responsible farm legislation, legislation that makes sense economically as well as legislation that makes sense for our farmers. The bill we have before us achieves these goals and I urge my colleagues to support it.

Mr. JONES of Tennessee. Mr. Chairman, I yield 1 minute to the distinguished member of the subcommittee, the gentleman from Texas (Mr. HIGHTOWER).

Mr. HIGHTOWER. Mr. Chairman, when Congress reconvened in January the most immediate problem we had at that time was the agricultural situation. In the fall of 1977, when the farmers began to realize that the farm bill we had passed last year was not really going to provide the help they needed, they began to tell us just how critical the situation is. One of the arguments they made repeatedly was that it was not going to help if we provided more credit for them, that what they needed was higher prices. We heard that at the time and we committed ourselves to trying to get the higher prices. The farm bill we had that would have done that failed.

In spite of the fact that they said they did not need more credit, the reality is that they must have more credit. We have farmers going broke every day in my part of the country. The papers each week have many stories of foreclosures.

H.R. 11504 will not end the foreclosures, but it will help. It will help the farmer that is a good operator and is an innocent victim of the economic forces that have produced the present crisis.

I urge the House to speedily pass this bill. I hope that the President will quickly sign it in order that help will be on the way to rural America.

Mr. MADIGAN. Mr. Chairman, I yield such time as he may require to the gentleman from South Dakota (Mr. ABDNOR).

Mr. ABDNOR. Mr. Chairman, I rise in support of H.R. 11504, the Agricultural Credit Act of 1978.

While credit is no substitute for improved farm income, this legislation does provide for some important changes in the lending authorities of the Farmers Home Administration. These changes are justified on the basis of fairness and taking into account the inflation which has occurred in property values and operating expenses.

I urge my colleagues to oppose weakening amendments, but one amendment in particular deserves support. Currently a number of discrepancies exist between FmHA and HUD lending programs for housing. Despite the increasing emphasis on urban strategies, rural citizens deserve access to housing assistance on terms no less favorable than those available under HUD's program.

Other major aspects of H.R. 11504 include:

First. Making farmer-controlled cooperatives, partnerships, and private domestic corporations eligible for farm ownership and operating loans;

Second. Raising the limit on farm ownership loans for $100,000 to $200,000 for direct and insured loans, and to $300,000 for guaranteed loans;

Third. Deleting the current $225,000 limitation on a borrower's total real estate indebtedness and providing instead that total indebtedness may not exceed the value of the farm or other security;

Fourth. Raising the limit on farm operating loans from $50,000 to $100,000 for direct or insured loans, and to $200,000 for guaranteed loans;

Fifth. Establishing special direct or insured farm ownership and operating loan programs for small family farmers who have low incomes and are unable to obtain credit under the regulator programs.

Under these special programs, the interest rate shall not exceed 5 percent on farm ownership loans, which will be repayable over 40 years, with reduced payments in the initial 10 years. Special operating loans will have an interest rate not to exceed 3 percent, and borrowers under these special programs will be "graduated" to regular FmHA credit terms or to private credit as their financial situation improves.

Sixth. For emergency loans, effective October 1, 1978, the interest rate will be no more than 5 percent on the amount of the actual loss and the prevailing market rate for amounts in excess of the loss;

Seventh. The bureaucratic "job piracy" requirements on business and industrial loans are removed for loans to small businesses not exceeding $500,000 and not increasing employment by more than 20 employees;

Eighth. The overall authorization for water and waste disposal grants is increased from $300,000 million to $400,000 million; and these grants may provide up to 75 percent of a project's costs, instead of the current 50-percent limit;

Ninth. Emergency insured or guaranteed loans up to $400,000 are authorized to farmers and ranchers who are unable to obtain credit from normal sources because of depressed economic conditions and have the experience and resources to reasonably assure a successful operation. Insured loans under this program shall be at a rate of interest equal to the cost of money to the Government, plus 1 percent. These loans may be for terms of up to 30 years, but borrowers will be graduated to private credit when their financial conditions improve; and

Tenth. Finally, the Emergency Livestock Credit Act is extended until September 30, 1979.

I am somewhat concerned that the interest rate on direct and insured loans under FmHA's regular farm ownership and operating loans will be increased to

a rate not greater than the cost of money to the Government plus 1 percent. Lower rates will be preserved under the new special programs, though, and, hopefully, will direct additional assistance to where it is needed most.

There is no doubt H.R. 11504 is far from perfect. It is certainly no panacea for the economic problems of agriculture, and perhaps there will be additional amendments offered which can improve this legislation. On balance, however, H.R. 11504 is a very good and much-needed measure.

I strongly urge adoption of this legislation.

Mr. JONES of Tennessee. Mr. Chairman, I yield 1 minute to the distinguished member of the subcommittee, the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Chairman, I rise in support of this legislation to help us give some very urgently needed financial help to some of our hard-pressed farmers. However, I would like to call the committee's attention to a problem that we have in FmHA. That problem is pure and simple: They do not have adequate personnel to properly supervise these loans, to properly watch over these loans. This has broken out in my State in the press just in the last 2 or 3 days I find that since 1969 FmHA's outstanding loans have increased from $5.6 billion to $22.5 billion, a fourfold increase—and we have increased the staff by only 12 percent. I am told they do not have enough staff to inspect the buildings that they are making loans on, that they do not have enough staff to check with regard to repayment of the loans.

Mr. Chairman, it is only good banking practice that if we are going to make loans, we provide adequate personnel so that we can know what we are doing both on the loans that we make and in the supervision of the loans that are made.

Mr. MADIGAN. Mr. Chairman, I yield 10 minutes to the gentleman from Tennessee, Mr. JONES, chairman of the Subcommittee on Conservation and Credit.

Mr. JONES of Tennessee. Mr. Chairman, I thank my good friend and colleague on the subcommittee, the gentleman from Illinois (Mr. MADIGAN). I am sure that I will not use all the time, but I do appreciate it.

I yield 2 minutes to my distinguished colleague, the gentleman from California (Mr. KREBS), a member of the subcommittee.

Mr. KREBS. Mr. Chairman, first of all I would like to congratulate the chairman of the subcommittee, the gentleman from Tennessee (Mr. JONES), as well as the ranking minority member, the gentleman from Illinois (Mr. MADIGAN), on the excellent job that they have done with this legislation. We recently had several days of hearings on the plight of the American farmer.

As has been pointed out, the House has seen fit not to pass emergency farm legislation for a number of reasons. As far as this Member is concerned, one of the reasons I could not support the legislation that was before us approximately 10 days ago was because I felt it would create problems in certain parts of the country in the hopes of helping farmers in other parts of the country. Certainly this is not true—and I want to emphasize not true—about the legislation before us.

I think the legislation before us is going to be of substantial help to farmers throughout the country, who find themselves in many cases in dire financial straits. It is also the purpose of this legislation to make it possible for farmers who find themselves in that position to get a new start, if you will, and it is in that spirit this legislation should be passed.

There is one aspect of the legislation that does give me some concern. An amendment will be offered by my colleague, the gentleman from Missouri (Mr. VOLKMER), which seeks to address the issue of placing a loan limit on the amount of funds that are going to be available. Under the legislation as it is now before us, it would be possible for an applicant to receive a grand total of $900,000 under both title I and title II. This obviously would not only represent a figure that would benefit primarily large operators, but would do so at the expense of the rest of the farmers who seek our help, in light of the fact that the total funds available are rather limited.

Mr. Chairman, I urge adoption of the Volkmer amendment.

Mr. JONES of Tennessee. Mr. Chairman, I yield 1 minute to my good friend and member of the full committee, the gentleman from Louisiana (Mr. HUCKABY).

Mr. HUCKABY. Mr. Chairman, I rise in strong support of this legislation.

I would also like to commend my good friend, the gentleman from Tennessee, the chairman of the subcommittee, for all the many hours of labor the gentleman has put into this bill.

This bill is not going to solve the farmers' problems, as we all know. The emergency credit provisions in there are certainly going to help the farmers in my part of the country, as well as the entire Nation, who find themselves in dire financial straits today; but in addition, the bill does something that should have been done many years ago. If it passes, it will increase the amount that can be lent to farmers, whose expenses have gone up considerably in recent years, from $50,000 to $100,000 for operating expenses and from $100,000 to $300,000 for land. Certainly we are getting the Farmers Home Administration back into business where we can deal with the small and average farmer. This legislation for that reason is desperately needed.

Mr. JONES of Tennessee. Mr. Chairman, I yield 1 minute to my colleague, the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, I appreciate the gentleman yielding to me. I am pleased to extend my strong support for the Agricultural Credit Act. I think this is a demonstration of an area in our economy and in our Nation that desperately needs help.

From time to time different areas in our country, different sectors have to come to us for assistance. Later this spring we will have the city of New York coming to us making exactly the same case that the farm sector now makes. There is great similarity in these two bills. In fact, the amount New York will be asking for is less than the $4 billion authorized in this legislation.

I would hope in the same way that all of us across the country seek to assist with compassion our farmers, that all of us will look with genuine concern and understanding at the plight of New York City.

Mr. Chairman, as a representative of New York City, I can well understand how H.R. 11504, the Agriculture Credit Act of 1978, will help America's family farmers. As surprising as this may sound, the plight faced by the American farmer is very similar to the one confronting New York City.

As the gentleman from Oklahoma (Mr. ENGLISH), one of the supporters of this bill, has pointed out, we face the possibility of losing an entire generation of young farmers. New York City, as important to our Nation as farmers are, also faces the possibility of a catastrophic loss. It could lose its middle-class, its appeal as a business and artistic center, and thousands of jobs.

There are other analogies worth noting. One of the reasons family farmers are in the midst of an economic crisis is that they made large investments when times were good only to see the recession of 1974–75 undermine farm prices and their economic future.

New York City suffered a similar fate; the recession, the flight of business and the tremendous increase of people dependent on government services created a fiscal crisis.

The parallels between our Nation's family farmers and New York City do not stop with the causes of their economic plight. They extend to the solutions.

The Agriculture Credit Act of 1978 will enable—through Farmers Home Administration guaranteed loans—farmers to refinance their debt. As the bill's supporters have correctly pointed out, this loan guarantee program is self-supporting. It will cost the Government nothing.

In this respect, it is not unlike the long-term bond guarantees New York City has requested. These guarantees will not burden the Federal Treasury. In fact—like the New York Seasonal Loan Act which will net the Government $40 million in profits by this June—this program will generate a profit for the U.S. Treasury.

I support H.R. 11504. There is no justification for abandoning farmers or "teaching them a lesson" merely because they have come upon hard times. The family farmer is a crucial part not only of our economy but of our country's heritage.

I hope that in the coming months, when legislation to aid New York comes before us, we will remember the important contributions New York City has made and continues to make to this

country. It must not be abandoned either.

● Mr. TUCKER. Mr. Chairman, I want to take this opportunity to note my cosponsorship of H.R. 11504 and my wholehearted support for its passage. Farmers throughout this country have been very effective in informing Congress of their financial plight. Unfortunately, this Congress and the administration have not responded to this crisis with a farm bill that farmers and consumers can support.

H.R. 11504 is not a final solution to this problem. We still need a long range farm bill that will insure income and price stability in the farm sector of our economy. But the Agricultural Credit Act will provide farmers with one form of financial assistance that will allow many farmers to stave off financial disaster for another year.

Farm land prices have risen 300 percent in the last 5 years. More than one Arkansas farmer has quoted me a tractor or combine price that inflation has doubled in only 4 years. Fertilizer and pesticides have not only jumped in price but in some cases have been taken off the market resulting in less yield and ultimately less income.

All of these factors necessitate passage of this bill so that family farmers can receive the amount of loan assistance that they need to meet rising costs of production. Fortunately, title II of this bill goes one step further in meeting this problem by providing FHA with the authority to consolidate and refinance outstanding loans which farmers have made between 1973 and the date of enactment of this bill. This provision does not go as far as I would like, but it does provide some immediate financial assistance. In light of the present farm situation and considering how little has been done so far, this bill is a good first step toward the long-term need of stabilizing the farm sector of our economy, saving the family farm, and guaranteeing an abundant supply of food for our people.●

● Mrs. HECKLER. Mr. Chairman, as a member of the House Agriculture Committee, I was visited by hundreds of farmers in the past 4 months. Though their accents, backgrounds, and hometowns varied, one common thread united them all. The credit crunch has hit hard. Without congressional action they will be stripped of their livelihood. I will do my part to prevent that by voting for the Agriculture Credit Act of 1978.

H.R. 11504 amends ongoing Farmers Home Administration programs to reflect the credit crunch now facing farmers. In addition, it establishes a temporary loan program to provide financial aid to farmers and ranchers caught in the agricultural credit squeeze. Finally, it extends the Emergency Livestock Credit Act for 1 more year.

Title I of the bill increases loan limitations for both farm ownership and operations to reflect increased costs. Younger farmers in particular have borne the brunt of increased input costs and decreased income from production. Without these changes the Congress would be a party to closing out farming opportunities for a whole segment of ambitious young farmers. They would be the short-term losers; we would be the long-term losers.

Title II of H.R. 11504 establishes an emergency agricultural credit program designed to meet the immediate credit needs of the Nation's farmers. A loan consolidation framework is established to assure repayment of loans on debt incurred between January 1, 1973, and enactment. Preference is given to family farmers. This program will prevent thousands of family farmers caught in the vise of rising inflation and declining income from commodities. This title authorizes up to $2 billion in outstanding loans in calendar year 1978 and up to $4 billion in 1979.

Under title III of the legislation, USDA's authority to make loan guarantees under the 1974 Emergency Livestock Credit Act is extended for 1 year to September 30, 1979.

Mr. Chairman, the American farmer needs help. But, he does not seek a Government handout. This legislation provides the helping hand of easier credit and loan terms without burdening him with unwanted Government subsidies and the accompanying tarnished pride. H.R. 11504 provides the framework for the farmer to help himself, a goal on which we all can agree.●

● Mr. ALEXANDER. Mr. Chairman, the family farmer is the most productive, yet least appreciated partner in our economic system today. He, more than any other element of our population has suffered from inflation. As a result, the family farmer is deeper in debt today than at any time in our history. Forever at the mercy of the marketplace, the farmer's financial woes are aggravated and compounded by agricultural policies that, on the one hand, encourage "fencerow to fencerow" production and which impede exports on the other.

The family farmer is, it must be remembered, a consumer too. He spends billions annually on equipment, fertilizer, seed, and feed. His labors provide job opportunities for thousands of Americans who are involved in the marketing, processing, storing, and transporting of his product.

The bill before us today will aid those farmers most critically in need—those who actually face bankruptcy and repossession moves by their creditors.

It is one of several responses this Congress and this administration should make to the short-term needs of farmers. We must continue to seek target price and loan rate adjustments that more realistically reflect cost of production. At the same time, we must concentrate on expansion of markets, particularly world markets. A bill presently moving through the Agriculture Committee will facilitate that aim by setting up the machinery abroad in terms of trade offices and representatives to bolster export market development. That legislation will also provide an intermediate credit program, an additional tool to help increase the sales of U.S. agricultural products overseas.

I am encouraged that others in the House leadership agree with me that no legislation, with the exception of a comprehensive energy bill, is a more pressing priority of this body than emergency farm legislation.

Mr. Chairman, the farmer has been patient. He has come to Washington in an orderly fashion to petition his Government, I might add, in the finest American tradition. H.R. 11504 is one response to the farmer's legitimate grievances. The most productive partner in our economic system deserves no less than such reasonable responses to his immediate needs. I urge adoption of this bill.●

● Mr. FRENZEL. Mr. Chairman, I rise in support of H.R. 11504, the Agricultural Credit Act of 1978.

Without access to further credit, many of our small agricultural producers will no longer be able to own and operate their farms.

Statistical evidence shows that the costs of owning and operating a farm has increased greatly in the last few years—so much so that credit availability can no longer keep up with the amount of credit demanded. Therefore, I am in favor of Congress raising the loan ceiling to meet those demands.

I am also very much in favor of the new interest rates on loan programs, especially the guaranteed loan rate changes which should stimulate increased investment from the private sector and eliminate Government redtape and interference.

However, I am a little concerned with title II of the bill as it is presently written. I question whether it is wise to subsidize the entire debt that a farmer has incurred and thereby increase his dependence on the Government for help. Therefore, I will support the Madigan amendment which decreases Government involvement by allowing only for help in debt payments for a few years or until the farmer can take over payments himself.

Market prices will rise on their own but in the meantime many farmers are in need of immediate help to maintain their operations. For these reasons, I will vote for H.R. 11504.●

Mr. WAMPLER. Mr. Chairman, I rise in support of this agricultural credit bill, H.R. 11504.

I first wish to extend my congratulations to Chairman FOLEY for his leadership in shepherding this greatly needed legislation to the floor for our consideration.

I also wish to commend my good friend Ed JONES of Tennessee, chairman of the Subcommittee on Conservation and Credit, and EDWARD MADIGAN of Illinois, the ranking minority member of that subcommittee, for their leadership in bringing to the floor a badly needed piece of legislation at a very critical period. This is a time when farm production costs are soaring and farm income has been in a steep decline since early 1977 and shows little prospects for improvement in 1978—albeit it is showing some improvement at the moment.

I am sure all of the Members have some appreciation for the critical nature of the farm problem because of the large

numbers of farmers who discussed their problems with the Members over the last few months.

I must say that my experience with the farmers was positive. They were well-mannered and plainspoken, and they got their point across in a sincere, straightforward manner.

We were unsuccessful last week in passing a conference report on a farm bill that would have improved farm income. Based on the fact that the Senate Committee on Agriculture, Nutrition, and Forestry reported two new farm bills yesterday, I judge that farm legislation is still alive in Congress.

There remains a great need to update farm credit legislation, and we have an opportunity to do that today. Let us act decisively today and pass legislation to help the farm credit situation.

I am aware that there will be some disagreement over certain provisions of the bill; but after full debate and consideration on the merits, I urge the Members to pass this bill with a decisive vote. Let us send a message to farmers that Congress is genuinely concerned with their plight.

In speaking of possible amendments to this bill, I want to urge you to give serious consideration to the substitute to title II which will be offered by Mr. MADIGAN. Mr. MADIGAN is second to none in his support of farmers and the farm community, but he has serious reservations about title II. He is concerned that his version of title II—the Emergency Agricultural Credit Adjustment Act of 1978—will better serve farmers and ranchers and get help to them quicker and get help to those who need it most.

Title I of H.R. 11504 increases farm ownership and farm operating loan limits to a more realistic level reflecting increases in real estate prices and farm production costs.

The interest rate for emergency loans is placed at 5 percent for the amount of actual loss and the prevailing market rate for the amount of the loan over and above the loss.

Of interest to small rural communities is a provision that increases the authorizations for grant funds for water and disposal projects from $300 million to $400 million. Also, such grant funds may provide up to 75 percent of a project's development costs (increased from 50 percent).

Also of interest to Members is a provision which provides that beginning in fiscal year 1979 Congress would be required every 2 years to authorize lending limits for each program established under the Consolidated Farm and Rural Development Act.

Turning back to the severe credit crunch facing farmers, let me embellish a bit on that. The costs of farm real estate and operating expenses have jumped dramatically in recent years. Meanwhile, farm commodity prices have dropped 25 to 50 percent in some instances since 1974. Outstanding farm debt has more than doubled since 1970, having increased from approximately $50 billion in 1970 to $120 billion in 1978.

Total nonreal estate farm debt has increased from $21 billion in 1970 to $45 billion in 1978. Net farm income in 1974 was $27.7 billion, and despite an inflation rate of about 6 percent per year, farm net income dropped to $20.5 billion in 1977.

This bill is badly needed to bring loan limits into a proper relation with land prices and farm operating costs. Moreover, for those farmers who have been caught in a farm cost-commodity price squeeze, there is a great need for an Emergency Agricultural Credit Adjustment Act which is contained in title II. And, of course, there is a need to extend for another year (as is done in title II) the Emergency Livestock Credit Act of 1974.

I urge you to consider the amendments on their merits and to vote for final passage of H.R. 11504.

● Mr. KOSTMAYER. Mr. Chairman, I rise to express some reservations about H.R. 11504, the Agricultural Credit Act of 1978.

Section 306 of the Consolidated Farm and Rural Development Act is being amended to increase the authorization for water and waste disposal grants to $400,000,000 in any fiscal year, up from $300,000,000. Besides the fact that this is a one-third increase in spending and I think a one-third increase in spending for any program in one year is too big an increase, I think we have to evaluate the worth of the section 306 program.

All over America and in my congressional district as well there is an increased awareness of the catastrophic problem of vanishing prime agricultural land. I think we should question the spending of Federal dollars to extend sewer lines to rural areas, a policy which in my view encourages the loss of farmland. In southeastern Pennsylvania we are fighting to halt mindless urban sprawl which is devouring agricultural acreage, and changing the rural character of many areas, including my own home area in central Bucks County. It does not make sense to subsidize development by extending sewer lines to these fringe areas. Such a policy only spurs unwanted development.

I have no problem with waste treatment grants to areas which have a real need—be they urban, suburban, or boroughs in the midst of our rural townships. But I am concerned about the building of sewer lines to the middle of nowhere. This is happening in Pennsylvania, and it results in tremendous pressures to follow the sewer lines with housing which inevitably is followed by higher taxes and then by more spending. Thus, the cycle begins. We must break that cycle.

I am not in favor of deleting all this money from the bill, but I am opposed to increasing the funding and making it easier to obtain by requiring the local communities to contribute only 25 percent rather than the 50 percent now required. I am in favor of tighter coordination and planning so that the extension of sewer lines is subsidized to areas which truly need it. Too often there is inadequate planning. When vanishing agricultural land is a problem in an area, we should not subsidize a sewer line which exacerbates the problem.

I am hopeful that legislation which my distinguished colleague from Vermont, JIM JEFFORDS, has authored will be passed shortly by the Congress. That bill would provide for the study needed on this subject and hopefully improve Government programs in rural areas, perhaps by lessening them. This coordination is needed so that the programs, such as the section 306 program, do not destroy the rural character of the very areas the Farmers Home Administration seeks to help.●

Mr. JONES of Tennessee. Mr. Chairman, I have no further requests for time. I yield back the balance of my time.

Mr. MADIGAN. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Under the rule, all time has expired.

The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Credit Act of 1978".

TITLE I—AMENDMENTS TO THE CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT

SEC. 101. ELIGIBILITY FOR FARM OWNERSHIP AND OTHER LOANS UNDER SUBTITLE A.—Section 302 of the Consolidated Farm and Rural Development Act is amended to read as follows:

"SEC. 302. The Secretary is authorized to make and insure loans under this subtitle to farmers and ranchers in the United States, and to farm cooperatives, private domesitc corporations, and partnerships controlled by farmers and ranchers and engaged primarily and directly in farming or ranching in the United States, subject to the conditions specified in this section. To be eligible for such loans, applicants who are individuals, or in the case of cooperatives, corporations, and partnerships, members, stockholders, and partners, as applicable, holding a majority interest in such entity, must (1) be citizens of the United States, (2) have either training or farming experience which the Secretary determines is sufficient to assure reasonable prospects of success in the proposed farming operations, (3) be or will become owner-operators of not larger than family farms (or in the case of cooperatives, corporations, and partnership in which a majority interest is held by members, stockholders, or partners, as applicable, who are related by blood or marriage, as defined by the Secretary, such individuals are or will become either owners or operators of not larger than a family farm and at least one such individual is an operator of not larger than a family farm), and (4) be unable to obtain sufficient credit elsewhere to finance their actual needs at reasonable rates and terms, taking into consideration prevailing private and cooperative rates and terms in the community in or near which the applicant resides for loans for similar purposes and periods of time. In addition to the foregoing requirements of this subsection, in the case of cooperatives, corporations, and partnerships, the family farm requirement of clause (3) shall apply as well to the farm or farms in which the entity has an ownership and operator interest and the requirement of clause (4) shall apply as well to the entity.".

SEC. 102. LOANS FOR RECREATIONAL AND POLLUTION ABATEMENT FACILITIES.—Section 304 of the Consolidated Farm and Rural De-

velopment Act is amended by adding at the end thereof a new subsection (c) as follows:

"(c) Loans may also be made or insured under this subtitle to any farm owners or tenants without regard to the requirements of clauses (1), (2), and (3) of section 302 for the purposes of meeting Federal, State, and local requirements for agricultural, animal, or poultry waste pollution abatement and control facilities, including the construction, modification, or relocation of farm or other structures necessary to comply with such pollution abatement requirements.".

SEC. 103. LIMITATIONS ON LOANS UNDER SECTIONS 302, 303, 304, AND 310D OF THE ACT.—Section 305 of the Consolidated Farm and Rural Development Act is amended by striking out the first sentence and inserting in lieu thereof the following: "The Secretary shall make or insure no loan under sections 302, 303, 304, and 310D of this title which would cause the unpaid indebtedness under such sections to any one borrower to exceed the lesser of (a) the value of the farm or other security, or (b) 200,000, or in the case of a guaranteed loan to exceed $300,000.".

SEC. 104. WATER AND WASTE FACILITY GRANTS.—Section 306(a)(2) of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out in the first sentence the figure "$300,000,000" and inserting in lieu thereof "$400,000,000"; and

(2) striking out in the second sentence "50 per centum" and inserting in lieu thereof "75 per centum".

SEC. 105. RURAL AREAS.—Section 306(a)(7) of the Consolidated Farm and Rural Development Act is amended by striking out ", the Commonwealth of Puerto Rico and Virgin Islands,".

SEC. 106. INTEREST RATES FOR LOANS UNDER SUBTITLE A. DELETION OF ESCROW AGENT PROVISION.—Section 307 is amended by—

(1) amending subsection (a) to read as follows:

"(a)(1) The period for repayment of loans under this subtitle shall not exceed forty years.

"(2) Except as otherwise provided in paragraphs (3), (4), and (5) of this subsection, the interest rate or rates or loans under this subtitle shall be as determined by the Secretary, but not in excess of the current average market yield on outstanding marketable obligations of the United States with remaining periods of maturity comparable to the average maturities of such loans, adjusted to the nearest one-eighth of 1 per centum, plus not to exceed 1 per centum, as determined by the Secretary.

"(3) The interest rate on loans (other than guaranteed loans) under section 310D, and loans (other than guaranteed loans) to public bodies or nonprofit associations (including Indian tribes on Federal and State reservations and other federally recognized Indian tribal groups) for water and waste disposal systems and essential community facilities shall be as determined by the Secretary, but not in excess of 5 per centum per annum.

"(4) The interest rate on loans under sections 304(b), 306(a)(1), or 310B (other than guaranteed loans and loans as described in paragraph (3) of this subsection) shall be as determined by the Secretary, but not less than a rate determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States comparable to the average maturities of such loans, adjusted in the judgment of the Secretary of the Treasury to provide for a rate comparable to the rates prevailing in the private market for similar loans and considering the Secretary's insurance of the loans, plus an additional charge, prescribed by the Secretary, to cover the Secretary's losses and cost of administration, which charge shall be deposited in the Rural Development Fund: *Provided*, That the rate so prescribed shall be adjusted to the nearest one-eighth of 1 per centum.

"(5) The interest rate on any loan made under this subtitle as a guaranteed loan shall be at such rate as may be agreed upon by the borrower and the lender, but not in excess of a rate as may be determined by the Secretary.".

(2) redesignating subsection (b) as subsection (c); and

(3) inserting a new subsection (b) to read as follows:

"(b) The borrower shall pay such fees and other charges as the Secretary may require, and borrowers under this title shall prepay to the Secretary such taxes and insurance as the Secretary may require, on such terms and conditions as the Secretary may prescribe."

SEC. 107. REPEAL OF LIMITATION ON OUTSTANDING LOANS UNDER THE AGRICULTURAL CREDIT INSURANCE FUND.—(a) Section 309(f) of the Consolidated Farm and Rural Development Act is amended by changing the period at the end of the first sentence in paragraph (1) to a semicolon and striking out the second sentence therein which reads: "The aggregate of the principal of such loans made and not disposed of shall not exceed $500,000,000 at any one time;".

(b) Section 328 of the Consolidated Farm and Rural Development Act is amended by striking out ": *Provided*, That loans made under this section shall not be included in applying the $500,000,000 limitation in section 309(f)(1)".

SEC. 108. PURCHASE BY THE SECRETARY OF GUARANTEED PORTION OF LOANS.—The Consolidated Farm and Rural Development Act is amended by adding immediately after section 309A a new section 309B to read as follows:

"SEC. 309B. The Secretary is authorized to purchase, on such terms and conditions as the Secretary may deem appropriate, the guaranteed portion of any loan guaranteed pursuant to this title: *Provided*, That the Secretary may not pay for any such guaranteed portion of a loan an amount in excess of the principal balance due and accrued interest on the guaranteed portion of the loan. The Secretary may use for such purchases funds from the Rural Development Insurance Fund in respect of rural development loans as defined in section 309A(a) and funds from the Agriculture Credit Insurance Fund in respect of all other loans under this title.".

SEC. 109. EXEMPTION OF SMALL BUSINESS PROJECTS FROM RESTRICTIONS ON RURAL INDUSTRIAL ASSISTANCE.—Section 310B(d) of the Consolidated Farm and Rural Development Act is amended by—

(1) inserting in each of paragraphs (1), (2), and (3) immediately after "312(b)" wherever the term appears therein the following: ", except for cases where such assistance does not exceed $500,000 or for cases where direct employment will be increased by not more than twenty employees,"; and

(2) in paragraph (3) striking out the number "60" and inserting in lieu thereof of the number "30".

SEC. 110. LOW-INCOME FARM OWNERSHIP LOAN PROGRAM.—The Consolidated Farm and Rural Development Act is amended by adding immediately after section 310C the following new section:

"SEC. 310D. (a) The Secretary may make and insure loans for any of the purposes referred to in clauses (1) through (5) of section 303(a) to farmers and ranchers in the United States, who (1) are citizens of the United States, (2) meet the requirements of clauses (2) through (4) of section 302, (3) are unable to obtain sufficient credit under section 302 to finance their actual needs, (4) are owners or operators of small or family farms (including new owners or operators) and are farmers or ranchers with a low income, and (5) demonstrate a need to maximize their income from farming or ranching operations. The Secretary may also make such loans to any farm cooperative, private domestic corporation, or partnership which is controlled by farmers and ranchers and which is engaged primarily and directly in farming or ranching activities in the United States if all of its members, stockholders, or partners, as applicable, are citizens of the United States and the entity and all such members, stockholders, or partners meet the requirements of clauses (2) through (5) of the preceding sentence.

"(b)(1) Principal of and interest on each loan made or insured under this section shall be repayable over a period not in excess of forty years.

"(2) Each loan made or insured under this section shall be repayable in such installments as the Secretary determines meets the requirements of the following repayment schedule:

"(A) For the first annual installment, payment shall be made of 10 per centum of the principal of and interest on the loan which would be due for payment based upon the normal amortization of the loan.

"(B) For each of the succeeding annual installments, up to and including the tenth annual installment, payment shall be made of a per centum equal to ten times the number of the annual installment multiplied by the principal of and interest on the loan which would be due for payment based upon the normal amortization of the loan.

"(C) During the remainder of the repayment period of the loan, payments shall be made in such installments as the Secretary determines will result in the payment at the end of such repayment period of all principal of and all interest on the loan including all principal of and all interest on the loan deferred from payment under the provisions of subparagraphs (A) and (B) and all interest thereon.".

SEC. 111. ELIGIBILITY FOR OPERATING LOANS.—Section 311(a) of the Consolidated Farm and Rural Development Act is amended to read as follows:

"(a) The Secretary is authorized to make and insure loans under this subtitle to farmers and ranchers in the United States, and to farm cooperatives, private domestic corporations, and partnerships controlled by farmers and ranchers and engaged primarily and directly in farming or ranching in the United States, subject to the conditions specified in this section. To be eligible for such loans, applicants who are individuals, or in the case of cooperatives, corporations, and partnerships, members, stockholders, and partners, as applicable, holding a majority interest in such entity, must (1) be citizens of the United States, (2) have either training or farming experience which the Secretary determines is sufficient to assure reasonable prospects of success in the proposed farming operations, (3) be or will become operators of not larger than family farms (or in the case of cooperatives, corporations, and partnerships in which a majority interest is held by members, stockholders, or partners, as applicable, who are related by blood or marriage, as defined by the Secretary, such individuals are or will become either owners or operators of not larger than a family farm and at least one such individual is an operator of not larger than a family farm), and (4) be unable to obtain sufficient credit elsewhere to finance their actual needs at reasonable rates and terms, taking into consideration prevailing private and cooperative rates and terms in the community in or near which the applicant resides for loans for similar purposes and periods of time. In addition to the foregoing requirements of this subsection, in the case of cooperatives,

corporations, and partnerships, the family farm requirement of clause (3) shall apply as well to the farm or farms in which the entity has an operator interest and the requirement of clause (4) shall apply as well to the entity.".

SEC. 112. LIMITATION ON FARM OPERATING LOANS.—Section 313 of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out at the end of clause (1) "$50,000," and inserting in lieu thereof "$100,000 or, in the case of a guaranteed loan, to exceed $200,000, or",

(2) striking out the comma following the world "program" and inserting a period in lieu thereof, and

(3) striking out the balance of the sentence.

SEC. 113. FARM OPERATING GUARANTEED LOAN INTEREST RATES; CONSOLIDATION AND RESCHEDULING OF LOANS.—Section 316 of the Consolidated Farm and Rural Development Act is amended to read as follows:

"SEC. 316. (a) (1) The Secretary shall make all loans under this subtitle upon the full personal liability of the borrower and upon such security as the Secretary may prescribe.

"(2) Except as provided in paragraphs (3) and (4) of this subsection, the interest rate on loans under this subtitle shall be as determined by the Secretary, but not in excess of the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, adjusted to the nearest one-eighth of 1 per centum, plus not to exceed 1 per centum per annum as determined by the Secretary.

"(3) The interest rate shall be as determined by the Secretary but not in excess of 3 per centum per annum on loans (other than guaranteed loans) to farmers and ranchers in the United States who (1) are citizens of the United States, (2) meet the requirements of clauses (2) through (4) of section 311(a), (3) are unable to obtain sufficient credit under section 311(a) to finance their actual needs, (4) are owners or operators of small or family farms (including new owners or operators) and are farmers or ranchers with a low income, and (5) demonstrate a need to maximize their income from farming or ranching operations. The Secretary may also make such loans to any cooperative, private domestic corporation, or partnership which is engaged primarily and directly in farming or ranching activities in the United States, if all of its members, stockholders, or partners, as applicable, are citizens of the United States and the entity and all such members, stockholders, and partners meet the requirements of clauses (2) through (5) of the preceding sentence.

"(4) The interest rate on guaranteed loans made under this subtitle shall be at such rate as may be agreed upon by the borrower and the lender, but not in excess of a rate as may be established by the Secretary.

"(b) Loans made under this subtitle shall be payable in not to exceed seven years. The Secretary may consolidate or reschedule outstanding loans for payment over a period not to exceed seven years from the date of such consolidation or rescheduling, and the amount of unpaid principal and interest of the prior loans so consolidated or rescheduled shall not create a new charge against any loan levels authorized by law. A new loan may be included in a consolidation. Such new loan shall be charged against any loan level authorized by law. The interest rate on such consolidated or rescheduled loans, other than guaranteed loans, may be changed by the Secretary to a rate not to exceed the rate being charged for loans made under this subtitle at the time of the consolidation or rescheduling. Guaranteed loans under this subtitle that may be consolidated or rescheduled for payment shall bear interest at such rate as may be agreed upon by the borrower and the lender, but not in excess of a rate as may be established by the Secretary.".

SEC. 144. TECHNICAL AMENDMENTS TO EMERGENCY LOAN PROVISIONS.—Section 321 of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out in subsection (a) the language ", Puerto Rico, and the Virgin Islands";

(2) amending subsection (b) to read as follows:

"(b) The Secretary shall make loans in any such area designated by the Secretary in accordance with subsection (a) hereof and in any area designated as a major disaster or emergency by the President pursuant to the provisions of the Disaster Relief Act of 1974 (1) to established farmers, ranchers, or persons engaged in aquaculture who are citizens of the United States and (2) to farm cooperatives, private domestic corporations, or partnerships in which a majority interest is held by members, stockholders, or partners who are citizens of the United States if the cooperative, corporation, or partnership is engaged primarily in farming, ranching, or aquaculture: *Provided*, That they have experience and resources necessary to assure a reasonable prospect for successful operation with the assistance of such loan and are unable to obtain sufficient credit elsewhere to finance their actual needs at reasonable rates and terms, taking into consideration prevailing private and cooperative rates and terms in the community in or near which the applicant resides for loans for similar purposes and periods of time. The provisions of this subsection shall not be applicable to loan applications filed prior to July 9, 1975.".

SEC. 115. DELEGATION OF REQUIREMENT FOR EMERGENCY LOAN INTEREST RATES TO BE BASED ON SMALL BUSINESS ADMINISTRATION LOAN RATES.—Section 324 of the Consolidated Farm and Rural Development Act is amended, effective October 1, 1978, by deleting subsection (b) and redesignating subsection (c) as a new subsection (b).

SEC. 116. DELEGATION OF AUTHORITY TO COMPROMISE CLAIMS; AUTHORITY IN AREAS THAT HAVE CEASED TO BE RURAL.—Section 331 of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out in clause (a) the words "and in Puerto Rico and the Virgin Islands";

(2) striking out in clause (d) "$15,000" and inserting in lieu thereof "$25,000";

(3) striking out the period at the end of clause (i) and inserting in lieu thereof "; and"; and

(4) adding at the end thereof a new clause (j) to read as follows:

"(j) notwithstanding that an area ceases, or has ceased, to be 'rural', in a 'rural area', or an eligible area, make loans and grants, and approve transfers and assumptions, under this Act on the same basis as though the area still was rural in connection with property securing any loan made, insured, or held by the Secretary under this Act or in connection with any property held by the Secretary under this Act.".

SEC. 117. MORATORIUM ON LOANS AND POLICY ON FORECLOSURES.—The Consolidated Farm and Rural Development Act is amended by adding a new section 331A to read as follows:

"SEC. 331A. In addition to any authority under existing law which the Secretary may have, during any time that any direct or insured loan is outstanding under this title, the Secretary is authorized under regulations prescribed by him to grant a moratorium upon the payment of interest and principal on such loan for so long a period as he deems necessary, upon a showing by the borrower that due to circumstances beyond his control, he is temporarily unable to continue making payments of such principal and interest when due without unduly impairing the standard of living of the borrower. The Secretary is also authorized to forego foreclosure on loans made under this title under circumstances set forth in this section.".

SEC. 118. APPEAL AND REVIEW OF COUNTY COMMITTEE DETERMINATIONS; EXEMPTION OF LOANS FROM GRADUATION REQUIREMENTS.—Section 333 of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out the semicolon at the end of subsection (b) and inserting in lieu thereof the following: ": *Provided*, That the Secretary may provide a procedure for appeal and review of any determination relating to a certification or recommendation required to be made by the county committee, and for reversal or modification thereof should the facts warrant such action;";

(2) inserting in subsection (c) "except for guaranteed loans," immediately before "an agreement by the borrower"; and

(3) inserting in subsection (c) after "private credit source" the following: "(or, in the case of a borrower under section 310D, the borrower may be able to obtain a loan under section 302 and, in the case of a borrower under section 316(a)(3), the borrower may be able to obtain a loan under section 311(a))".

SEC. 119. DEFINITION OF "UNITED STATES" AND "STATE".—Section 343 of the Consolidated Farm and Rural Development Act is amended by striking out "and" immediately before "(5)" and inserting the following before the period at the end of the section: ", and (6) the terms 'United States' and 'State' shall include each of the several States, the Commonwealth of Puerto Rico, and the Virgin Islands".

SEC. 120. AUTHORIZATION OF INSURED AND GUARANTEED LOANS AMOUNTS; PARTICIPATION BY OTHER DEPARTMENTS AND AGENCIES.—The Consolidated Farm and Rural Development Act is amended by adding at the end thereof new sections 346 and 347 to read as follows:

"SEC. 346. Effective October 1, 1979, the aggregate principal amount of loans made, insured, or guaranteed for the programs authorized under each subtitle of this Act for each two-year period thereafter shall not exceed such amounts as may be authorized by law after the date of enactment of this section: *Provided*, That there shall be two amounts so established for each of such programs and for any maximum levels set forth in appropriation Acts for the programs authorized in this title, one against which direct and insured loans shall be charged and the other against which guaranteed loans shall be charged, with or without authority for the Secretary to transfer amounts between such categories within a given program for more effective program administration purposes.

"SEC. 347. Notwithstanding any other provision of law, departments, agencies, and executive establishments of the Federal Government may participate and provide financial assistance jointly with the Secretary to any applicant to whom assistance is being provided under any program administered by the Farm and Rural Development Administration. Participation by any other department, agency, or executive establishment shall be only to the extent authorized for, and subject to the authorities of, such other department, agency, or establishment, except that any limitation on joint participation is superseded by this Act.".

Mr. JONES of Tennessee (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered

as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

COMMITTEE AMENDMENT

The Chairman. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Page 19, line 22, strike out "Farm and Rural Development Administration" and insert in lieu thereof "Farmers Home Administration".

The committee amendment was agreed to.

AMENDMENT OFFERED BY MR. GLICKMAN

Mr. GLICKMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GLICKMAN: On page 8 after line 19 insert the following:

"SEC. 109B. The Consolidated Farm and Rural Development Act is amended by adding at the end of section 310C the following:

"(c) Notwithstanding any other provision of law, any person who would be eligible for a guarantee of a mortgage under section 1709(b) of title 12, United States Code, shall be eligible for a loan guarantee under section 1487 of title 42, United States Code, under terms and restrictions no less favorable to the borrower and in amounts at least equal to those provided under said section 1709(b) of title 12. *Provided however*, That such guarantee shall apply to a mortgage on a dwelling in a "rural area", as defined herein."

Mr. GLICKMAN. Mr. Chairman, this amendment, which is offered by myself and by my colleague, the gentleman from Iowa (Mr. SMITH), reflects a piece of legislation which the gentleman from Iowa has offered in this Congress dealing with the issue of rural housing. That legislation is cosponsored by over 30 Members.

This amendment is intended to provide equal access to comparable housing programs for both rural and urban Americans.

HUD operates its 203(b) mortgage guarantee program with only a few exceptions in highly urbanized areas. A similar program is available to rural residents under the Farmers Home Administration. But currently the differences between the HUD and Farmers Home Administration guarantee programs are too numerous to be ignored.

This reflects the fact that primarily the HUD loans go to urban Americans and reflects the fact that rural Americans are not entitled to housing guarantees or direct loans under the same circumstances. This amendment is intended to offer some equity to correct that problem.

The HUD program has no income cap on eligibility. The Farmers Home Administration program does. The HUD program insures 100 percent of eligible loans, but the FmHA program insures only 90 percent. The HUD program has a $60,000 mortgage limit: the farmers home mortgage limit is only $33,000.

The HUD program does not provide a "credit elsewhere" test, but the farmers credit program does. The HUD insurance premium is 0.5 percent of the outstanding principal balance; the FmHA fee is 1 percent of the loan principal times the percentage of the guarantee.

This amendment that we propose guarantees that we treat no less favorably rural housing under the farm home mortgage guarantee program than we do urban housing under the HUD mortgage guarantee program. This is a minor change but an important one.

This would show that Congress has not put rural America on the back burner, and that we still believe in equal treatment for all Americans.

Mr. Chairman, I yield to the author of the bill, the Member who has led the effort on this piece of legislation, my colleague, the gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Mr. Chairman, I want to thank the gentleman for yielding and for offering this amendment and sponsoring it in the committee.

I want to reiterate, that 70 percent of the substandard housing in the United States is in cities of 10,000 population or less and in rural areas. Yet HUD has put only 1½ percent of its money there.

If the Farmers Home Administration does not guarantee bank loans in those areas, there is not going to be Government housing activity in those areas. I think HUD has historically ignored its responsibility.

For many years HUD just arbitrarily said it would not provide housing for cities of 10,000 or less, so Congress finally passed a law that said the Farmers Home Administration would accept that responsibility. However, since that time, there have been limits applied to the Farmers Home Administration authority so it really cannot adequately serve the area.

I believe the thrift institutions ought to also provide more loans. But we know what is happening there. The thrift institutions go into the rural areas and set up an office to pick the rural savings up and take it back to the cities to loan. They not only red line rural areas but they even soak up and divert the money which is accumulated in those areas. They do not loan the money in the rural areas. They are soaking up the money out there for the HUD urban programs and also even send some of it clear out of the State in large blocks through the Home Loan Bank. Government bonds are also promoted which soaks up money which supports Government programs that do not treat rural areas equally.

Mr. Chairman, the only hope we have for more adequate rural housing is for these FmHA guarantees. I think it is a matter of simple fairness, and this is also an important credit matter, because the banks in the rural areas are already short of credit as everybody says, and if they cannot secure bank guarantees for housing loans, they cannot make long-term housing loans because they cannot market the paper when they need funds to make regular loans for other purposes. If they can secure a guarantee for the loans, they can sell or discount the paper and will not be so reluctant to make the long-term housing loan.

Also, the use of a bank guarantee is the cheapest way to increase and upgrade housing in rural areas, because when someone moves into a better house as a result of securing a bank guarantee, they vacate a substantial older home that someone without a home or with a substandard unit can move into. It is the best way to upgrade the area of the country which has 70 percent of the substandard housing in the United States.

Mr. Chairman, I commend the gentleman for offering this amendment.

Mr. GLICKMAN. Mr. Chairman, in conclusion, I think the purpose of this amendment is to insure the people in rural areas have the same access to the same statutory criteria for housing that people in urban areas do. The amendment is no more and no less.

A lot of people will say this will vastly expand the power and ability of the Farmers Home Administration to operate under an already shortage of manpower. My response is that the equity of the issue requires that people in rural areas be subject to the same eligibility requirements for housing as people in urban areas.

Inasmuch as my colleague, the gentleman from Iowa (Mr. SMITH) indicated that much of the substandard housing is in the rural areas, we owe it to rural America to provide that kind of opportunity.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Louisiana.

Mr. HUCKABY. I thank the gentleman for yielding.

Mr. Chairman, my friend, the gentleman from Kansas, might be aware that the Farmers Home Administration has a 502 section which allows for lower income areas and also an interest credit program.

The CHAIRMAN. The time of the gentleman from Kansas (Mr. GLICKMAN) has expired.

(On request of Mr. HUCKABY and by unanimous consent, Mr. GLICKMAN was allowed to proceed for 2 additional minutes.)

Mr. HUCKABY. If the gentleman will yield further, the program the gentleman is inquiring about here and is actually presenting his case on is the section of the guaranteed loans. I would like to point out to the gentleman from Kansas that the Office of Management and Budget cut this program back on the Farm Home Administration. This program exists today. But the Office of Management and Budget decided this was not needed for the rural areas. I am extremely happy that the gentleman is addressing this, and maybe the Office of Management and Budget will realize we do not have second class citizens in rural America and they are deserving of adequate housing just like our city cousins.

I think this is a very appropriate and a very timely amendment, and I think we should get on with trying to provide this guaranteed program for all people in rural areas.

Mr. GLICKMAN. I thank the gentleman for his comments.

Mr. JONES of Tennessee. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, my good friend, the gentleman from Kansas (Mr. GLICKMAN)

has made a good argument for his amendment, as has my good friend, the gentleman from Iowa (Mr. SMITH). There may be some merit in the proposal. But my point is and my opposition to the amendment emanates from the fact that we have had no hearings on this particular amendment whatsoever. We should have more input so that we know what we are doing with this amendment and what the impact will be.

Someone made a reference to the fact that they did not want to put rural America on the back burner. I would be one of the first to stand up and say, "I do not want rural America put on the back burner either." But I want to be sure that we are doing that which is right and that which we can live with.

Mr. Chairman, I would like to point out to the Members of this body that if this amendment were adopted there will be an estimated $5 million in additional lending programs in the next 5 years for housing loan guarantees. The proposal has a lot of inequities in it that I feel we should correct before enacting. It is not compatible with the Farmers Home Administration programs. Loans would not be limited to housing that is adequate but modest as it is now. I think we need to oppose the amendment today because it encompasses a whole new group of borrowers who have higher incomes. It changes the whole concept of housing programs so far as the Farmers Home Administration is concerned. It would require the Farmers Home Administration to guarantee loans to borrowers that are eligible for HUD insured loans.

Mr. Chairman, I ask that the amendment be defeated.

Mr. FOLEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I would like to underscore the arguments made by the distinguished chairman of the subcommittee, the gentleman from Tennessee (Mr. JONES). This amendment has not been the subject of hearings in the Committee on Agriculture. There is some divided jurisdiction between this committee and the Committee on Finance, Banking and Urban Affairs.

Beyond that question, we have a very substantial impact from this amendment, if it is adopted.

To repeat the statement that was made by the gentleman from Tennessee (Mr. JONES) a few moments ago, it is estimated that the loan activity under this program would be $5 billion within 5 years.

Mr. Chairman, if we are going to entertain programs of that size and dimension, they should be the result of consideration following hearings, when the ramifications of this program can be fully explored. To come on with a floor amendment which simply requires the FmHA to adopt the same standards or programs on housing as are covered by section 203 of the Housing Act under HUD, without an opportunity to examine whether or not those are entirely appropriate standards, seems to me to be an ill-considered judgment on the part of the House.

The Farm Credit Administration has expressed some grave reservation about the adoption of this amendment. It is opposed by the Department of Agriculture and the Farmers Home Administration. The program that is currently in existence for FmHA loans for rural housing concentrates on low and moderate income. This program would considerably raise the level of income eligible for housing assistance and would distort the existing priorities of the program at the present time.

Again, whether it is wise to do that is a judgment that should follow more extensive hearings than have been held on this particular proposal. As a matter of fact, no hearings have been held at all.

Mr. Chairman, I am concerned that we are being asked to make a very quick judgment on this amendment, without adequate consideration. The impacts are very large in terms of the housing program.

We hear constant complaints throughout the country today that Farmers Home Administration does not have adequate personel to serve the existing housing program; and before that problem is resolved, we are asked to put a very substantial additional program into effect, really overnight, without sufficient resources in terms of personnel to carry it out efficiently and effectively.

Mr. Chairman, I hope that the Members will, at this juncture at least, oppose this amendment.

Mr. SMITH of Iowa. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I would like to speak to the objections expressed, which I was very much surprised at.

It has been said that there have not been any hearings. Let me tell the Members how some of the restrictions got into the law. They were adopted as a part of a bill last fall, in a conference report from the Committee on Banking, Finance and Urban Affairs.

There were no hearings. People from the administration went over to the conference and asked them to put restrictions in, curbing the ability of the Farmers Home Administration to make housing guarantees. There were no hearings on it.

The sponsors of this amendment asked for hearings on this amendment. We have discussed it enough, I think, so that it is obvious on the face of it that the situation is patently unfair to rural America. We have already had more hearings right here today than they had when they put the restrictions into the bill. Consequently, I do not think that that is a valid argument.

It was said that this amendment's application is not limited to cities under 10,000 and rural areas, but I think the last paragraph meets that objection.

Mr. Chairman, it is said that it will be a $5 billion guarantee program. That does not mean it will cost $5 billion. It will cost almost nothing. As a matter of fact, there is no way by which we can secure more housing in the area of the country that has 70 percent of the substandard housing of the United States cheaper than we can by making guarantees to rural banks. If applicants can secure a guarantee, the banks will make more loans to the rural people who want to buy a new house or a substantial older house, and then those people will vacate a substantial older house for somebody else to move into. That is the only practical way in which we will be able to rapidly upgrade the substandard housing in rural America.

Mr. Chairman, it is not surprising that the administration is opposed to it. They have been opposed to a lot of things down there at FmHA, some of which I assume is dictated by OMB. If we limit FmHA activity to what the Farmers Home Administration wants to get get around to administering, we will be waiting for a lot of things. I do not think we ought to go by that.

Mr. Chairman, what is really being said is that HUD is not doing the job and that the Farmers Home Administration would like the Congress to set up the restrictions so that they will have an excuse for not doing the job. If they, FmHA, cannot do the job, then we should seriously consider getting the Small Business Administration into it. We finally had to get them to make loans to farmers. I doubt if FmHA or OMB would support this bill if SBA were not recently authorized over their objections to provide service to farmers.

Mr. Chairman, those people who do not want to do the job should seek to give the responsibility to someone else and then we will get the Small Business Administration into it.

What they are saying is that they do not want somebody else to provide equal housing opportunities, but they do not want to do the job either. It is just patently unfair.

Mr. Chairman, I think that if we really want to do something for the rural banks so that they can extend more regular operating loans to farmers, then we should make some housing guarantees available to them so they can borrow on or discount that paper and get the money to make the farm loans that they need to make. We should take action to see that that is done.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Louisiana.

Mr. HUCKABY. Mr. Chairman, the gentleman in the well mentioned a point which is very dear to my heart.

Today we have the Small Business Administration making loans to many farmers. We have the Farmers Home Administration lending money for houses. Should we not possibly have an organization at this time for the home building industry just dealing with that industry, an organization for farmers dealing with that industry, and an organization for small businessmen dealing with that industry?

I hear so many complaints about people. They say, "Well, we are not set up for that. We do not know how to function in that area."

Mr. SMITH of Iowa. We single-tracked housing for years, and HUD

arbitrarily said, "We do not want to be bothered with any applicant who lives in a city of less than 10,000," so that is the reason we finally got Farmers Home Administration into the act. We moved to FmHA, when HUD did not show an ability to do so or a desire to guarantee loans in rural areas and smaller cities.

Mr. HUCKABY. It seems to me that we should go back and demand that the agency that should do the job perform in this area.

Mr. SMITH of Iowa. I think the Farmers Home Administration is now set up to do the job if they would just do it. They have people out there who can work with the banks. The least amount of administration, to secure an additional housing unit can be accomplished through a bank guarantee. It is a lot less work to get a house built that way and less Government supervision is required than under a direct loan program. I am not against direct loans, I am for that, but we can secure a lot more housing in rural America with the same effort and less cost under a bank guarantee program.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Mr. Chairman, I agree with the thrust of the remarks made by the gentleman in the well. We had a great deal of difficulty, I remember, during the drought. We had a serious drought in Illinois, and there were two different sets of standards for the communities of over and under 10,000 population. It was administered. as I recall, by the Economic Development Administration, for the communities over 10,000. For the smaller communities the Farmers Home Administration was the administrator. The requirements were much more restrictive to obtain assistance. The EDA was much more liberal and much less restrictive. To try to get emergency drought assistance to develop wells, for instance, or to dig wells, the smaller communities came under the Farmers Home Administration which had these very cumbersome restrictions. It was ridiculous to me that we had so many more problems with small communities than we had with those of over 10,000 population.

Mr. SMITH of Iowa. That is just another example. They put a 20-percent restriction, which excluded a lot of applicant cities because they did not want the business. We corrected that with legislation.

Mr. WATKINS. Mr. Chairman, I move to strike the last word, and I rise in support of the amendment.

Mr. WATKINS. Mr. Chairman, my colleagues, before I asked to become a Congressman I was a homebuilder in rural areas of Oklahoma. As my friend from Iowa stated, I witnessed and I worked with people who had at least 70 percent of their homes in a dilapidated condition. I for one, through my experience in trying to build homes in rural Oklahoma, in rural America, realized that we do not have an equity program in homeownership in this country.

It deeply concerns me if this body accepts our citizens in rural areas as second-class citizens. Again, as my good friend from Iowa has pointed out, this is a guaranteed loan, not a direct Government loan. The Farmers Home Administration has always prided itself on the fact that it did not lose money. I think it would be far better if it lost a few dollars trying to serve the people who need the help.

I would like to address briefly some of the programs of the Farmers Home Administration. The 502 program allows housing to lower income groups, but very few people can qualify for it. FmHA has an interest credit program to serve the lower income people, but very few people can qualify for it. They do not have a program, and it is nearly impossible for the rural citizens to be able to get adequate financing, for the moderate-income home buyer. All this amendment does, if I understand the gentleman from Kansas correctly, is to allow our citizens in rural areas of this country to have the same opportunity and qualifications for a home as do those in the urban areas. I do not think that is asking too much.

Another thing the Farmers Home Administration has done is that we have limited them to certain groups they are trying to serve. I have literally worked on these problems for a number of years and finally we received the opportunity to serve citizens in communities up to 20,000.

We talk about FmHA personnel and I would like to address that problem. One point is we are trying to revamp the Farmers Home Administration delivery system in this country to relieve them of some of the least utilized programs so they can better deliver these agricultural programs to the people.

Let me tell the Members this. Some of the personnel in the Farmers Home Administration in this country just need to be better organized because some of them are not doing the job they are paid to do, to deliver these services to the people.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. WATKINS. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Chairman, is the gentleman aware of the fact that at this time the loan load that is being carried by the people in the Farmers Home Administration is so great they are not able to do the work they need to do? I presume then the gentleman would support the efforts to try to get them personnel, if this is indeed expanded as proposed in the amendment.

Mr. WATKINS. I am aware of that. In Oklahoma we have some county supervisors making 125 loans a year and others making 4. That is not just a discrepancy in the program but it is just a discrepancy in those willing to get up and do the job for their people.

I have worked with them for 12 years in trying to get a program designed to be delivered to the people of our area. I think the Farmers Home does a tremendous job. I think they need help, and I am willing to work with them to try to get them additional personnel. But that does not mean we should not be able to give them an opportunity to be able to provide a home loan program equal to our city cousins in the major urban areas. What I would like to see us do is to adopt this amendment giving our people, the rural citizens, the same opportunity that city residents have today.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas (Mr. GLICKMAN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LAGOMARSINO

Mr. LAGOMARSINO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LAGOMARSINO: Page 20, after line 4, insert the following new section:

SEC. 122. Use of Qualified Personnel by the Department of Agriculture. It is the sense of Congress that, in carrying out the provisions of the Consolidated Farm and Rural Development Act, the Secretary of Agriculture should insure—

(1) that only officers and employees of the Department of Agriculture who are adequately prepared to understand the particular needs and problems of farmers in an area be assigned to such area; and

(2) that a high priority is placed on keeping existing farm operations operating.

Mr. LAGOMARSINO. Mr. Chairman, this amendment Mr. GILMAN and I are offering addresses a singularly onerous problem which farmers in Mr. GILMAN'S congressional district in New York have experienced.

However, the same complaint is widely heard in a multitude of congressional districts that Farmers Home Administration personnel are not adequately prepared or trained to deal with those particular problems endemic to vastly differing farming communities throughout this Nation.

In 1976, a compendium of testimony prepared jointly by Agricultural Subcommittees of both the House and Senate is laced with statements attesting to the inability of farmers seeking loan assistance.

I am sure that many of my colleagues have had relayed to them from farmers in their districts who have applied for FmHA assistance, a myriad of cases documenting FmHA mismanagement including personnel shortages, lack of personnel training, and complex regulations which intimidate and often do a stinging disservice to potential applicants and those who are granted loans.

Farmers, and representatives from the county extension service in Mr. GILMAN'S district have on several occasions come to Washington to testify before appropriate congressional committees on the lack of effectiveness of the FmHA loan programs. They invariably report that FmHA personnel are inadequately prepared to understand and deal with the problems encountered by, for example, the many vegetable farmers in Mr. GILMAN'S area.

According to the Orange County, N.Y., cooperative extension office:

The lack of adequate understanding of this type of agriculture, that FmHA had a responsibility to service has resulted in poor loan programs based on internal interpretation which have served to increase the risk of loss of FmHA loan moneys thru some farms being forced out of business. Shortsighted emer-

gency loan policies have intentionally minimized help to the large family farms, forcing unsound credit situations upon them and in some ways making their recovery from the original disaster more difficult.

Moreover, we have found that FmHA places its "highest priority" on the security of FmHA loan funds. While I am all for the security of these funds, FmHA's prevailing philosophy places this concern in an either-or relationship with the concept of providing the assistance FmHA was designed to provide needy farmers.

Farmers Home Administration should not be characterized by a parsimonius callousness that caused a group of Minnesota farmers to declare:

The farmers home administration resists making loans for all purposes including the disaster programs which are so important to us.

Staff personnel dealing with farmers who rightfully seek financial assistance from FmHA should possess not just general agricultural expertise, but a familiarity with the unique problems encountered by the farm operations prevalent in those areas to which FmHA personnel are assigned.

FmHA personnel should also reflect a concern not just for protecting administration money, but for coupling this concern with the intention to place a high priority on keeping existing farm operations operating.

The amendment we offer is part of earlier legislation, H.R. 8141, Mr. GILMAN, I and others have introduced addressing shortcomings in the FmHA loan program.

A USDA report on that legislation contained the following analysis of that section of the bill which I now offer as an amendment to H.R. 11504:

Section 3 of H.R. 8141 expresses the "sense of Congress" relative to the Secretary's responsibility for ensuring that only qualified employees who understand the needs and problems of farmers be assigned to administer the emergency loan program, and that high priority be given to keeping farmers in business. We concur with this philosophy and recognize the need to employ and train additional qualified personnel for these purposes.

Accordingly, I urge my colleagues to vote for passage of this amendment that I am offering.

PARLIAMENTARY INQUIRY

Mr. FOLEY. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. FOLEY. Mr. Chairman, what is the pending amendment? The gentleman offered the first of several amendments. Will the Clerk rereport the pending amendment?

The CHAIRMAN. Without objection, the Clerk will report the amendment again.

There was no objection.

The Clerk rereported the amendment offered by the gentleman from California (Mr. LAGOMARSINO).

Mr. FOLEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to state, speaking for this side of the aisle, we have no objection to this particular amendment. It restates what I think is the intention of the FmHA in operating their programs. I do not think anyone would take exception to this amendment. I have some reservation on some of the other amendments to which the gentleman is addressing himself, but this one is not objected to on this side of the aisle.

Mr. MADIGAN. Mr. Chairman, I rise in support of the amendment of the gentleman from California and urge that we pass it.

Mr. Chairman, I would state, first of all, that the House should support the first amendment being offered by the gentleman from California, as the chairman of the full committee has said. It simply restates a principle that should be restated occasionally.

I would urge Members to be very attentive to the other amendments being offered by the gentleman from California, but to support this one.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. LAGOMARSINO).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BEDELL

Mr. BEDELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BEDELL:

Page 7, after line 16, amend—

SEC. 107 of H.R. 11504 by adding new subsections (c) and (d) to read as follows:

"(c) Section 309(f) of the Consolidated Farm and Rural Development Act is amended by adding a new paragraph (6) as follows:

"'(6) to pay the Secretary's costs of administration necessary to insure, make grants, service, and otherwise carry out the programs under this title not specifically covered by the Rural Development Insurance Fund of section 309A, including costs of the Secretary incidental to guaranteeing loans under this title, either directly from the Fund or by transfers from the Fund to, and merger with, any appropriations for administrative expenses.'"

"(d) Section 309A(g)(8) of the Consolidated Farm and Rural Development Act is amended to read as follows: 'to pay the Secretary's costs of administration necessary to insure, make grants, service, and otherwise carry out the programs referred to in subsection (a), including costs of the Secretary incidental to guaranteeing rural development loans under this title, either directly from the Insurance Fund or by transfers from the Fund to, and merger with, any appropriations for administrative expenses.'"

Mr. BEDELL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. BEDELL. Mr. Speaker, I have come before my colleagues today to request their support for an amendment to the Agricultural Credit Act of 1978, H.R. 11504. This amendment would allow the Farmers Home Administration (FmHA) to use program funds in order to pay salaries and expenses for hiring the additional field personnel needed to assure proper administration of the expanded FmHA program activities authorized by H.R. 11504.

H.R. 11504 is a very necessary piece of legislation. It would upgrade FmHA credit programs in recognition of the stressful economic situation now confronting many individuals, as well as rural communities, eligible for FmHA assistance. However, as H.R. 11504 increases the lending capacity of the Farmers Home Administration, it unfortunately exacerbates the increasing visible problem of expending program responsibilities administered by too few, overworked employees.

Since 1969, FmHA's outstanding loan balance has increased from $5.6 billion to $22.5 billion, a fourfold increase. The growth in annual program levels over the same period has gone from $1.4 billion to $7.2 billion, a fivefold increase. However, permanent, full-time field office employment in FmHA for the same period has only gone from 6,534 to 7,319, an increase of 12 percent. This lag in employment levels is resulting in a severe strain on FmHA's ability to function efficiently in providing the services which are the agency's fundamental purpose: processing credit applications and servicing existing loans.

While the effects of insufficient staffing have been experienced nationwide, I believe that the impact upon Iowa is especially illustrative of the problem. In Iowa, 51 FmHA county offices service 99 State counties, making loans under 12 different programs. In 1977, the Iowa FmHA lending level reached $259.2 million, up from the $8.8 million lending activity of 1961. During that time, while the workload was increasing by over 29-fold, the number of personnel available to service the programs only doubled, from 89 to 177. According to the Production Credit Association, the maximum number of loans that one loan officer and one clerk can handle is 75 to 80. However, many FmHA county offices are servicing three times that level. One office in northwest Iowa has three loan officers, one clerk, one part-time clerk and 664 loans to service.

The inability to properly service loans, particularly rural housing and farm operating loans, has resulted in a great deal of frustration for those citizens seeking assistance through the FmHA programs. It has been equally frustrating for FmHA field personnel who feel hampered in their attempts to do a good job with too little staff resources while being asked to cope with a growing number of program demands.

In my district, FmHA personnel have told me that they are able to make only one-third of the visits the regulations call for in servicing farm operating loan borrowers. It is my understanding that these visits are often made by part-time or emergency trainees who can offer little in the way of solid, professional farm management assistance. This type of assistance is especially crucial for the young, beginning farmer.

Under the rural housing program, which has grown to $89 million in Iowa during the last fiscal year, FmHA regulations call for at least three inspections by personnel during the building process. However, because of staffing shortages, one typical northwest Iowa county office reports that they are able to make only about half of the required rural housing inspections on FmHA-financed new homes. Under the remodeled homes

program, another Iowa county office claims that only 20 to 25 percent of the homes can be inspected; while a third laments that they can only get around to checking less than 1 percent of these older homes.

The programs administered by the Farmers Home Administration in the field are among the most essential of our Federal efforts to sustain and improve not only the quality of life in rural America, but also the viability of our agricultural production. I believe that ample evidence exists that it is not enough for this Congress to address the very real problems of rural America with new programs and increased lending authority. In order to be truly effective, we must go a logical step further and provide sufficient staff resources to allow for the intended, full implementation of such programs.

I therefore urge my colleagues to support the adoption of this amendment which would allow for the hiring of additional field personnel.

Mr. BEDELL. Mr. Chairman, the purpose of this amendment is to try to help put some push behind FmHA in order to get them to try to hire the personnel that they need in order to properly administer their loan program. If one is a banker, it does not make very much sense not to hire enough people so that they can check in regard to the loans they are making and check those loans to see that they are properly supervised.

I think we are sitting on a keg of dynamite with the problems FmHA has. Just this last weekend a situation has broken in the State of Iowa as to the problems we have out there in regard to loans made where inspections were not done on buildings and some of the problems occurring therein.

I find that in Iowa we now have six times the volume of loans; it has increased to that extent and they have only added 13 employees in total.

We find this all across the country. The purpose of this amendment is to say that they could use the revolving fund to hire the employees they need in order to adequately handle their loans.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I yield to the gentleman from Illinois.

Mr. MADIGAN. Mr. Chairman, I thank the gentleman from Iowa for yielding.

Mr. Chairman, I rise in support of the amendment of the gentleman from Iowa and tell the members of the committee that one of the first things I did here as a freshman Member of Congress was to handle a private bill for a gentleman who had been a resident of the district of my predecessor. He had a home financed under one of these programs which burned to the ground and it was uninsured. Its uninsured status was the result of an oversight occurring in the FmHA regional office that was simply overstaffed. The settlement papers on the house and the insurance papers were never looked at by anyone and, as a consequence, the gentleman was going to be held responsible to the Government for the cost of this home. The Congress in its wisdom relieved him of that responsibility, but it took an act of Congress to do it.

That particular office that was supposed to be handling the oversight of that loan had the responsibility for 71 Illinois counties. having a population of almost 7 million people, and there were only 3 employees in the office.

I think if there is anything wrong with the amendment of the gentleman from Iowa (Mr. BEDELL), it is that it is 5 years too late.

Mr. GRASSLEY. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I yield to my colleague, the gentleman from Iowa.

Mr. GRASSLEY. Mr. Chairman, I rise in support of the gentleman's amendment and say it is a shame to have all these programs and not be able to get them to the people that need them, just for the reason that we do not have the capability to process the applications. Either we ought to have enough employees to administer the program, or not have the program in the first place, because it is unjust to the people in our country, not to render judgment in applications, or to supervise the loans adequately.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I yield to my colleague, the gentleman from Iowa.

Mr. HARKIN. Mr. Chairman, I, too, associate myself with the gentleman from Iowa. The gentleman has also pointed out that very recently we have learned about the lack of inspection of homes being built in the district I represent in Iowa, homes being built with Farmers Home Administration loans.

I support the gentleman's amendment, and in its support I would like to give some figures about the problems. This will show the problems that we have in Iowa.

For example, in 1970 the Farmers Home Administration in Iowa handled loans and grants of $48 million with a staff of 212. Last year it handled $282 million in loans and grants with a staff of 225. That was six times the volume, with only 13 more employees.

So again I think the gentleman has offered a good amendment here.

Mr. Chairman, I support the amendment, and I hope it is adopted.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Chairman, I wish to rise in support of the amendment.

I want to point out that a year and a half ago the Congress appropriated the money for 1,600 additional personnel in FmHA. Then the OMB put a ceiling on that was 300 lower than what they previously had.

The Office of Management and Budget should become more realistic about Farmers Home Administration personnel needs. I hope this debate will serve notice on OMB to take another look at the way it is restricting Farmers Home Administration staffing. They need more personnel to execute responsibility.

Mr. Chairman, I thank the gentleman for yielding.

Mr. BEDELL. Mr. Chairman, the real problem with this legislation is that we must put some pressure on those people who are supervising the loans.

I had my field manager certify some facts for me, and in one of the counties he said they were only able to make 10 percent of the inspections they were supposed to make on the funding of the loans they were making.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. BEDELL).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. PHILLIP BURTON

Mr. PHILLIP BURTON. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. PHILLIP BURTON: Page 18, line 20, strike out the word, "and" page 18, line 21 immediately after the word "Islands" insert the phrase ", Guam, American Samoa, and the Northern Mariana Islands.".

In title II, page 29, immediately following line 17, insert the following new section 213:

"SEC. 213. For the purposes of this title the definitions of the terms 'United States' and 'State' contained in section 343 of the Consolidated Farm and Rural Development Act shall apply."

Title III, page 29, line 23, strike the word "and".

Page 30, line 2, strike out the period and insert in lieu thereof ", and".

Page 30, immediately after line 2, insert the following:

"(3) adding at the end thereof a new section 12 to read as follows:

"'SEC. 12. Financial assistance may be made available under this Act throughout the "United States" as that term is defined in section 343 of the Consolidated Farm and Rural Development Act.'"

Mr. PHILLIP BURTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read, printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PHILLIP BURTON. Mr. Chairman, I yield to the gentleman from Guam (Mr. WON PAT).

Mr. WON PAT. Mr. Chairman, I rise in support of this amendment to H.R. 11504, which would extend to my district of Guam the farm loan programs of the Farmers Home Administration.

These programs presently are extended to the States and the territories of Puerto Rico and the Virgin Islands.

Mr. Chairman, I would point out to you and our colleagues that until World War II Guam was self-sufficient in food, and during the war even supported several thousands occupying enemy troops. Had prewar conditions remained undisturbed, there probably would not have been any requirement for Federal agricultural assistance.

Since our liberation in 1944, the U.S. military services have owned about one-third of Guam's entire area, including the primary farming areas. Additionally, the services hired most of the local workers and farmers onto the Federal payroll.

It is only in recent years, with development of new lands and water sources, and decreased economic dependence on the military services, that a revival of

agriculture on Guam has become reasonable.

Guam now imports nearly all its food as do the military commands on the island.

Reestablishment of local food production has great potential for the island's general economy to be strengthened and to reduce its dependence on the Federal Government.

However, Guam's farmers are confronted with a severe lack of capital, particularly for land development and operations financing. And we are all aware that agriculture today is very capital-intensive.

Guam's farmers certainly deserve eligibility to seek Federal assistance the same as other U.S. farmers in the States, Puerto Rico, and the Virgin Islands.

This amendment would accomplish this and I strongly urge our colleagues to vote for its inclusion in H.R. 11504.

Thank you.

Mr. POAGE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have no objection to the purpose of the amendment. I think that, with the situation as it is, we must do justice to these people in Guam.

But, very frankly, I am getting sick and tired of this Congress coming up here every few months and taking some kind of special action for some of our people in distant parts of the world. I think that we have to make up our minds how we want to treat all the people who make up the United States—those who are living in territories that are not States as well as those in the States. I believe every citizen of the United States ought to have the same kind of treatment. I want to give the people of Guam the same kind of treatment I want to give the people of Texas. I want to give American citizens the same kind of treatment regardless of where they live, but this can only be done if they are all citizens of some State.

But we never seem to be willing to face the question directly. We always do it on a bill like this, where we have no jurisdiction over the basic question.

The basic question is: What is the constitutional relationship between the people of the territories and of the District of Columbia and that of the rest of the United States? They are citizens of the United States. I think that we should treat them the same as we treat the other citizens of the United States, but other citizens of the United States are citizens of some State. Even the post-Civil War amendments, which have caused us more trouble than all of the rest of the Constitution put together, in determining the relationship between States and Federal Government, says that "All persons born in the United States are citizens of the United States and of the State wherein they reside."

Let us meet the question squarely and make the people of Guam a part of some State. There is not any State to which they can properly be made a part, except Hawaii. There is no sense in making the people of Guam a part of Alaska or a part of Maine or a part of Louisiana. But there is lots of sense in making them part of the State of Hawaii, a county of that State. Why do we not deal with the question?

I recognize that this committee does not have the jurisdiction to do that. I recognize it is not an agricultural problem. It comes up on every bill that passes out money. I am not criticizing, I am not objecting to the people of Guam having the same benefits that other citizens have, but let us meet the issue squarely. Make Guam a part of the State of Hawaii, and then we will not have this question comes up every time we pass a bill.

Mr. Chairman, I hope that the Members of this House will give this some basic consideration and do something that will solve some of these basic problems, instead of dealing with it every time we bring a bill up.

Mr. FOLEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, speaking only for myself, I have no objections to this amendment. I would like to state, however, that there may be a technical problem in the operation of FmHA guaranteed and insured loans within the area of the Northern Marianas. The relationship of the Northern Marianas to the United States is that of a commonwealth and that is embodied in legislation enacted after a series of negotiations between the United States and the people of the Northern Marianas. Because of the peculiar relationship of the United States to the island area there are provisions in the laws, in the Constitution of the Northern Marianas, which are most unusual. These provisions prohibit transfer of title to land except to certain classes of citizens who reside in that area. Consequently, there may be problems in foreclosure actions by the Farmers Home Administration which could occur in the normal course of operation of the guaranteed or insured loan programs. Therefore, I want the record to show that the effect of this amendment insofar as it includes the Northern Marianas is simply to extend to the Farmers Home Administration authority to make such loans in the Northern Marianas. It does not require the Farmers Home Administration to make either guaranteed or insured loans in that area.

I would certainly hope personally that FmHA loans, and particularly insured loans, would not be made in that area without adequate security to protect the interests of the United States. To the degree that the particular land-holding arrangements in that area militate against the provision or availability of such security, the scope of the program, I think, accordingly, would have to be much diminished in the Northern Marianas area.

As far as I know, this problem does not affect Guam at all; and I do not believe it would affect the area of American Samoa, but it is peculiar to the Northern Marianas.

Mr. PHILLIP BURTON. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from California.

Mr. PHILLIP BURTON. Mr. Chairman, I commend the chairman of the full committee for his observations.

Obviously, we want to be sure that the terms of the covenant are paramount, and we do not invite a violation of its fundamental terms, which, as I would deem it, could not even be contravened by statute.

As the gentleman from Washington (Mr. FOLEY) fully knows, all sides agree that we did not want U.S. ability to alienate or acquire by fee lands in the Northern Marianas primarily, among other things, because that would trigger a whole variety of treaty arrangements, which would invite countries from all over the world to purchase fee interests.

It is not my intention and, I am sure, not the intention of the gentleman from Guam (Mr. WON PAT) to in any way contravene that very emphatic and specific authority in the arrangements with the people of the Northern Marianas.

Mr. Chairman, I fully concur with the gentleman that if there is any contravention, the application of these laws should be administered in that way or not at all, so as to insure the purity, if you will, of that land ownership language in the Northern Mariana Islands covenant with the United States.

Mr. FOLEY. Mr. Chairman, I thank the gentleman for his contribution; but that was not the concern I was expressing.

I do not believe that this amendment would in any way contravene the requirements of the covenant of the United States with the Northern Marianas with respect to land transfers.

My concern is that the amendment be understood only to authorize guaranteed and insured loans. In no sense is it required that they be made if the peculiar land tenure requirements of the Northern Marianas do not allow, by their operation, the full protection of the security interest of the United States and of the FmHA in foreclosure actions.

It might, of course, be possible for the security of the United States to be fully protected by guarantees from the commonwealth government or by other arrangements. In such event, it would be possible to extend the program to the Northern Marianas under this amendment.

The CHAIRMAN. The question is on the amendments offered by the gentleman from California (Mr. PHILLIP BURTON).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. LAGOMARSINO

Mr. LAGOMARSINO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LAGOMARSINO: Page 20, after line 4, insert the following new section:

SEC. 121. CREDIT ELSEWHERE REQUIREMENT.—The Consolidated Farms and Rural Development Act is amended by adding at the end thereof new section 348 to read as follows:

"SEC. 348. An applicant for any loan under this title shall be deemed to meet the eligibility requirement that he be unable to obtain sufficient credit elsewhere to finance his actual needs at reasonable rates, taking into consideration prevailing private and cooperative rates in the community in or near which the applicant resides for loans for similar purposes and periods of time, if,

at the time the applicant applies for such loan under this title, such prevailing private and cooperative interest rates are more than the prevailing interest rate in the private market for similar purposes and periods of time, as determined by the Secretary.".

Mr. LAGOMARSINO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LAGOMARSINO. Mr. Chairman, the amendment I offer, on behalf of Mr. GILMAN and myself, is designed to protect disaster stricken farmers being arbitrarily forced to accept high interest rates on loans due to the nefarious "credit elsewhere" test employed by the Farmers Home Administration.

This discriminatory mechanism works as follows. A farmer applying for FmHA disaster assistance must first prove that he has been unable to obtain "credit elsewhere" at "reasonable rates and terms." If he can obtain such credit, however, he becomes ineligible for emergency loan assistance from FmHA.

Unfortunately, the term, "reasonable rates and terms" is so vague that farmers have often been forced to pay outrageous interest rates on loans financed by private lending institutions.

While under normal circumstances, private lending institutions provide valuable credit assistance to farmers, they have no special terms or rates for emergencies. Such lenders do not take into account abnormal circumstances such as repeated flooding or continual drought. By requiring farmers to apply for private credit, the Government is sentencing a disaster victim to apply for credit at terms offered a prosperous farmer.

The FmHA loan program is thus very discriminatory because, the credit elsewhere test, in effect, screens all but the most impoverished farmers or inept managers.

Our amendment would protect farmers from inordinately high interest rates sometimes subsumed under the rubric "reasonable" by clearly indicating what the term reasonable meant.

"Reasonable" would be defined as the prevailing interest rate for loans of similar purposes and periods of time as offered in the private market, as determined by the Secretary. Currently, in fixing interest rates for loans granted for above "actual losses" in a disaster, the Secretary has defined the market rate of interest at 8 percent. This same formula would be used to define "reasonable" as used in the credit elsewhere test.

In other words, if an applicant cannot obtain credit at or below the same rate as the market rate determined by the Secretary, the applicant will be deemed to have met the credit elsewhere test and thus remove a substantial impediment to becoming eligible for FmHA assistance.

Under this formula, we can begin to help those farmers, who, while surviving a disaster but with few assets and in no position to pay high interest rates and accept restrictive repayment provisions, have nevertheless been diligent, hardworking, and careful to keep their credit up, and thus, are rejected outright by FmHA.

I urge my colleagues to accept this amendment putting an end to the discrimination of worthy loan applicants that the current credit elsewhere test now perpetuates.

I would point out that under the small business loans the language of the amendment that I am proposing this afternoon is already in fact the law. As the committee report on the small business bill which we passed several weeks ago points out:

Under the FmHA program, an applicant is not eligible for disaster assistance unless he or she is able to show that credit cannot be obtained elsewhere. There are farmers and homeowners who have no assets and are not in a position to pay high interest rates but who can obtain credit elsewhere because they have been so diligent, hardworking and careful to keep their credit rating good. Under the FmHA credit elsewhere test, this applicant is penalized and told to secure the higher interest commercial loan with more stringent repayment provisions or quit; but the person who has not tried to keep a good credit rating receives the advantage of both lower interest rates and better repayment provisions.

Mr. JONES of Tennessee. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I shall not take 5 minutes, but I would like to point out that in the subcommittee discussions we took a number of votes that had to do with credit elsewhere provisions. We feel it is necessary that credit elsewhere provisions be retained in Farmers Home Administration programs in order to serve people who need assistance the most.

We want proof of that fact at the time application is made. I would urge my colleagues to oppose the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. LAGOMARSINO).

The amendment was rejected.

The CHAIRMAN. Are there any further amendments to title I?

AMENDMENT OFFERED BY MR. LAGOMARSINO

Mr. LAGOMARSINO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LAGOMARSINO: Page 16, after line 5 insert the following new subsection:

(b) Section 324(a) of the Consolidated Farm and Rural Development Act is amended—

(1) by striking out "that prevailing in the private market for similar loans, as determined by the Secretary" in the first sentence and inserting in lieu thereof the following: "the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, adjusted to the nearest one-eighth of 1 per centum, plus not to exceed 1 per centum per annum as determined by the Secretary"; and

(2) by adding at the end of such section the following new sentences: "With respect to any loan made or insured under this subtitle after the date of enactment of the Agricultural Credit Act of 1978, the Secretary shall make on behalf of the borrower all payments of principal which become due on such loan during the first one-fourth of the repayment period of such loan and the borrower shall make all payments of interest which become due on such loan during the first one-fourth of such repayment period. The borrower shall repay, without charge for interest and within such repayment period, the Secretary for any payment made on behalf of the borrower under the preceding sentence.".

Page 16, line 1, insert "; Interest Rates on Emergency Loans; Suspension of Certain Principal Payments" after "Loan Rates".

Page 16, lines 1 and 2, insert "(a)" before "Section 324".

Mr. LAGOMARSINO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LAGOMARSINO. Mr. Chairman, Mr. GILMAN and I, along with some of our colleagues representing farming districts, I have long been concerned with what are obvious shortcomings in the Farmers Home Administration (FmHA) loan program.

Mr. GILMAN has testified on numerous occasions on the need to reform the inequities and shortsightedness of FmHA programs, and in particular, the inadequacy of the FmHA emergency loan program.

During this Congress, he has twice presented testimony before the Subcommittee on Conservation and Credit of the House Committee on Agriculture concerning the need to correct serious defects in the FmHA emergency loan program. Moreover, during the first session of this 95th Congress, we introduced legislation addressing such FmHA staff training for dealing with problems endemic to certain regions, and the need to provide disaster stricken farmers with less restictive payment schedules.

Last year, during debate on the House floor on H.R. 7171, the Agricultural Assistance Act of 1977, Mr. GILMAN established, during a colloquy with the distinguished chairman of the Subcommittee on Conservation and Credit, the gentleman from Tennessee (Mr. JONES), that there was a real need to take a hard look at what manner of responsible change can be made in a program that is not adequately helping the farmers it was designed to assist.

While I am pleased that H.R. 11504, the Agricultural Credit Act of 1978, as reported, makes a number of much needed changes in FmHA programs, the measure fails to rectify a number of shortcomings which I will be addressing this afternoon by way of several amendments we are offering to H.R. 11504.

The first amendment we are offering seeks to help responsible farmers struggling to recover from a disaster in two ways. First, it would reduce the interest rate on emergency loans on other than actual losses to the lower interest rate paid by the Government on its own outstanding debt. That interest rate would be similar to the amount charged by SBA for loans above actual losses. I believe it is in our best interest to determine whether FmHA is in the business of helping disaster stricken farmers recover, or whether FmHA is more interested in

making a profit at their current lending rate of approximately 8 percent.

Second, my amendment would protect farmers from the usual FmHA policy of scheduling repayment of a loan within the shortest period possible. Such an unrealistic policy recently imposed an inordinate burden upon two Orange County, New York farmers, requiring them to repay 98 percent and 77.5 percent, respectively, of their 5-year loans within the first 18 months of their loans.

Our amendment provides that the Secretary of Agriculture shall make, on behalf of the borrower, all payments of principal which become due during the first one-fourth of the repayment period of the loan, with the borrower making all interest payments during this period. However, the amount of the principal paid by the Secretary shall be repaid by the borrower to the first quarter of the repayment period of the loan.

All too often, the vicissitudes that are inherent in farming subject farmers to subsequent disaster, or to a spell of poor crop growing seasons even as he valiantly tries to extricate himself from the deleterious consequences of the first disaster.

This amendment will allow disaster victims the chance they need and deserve, to regain their formerly economically viable footing.

Accordingly, I urge my colleagues to support this amendment and inject a sense of compassion and understanding into the FmHA assistance program.

Mr. FOLEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, first of all the emergency loans presently carried on under the law provide for a 5-percent interest rate up to the amount of the loss, and the gentleman would not change that in his amendment, but he does go from a market interest rate on the balance of the emergency loans above the loss to a cost-of-money-to-the-Government proposal.

Of course, the idea of the emergency loan basically is to allow the farmers to have a loan program that would compensate them for the expenditures that they will have to make because of the loss. At least, it seems to me questionable whether we should expand very much beyond that loan level except at something like market rates of interest.

There is also in the second part of the gentleman's amendment a provision to extend the repayment period without charging any interest, which in effect is a forgiveness of interest on a period of repayment. These programs, Mr. Chairman, are really quite generous as they are. I know there is always a tendency for Members to come on the floor and want to offer additional opportunities for borrowers not to have to pay interest and to have programs extended, but all of these programs have an expenditure cost, and I hope the Members will resist the tendency to goldplate this legislation. I think the committee has been quite generous in reporting out the legislation that is on the floor today, and we have authorized expanded loans in the traditional FmHA areas. We have doubled the ceilings on most of the loan programs. We have provided for the cost of the money, of borrowing, in most cases, while retaining some continued at 5 percent, which is a subsidized interest rate.

We had before the committee a proposal which the committee rejected, to provide periods of forgiveness on interest and principal, feeling that it was not wise to recommend such legislation to the House.

The gentleman, of course, has a perfect right to offer these amendments. They were not offered in the committee. There was no testimony that I can recall—maybe the gentleman will correct me if I am not stating it accurately—in terms of the sponsorship of this particular amendment. I do not believe it was recommended to the committee for its consideration.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. FOLY. I yield to the gentleman from California.

Mr. LAGOMARSINO. I thank the gentleman for yielding.

I am offering, as I said, these amendments on behalf of the gentleman from New York (Mr. GILMAN); but my understanding was that there was testimony to these amendments, not on the present pending legislation but in previous hearings on similar legislation.

Will the gentleman agree with me that the amendment in the first part, section 1, subsection (1), would give to FmHA and the farmers seeking assistance from FmHA the same kind of consideration that they are able to get if they are able to do so under the SBA?

Mr. FOLEY. The gentleman is talking about the interest rate in section 1?

Mr. LAGOMARSINO. Yes.

Mr. FOLEY. Yes.

Mr. LAGOMARSINO. It is the current yield on outstanding market obligations of the United States, plus 1 percent.

Mr. FOLEY. Yes. Personally speaking, I have much less objection to this provision than the second part. The second part is, in my judgment, very unwise. I hope the gentleman will forgive me, but I think it was unwise to join these together. I might have been able to support the first one, but I very strongly object to combining them.

Mr. LAGOMARSINO. If the gentleman will yield further, will the gentleman be agreeable to a unanimous-consent request on my part to strike subsection (2)?

Mr. FOLEY. I would not object.

Mr. LAGOMARSINO. Mr. Chairman. I ask unanimous consent that subsection (2) be stricken from the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. FOLEY. In that case. Mr. Chairman. I will leave it to the judgment of the Members of the Committee on that. I do not have any strong objection to the amendment as modified.

The CHAIRMAN. The question is on the amendment, as modified, offered by the gentleman from California (Mr. LAGOMARSINO).

The question was taken; and on a division (demanded by Mr. LAGOMARSINO) there were—ayes 3, noes 18.

So the amendment, as modified, was rejected.

The CHAIRMAN. Are there further amendments to title I? If not, the Clerk will read title II.

The Clerk read as follows:

TITLE II

SEC. 201. This title may be cited as the "Emergency Agricultural Credit Adjustment Act of 1978".

SEC. 202. AUTHORITY TO MAKE, INSURE, OR GUARANTEE LOANS; ELIGIBLE RECIPIENTS; PURPOSES.—(a) The Secretary of Agriculture is authorized to insure or guarantee loans (1) to bona fide farmers and ranchers who are primarily and directly engaged in agricultural production, and who are citizens of the United States and (2) to farm cooperatives, private domestic corporations, or partnerships that are primarily and directly engaged in agricultural production and in which a majority interest is held by members, stockholders, or partners who themselves are citizens of the United States and are primarily and directly engaged in agricultural production: *Provided*, That such farmers, ranchers, cooperatives, corporations, or partnerships have the experience or training and resources necessary to assure a reasonable prospect for successful operation with the assistance of such loans, need such credit in order to maintain a viable agricultural production operation, and are unable at the time the loan application is filed to obtain sufficient credit from their normal credit sources to finance their actual needs at reasonable rates and terms due to a general tightening of agricultural credit and an unfavorable relationship between production costs and prices received for agricultural commodities.

SEC. 203. PURPOSES OF LOANS.—(a) Subject to the provisions of subsection (b) of this section, loans may be insured or guaranteed under this title for the purpose of making payment of principal and interest installments or refinancing, in whole or in part, any outstanding indebtedness incurred for (1) acquiring, enlarging, or improving farms, including farm buildings, land and water development, use and conservation, pollution abatement control, (2) paying costs incident to reorganizing the farming system for more profitable operations, (3) purchasing livestock, poultry, and farm equipment (including equipment which utilizes solar energy), (4) purchasing feed, seed, fertilizer, insecticides, and farm supplies and to meet other essential farm operating expenses including cash rent, (5) other farm and home needs including but not limited to family subsistence, (6) loan closing costs, and (7) refinancing items previously described in this subsection.

(b) Indebtedness eligible for assistance under subsection (a) is limited to indebtedness which cannot be paid unless assistance is rendered under this title and which was incurred during the period beginning January 1, 1973, and ending on the date of enactment of this title, or indebtedness incurred after the date of enactment of this Act, but on or before December 31, 1979, to the extent which indebtedness may have been incurred in the refinancing of a loan made during the period beginning January 1, 1973, and ending on the date of enactment of this Act.

(c) Loans also may be insured or guaranteed under this title to cover operating expenses and adjustments in operations needed to assure the applicant's ability to make repayment on his outstanding indebtedness, including indebtedness incurred under subsection (a) of this section. Such loans may be made for (1) paying costs incident to reorganizing the agricultural operation to provide an economically sound operating unit, (2) purchasing essential livestock and poultry, and replacing essential farm equip-

ment, (3) purchasing feed, seed, fertilizer, insecticides, and farm supplies and to meet other essential farm operating expenses including cash rent, (4) financing other essential farm needs including but not limiting to family subsistence, and (5) loan closing costs. No loan may be insured or guaranteed under this subsection the purpose of which is to purchase or lease additional real estate.

(d) In making loans under this title, preference shall be given to owners or operators of not larger than family farms. In the case of farm cooperatives, corporations, and partnerships, the family farm preference shall apply to the farm or farms in which both the entity and its principal members, stockholders, or partners, as applicable, have an ownership and operator interest and are primarily and directly engaged in agricultural production.

SEC. 204. GUARANTEED LIMITS; RATES OF INTEREST; REPAYMENT PERIOD; RESTRICTIONS.—(a) The Secretary is authorized to guarantee for the purposes and subject to the conditions of this title not to exceed 90 per centum of the principal and interest on any loan made by a legally organized agency.

(b) Loans guaranteed under this title shall bear interest at a rate to be agreed upon by the lender and borrower. Loans insured under this title shall bear interest at a rate determined by the Secretary taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, adjusted to the nearest one-eighth of 1 per centum, plus not to exceed 1 per centum per annum as determined by the Secretary.

(c) Insured and guaranteed loans shall be for the period reasonably required by the needs of the borrower, taking into consideration the security the borrower has available, but not exceeding a term of thirty years for loans secured primarily by real estate, and not exceeding a term of seven years for loans secured primarily by personality: *Provided*, That renewal of loans secured by personality is authorized for an additional period or periods which shall not, in the aggregate, exceed five years beyond the original term of the loan: *And provided further*, That with respect to loans secured by personality the Washington office of the Farmers Home Administration may approve an original term of twelve years if it is determined that the need of the loan applicant justifies such a longer repayment period. Loans as to which the original term is twelve years may not be renewed.

(d) The total principal balance outstanding at any one time on loans insured or guaranteed under this title for any borrower shall not exceed $400,000: *Provided, however*, That no loan which will cause the total outstanding principal indebtedness of any borrower under this title to exceed $150,000 shall be made without the approval of the senior FmHA official in the State in which the loan is made.

(e) No fees or charges shall be assessed by the Secretary for any loan insured or for any guarantee provided under this title.

SEC. 205. CERTIFICATIONS; CONDITIONS.—(a) As a condition of the Secretary's guaranteeing any loan under this title the lender shall certify that—

(1) the lender is unwilling to provide credit to, or continue with, the loan applicant in the absence of the guarantee authorized by this title; and

(2) the loan applicant is directly and in good faith engaged in agricultural production, and the financing to be furnished the loan applicant is to be used for the purposes set forth in this title.

(b) As a condition of the Secretary's insuring any loan under this title the loan applicant shall certify that—

(1) the loan applicant will be unable to obtain financing in the absence of the assistance authorized by this title; and

(2) the loan applicant is directly and in good faith engaged in agricultural production, and the financing to be furnished the loan applicant is to be used for the purposes set forth in this title.

(c) As a condition for insuring or guaranteeing any loan under this title, the Secretary must find that there is reasonable probability of accomplishing the objectives of this title and repayment of the loan.

(d) The Secretary shall require—

(1) the county committee authorized under section 332 of the Consolidated Farm and Rural Development Act to certify in writing that the applicant meets the eligibility requirements for the loan, and has the character, industry, and ability to carry out the proposed operations, and will, in the opinion of the committee, honestly endeavor to carry out the applicant's undertakings and obligations; and

(2) except for guaranteed loans, an agreement by the borrower that if at any time it shall appear to the Secretary that the borrower may be able to obtain a loan from a production credit association, a Federal land bank, or other responsibilities cooperative or private credit source, at reasonable rates and terms for loans for similar purposes and periods of time, the borrower will, upon request by the Secretary, apply for and accept such loan in sufficient amount to repay the Secretary or the insured lender, or both, and to pay for any stock necessary to be purchased in a cooperative lending agency in connection with such loan.

SEC. 206. LOAN SECURITY.—Loans shall be insured or guaranteed under this title upon the full personal liability of the borrower secured by such collateral as is available which, together with the Secretary's confidence, and for guaranteed loans the confidence of the lender, in the repayment ability of the loan applicant, is deemed by the Secretary adequate to protect the Government's interest. The collateral may be subject to a prior lien or may be collateral which has depreciated in value owing to temporary economic conditions.

SEC. 207. FUNDING; LIMITATION ON LOANS.—(a) The Fund created in section 309 of the Consolidated Farm and Rural Development Act shall be used by the Secretary for the operation of the loan program and for the discharge of the obligations incurred pursuant to this title. Such Fund may also be utilized to pay salaries and other administrative expenses of the Secretary necessary to insure, guarantee, service, and otherwise carry out the provisions of this title. The Secretary in his discretion is authorized to use the Fund to purchase, on such terms and conditions as the Secretary may deem appropriate, all or any portion of any loan insured or guaranteed pursuant to this title, or to defer payments of principal and interest with respect to such loan, and to pay expenses and fees incident to such purchase or deferral. There shall be reimbursed to the Fund by annual appropriations the costs incurred by the Fund in the operation and administration of the program created by the title.

(b) The total principal amount of loans which may be outstanding at any time under this title in calendar year 1978 shall not exceed $2,000,000,000, and the total principal amounts of loans which may be outstanding at any one time under this title in calendar year 1979 shall not exceed $4,000,000,000.

SEC. 208. GUARANTEES SUPPORTED BY FULL FAITH AND CREDIT OF THE UNITED STATES.—Any contract of guarantee or insurance executed by the Secretary under this title shall be an obligation supported by the full faith and credit of the United States and incontestable except for fraud or misrepresentation of which the holder had actual knowledge at the time it became a holder.

SEC. 209. EFFECTIVE PERIOD.—The provisions of this title shall become effective upon enactment, and the authority to insure and guarantee loans shall terminate on December 31, 1979.

SEC. 210. ISSUANCE OF CERTIFICATES OF BENEFICIAL OWNERSHIP; CONTRACTS OF GUARANTEE ASSIGNABLE.—(a) The provisions of section 310B(6) of the Consolidated Farm and Rural Development Act shall apply to loans insured or guaranteed under this title, and the Secretary is authorized to handle such guaranteed loans in the same manner as loans guaranteed under the Consolidated Farm and Rural Development Act.

(b) Contracts of guarantee executed pursuant to the provisions of this title shall be fully assignable.

SEC. 211. REGULATIONS; SECRETARY TO ACT EXPEDITIOUSLY.—The Secretary is authorized to issue such regulations as he determines necessary to carry out this title. Final regulations shall be issued as soon as possible, but in no event later than thirty days from the date of enactment of this title. Insofar as practicable, the Secretary shall complete action on each loan application within thirty days after its receipt.

SEC. 212. REPORT TO CONGRESSIONAL COMMITTEES.—The Secretary shall report to the Committee on Agriculture of the House of Representatives, and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the effectiveness of this title not later than January 1, 1979. The Secretary shall include in such report the number of loan applications submitted, the number and amount of loans approved, the financial situation facing farmers and ranchers at the time of the report, the effect of this title on maintaining the operations of farmers and ranchers, and any recommendations the Secretary may have as to actions which can be taken to further facilitate the continued operations of prudent farmers and ranchers whose continued ability to remain in agriculture is threatened by economic factors not fairly within their control.

Mr. MADIGAN (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Amendment offered by Mr. MADAGAN:

Mr. MADIGAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MADIGAN: Strike out all from lines 6, page 20, through line 17, page 29, in title II and substitute therefore the following:

TITLE II

SEC. 201. This title may be cited as the "Emergency Agricultural Credit Adjustment Act of 1978".

SEC. 202. AUTHORITY TO MAKE, INSURE, OR GUARANTEE LOANS; ELIGIBLE RECIPIENTS; PURPOSES.—(a) The Secretary of Agriculture is authorized to insure or guarantee loans (1) to bona fide farmers and ranchers who are primarily and directly engaged in agricultural production, and who are citizens of the United States and (2) to private domestic corporations, or partnerships that are primarily and directly engaged in agricultural production and in which a majority interest is held by members, stockholders, or partners who themselves are citizens of the United States and are primarily and directly engaged in agricultural production: *Provided*, That such farmers, ranchers, cooperatives, corporations, or partnerships have the ex-

perience or training and resources necessary to assure a reasonable prospect for successful operation with the assistance of such loans, need such credit in order to maintain a viable agricultural production operation, and are unable at the time the loan application is filed to obtain sufficient credit from their normal credit sources to finance their actual needs at reasonable rates and terms due to a general tightening of agricultural credit and an unfavorable relationship between production costs and prices received for agricultural commodities.

SEC. 203. PURPOSES OF LOANS.—(a) Subject to the provisions of subsection (b) of this section, loans may be insured or guaranteed under this title for the purpose of making payment of principal and interest installments on any outstanding indebtedness incurred for (1) acquiring, enlarging, or improving farms, including farm buildings, land and water development, use and conservation, pollution abatement control, (2) paying costs incident to reorganizing the farming system for more profitable operations, (3) purchasing livestock, poultry, and farm equipment (including equipment which utilizes solar energy), (4) purchasing feed, seed, fertilizer, insecticides, and farm supplies and to meet other essential farm operating expenses including cash rent, (5) other farm and home needs including but not limited to family subsistence, (6) loan closing costs, and (7) refinancing items previously described in this subsection.

(b) Indebtedness eligible for assistance under subsection (a) is limited to indebtedness which cannot be paid unless assistance is rendered under this title and which was incurred during the period beginning January 1, 1977, and ending on the date of enactment of this title, or indebtedness incurred after the date of enactment of this Act, but on or before December 31, 1979.

(c) Loans also may be insured or guaranteed under this title to cover operating expenses and adjustments in operations needed to assure the applicant's ability to make repayment on his outstanding indebtedness, including indebtedness incurred under subsection (a) of this section. Such loans may be made for (1) paying costs incident to reorganizing the agricultural operation to provide an economically sound operating unit, (2) purchasing essential livestock and poultry, and replacing essential farm equipment, (3) purchasing feed, seed, fertilizer, insecticides, and farm supplies and to meet other essential farm operating expenses including cash rent, (4) financing other essential farm needs including but not limited to family subsistence, and (5) loan closing costs. No loan may be insured or guaranteed under this subsection the purpose of which is to purchase or lease additional real estate.

(d) In making loans under this title, preference shall be given to owners or operators of not larger than family farms. In the case of private domestic corporations, and partnerships, the family farm preference shall apply to the farm or farms in which both the entity and its principal members, stockholders, or partners, as applicable, have an ownership and operator interest and are primarily and directly engaged in agricultural production.

SEC. 204. GUARANTEED LIMITS; RATES OF INTEREST; REPAYMENT PERIOD; RESTRICTIONS.—(a) The Secretary is authorized to guarantee, for the purposes and subject to the conditions of this title, loans which are made, held and serviced by any legally organized lending agency. The Secretary shall guarantee 100 per centum of the principal and interest on any loan guaranteed under this title: *Provided, however,* That the lender to whom such guarantee is extended agrees in consideration for such guarantee to extend to the loan applicant at not more than prevailing rates of interest sufficient production credit to maintain operation from the date of such loan for one calendar year or such other annual period as the nature of the loan applicant's agricultural or ranch operations require.

(b) Loans guaranteed under this title shall bear interest at a rate to be agreed upon by the lender and borrower. Loans insured under this title shall bear interest at a rate determined by the Secretary taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, adjusted to the nearest one-eighth of 1 per centum, plus not to exceed 1 per centum per annum as determined by the Secretary.

(c) Insured and guaranteed loans shall be for the period reasonably required by the needs of the borrower, taking into consideration the security the borrower has available, but not exceeding a term of twelve years for loans secured primarily by real estate, and not exceeding a term of seven years for loans secured primarily by personality: *Provided,* That renewal of loans secured by personality is authorized for an additional period or periods which shall not, in the aggregate, exceed five years beyond the original term of the loan: *And provided further,* That with respect to loans secured by personality the Washington office of the Farmers Home Administration may approve an original term of twelve years if it is determined that the need of the loan applicant justifies such a longer repayment period. Loans as to which the original term is twelve years may not be renewed.

(d) The total principal balance outstanding at any one time on loans insured or guaranteed under this title for any borrower shall not exceed $300,000: *Provided, however,* That no loan which will cause the total outstanding principal indebtedness of any borrower under this title to exceed $150,000 shall be made without the approval of the senior FmHA official in the State in which the loan is made.

(e) No fees or charges shall be assessed by the Secretary for any loan insured or for any guarantee provided under this title.

SEC. 205. CERTIFICATIONS; CONDITIONS.—(a) As a condition of the Secretary's guaranteeing any loan under this title the lender shall certify that—

(1) the lender is unwilling to provide credit to, or continue with, the loan applicant in the absence of the guarantee authorized by this title; and

(2) the loan applicant is directly and in good faith engaged in agricultural production, and the financing to be furnished the loan applicant is to be used for the purposes set forth in this title.

(b) As a condition of the Secretary's insuring any loan under this title the loan applicant shall certify that—

(1) the loan applicant will be unable to obtain financing in the absence of the assistance authorized by this title; and

(2) the loan applicant is directly and in good faith engaged in agricultural production, and the financing to be furnished the loan applicant is to be used for the purposes set forth in this title.

(c) As a condition for insuring or guaranteeing any loan under this title, the Secretary must find that there is reasonable probability of accomplishing the objectives of this title and repayment of the loan.

(d) The Secretary shall require—

(1) the county committee authorized under section 332 of the Consolidated Farm and Rural Development Act to certify in writing that the applicant meets the eligibility requirements for the loan, and has the character, industry, and ability to carry out the proposed operations, and will, in the opinion of the committee, honestly endeavor to carry out the applicant's undertakings and obligations; and

(2) except for guaranteed loans, an agreement by the borrower that if at any time it shall appear to the Secretary that the borrower may be able to obtain a loan from a production credit association, a Federal land bank, or other responsible cooperative or private credit source, at reasonable rates and terms for loans for similar purposes and periods of time, the borrower will, upon request by the Secretary, apply for and accept such loan in sufficient amount to repay the Secretary or the insured lender, or both, and to pay for any stock necessary to be purchased in a cooperative lending agency in connection with such loan.

SEC. 206. LOAN SECURITY.—Loans shall be insured or guaranteed under this title upon the full personal liability of the borrower secured by such collateral as is available which, together with the Secretary's confidence, and for guaranteed loans the confidence of the lender, in the repayment ability of the loan applicant, is deemed by the Secretary adequate to protect the Government's interest. The collateral may be subject to a prior lien or may be collateral which has depreciated in value owing to temporary economic conditions.

SEC. 207. FUNDING; LIMITATION ON LOANS.—(a) The Fund created in section 309 of the Consolidated Farm and Rural Development Act shall be used by the Secretary for the operation of the loan program and for the discharge of the obligations incurred pursuant to this title. Such Fund may also be utilized to pay salaries and other administrative expenses of the Secretary necessary to insure, guarantee, service, and otherwise carry out the provisions of this title. The Secretary in his discretion is authorized to use the Fund to purchase, on such terms and conditions as the Secretary may deem appropriate, all or any portion of any loan insured or guaranteed pursuant to this title, or to defer payments of principal and interest with respect to such loan, and to pay expenses and fees incident to such purchase or deferral. There shall be reimbursed to the Fund by annual appropriations the costs incurred by the Fund in the operation and administration of the program created by the title.

(b) The total principal amount of loans which may be outstanding at any one time under this title in calendar year 1978 shall not exceed $2,000,000,000, and the total principal amounts of loans which may be outstanding at any one time under this title in calendar year 1979 shall not exceed $4,000,000,000.

SEC. 208. GUARANTEES SUPPORTED BY FULL FAITH AND CREDIT OF THE UNITED STATES.—Any contract of guarantee or insurance executed by the Secretary under this title shall be an obligation supported by the full faith and credit of the United States and incontestable except for fraud or misrepresentation of which the holder had actual knowledge at the time it became a holder.

SEC. 209. EFFECTIVE PERIOD.—The provisions of this title shall become effective upon enactment, and the authority to insure and guarantee loans shall terminate on December 31, 1979.

SEC. 210. ISSUANCE OF CERTIFICATES OF BENEFICIAL OWNERSHIP; CONTRACTS OF GUARANTEE ASSIGNABLE.—(a) The provisions of section 310B(6) of the Consolidated Farm and Rural Development Act shall apply to loans insured or guaranteed under this title, and the Secretary is authorized to handle such guaranteed loans in the same manner as loans guaranteed under the Consolidated Farm and Rural Development Act.

(b) Contracts of guarantee executed pursuant to the provisions of this title shall be fully assignable.

SEC. 211. REGULATIONS; SECRETARY TO ACT EXPEDITIOUSLY.—The Secretary is author-

ized to issue such regulations as he determines necessary to carry out this title. Final regulations shall be issued as soon as possible, but in no event later than thirty days from the date of enactment of this title. Insofar as practicable, the Secretary shall complete action on each loan application within thirty days after its receipt.

SEC. 212. REPORT TO CONGRESSIONAL COMMITTEES.—The Secretary shall report to the Committee on Agriculture of the House of Representatives, and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the effectiveness of this title not later than January 1, 1979. The Secretary shall include in such report the number of loan applications submitted, the number and amount of loans approved, the financial situation facing farmers and ranchers at the time of the report, the effect of this title on maintaining the operations of farmers and ranchers, and any recommendations the Secretary may have as to actions which can be taken to further facilitate the continued operations of prudent farmers and ranchers whose continued ability to remain in agriculture is threatened by economic factors not fairly within their control.

Mr. MADIGAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MADIGAN. Mr. Chairman, as I stated earlier in my general remarks on the bill, my substitute amendment for title II is similar in its general thrust to that contained in the subcommittee markup print when we first took up this matter.

If I may go back to that history for just a moment, in the beginning the Subcommitee on Conservation and Credit began with a bill to raise the loan limits that would be authorized for the Farmers Home Administration for both operating loans and real estate purchase loans. Under those such programs, the increases would provide reasonably modest increases in total loans and reflect only the natural inflationary increases that have occurred since the last time any increase was made.

As the subcommittee began its markup of the legislation, a substitute committee print for the bill which we were considering was offered and that substitute committee print included a second title, title II, which was generally the same as that I am now putting before the Committee as a substitute for the title II that was agreed to by the full committee. The title II which the subcommittee considered as a committee print initially would have provided a program by which farmers who were unable to meet installment payments, either interest or principal payments for a given period of time, would have been able to borrow the money from the Government to make those principal and interest payments and would have had a minimum of 7 years, but in some circumstances up to 12 years to repay.

From that rather modest beginning we have expanded title II of the bill into a program that now provides loans for the complete refinancing up to $900,000 of any farmer's outstanding obligations, regardless of the size of his operation, regardless of whether he is a family farmer, corporate farmer, or whatever, and these $900,000-loans would be available at a rate of interest equal to the cost of money to the Government at that time and, further, this farmer would have up to 30 years to repay these loans.

I might mention that the $900,000 would be a combination of loans under title 1 and title II of the bill, but the rest of what I said relating to interest and cost of the money to the Government and a term of up to 30 years to pay is appropriate, and those provisions are in title II of the bill.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, I simply want to point out to the gentleman, as he well knows, but to make it perfectly clear to the committee, the fact that the $900,000 would not be in insured loans, but would be loans that would be guaranteed through private lending institutions, and the cost to the farmer would be set by the farmer and the lender; it would not be set by the Government.

Mr. MADIGAN. Mr. Chairman, I have no argument with that. The point is that we have taken a program that would have simply allowed the people to borrow money to make principal and interest payments for a very short period of time and expanded that now into a 30-year complete refinancing at a guaranteed lower rate of interest for farmers, regardless of the nature of their operation or the size of their operation.

I think that goes far beyond anything we originally considered or had any idea we might get into.

I might say to the committee that initially the Farmers Home Administration told us that the more modest program which I am offering as a substitute would have a price tag of $5 billion. The program that we have before us has a price tag which I am not even able to estimate. However, I can say that in the State of Illinois the Farmers Home Administration estimates that only 800 farmers would even be interested in applying for these 30-year, low-interest loans. I think that is ridiculous when we consider that there are over 120,000 farmers in the State. Obviously we are calculating that less than 1 percent of those farmers would actually be applicants for this program.

I have no way of knowing what the program would cost. It might cost $20 billion, it might cost $30 billion, I do not know. But the $4 billion that is authorized in the bill is in my judgment simply not an adequate amount of money, considering the fact that initially even the Farmers Home Administration said it would cost $5½ billion.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. MADIGAN) has expired.

(By unanimous consent, Mr. MADIGAN was allowed to proceed for 2 additional minutes.)

Mr. MADIGAN. Mr. Chairman, I think that if we were to continue to work with title II of this bill that is before us, we could be accused of having just enacted a simple and empty promise. We would be providing these 30-year low-interest loans to actually only 2 percent of all the farmers in the country, if the FmHA estimates are correct.

I think that is the worst thing we could do: To say that we are going to do something and then not actually follow through by providing enough money.

I think we will have a situation where farmers will find out there is not enough money to accommodate all of the applications, and that applicant after applicant will be turned away. If I may quote the distinguished vice chairman of the committee, the gentleman from Texas (Mr. POAGE), he said that all this money could be used in just two counties in Texas if we leave the program written as it is.

I think my substitute answers the emergency credit needs that exist in agricultural America today. I think it provides enough money to go around. It does not create a situation where some will be served and some will be turned away. It is a program that will reach out to all the farmers and not just 1 or 2 percent of the farmers.

Mr. Chairman, this is an approach that is endorsed by the American Farm Bureau Federation. I think it is a good approach, and I urge the support of the Members for this substitute language.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. MADIGAN) has again expired.

(On request of Mr. GARY A. MYERS and by unanimous consent, Mr. MADIGAN was allowed to proceed for 2 additional minutes.)

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. MADIGAN. I am happy to yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, under section 203, subsection (b), the wording of the gentleman's amendment is as follows:

Indebtedness eligible for assistance under subsection (a) is limited to indebtedness which cannot be paid unless assistance is rendered under this title and which was incurred during the period beginning January 1, 1977, and ending. . . .

And so forth.

Mr. Chairman, if the gentleman will continue to yield, with respect to the phrases "indebtedness" in this program and "incurred," is the intent of the gentleman's amendment simply to be indebtedness of the principal and interest that were incurred during that period of time, and not the indebtedness incurring alone itself?

Mr. MADIGAN. It is my intention that the indebtedness will refer to both principal and interest; that if a borrower, a potential borrower, under the provisions of the act, were not able to pay either principal or interest payments, that that borrower would be able to apply for a loan, through which he or she would be able to make both interest and principal payments. They could borrow an amount equal to whatever was needed to pay both of those things.

Mr. GARY A. MYERS. So the loan

could have been made prior to 1977, any debt, so long as there was principal and interest that came due during this period of time which is established in the bill?

Mr. MADIGAN. The effective period of the program under my amendment would be January 1, 1977, through December 31, 1979, with 7 years initially to repay and a 5-year extension beyond those 7 years under certain circumstances.

Mr. GARY A. MYERS. If the gentleman will yield further for one more clarification, that means that the loans could have occurred at any period of time? In other words, well before the 1973 date that is in the bill?

Mr. MADIGAN. If I understand the gentleman's question, the gentleman is asking me if the loan which the person would be borrowing money to pay could have been taken out prior to January 1, 1977. Is that the question?

Mr. GARY A. MYERS. That is correct.

Mr. MADIGAN. The answer is "yes."

Mr. GARY A. MYERS. I thank the gentleman.

Mr. ENGLISH. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, basically, what is involved here is the question of philosophy. And I might say that the philosophy that the gentleman from Illinois (Mr. MADIGAN) has presented to us in the form of this amendment, as he states, is the identical proposal that we started out with in the subcommittee as part of the original committee print. It was rejected in the subcommittee and it was rejected again in the full committee. And the reason was due to the fact, and a very simple fact, that any individual, due to the depressed economic situation facing our farmers today, if he is unable to make that payment today, how in the world is he going to make it next year, with additional debt piled on top of it? It simply makes the situation that much more impossible.

What our farmers need today is not additional debt. What they need is the chance to survive. And the only way in which they can survive under these circumstances and, given the depressed economic crisis that they have, is, very simply, by consolidating the debts that they have, reducing the interest rates which they are paying, and stretching the payments out over a longer period of time. This is it, pure and simple. And this is the only way for our farmers to have a chance. This is the reason the Madigan approach was rejected in the subcommittee, and this is the reason the Madigan approach was rejected in the full committee. I hope this is the reason it is going to be rejected here in this committee.

Mr. Chairman, I think it is imperative that the Members understand that the Madigan approach, in effect, guts the opportunity for farmers to survive this economic crisis, to hang on for the period of time that is going to be necessary for improvement in prices. I just want to plead and urge this committee to give our farmers a chance by rejecting the Madigan amendment.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman from Illinois.

Mr. MADIGAN. I thank the gentleman for yielding.

Mr. Chairman, the question I would like to ask the gentleman from Oklahoma is: How are we going to help these farmers whose cause the gentleman argues so effectively, if we are going to allow each of them to borrow, under this title of the bill, up to $400 thousand? And to allow them to borrow it for up to a 30-year period of time. How many farmers is the gentleman going to be able to help with the limited funding in the bill?

The gentleman from Texas (Mr. POAGE), our colleague and vice chairman of this committee, says that all of the money you are appropriating in this bill can be used up in just two counties in Texas.

How is the gentleman going to help the farmers in Illinois, in Indiana, and in all the other parts of the country that might want to become participants in this program if the gentleman is going to keep such a liberal program but also keep such a limit on the amount of money he is willing to put into the program?

Mr. ENGLISH. As the gentleman is well aware, the situation exists in which not all farmers are facing this type of catastrophe.

This program is aimed toward those who are facing a crisis, who are facing foreclosure in the immediate future; and we are hopeful that there is no more than 10 percent of the farmers of this Nation in need of this program.

As the gentleman knows, this is a very spotty problem. It is a problem that appears in some farming areas, but not in others. What we need to do today is to contain this problem.

As the gentleman well knows, this particular amount of money, the $2 billion, that is provided under this title for this calendar year, for the next 6 months or less, depending upon when this program would go into effect, is as much money as the Farmers Home Administration says it even has the capacity to take applications for and to loan out.

I would like to point out once again that this program will be reviewed the first of next year; and if this catastrophe is more serious than we all hope that it is, then we will have the opportunity to come back to the committee and to the House, but certainly no one would want to simply disregard and junk this section of the program simply because we are afraid that there is not enough money there. Certainly we can come back and make a case before this House, if that is the situation.

Mr. MADIGAN. Mr. Chairman, if the gentleman will yield further, if I may quote what the gentleman from Oklahoma (Mr. ENGLISH) has just said, he has indicated that he thinks this special farm credit aid may be needed by as many as 10 percent of the farmers of the country.

I agree with the gentleman from Oklahoma completely and point out to the gentleman from Oklahoma that the Farmers Home Administration says that in order to accommodate those kinds of loans for just 2 percent of the farmers in the country, $5.5 billion would be required.

Mr. JONES of Tennessee. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I shall not take the 5 minutes because the question has already been well argued by my friend, the gentleman from Oklahoma (Mr. ENGLISH).

I hate to oppose my good friend, the ranking minority member on the subcommittee, the gentleman from Illinois (Mr. MADIGAN), because we worked closely on this piece of credit; we worked on it for 3 months.

However, I want to point out that there is a $4 billion cap for the 2-year program and we are now in the first year. We have considerably less than a year to go under the initial $2 billion ceiling. In other words, considering the short term of the program, I believe it is adequately funded.

As far as the $400,000 is concerned for those who are in need of loans, I want to point out that there are not too many farmers in the United States who will need to borrow $400,000 at one time from the Farmers Home Administration. We simply are kidding ourselves when we say that $400,000 would be borrowed by very many of our farmers.

In the first place, I would point out that we need the refinancing that is provided in some areas of the country. We do need to retain the language that we have in the bill at the present time.

Mr. Chairman, I urge my colleagues to vote against the Madigan amendment.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. JONES of Tennessee. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, I would simply like to reiterate what the chairman of the subcommittee has said so aptly; and that is without question, we are facing a crisis in parts of our agricultural economy in certain sections of the country.

The important thing at this point is that we have made a beginning in stopping this problem from spreading to other parts of the agricultural economy. It is as simple as that.

Certainly, as the gentleman pointed out, what $2 billion may be able to accomplish today it may not be able to accomplish next year; and the first important step that must be taken is the enactment of title II.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. JONES of Tennessee. I am glad to yield to the gentleman from Illinois.

Mr. MADIGAN. Mr. Chairman, I want, first of all, to thank the gentleman from Tennessee (Mr. JONES) for the many courtesies extended to me as a member of his subcommittee during the consideration of this particular bill.

I also want to congratulate the chairman on the outstanding job he does in

bringing the subcommittee members together and in working with them very effectively, in my judgment.

I do want to take issue with just one statement the distinguished chairman made during his remarks a moment ago, when he suggested that he would doubt that there would be very many farmers in the United States applying for these kinds of loans at $400,000 limitation. I want to take issue with the chairman on that point, because the Farmers Home Administration, the agency with the responsibility of running all these programs, has said in its report to our subcommittee that it estimated that there would be 50,000 farmers applying for loans at levels of over $400,000 apiece. If my mathematics serves me at all, that would require some $20 billion of money to take care of all of them.

I thank the gentleman for yielding to me.

Mr. JONES of Tennessee. I thank my friend from Illinois (Mr. MADIGAN). I would like to rebut that by saying that the statistics that I have on the Farmers Home Administration ownership loan programs show that, thus far in 1978, it is estimated that the average initial loan from Farmers Home Administration is in the area of $50,000. I admit that farm costs are going up, that farm sizes are increasing, that farmers are getting older, that we have many, many younger people who are engaging, or trying to engage, in the farming profession today, and inordinately more money will be required. However, I want to point out that all of it cannot come from the Farmers Home Administration.

Mr. WATKINS. Mr. Chairman, will the gentleman yield?

Mr. JONES of Tennessee. I yield to the gentleman from Oklahoma.

Mr. WATKINS. Mr. Chairman, I appreciate my friend from Tennessee standing in opposition to this amendment. I concur with him and with my colleague from Oklahoma (Mr. ENGLISH) that our farmers are in desperate need of more than just extending for another year. They are in need of a consolidation program for title II.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

(By unanimous consent Mr. JONES of Tennessee was allowed to proceed for 2 additional minutes.)

Mr. WATKINS. I would like to state that the farmers I have talked to in my part of the State of Oklahoma are in dire need of a longer period of time in consolidating the loans. This is the only way they are going to be able to survive. Many of them have actually gone out of business already. I think the program the gentleman from Oklahoma (Mr. ENGLISH) is advocating will see to it that our people will be able to survive, along with the emergency cattle loan program and the emergency drought relief program. I think we have a program that will allow our people to move forward and be able to continue in the family farming business.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. JONES of Tennessee. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, I would like to commend my fellow Member from Oklahoma (Mr. WATKINS). He is one of the original cosponsors and a strong supporter of this proposal. I wish to thank him for his support.

Mr. FINDLEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the Madigan substitute. I am sure that we all try to keep in mind the effect upon the total budget of legislation which we consider. In fact, we will very soon be in the appropriations process, and will be wrestling with the fragments of the appropriations system trying to reconcile those items with the expected revenues of our Government.

I was especially interested to hear what my colleague from Illinois (Mr. MADIGAN) had to say about the prospect that this might eventually entail outlays of many billions of dollars, well beyond the money limits expressed in the bill itself. I would like to ask the gentleman to elaborate on that a bit.

It is my understanding, my recollection, that he said that Illinois is set down for only 700 loans in the estimate made by the Department upon how popular this loan system would be. Well, we have 100 counties in Illinois. That is seven farmers per county.

I know from my own home county that there is an enormous number of individual farmers who would relish—and I use that world "relish" advisedly—relish the opportunity to borrow money at, let us say, about 6.5 percent today up to, who knows, perhaps even the outside limit of $900,000. My colleague from Illinois (Mr. MADIGAN) represents a commercial corn area. My impression would be that farmers in that region probably have use for even more per farm than in my home county of Pike.

I wonder if the gentleman could make or hazard a guess as to how many farmers in Logan County, Ill., would like to borrow money at 6½ percent with almost the sky as the limit as a result of this legislation?

Mr. MADIGAN. Mr. Chairman, if the gentleman will yield, that could be 2½ percentage points less than the banks are charging for farm purchase loans in Logan County right now, and because this has a refinancing provision in it the farmer could actually take a loan made not too long ago at 9 percent and under the provisions of this bill refinance it at 6½ percent and have up to 30 years to pay if he could convince the local FmHA office to lend him the money.

Mr. FINDLEY. In my home county I would be surprised if there were not 500 farmers at the minimum who would like to borrow at this minimum rate. Would the gentleman agree that is a modest estimate for any county in Illinois?

Mr. MADIGAN. There are 120,000 farmers in Illinois and the FmHA estimates only 800 would be interested in this kind of loan. Yet any farmer who has a loan outstanding at a rate higher than 6½ percent would be interested in one of these loans.

Mr. FINDLEY. What concerns me most about the committee recommendation which is now before us, and the main reason why I support the approach by the gentleman from Illinois (Mr. MADIGAN), is that I feel with the committee recommendation we will set in motion a process we will be unable to stop. I know we have $3 billion as the cap for this in this bill, but once the news gets around in farming communities that Joe Smith down the road has been able to borrow money at 6½ percent, refinance his loan, and get the loan picked up by the Federal Government, we will get virtually half of his neighbors demanding the same consideration and there will be no way we can keep that $3 billion cap on the amount that could be obligated under this program.

Would the gentleman from Illinois (Mr. MADIGAN) give us an estimate out of his own consideration of this bill as to how many billions of dollars this might conceivably entail?

Mr. MADIGAN. If the gentleman will yield further, I would prefer, rather than making the estimate myself, to quote the estimate of the Farmers Home Administration which I think is low, because as in the case of our own State of Illinois they estimate only 800 applicants would use title II credit, but if we use that figure, which I estimate to be actually low, all over the country their estimate is there would be 49,200 applicants at $400,000 apiece, as I indicated earlier, and that would be nearly $20 billion.

Mr. FINDLEY. For the State of Illinois alone? I wonder if the gentleman from Illinois (Mr. MADIGAN), as the author of the substitute, could indicate the degree to which his language would restrict that?

The CHAIRMAN. The time of the gentleman from Illinois (Mr. FINDLEY) has expired.

(By unanimous consent, Mr. FINDLEY was allowed to proceed for 2 additional minutes.)

Mr. MADIGAN. Mr. Chairman, if the gentleman will yield further, I would point out the 49,200 figure is the FMHA estimate for the entire country, not just the State of Illinois, but even at that estimate it could be still a $20 billion program.

Mr. FINDLEY. And the estimate of the gentleman from Illinois (Mr. MADIGAN) is that the FmHA estimate is on the conservative side.

Would the gentleman from Illinois (Mr. MADIGAN) contrast the proposition under title II of the committee recommendations with his substitute?

Mr. MADIGAN. If the gentleman will yield further, my substitute simply says we will make loans enabling people to pay their principal and interest for a period of time to end December 31, 1979, and that we will allow them to borrow that money from us but to repay it within 7 years rather than within 30 years, but it would be only to make principal and interest payments that they otherwise cannot make and some operating loan help. It would not allow this complete refinancing proposition that is contained in the bill before us.

Mr. FINDLEY. And there would remain the provisions of title I which was intended to meet the emergency created by low prices in wheat country primarily.

That would remain as an additional credit back-up for the distressed farmers. Am I correct?

Mr. MADIGAN. Title I programs have up to $500,000 for family farmers, yes.

Mr. FINDLEY. I need to make a statement and then I will be glad to yield.

It seems to me that the members of this committee would be very prudent to accept the Madigan substitute.

It leaves in place an enormous potential for credit to farmers who need refinancing. Perhaps that part goes a little bit too far for some members of this committee, but, nevertheless, I think it is a reasonable compromise. To go with the committee language we are asking for trouble as time goes by because I think the pressure for these low-interest loans will be irresistible.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. ENGLISH, and by unanimous consent, Mr. FINDLEY was allowed to proceed for 2 additional minutes.)

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. I thank the gentleman for yielding.

I would simply like to point out to the gentleman that I am sure he is very familiar with the provisions of the bill, and the requirements of the bill basically are the same for those people who are facing foreclosure and bankruptcy. I know that if I had 500 farmers in my State who were facing bankruptcy, I would be most interested in trying to take action that would give them some relief and some assistance. But I would also like to say that the gentleman has a much different kind of farmer in his State than I do in mine. I have very few farmers in my hometown who are going to be helped, if they face foreclosure and bankruptcy, by additional loans. It simply gets them in deeper.

I would simply like to urge the gentleman to keep in mind that this is basically for that group that is facing those types of economic difficulties. It is not the people who would like to have those kinds of loans.

Mr. FINDLEY. Difficulty is in the eyes of the beholder, I guess, and I suspect that the farmers of the gentleman's home State, like the farmers of Illinois, have proved to be very resourceful when it comes to the task of qualifying for Federal subsidies programs. I think we will find an enormous number of farmers who are able to say that they are in financial difficulty and facing bankruptcy in order to trim 2 percent off of the interest bill that confronts them.

Mr. ENGLISH. I am sorry the gentleman feels that farmers would not honor the provisions of the bill. I am certain that an Oklahoman would.

Mr. FINDLEY. Let me tell the gentleman that early in my days on the House Agriculture Committee, we had a weather-beaten, old farmer as a witness one day who gave us some advice. He said, "You fellows on the Ag Committee ought to keep one thing in mind. There are only about 435 of you in the House of Representatives. You work together to fix up a farm program, but just bear in mind that there are 3 million of us farmers out there with pencils trying to figure out ways to beat it."

Mr. POAGE. Mr. Chairman, I move to strike out the last five words.

Mr. Chairman, I am reluctant to take the floor to oppose any part of a program as good as this, but I think that we should all bear in mind what we did 2 weeks ago. We destroyed an opportunity to be of real help to our farmers by trying to give them too much, and I think every Member of this House knows that, regardless of how he voted. I am one of those who voted for—for—the very generous provisions of the farm bill that we had before us. But we know that we got all of nothing because we asked for too much.

I am afraid we are asking for too much now. We are asking to take care of farmers who, we say, may need right at $1 million—actually $900,000 of Government credit, $500,000 under title I and $400,000 under title II. There are not many so-called family farmers who need $900,000 for the next 30 years at a subsidized interest rate.

Certainly we ought to take care of those who have suffered disaster, and I am for it. I commend the chairman, the gentleman from Tennesse (Mr. JONES), for working that out. But we all, at least those of us who are on the committee, know that I expressed myself while in the committee about this $900,000 and these 30 years.

These 30 years represent the active lifetime of any farmer, and we are going to keep him in debt all of his life. We are not solving emergencies when we provide a system which is going to put the farmer in debt and keep him there the rest of his productive lifetime. We cannot take care of the income problem simply by lending more money.

You can help by lending money where people need it. You can help by taking care of emergencies, but emergencies cannot last for a man's lifetime. If it lasts this long it ceases to be an emergency and becomes the commonplace.

We have got to recognize that this is supposed to be an emergency bill. We need a disaster emergency bill. We need a bill to take care of disasters. We need a bill to help people who are faced with disasters that come about without any fault on his part, but if we are simply going to put that man into the position of paying on a debt for the next 30 years, we are not helping very much.

I think we do a whole lot more good to provide the funds necessary to take care of those who are really faced with a disaster than to promise to take care of 10 percent or any other extreme number of the farmers in the United States under the tremendous figures that the bill now provides.

I think that the original proposal in the Madigan substitute amendment is substantially the original proposal of the subcommittee. It is not new. The new is the tremendous promise that we all know we cannot keep. You know you cannot keep it. You cannot spend $20 billion to subsidize 10 percent of the farmers of the United States through million-dollar loans for the next 30 years. You cannot do it and you are going to do for farmers just what you did last week. You are going to give them all of nothing, unless you cut this down to some point of reason. If you get it back to what the subcommittee originally had, we will have something worthwhile.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, first of all, this particular bill, title II, contains more money for the rest of 1978 than the regular Farmers Home program contains for the next fiscal year. Does this mean we should wipe out the existing Farmers Home program? Does it mean by raising the limits that the Farmers Home program as it exists today, we have done wrong?

I should also point out that the existing Farmers Home program makes loans for 40 years, not 30 years.

Mr. POAGE. Mr. Chairman, the original program made loans for 40 years for the purpose of purchasing farms. That was the original program. This is supposed to be a disaster program to take care of disaster situations.

The CHAIRMAN. The time of the gentleman from Texas has expired.

(At the request of Mr. ENGLISH, and by unanimous consent, Mr. POAGE was allowed to proceed for an additional 2 minutes.)

Mr. ENGLISH. Mr. Chairman, if the gentleman will yield further, I would like to point out as well that the existing Farmers Home program has fallen short and has not covered all needs; but I have yet to hear anyone come before Congress and state that we should wipe out the entire Farmers Home program because there is simply not enough. There is never enough in most of these programs; but we must do the best we can with what we have.

I would like also to point out that as opposed to the situation we had a couple weeks ago, we now have the situation where the administration has said this is a good program and it will be signed.

Mr. POAGE. The existing Farmers Home program has a chance of being financed. This $20 billion program has no chance of being financed and every Member of this Congress knows it.

I hope some of the farmers of the United States now know it.

I come back to the thing I have said to this House so many times, that I would rather have a part of something, and get a part of something for my farmers, than to get them absolutely all of nothing. I think that is our choice.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. MADIGAN).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. MADIGAN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Illinois (Mr. MADIGAN) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 151, noes 215, answered "present" 1, not voting 67, as follows:

[Roll No. 245]

Messrs. LONG of Maryland, BRODHEAD, LEHMAN, SPENCE, CARNEY, LOTT, BEARD of Tennessee, and JOHNSON of California changed their vote from "aye" to "no."

Messrs. EVANS of Indiana, MARKEY, SATTERFIELD, KOSTMAYER, and FISHER, changed their vote from "no" to "aye."

Mr. ST GERMAIN changed his vote from "present" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. VOLKMER

Mr. VOLKMER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VOLKMER: On page 24 of H.R. 11504, as reported, title II, section 204, insert in subsection (d) after "*Provided, however,*" and before "That no loan which will cause", the following: "that such limitation shall be reduced to the extent of the principal of any loans outstanding to the borrower under subtitles A and B of the Consolidated Farm and Rural Development Act: *Provided further,*".

Mr. VOLKMER. Mr. Chairman, I support the bill that is before us. However, I have one serious reservation concerning the bill, and that is as to the total amount that a borrower could receive from the title I and title II provisions of the bill.

Under the present law, under title I a borrower can receive a maximum of $100,000 for real estate acquisition and $50,000 for operations. Under the changes in title I, a borrower could receive up to $200,000 for operations and up to $200,000 in direct payment of an insured loan for land acquisition or up to $300,000 for a guaranteed real estate loan.

Under title I a borrower could technically receive a total of $500,000 or half a million dollars for loans for operation purposes and for land acquisition.

Under the present law we do not have a title II provision for emergency loans or for consolidation of existing loans. A borrower can, then, borrow up to $400,000 on guaranteed or insured loans. Technically, there is nothing in this bill that would prohibit FHA from lending a total of $900,000 to a borrower under certain circumstances. This amendment would provide that any amount that one would be entitled to under title II would be reduced by any amount that one has previously been loaned under title I, which means that one could not receive more under title II than one has received under title I except to the extent the amount is raised to a maximum of $400,000.

In other words, if you had a loan outstanding of $200,000 under title I, and you made application under title II, you could only receive an additional $200,000. It would be reduced by the amount that you have already received under title I.

This is an attempt to help as many farmers as we can.

I know during the committee hearings, when this was offered, there were arguments to the effect that very few, if any, would ever receive any benefits under this, because only a very few would qualify for a total of $900,000 under the provisions that are written for title I loans and title II loans. However, it is admitted that, technically, it is possible for one borrower to receive this full amount.

Under the limited amount under the bill, the total limit of $2 billion for this

year and $4 billion total for 1979, I believe it is incumbent upon us to try to help as many farmers as we can, under the present circumstances. I believe that by limiting the amount that you can receive under title II by the amount you have already received under title I, we will be able to help many more farmers than we are if we do not limit it at all and prevent some farmers, although they may be few, from possibly receiving the full $900,000.

Mr. Chairman, I urge the Committee to vote for the amendment. I do believe that we need to help as many farmers as possible.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Illinois.

Mr. FINDLEY. I thank the gentleman for yielding.

Mr. Chairman, is my understanding correct in believing that the gentleman's amendment would put a cap of $400,000 on a loan that any individual farmer could get in the aggregate, under the various provisions of this bill?

Mr. VOLKMER. No, that is not quite correct. You could still get a total of $500,000 under title I.

Mr. FINDLEY. But it would reduce the aggregate?

Mr. VOLKMER. But if you had $500,000 under title I you are not going to get any under title II. If you had $400,000 under title I, you are not going to get any under title II.

Mr. FINDLEY. So the aggregate limit is $500,000 instead of $700,000, as the bill presently reads; is that correct?

Mr. VOLKMER. You reduce title II by the amounts under title I.

By the way, the amounts that are credited under title I are only land acquisitional and operational. They are not disaster loans.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. VOLKMER) has expired.

(On request of Mr. FINDLEY and by unanimous consent, Mr. VOLKMER was allowed to proceed for 2 additional minutes.)

Mr. VOLKMER. Under a combination loan, title I and title II, where you have both, you would be limited to $400,000 on that basis.

Mr. FINDLEY. So this would reduce the aggregate amount that any individual farmer could get under the various provisions of the bill by $200,000 to $300,000, depending upon the combination?

Mr. VOLKMER. Yes, depending upon the combination.

Mr. FINDLEY. I thank the gentleman, and I support the gentleman's amendment.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Washington.

Mr. FOLEY. I thank the gentleman for yielding, and I wonder if the gentleman will clear up some misunderstanding I may have about his amendment in the event that title II is used in part to refinance loans under subtitles A and B of the Consolidated Farm and Rural Development Act. Let me give an example. Suppose someone has $200,000 outstanding in real estate loans under subtitle A and wants to borrow $400,000 for the purpose of paying off $200,000 in subtitle A loans and obtaining $200,000 in additional financing. In that event, would he be able to borrow the full $400,000?

Mr. VOLKMER. Yes, he may.

Mr. FOLEY. And the limitation would be on the outstanding obligations after the refinancing procedure has been concluded?

Mr. VOLKMER. That is correct. It is on loans outstanding at the time of that consolidation. In other words, if you pay off a title I loan with title II money, then you do not have a title I loan still outstanding. But if you had a $200,000 loan outstanding at the present time and went in under the bill as it pertains right now, you could go in and get another $400,000 under title II and have $600,000 outstanding.

Mr. FOLEY. I understand what the gentleman is saying, but I want to make it clear. When a farmer uses financing under title II to consolidate debt previously incurred under subtitles A and B of the Consolidated Farm and Rural Development Act we look at the combined obligations outstanding after he has consolidated the debt?

Mr. VOLKMER. That is correct.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. VOLKMER) has again expired.

(By unanimous consent, Mr. VOLKMER was allowed to proceed for 2 additional minutes.)

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, does the gentleman mean to include those loans that were made as a result of a disaster or some such situation as that?

Mr. VOLKMER. No, they are not included in any way.

Mr. ENGLISH. Mr. Chairman, I thank the gentleman.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. Yes, I yield to the gentleman from Illinois.

Mr. MADIGAN. Mr. Chairman, as the gentleman recalls, we discussed this in the subcommittee.

I want to see if my understanding of it is still correct. What the gentleman is saying is that unless we adopt his amendment, a farmer could borrow $500,000 under title I and up to $400,000 under title II, for a total of $900,000; but if we adopt this amendment, any borrowing in excess of $400,000 under title I would eliminate the person's eligibility under title II; is that correct?

Mr. VOLKMER. That is correct, if the person continued on with the title I loan. In other words, a person could go from a title I to a title II loan, but he would be limited to $400,000 by doing that.

Mr. MADIGAN. If the gentleman will yield further, Mr. Chairman, my concern now is as it was before, with the basic fairness of that.

The gentleman is saying that if a person has money borrowed under title I, that counts against the person's ability to partake in an emergency program, which is title II; but that if another person has an amount of money borrowed from any other source, whatever that amount of money may be, that that borrowing has no impact upon the person's credit rating or eligibility for money under title II; is that not correct?

Mr. VOLKMER. That is correct, because they are not now participating in the Government loans or the insured loan or guaranteed loan program. If they have not participated in it, then I do not see why they should be limited in the amount that they borrow under the title II program.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. VOLKMER) has again expired.

(On request of Mr. MADIGAN and by unanimous consent, Mr. VOLKMER was allowed to proceed for 1 additional minute.)

Mr. MADIGAN. Mr. Chairman, will the gentleman yield further?

Mr. VOLKMER. I yield to the gentleman from Illinois.

Mr. MADIGAN. Is it correct to say that a person with $1 million in assets could borrow $500,000 from a bank and up to $400,000 under title II; and a similar person with $1 million worth of assets, with $500,000 borrowed under title I, would not be eligible for anything under title II, even though the amount of his borrowing and the extent of his assets could be the same as his neighbor's? Is that correct?

Mr. VOLKMER. That would be theoretically correct; but I am sure that that type of person presently—and I think everyone realizes this—would have a Farmers Home Administration supplemental loan along with a bank loan.

I do not believe we will find any circumstance where there will be a person having a large Farmers Home Administration loan and no bank loan. We just will not find it.

Mr. MADIGAN. Mr. Chairman, I thank the gentleman for his clarification.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, I simply would like to ask the gentleman this question: As I understand his amendment, we would basically be faced with the situation in which a person under title I could borrow through the guaranteed loan program; is that correct?

The CHAIRMAN. The time of the gentleman from Missouri (Mr. VOLKMER) has again expired.

(On the request of Mr. ENGLISH and by unanimous consent, Mr. VOLKMER was allowed to proceed for 1 additional minute.)

Mr. ENGLISH. Mr. Chairman, will the gentleman yield further?

Mr. VOLKMER. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. To continue, Mr. Chairman, the gentleman could borrow $500,000 through the guaranteed loan program under title I. How much could

he obtain under title II in the guaranteed loan program?

Mr. VOLKMER. Nothing.

Mr. ENGLISH. No; I am talking about under title I or title II.

Mr. VOLKMER. With my amendment or without my amendment?

Mr. ENGLISH. With the gentleman's amendment. On one hand, he could get $500,000 under title I. Then if he came in under title II, how much could he get?

Mr. VOLKMER. $400,000.

Mr. ENGLISH. Why would the gentleman provide for less under title II?

Mr. VOLKMER. That is because the bill does.

Mr. ENGLISH. It is the gentleman's amendment which we are talking about. I am simply trying to get at the reason for the gentleman's offering an amendment which would limit title II to $400,000 when he is not directing himself toward title I, which has a $500,000 limit.

Mr. VOLKMER. The bill only allows $400,000 under title II. My amendment has nothing to do with that. My amendment does not have a figure in it.

Mr. ENGLISH. The gentleman's amendment does affect the amount a person can receive.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. VOLKMER) has expired.

Mr. KREBS. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I think the committee has tried its level best to come up with a bill that is fiscally responsible, a bill designed to meet the concerns of the farmers and, specifically those farmers who have been visiting with us for the last 2 or 3 months and who, in many cases, have found themselves in very serious financial difficulties.

However, having done so, I believe this particular amendment seeks to correct what, I submit, was an oversight, for lack of a better description, by, in effect, closing a loophole which would make it possible, as the author of this amendment previously attested, to, in effect, give a borrower an opportunity to borrow as much as $900,000.

In the final analysis, we have to make a policy decision here. Are we going to make these limited funds available to the largest number of applicants, or are we going to make them available, basically, to a relatively small number of borrowers who would be able to borrow relativey large amounts of money? I submit that in light of the limited funds that are available, it certainly would appear to me that the equitable thing to do would be to make these funds available to the largest number of borrowers rather than to limit these funds to a relatively small number of individuals.

So, I urge the Members of the committee to support the amendment offered by the gentleman from Missouri (Mr. VOLKMER).

Mr. FOLEY. Mr. Chairman, I move to strike the necessary number of words.

Mr. Chairman, I rise because I have been advised that there is a technical problem in the language of the gentleman's amendment where the gentleman's refers to—

That such limitation shall be reduced to the extent of the principal of any loans outstanding to the borrower under title I of the Consolidated Farm and Rural Development Act: *Provided, further.*"

I am advised that in order to accomplish the gentleman's purpose, the reference to "title I" should be stricken and the language, "subtitles A and B" should be inserted instead.

The CHAIRMAN. The Chair would like to inform the gentleman from Washington that the copy of the amendment at the desk does contain that language.

Mr. VOLKMER. Mr. Chairman, this was brought to my attention earlier, and it has been corrected.

Mr. FOLEY. I thank the Chair.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Missouri (Mr. VOLKMER).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. WEAVER

Mr. WEAVER. Mr. Chairman, I offer amendments, and I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. WEAVER: Page 20, line 7, insert "and Commercial Fishing" after "Agricultural."

Section 202:

Page 20, line 11, strike out "and ranchers" and insert in lieu thereof ", ranchers, or commercial fishermen".

Page 20, line 12, strike out the comma and insert "or commercial fishing".

Page 20, line 14, insert "or fishing" before "cooperatives".

Page 20, line 16, insert "or commercial fishing" before "and, in".

Page 20, line 19, insert "or commercial fishing" before the colon.

Page 20, line 24, insert "or commercial fishing" after "production".

Page 21, line 2, insert "or fishing" after "agricultural".

Page 21, line 4, insert ", including fish" before the period.

Page 21, line 11, insert "commercial fishing vessels", after the second comma.

Page 21, line 13, insert "or fishing" after "farming".

Page 21, line 16, insert "or commercial fishing equipment" before the first comma.

Page 21, line 17, insert "or commercial fishing supplies" after "farm supplies".

Page 21, line 18, insert "or commercial fishing" after "farm".

Page 21, line 19, insert "(or commercial fishing)" after "farm".

Page 22, line 13, insert "or commercial fishing" after "agricultural".

Page 22, line 15 insert "or commercial fishing", after "farm".

Page 22, line 16, insert "or commercial fishing supplies" after "farm supplies".

Page 22, line 17, insert "or commercial fishing" after "farm".

Page 22, line 18, insert "or commercial fishing" after "farm".

Page 22, line 24, insert "or [family] fishing operations" after "family farms".

Page 22, line 25, insert "or fishing" after "farm".

Page 23, line 2, insert "or fishing operation" after "farms".

Page 23, line 5, insert "or commercial fishing" before the period.

Page 24, line 1, insert "or commercial fishing vessels" after "real estate".

Section 205:

Page 25, line 5, insert "or commercial fishing" before the comma.

Page 25, line 14, insert "or commercial fishing" before the comma.

Page 25, line 22, insert "in the case of farmers and ranchers," after "(1)".

Page 29, strike out lines 4 through 8 and insert in lieu thereof the following:

The Secretary shall report—

(1) to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the effectiveness of this title; and

(2) to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate on the effectiveness of commercial fishing loans made under this title;

not later than January 1, 1979. The Secretary shall include [in the report submitted under paragraph (1)] the number of loan

Page 29, line 10, strike out "and ranchers" and insert in lieu thereof ", ranchers, and commercial fishermen".

Page 29, line 12, strike out "and ranchers" and insert in lieu thereof ", ranchers, and commercial fishermen".

Page 29, line 15, strike out "and ranchers" and insert in lieu thereof ", ranchers and commercial fishermen".

Page 29, line 16, insert "or commercial fishing" after "agriculture".

Mr. WEAVER (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. MADIGAN. Mr. Chairman, I reserve a point of order against the amendments.

Mr. FOLEY. Mr. Chairman, I reserve a point of order against the amendments.

Mr. WEAVER. Mr. Chairman, all my amendment does is to include in title II as qualifying for the emergency loans another great segment of our society which produces food, the commercial fishermen. The Farmers Home Administration presently makes fish loans, and so the fishermen certainly should qualify in this emergency loan program. My amendment will complement the existing authorities given the Farmers Home Administration in previous legislation to provide credit to farm-related businesses. Fish, of course, is a major source of food in most of the world, and is significant in the United States as well. It will become even more significant as we develop the fish resource within the 200-mile limit for American fishermen and processors.

We are already talking about "fish farming" and "aquaculture." Production of fish for protein can be and should be a growing American food industry. However, the legislation we have passed in this body to enhance aquaculture does not cover the harvesting of fish in the open seas. It covers only the structures and activities used in the culture of fish and other aquatic species.

Hence, the National Federation of Fishermen have expressed strong support for this amendment, as one means of meeting their urgent credit needs that have arisen from emergency conditions much like those faced by farmers.

A commercial fisherman in my district, Bob Hudson, and another great lady, Kathleen Vanderpool, have pointed out to me that today they face emergencies in the paying for their boats as urgent as the farmers face in paying for their farms and their operations. We have just as serious a deficiency in the prices that fishermen get from year to year as the farmers have in their crops.

Mr. Chairman, I urge adoption of this amendment.

Mr. BREAUX. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Louisiana.

Mr. BREAUX. Mr. Chairman, I have to apologize for asking the gentleman a question. He might have answered this in his initial statement. I know the gentleman is aware that the House has just passed a national aquaculture program which provides loans and loan guarantees as well as insurance for people engaged in the business of fish farming or in the business of aquaculture. I wonder how that works with his amendment?

Mr. WEAVER. This would have a completely different proposition. This is for boats only and the aquaculture does not apply to it.

Mr. BREAUX. This is only applicable to the boats, not to the aquaculture?

Mr. WEAVER. Absolutely. The Maritime Commission just issued a provision that no loans over $250,000 would be made and they have no adequate provision for obtaining funds except from this Farmers Home Administration.

The CHAIRMAN. Does the gentleman from Washington (Mr. FOLEY) desire to be heard on his point of order?

Mr. FOLEY. Mr. Chairman, I make the point of order the amendment is not germane to title II of the bill, I cite the title of title II which is "Emergency Agricultural Credit Adjustment Act of 1978." The purposes of title II of the bill are to make insured and guaranteed loans to bona fide farmers and ranchers who are primarily engaged in agricultural production, and to farm cooperatives, private domestic corporations or partnerships that are primarily and directly engaged in agricultural production.

No part of the bill deals with fishing activities or the fishing industry or has to do with establishing any loans or credits or otherwise providing financial assistance to any fishermen or those engaged in any fishing activity.

The whole structure and purpose of this title are limited to provision of credit to farmers and ranchers. Therefore, Mr. Chairman, I feel that the amendment is not germane to the title.

The CHAIRMAN. Does the gentleman from Illinois (Mr. MADIGAN) wish to be heard on the point of order?

Mr. MADIGAN. Mr. Chairman, the reservation has been spoken to most eloquently by the chairman of the committee and I would urge his position.

The CHAIRMAN. Does the gentleman from Oregon (Mr. WEAVER) wish to be heard on the point of order?

Mr. WEAVER. Mr. Chairman, I would like to say the Farmers Home Administration makes fish loans presently. This is a Farmers Home Administration bill. Certainly the fishermen should be given the right to borrow under this Emergency Loan Act.

The CHAIRMAN. The Chair is prepared to rule.

The amendment offered by the gentleman from Oregon (Mr. WEAVER) would add commercial fishermen to the category of those eligible under title II of the bill. Title II, as indicated in section 202 on page 20, establishes a new emergency agricultural credit adjustment program for bona fide farmers and ranchers who are primarily engaged and directly engaged in agricultural production and to other farming entities engaged in agricultural production. While this program would be available to farmers and ranchers, the Committee on Agriculture has chosen to treat them as a generic class of persons engaged in the production of agricultural commodities—a matter properly within the jurisdiction of that committee.

As indicated in Deschler's procedure, in section 7.17 of chapter 28—

To a bill providing relief for one class, an amendment to extend the relief to another class is not germane—

Especially where, as here, the class of recipients who may receive credit assistance is sought to be to commercial fishermen, matters which are within the jurisdiction of another committee of the House, as pointed out in the colloquy a few minutes ago. So, therefore, the Chair sustains the point of order against the amendment.

Are there any further amendments to title II?

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 21 insert a period on line 24 after "under this title" and strike out all that follows through the period on page 22, line 6.

Mr. HARKIN. Mr. Chairman, what this amendment does is to strike out that part of title II that limits title II eligibiliy to debts incurred between January 1, 1973, and the date of the enactment of the bill, except there is a limiting exception for certain refinancing of loans.

Mr. Chairman, many farmers had long-term loans and some operating loans that were incurred at a time before January 1, 1973. Many of these farmers tightened up on their operations after that period. They did not go out and buy up a lot of other land and they did not go out and buy up a lot of new, fancy machinery to support those bigger land purchases. But some of these farmers who tightened down are in bad shape because of the long period of low cattle prices and low wheat and other grain prices which were exacerbated by the tremendous increase in input costs. So what we are doing is penalizing a lot of the farmers who were similarly situated when we have that cutoff time because we are really penalizing them in favor of other farmers.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, I thank the gentleman for yielding.

I think the original intention of the bill in having a limitation of January 1, 1973, was because of the action on the part of the committee to perhaps reduce the scope of the eligibility of these loans, for the purpose of being somewhat conservative on the life of the program. But the gentleman from Iowa (Mr. HARKIN) has been sort of persuasive in his argument that he has made, and on this side of the aisle we are willing to accept the amendment.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, may I say that the date came from the original English bill and, as the chairman, the gentleman from Washington (Mr. FOLEY) has pointed out, it was to limit the scope of the legislation. We thought that a very strong case could be made for the fact that in 1973 when we had Government interference with the farmers that caused many damages, that a very strong case could be made for that particular date. But since the administration is supporting the removal of the time period, and would like to go further and as I believe a majority of the Members would, I wholeheartedly support the gentleman's amendment.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Illinois.

Mr. FINDLEY. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, just to make sure I understand this, the effect of the amendment would permit refinancing of loans regardless of the date under which the obligation was incurred?

Mr. HARKIN. That is correct.

Mr. MADIGAN. Mr. Chairman, if the gentleman will yield, I understand that the gentleman has the consent of the Farmers Home Administration in offering this amendment. Is that correct?

Mr. HARKIN. That is correct.

Mr. MADIGAN. Is it the understanding of the gentleman from Iowa (Mr. HARKIN) that we can go back to 1949 or 1945 or any time that we want to to start picking up these loans and that we can still do all of that within the $4 billion that is authorized in this legislation?

Mr. HARKIN. As I understand it, for all who have some debt situation the situation would be similar to putting them in the same kind of circumstances as those who incurred their debts after January 1, 1973. If that is the question posed by the gentleman from Illinois (Mr. MADIGAN) then the answer is, "Yes."

Mr. MADIGAN. So we are going back now and picking up real estate loans clear back to the 1960's or the 1950's, or any that might not be paid up we will not go back and have FHA guaranteed loans for them?

Mr. ENGLISH. Mr. Chairman, if the gentleman will yield, I would like to point out to the gentleman that most of the real estate debt that would have been incurred during any such particular period, certainly back beyond the

1960's would be at a much lower rate than you would have under this particular legislation. In fact, I think that you would find, particularly in loans made in the 1940's and 1950's and perhaps even into the 1960's, would be at least somewhere in the neighborhood of 5½- to 6-percent loans. So I think a farmer would be extremely foolish to exchange such loans with such a low rate of interest for a loan that would be in the neighborhood of 7½ percent or so.

Mr. HARKIN. Mr. Chairman, I thank the gentleman from Oklahoma (Mr. ENGLISH) for the statement he has made. The gentleman is correct. Again, it was intended to pick up those few that might have gotten into a bad situation but did so before 1973. I doubt that we would have very many that would go back very much further than the 1970's.

Mr. MADIGAN. Mr. Chairman, if the gentleman will yield still further, will there be any additional cost involved or will we be able to do all of these things without any additional cost problems?

Mr. HARKIN. I assume and I would think that this could be handled under the total amounts that are authorized in this bill.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. HARKIN was allowed to proceed for 1 additional minute.)

Mr. HARKIN. As the gentleman knows, I did not agree with him on his amendment. I do not agree with the gentleman's opinion that there is not enough money in this bill to take care of what we have authorized in the bill. I think there is, because I do not think we will find farmers coming in for those maximum types of loans that are authorized in the bill. A few will, but most will not, and I think those will be able to be serviced by the amount of money that we have authorized.

Mr. Chairman, I urge adoption of the amendment, and I yield back the remainder of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The question was taken; and on a division (demanded by Mr. HARKIN) there were—ayes 32, noes 22.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: On page 23, strike out line 25, and on page 24, strike out lines 1 through 12, and insert in lieu thereof: "but not exceeding a term as provided for comparable type loans under subtitles A and B of the Consolidated Farm and Rural Development Act."

Mr. HARKIN. Mr. Chairman, what my amendment does is to make the terms of the loans under title II consistent with other Farmers Home Administration programs. This amendment increases the maximum tenure for loans made under title II from 30 to 40 years for loans secured by real estate, and from 12 to 14 years for loans secured by personalty. In other words, it would be 7 years for an original loan plus a maximum of an additional 7 years on a loan if rescheduled. The reason is to give the Farmers Home Administration the maximum amount of flexibility in making loans available under this title, and to make this title II program consistent with current law in the case of real estate loans and consistent with title I in the case of loans secured by personalty.

While 40 years for a real estate loan may sound like a long time, few loans are ever carried this long because of the graduation requirement. Once they are financially sound, they can graduate them out of this program to private lending sources. Therefore, the 40-year maximum tenure will allow for scheduling repayment in such a manner as to minimize installment payments in the first few years of the loan.

One of the problems under title II is that real estate loans are for 30 years, but under existing law the Farmers Home Administration can give up to 40 years on real estate. What we are trying to do under title II is to loosen up a little bit some of the requirements for real estate loans. Yet under title II the repayment period is 30 years, and under existing Farmers Home Administration programs it is 40 years, so it does not make any sense.

All I am trying to do is to make title II consistent with what is already present in Farmers Home Administration law.

The second part is in title I, that is, the loans on personalty, loans that are secured by personalty. Under title I, again one can get these loans for up to 14 years. Under title II, again which is supposed to be the title that is supposed to loosen things up and provide a little bit extra money out there, it is restricted to 12 years.

I am trying to made title II consistent with title I in terms of loans secured by personalty, and make title II consistent with existing law with regard to loans secured by real estate.

I believe that this amendment will simplify the administration of these programs and eliminate an enormous amount of confusion that will arise among farmers and Farmers Home personnel who will have to deal with these programs out in the field.

Finally, the administration and the Department supports this amendment, and I would urge its adoption.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Illinois.

Mr. MADIGAN. I want to thank the gentleman for yielding.

As the gentleman knows, in the committee when the dispute arose over the adequacy of the funding, the amount of the funding, the point was made that these are revolving funds and that the total authority of funding flows out and flows back in as payments are made and as obligations are discharged.

It seems to me if we extend from 30 to 40 years the repayment schedule, we are probably reducing the amount of incremental payments and consequently reducing the amount that would be flowing back in.

I wonder, first, if the gentleman agrees with that and, second, if the gentleman does agree with that, if the gentleman would further agree that a total increase in the amount of authority would be necessary to accommodate the same amount of borrowers.

Mr. HARKIN. No; I do not agree with that. Again, this is a maximum amount they can get for loans. They look at the person's situation and determine how long they need that loan for. The maximum of 40 years would go to small farmers, low-income farmers, that really are in bad shape, where they need this for the lowest possible payments at this time; but again, they can be graduated out of that as their situation improves.

Mr. MADIGAN. Mr. Chairman, if the gentleman will yield further, I assume that both the Farmers Home Administration and the Office of Management and Budget are now supporting these amendments that the gentleman is so eloquently offering.

Mr. HARKIN. Yes.

Mr. MADIGAN. I wonder if the gentleman could tell me why the Farmers Home Administration and the Office of Management and Budget would be supporting these amendments when they were decrying the farm bill as being inflationary.

Mr. HARKIN. I do not know that I can adequately answer that question. I am thankful for their support of this amendment. I would have offered it had they not supported it. As the gentleman knows, I offered it in the committee.

The CHAIRMAN. The time of the gentleman from Iowa (Mr. HARKIN) has expired.

(At the request of Mr. ENGLISH, and by unanimous consent, Mr. HARKIN was allowed to proceed for 2 additional minutes.)

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, I would like to commend the gentleman for offering this amendment. It is a fine amendment and certainly one that makes a great deal of sense and it is consistent with title I. I can see no reason whatever that the amendment would not be supported and approved by the committee.

Mr. Chairman, again it is a fine amendment and I commend the gentleman for offering it.

Mr. FOLEY. Mr. Chairman, I move to strike the requisite number of words. I rise to oppose the amendment.

Mr. Chairman, the committee discussed this amendment of the gentleman from Iowa (Mr HARKIN). After some deliberations, they determined to limit the loans to 30 years on real estate and to provide for a 7-year payment on personality, with the possibility of an additional 5 years. We can, of course, redesign the whole program here on the floor of the House and expand it to make it more generous than the committee determined to do; but I really think overall the committee has brought a recommendation

here which cannot be heavily criticized as being ungenerous in its terms.

I think there is a difference between the 40-year term under subtitle A of the Consolidated Farm and Rural Development Act where real estate is acquired in the first instance and the term of a loan for refinancing or consolidation of real estate debt which was originally incurred at an earlier date.

So I would hope, and I think the gentleman himself realizes, that Members have considered this in the committee at various times; but the committee finally did recommend 30 years on real estate and 7 years on personalty with provision for renewal for an additional 5-year period.

I would hope we would not change that by amendment on the floor.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Iowa.

Mr. HARKIN. Mr. Chairman, I thank the gentleman for yielding.

I just simply want to say again that I cannot understand the logic whereby under existing law the Farmers Home Administration can go out and on a real estate loan give up to 40 years, yet under title II, which is supposed to liberalize the program and help farmers out of serious situations where they are purchasing real estate they can get only 30 years. They are buying the real estate, and yet they can only get 30 years. I just cannot understand that kind of logic.

Mr. SEBELIUS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I would like to associate myself with the remarks of the chairman of the committee. We went over this matter well, and still ringing in my ears are the remarks of the gentleman from Texas (Mr. POAGE) when he called this the "used machinery to antique machinery amendment."

We are actually refinancing a loan, and we know that farm machinery depreciates very fast and becomes obsolete very fast.

What we are now talking about is 7 years on top of 7 years on top of whatever it was before that time. Likewise we are financing real estate loans.

I think this is probably what we might call a Christmas tree amendment. It seems that we cannot resist the temptation to be everything to everybody.

Mr. Chairman, I call upon my colleagues to vote down this amendment, and let us get on with trying to pass the emergency farm bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN).

The amendment was rejected.

The CHAIRMAN. Are there further amendments to title II?

If not, the Clerk will read.

The Clerk read as follows:

TITLE III—MISCELLANEOUS PROVISIONS

SEC. 301. EXTENSION OF THE EMERGENCY LIVESTOCK CREDIT ACT OF 1974; ANNUAL REPORT.—The Emergency Livestock Credit Act of 1974 is amended by—

(1) in section 8, striking out "September 30, 1978" and inserting in lieu thereof "September 30, 1979"; and

(2) in section 11, striking out "on or within one year of the date of the enactment of this section, and annually thereafter," and inserting in lieu thereof "on December 15 of each year,".

SEC. 302. CHANGE IN NAME OF FARMERS HOME ADMINISTRATION TO FARM AND RURAL DEVELOPMENT ADMINISTRATION. (a) The following provisions of law are amended by striking out the names "Farmers Home Administration" and "Farmers' Home Administration" wherever they appear therein and substituting in lieu thereof "Farm and Rural Development Administration":

(1) Section 5316(4) of title 5 of the United States Code;

(2) Section 1 of the Act of September 6, 1950 (64 Stat. 769; 7 U.S.C. 1033);

(3) Section 9(b) of the Act of August 3, 1956 (70 Stat. 1034; 7 U.S.C. 1040);

(4) Sections 309(c), 325, 331 (except in the phrase "Farmers Home Administration Act of 1946"), 335, and 338(a) of the Consolidated Farm and Rural Development Act;

(5) Section 302(c)(2)(A) of the National Housing Act;

(6) Section 7(a)(4) of the Federal Financing Bank Act of 1933;

(7) Sections 1 and 2 of the Act of September 12, 1964 (78 Stat. 933; 16 U.S.C. 410r-3 and 410r-4);

(8) Sections 657, 658, 1006, and 1014 of title 18 of the United States Code;

(9) Section 8(e)(1) of the United States Housing Act of 1937;

(10) Sections 501(a), 514(b)(3), and 517(j) of the Housing Act of 1949;

(11) Sections 731(c)(2) and 744 of the Economic Opportunity Act of 1964 (except in the phrase "Consolidated Farmers Home Administration Act of 1961"); and

(12) Section 51(a) of the Alaska Omnibus Act.

(b) Except where the context otherwise requires, any reference to the Farmers Home Administration in any provision of law not listed in subsection (a) of this section shall be deemed to refer to the Farm and Rural Development Administration.

(c) The officer occupying the position of Administrator, Farmers Home Administration, on the effective date of this section may assume the duties of the Administrator, Farm and Rural Development Administration. The officer assuming such duties shall not be subject to reappointment by reason of the enactment of this section.

(d) Upon this section becoming effective, the Farm and Rural Development Administration shall succeed to all the rights, duties, powers, and obligations of the Farmers Home Administration.

Mr. FOLEY (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Page 30, line 3, through page 32, line 2, strike out section 302 in its entirety.

The committee amendment was agreed to.

AMENDMENT OFFERED BY MR. HIGHTOWER

Mr. HIGHTOWER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HIGHTOWER: On page 29, line 23, strike the word "and" the second time it appears on that line.

On page 30, line 2, strike the period at the end of the sentence and insert in lieu thereof the following: "; and".

On page 30, immediately after line 2, add the following:

"(3) in section 2 inserting after the words 'bona fide farmers and ranchers' the following: ', including persons owning livestock that are fed in custom feedyards,' ".

Mr. HIGHTOWER. Mr. Chairman, this amendment makes no substantive change; rather, it is to clarify the intent of Congress when the Emergency Livestock Credit Act was passed in 1974.

At that time cattle feeders had just been hit by low prices. Cow-calf producers had not yet felt the effect of the "4-year wreck," a term cattlemen use to describe their disaster from 1974 through 1977. So the Emergency Livestock Credit Act of 1974 was passed to assist cattle feeders and other livestock producers.

To assure that emergency loans were not made to outside investors and to large corporate-type feedyards, the term "bona fide farmers and ranchers" was used. The Farmers Home Administration interpreted this to exclude owners of cattle who send their cattle to custom feedyards to be finished, even though many of these are small operators who are full-time cattlemen.

That act was not intended to assist outside investors and I am not proposing that. But it was intended to assist small operators who are primarily dependent upon livestock for their livelihood, regardless of where they may keep their livestock.

In my district, many small cattle feeders keep their cattle in custom feedyards in order to gain the economies of scale. While the custom feedyard looks like a large operation, it actually is a congregation of small operators who hire someone else to feed and care for their livestock—much like a midwestern farmer-feeder would have a hired man to help feed and care for his cattle.

So this amendment is intended to clarify the act and include only those smaller operators who are owners of livestock that are fed in custom feedyards.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. HIGHTOWER. I yield to the gentleman from New York.

Mr. RICHMOND. I thank the gentleman for yielding.

Mr. Chairman, the gentleman said in his remarks that this would benefit many farmers who own feedlots. What does the gentleman mean by "many"?

Mr. HIGHTOWER. No, I did not say that. What I said was it would benefit those cow-calf producers who feed their cattle in feedlots.

Mr. RICHMOND. Would this also benefit professional people, doctors, lawyers?

Mr. HIGHTOWER. This makes an amendment to the Livestock Credit Act, which only applies to those who are directly engaged in agricultural production for the purpose of breeding, raising, feeding, and marketing livestock. It is talking

about cattlemen. Assistance is only available to cattlemen. It would not be available to the doctor, or the lawyer, who might choose to invest in cattle, but it would be available to the cattleman who is feeding his cattle in a feedlot as a way of adding poundage. He should not be excluded just because he chooses, during the time of his ownership, to put them in a feedlot.

Mr. RICHMOND. Except we do have the words "bona fide farmers and ranchers." Does that not cover people who are actually bona fide farmers and ranchers who are engaged in the sale and fattening of cattle?

Mr. HIGHTOWER. Absolutely. It is my contention it does, I say to the gentleman from New York. We have gone over the record, and in committee, at the time the emergency livestock credit bill was passed, that point was raised over and over again. We were assured the Farmers Home Administration has not interpreted it that way.

Mr. RICHMOND. I cannot understand what the gentleman means by including people owning livestock that are fed in custom feedlots. That sounds to me like doctors, lawyers, and other types of investors.

Mr. HIGHTOWER. What I am doing is inserting those words into existing law and it would go on to read:

and who are primarily engaged in agricultural production for the purpose of breeding, raising, feeding and marketing livestock.

So they have to be primarily engaged in that activity. They cannot be secondarily or just consequentially engaged in that type of activity.

Mr. RICHMOND. They could be investors, could they not?

Mr. HIGHTOWER. Of course, anybody who is in the farming business, who owns his own cattle or his own land, is an investor. What we are talking about are investors who are farmers. This whole bill is designed to help the farmer investor. We are talking about investors for whom this is their livelihood—farmer investors.

Mr. RICHMOND. In that case, I would assume that the words "bona fide farmers and ranchers" would cover those people?

Mr. HIGHTOWER. That is what I explained to the gentleman a moment ago. That is what we assumed. But the Farmers Home Administration does not interpret it that way, so it is necessary to make this change.

Mr. RICHMOND. Would that not be for regulation and not legislation? If we changed those words, "bona fide farmers and ranchers," we would open ourselves to other people, doctors, lawyers, professional people, getting these benefits and we would not benefit farmers.

Mr. HIGHTOWER. The gentleman does not understand we are not changing those words. Just because one happens to be a livestock feeder does not mean he is not a farmer. If he is a midwestern farmer and feeder, why, he would be covered.

The CHAIRMAN. The time of the gentleman from Texas (Mr. HIGHTOWER) has expired.

(On request of Mr. FOLEY and by unanimous consent, Mr. HIGHTOWER was allowed to proceed for 2 additional minutes.)

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. HIGHTOWER. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, in order to clear up the problem, I wonder whether I could ask the gentleman this question: The gentleman's amendment says:

. . . inserting after the words "bona fide farmers and ranchers" the following: ", including persons owning livestock that are fed in custom feedyards,".

Does the gentleman intend that those "persons owning livestock that are fed in custom feedyards" must also be bona fide farmers and ranchers?

Mr. HIGHTOWER. That is correct.

Mr. FOLEY. Therefore, it is not the gentleman's intention to allow any person owning livestock that are fed in custom feedyards to meet this definition; is that correct? Only bona fide farmers and ranchers who are carrying on this activity will be included in the definition; is that correct?

Mr. HIGHTOWER. Yes, and we are putting it in where it says that they have to be directly engaged in agriculture.

What we are saying is that just because a man is a cattle feeder does not mean he cannot be a bona fide farmer and rancher.

The CHAIRMAN. The time of the gentleman from Texas (Mr. HIGHTOWER) has expired.

(On request of Mr. FOLEY and by unanimous consent, Mr. HIGHTOWER was allowed to proceed for 1 additional minute.)

Mr. FOLEY. Mr. Chairman, will the gentleman yield further?

Mr. HIGHTOWER. I yield to the gentleman from Washington.

Mr. FOLEY. In other words, a person primarily engaged as a doctor, lawyer, or in some other field of activity could not, by reason of owning livestock fed in custom feedyards, bring himself under the purview of this act; is that correct?

Mr. HIGHTOWER. That is right.

Mr. FOLEY. If this primary activity was not cattle feeding?

Mr. HIGHTOWER. That is right.

Mr. FOLEY. And if he was not, therefore, a bona fide farmer and rancher, he would not be eligible for these guaranteed loans; is that correct?

Mr. HIGHTOWER. That is right. We are not trying to help that kind of investor at all.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. HIGHTOWER. I yield to the gentleman from New York.

Mr. RICHMOND. What about an investor, I ask the gentleman?

Mr. HIGHTOWER. An investor would not be helped.

Mr. RICHMOND. What about a retired person who is an investor and who has cattle?

Mr. HIGHTOWER. If he is a cattleman investor, if he is a farmer investor, if that is his livelihood, then he is helped; but he just cannot take this as an investment and not be dependent on agriculture for his livelihood.

Mr. RICHMOND. Mr. Chairman, with all do respect to the expertise in agriculture of the gentleman from Texas (Mr. HIGHTOWER), I would think that the words "bona fide farmers and ranchers" cover the matter.

The CHAIRMAN. The time of the gentleman from Texas (Mr. HIGHTOWER) has again expired.

(On request of Mr. POAGE and by unanimous consent, Mr. HIGHTOWER was allowed to proceed for 2 additional minutes.)

Mr. POAGE. Mr. Chairman, will the gentleman yield?

Mr. HIGHTOWER. I yield to the gentleman from Texas.

Mr. POAGE. Mr. Chairman, is it not correct to say that under the gentleman's amendment, the first requirement which anybody would have would be that he was a bona fide farmer or rancher? He must be that whether he is feeding any cattle or not; is that correct?

Mr. HIGHTOWER. Absolutely.

Mr. POAGE. Then if he feeds cattle in a public feedlot, he is not disqualified simply because he feeds some cattle in this feedlot, if he is a bona fide farmer or rancher?

Mr. HIGHTOWER. That is right.

Mr. POAGE. That is the whole purpose. The gentlemen has not added anybody else; he confines the amendment to bona fide farmers and ranchers but is saying that the fact that the bona fide farmer or rancher is feeding some cattle in a feedlot does not disqualify him; is that correct?

Mr. HIGHTOWER. That is the intent of the amendment.

Mr. SEBELIUS. Mr. Chairman, will the gentleman yield?

Mr. HIGHTOWER. I yield to the gentleman from Kansas.

Mr. SEBELIUS. Mr. Chairman, I think the gentleman from New York (Mr. RICHMOND) put his finger on a bit of the problem when he said that the Farmers Home Administration passed regulations; that is, they took our bill and they determined that the persons were not qualified. It was by their regulation that we got into trouble, not by the intent of the bill by which we are now trying to correct this situation.

Mr. HIGHTOWER. As I recall, Mr. Chairman, the gentleman from Kansas (Mr. SEBELIUS) was one of the ones who made it clear at the time that they were included; but the Farmers Home Administration has set that aside.

Mr. SEBELIUS. That is correct. Now we are straightening the matter out.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. HIGHTOWER).

The amendment was agreed to.

The CHAIRMAN. Are there any further amendments to title III?

Mr. FINDLEY. Mr. Chairman, I move to strike the last word.

We are close to passage of the bill, and I hope that no one in this room will be under the delusion that the other body or the White House will save us from

what I think is the mischief that is in this bill.

The other body will probably make it even worse. The President, I am sure, is going to sign whatever comes down the avenue to him.

The second thing we ought to keep in mind, Mr. Chairman, is that there is nothing so permanent as an emergency farm bill.

We passed an emergency feed grains bill in 1961; and we still had it, I think, about 6 or 8 years until it developed into something else.

Mr. Chairman, title III of this bill is the third extension of the emergency cattle bill, so we should not be under any illusion that what we are doing now is just for 1 or 2 years. It is going to be with us for a long time.

My third observation, Mr. Chairman, is that this is, without any question, the most enormous proposal of the U.S. Treasury financing for agriculture that this body has ever considered. It is truly enormous in its scope.

Now, there may be some bankers who are going to jump with joy over this bill because it will have the effect of bailing them out from some bad loans they have made. Their joy will probably be short-lived, however, as they contemplate the long-term effect of this legislation. If this becomes law, as I am sure it will, it bodes very ill for private financing of agricultural production needs in the future. What private institution can possibly compete with money provided by the U.S. Treasury at cost to the Treasury itself? This is always going to be several percent lower than interest that the private institutions must pay.

Another thing I think we ought to ponder is the effect upon the farming economy itself. We do not always do a big favor to a farmer by making it easy for him to borrow a lot of money. Sometimes, it is the worst thing we could do. There are a lot of people in agriculture who never should have been there in the first place. One of the effects of legislation such as this is to slow down the readjustment process that is essential to American agriculture so long as the production of food in this country is carried out through private ownership.

There always will be people on the fringe of the production system who ought to be out of the system, who ought to go to a different occupation. Legislation such as this tends to slow down what I think is a very healthy process. It would be far better if we would enact legislation which would give money, or loan money, to those people in distressed circumstances in agriculture to enable them somehow to get off farm income, and not to perpetuate the misery many of them are experiencing in agriculture.

From these comments, Members can deduce that I am opposed to the bill.

AMENDMENT OFFERED BY MR. JONES OF TENNESSEE

Mr. JONES of Tennessee. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES of Tennessee. Insert at the end of the bill the following new title:

TITLE IV—EMERGENCY CONSERVATION MEASURES PROGRAM ACT OF 1978

SEC. 401. The Secretary of Agriculture is authorized to make payments to agricultural producers who carry out emergency measures to control wind erosion on farmlands or to rehabilitate farmlands damaged by wind erosion, floods, hurricanes, or other natural disasters when, as a result of the foregoing, new conservation problems have been created which, (1) if not treated, will impair or endanger the land, (2) materially affect the productive capacity of the land, (3) represent damage which is unusual in character and except for wind erosion, is not the type which would recur frequently in the same area, and (4) will be so costly to rehabilitate that Federal assistance is or will be required to return the land to productive agricultural use.

SEC. 402. The Secretary of Agriculture is authorized to make payments to agricultural producers who carry out emergency water conservation or water enhancing measures during periods of severe drought as determined by the Secretary.

SEC. 403. The Secretary of Agriculture is authorized to make payments to agricultural producers to carry out emergency measures for runoff retardation and soil erosion prevention to safeguard lives and property from floods, drought, and the products of erosion on any watershed whenever fire or any other natural occurrence has caused a sudden impairment of that watershed.

SEC. 404. There are authorized to be appropriated such funds as may be necessary to carry out the purpose of this title. Such funds shall remain available until expended.

SEC. 405. The provisions of this title shall be effective October 1, 1978.

Mr. JONES of Tennessee. Mr. Chairman, I ask unanimous consent to modify my amendment to include certain technical and clarifying changes.

The CHAIRMAN. The Clerk will report the modification to the amendment offered by the gentleman from Tennessee (Mr. JONES).

The Clerk read as follows:

Amend section 403 to read as follows:

"SEC. 403. The Secretary of Agriculture is authorized to undertake emergency measures for runoff retardation and soil-erosion prevention, in cooperation with land owners and land users, as he deems necessary to safeguard lives and property from floods, drought, and the products of erosion on any watershed whenever fire, flood or any other natural occurrence is causing or has caused a sudden impairment of that watershed.".

Redesignate section 405 as section 406 and insert a new section 405 to read as follows:

"SEC. 405. The Secretary of Agriculture is authorized to prescribe such regulations as he determines necessary to carry out the provisions of this title.".

Amend the title of title IV to read "Title IV—Emergency Conservation Program".

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. JONES of Tennessee. Mr. Chairman, this I am sure is the final amendment that will be offered to this credit bill today.

Mr. Chairman, my amendment has two purposes and I shall explain them very briefly. The first comes from a suggestion made by our distinguished colleague, the gentleman from California (Mr. SISK), which would have the effect of putting into statute and permanent law an emergency program which we have operated for several years under language in appropriations bills.

It is the emergency conservation measures program administered by the Agricultural Stabilization and Conservation Service and the elected county committeemen with the technical assistance of the Soil Conservation Service. The program provides assistance to farmers to rehabilitate their farmland if it is damaged by natural disasters. This amendment clarifies that assistance would be available to carry out emergency water conservation measures in drought situations.

The second purpose follows the language of a bill already passed by the Senate, S. 1462, sponsored by Senator EASTLAND. It authorizes the Secretary of Agriculture to repair damage to watersheds whenever fire, floods, or any other natural occurrence causes an impairment of that watershed. It also establishes an emergency fund for such purposes.

This provision is also designed to clarify an existing situation whereby the Soil Conservation Service carries out this function under another authority but which is limited to $300,000. Actually we usually spend much more than this every year through supplemental appropriations. In addition, the President's budget stated that legislation would be transmitted to remove the $300,000 limitation.

I hope, Mr. Chairman, that my colleagues will support this amendment.

Mr. POAGE. Mr. Chairman, will the gentleman yield?

Mr. JONES of Tennessee. I yield to the gentleman from Texas (Mr. POAGE).

Mr. POAGE. Mr. Chairman, I want to make sure that this includes the eradication of mesquite which the Soil Conservation Service says in a number of Southwestern States uses 20 times as much water as all industrial and municipal water use. I understand we have been including that and I just want to make sure it is the intention of the gentleman that this shall include a continuation of that kind of work.

Mr. JONES of Tennessee. May I answer the gentleman from Texas (Mr. POAGE) by saying it is my intention that this language continue the same practices and programs that we now have in effect.

The CHAIRMAN. The question is on the amendment as modified, offered by the gentleman from Tennessee (Mr. JONES).

The amendment, as modified, was agreed to.

Mr. RICHMOND. Mr. Chairman, I move to strike the last word.

Mr. Chairman, as a New Yorker and urban member of the Agriculture Committee, I believe we have an opportunity today to provide real economic help to our Nation's beleaguered farmers.

I have listened to the farmers' pleas these past months and can tell my rural colleagues that while we urban members may disagree with you on parity formulas and price levels, when it comes to providing emergency loan guarantees to

keep the family farmers of this Nation from going bankrupt, we stand ready to lend our support.

We urban dwellers know that the family farmer is struggling to keep costs down and produce food as efficiently and inexpensively as possible. We understand the farmers' plight because our cities, too, are faced with rising costs, an eroding tax base and continual demands for essential municipal services. Our communities have sacrificed. We have cut services to the bone, closing firehouses, reducing police protection, and curtailing free admission to our city university in order to reduce our operating budget. We have implemented a $16 million expense control system and reduced our workforce by 60,000 employees.

In the same vein, farmers have sacrificed. They have refinanced their land and homes, continually repaired old equipment and have continued to plant crops even though they know it will force them deeper and deeper into debt. The Federal Government—and we, Members of Congress from both urban and rural America—have the ultimate responsibility of assuring the continued survival of both family farmers and the people of New York.

The Emergency Agricultural Credit Act, with its $4 billion package of guaranteed loans, will help more than 50,000 family farms through this difficult period by extending credit that may well mean economic life or death to our family farm system. As an urban Member, I believe this bill will give farmers the time they need to survive until prices rise and the 1977 Farm Act has a chance to work for them. Urban Members understand this bill because it is the same kind of assistance that New York City is seeking from Congress this spring—loan guarantees coupled with strict fiscal accounting, a balanced budget, and a regular repayment schedule.

For our farmers, this bill is vital if they are to survive and prosper in an open market, without Government handouts—just as for our urban consumers, the New York City Financial Assistance Act is vital if we are to bring our budget under control and provide the services necessary to keep our city alive.

Urban Members have learned that we cannot survive without our farmers providing wholesome foods to our city markets. And we know that farmers, like city dwellers, sometimes need support to see them through difficult times.

We have a chance today to build upon this understanding and revitalize the urban-rural coalition, which has been so successful in the past. I urge my urban colleagues to join with me in this effort on behalf of both farmers and consumers.

And, I hope, too, that when urban America reaches to Congress for assistance, my rural friends will remember how important New York and our other cities have been to building this country, educating our citizens, and providing an environment in which the arts, culture, sciences, and business have prospered.

The CHAIRMAN. Are there further amendments? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. FUQUA, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee, having had under consideration the bill (H.R. 11504) to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act, pursuant to House Resolution 1140, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

Mr. MADIGAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were— yeas 347, nays 23, answered "present" 1, not voting 63, as follows:

[Roll No. 246]

Mr. Delaney with Mr. Coleman.
Mr. Breckinridge with Mr. Skubitz.
Mr. Anderson of California with Mr. Reuss.
Mr. McHugh with Mr. Teague.
Mr. Mann with Mr. Kasten.
Mr. Hannaford with Mr. Duncan of Oregon.
Mr. Mollohan with Mr. Wirth.
Mr. Russo with Mr. Kemp.
Mr. Rodino with Mr. Pressler.
Mr. Rooney with Mr. Nix.
Mr. Rostenkowski with Mr. Moss.

Messrs. CAPUTO, DERWINSKI, and HANSEN changed their vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

AUTHORIZING CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 11504

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the Clerk be authorized to correct section numbers and cross references in the engrossment of the bill H.R. 11504.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. RHODES asked and was given permission to address the House for 1 minute).

Mr. RHODES. Mr. Speaker, I take this time to inquire of the Chair as to the program for the balance of the day and the rest of this week, if the Chair is in a position to discuss the matter.

The SPEAKER pro tempore. The Chair will say to the gentleman that it is the understanding of the Chair that the gentleman from Washington (Mr. FOLEY) will have a motion very shortly, with respect to sending a bill back to conference.

That will conclude the legislative business for today.

On tomorrow, the House will meet at noon. There are no bills presently scheduled on suspension.

We plan to consider H.R. 11401, the NASA Authorization Act, under a rule adopted earlier today; H.R. 11877, the Peace Corps Act amendments; House Resolution 1049, the Reorganization Plan No. 1; and H.R. 11832, Arms Control and Disarmament Agency authorizations.

On Wednesday the House will meet at 3 o'clock, and we will complete consideration of H.R. 8494, the Public Disclosure of Lobbying Act of 1978.

For Thursday and the balance of the week, we will meet at 11 o'clock, and we have H.R. 11302, the EPA authorizations, which come under an open rule, with 1 hour of general debate, and House Joint Resolution 859, Supplemental Appropriations for USRA, subject to the granting of a rule.

Mr. RHODES. Mr. Speaker, would the Chair care to discuss the possibility of a Friday session?

The SPEAKER pro tempore. I think a Friday session will depend entirely upon our capacity to complete this schedule prior to Friday. It is impossible to predict with any accuracy, as the gentleman well knows. For example, on the bill today, 23 Members, if the Chair remembers correctly, voted in the negative, and yet the bill took all day. So the only answer I can give to the gentleman at this time is that it depends on our capacity to finish the schedule.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. RHODES. If I have any time remaining, I will be delighted to yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding.

Mr. Speaker, several weeks ago, when the ethics bill was first announced for the calendar, it disappeared. It disappeared again this week. I believe I asked the gentleman from Texas at that time the same question I would like to put to him on behalf of many Members of the House who are waiting anxiously for this legislation.

What has happened to the ethics bill, and will we ever see it again, and when?

The SPEAKER pro tempore. Oh, I think the Chair can assure the gentleman that he will see it again. It has been postponed for this week because we want to complete action on the lobbying bill.

APPOINTMENT OF CONFEREES ON H.R. 6782, EMERGENCY AGRICULTURAL ACT OF 1978

Mr. FOLEY. Mr. Speaker, I move to take from the Speaker's table the bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement of raisins and distribution among handlers of the pro rata costs of such promotion, with Senate amendments thereto, insist on disagreement to the Senate amendments, and request a further conference with the Senate thereon.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. FOLEY).

The motion was agreed to.

The SPEAKER pro tempore. Without objection, the Chair appoints the following conferees: Messrs. FOLEY, POAGE, DE LA GARZA, JONES of North Carolina, JONES of Tennessee, MATHIS, BOWEN, ROSE, RICHMOND, WAMPLER, SEBELIUS, JOHNSON of Colorado, and MOORE.

There was no objection.

VETERANS OWE GREAT DEBT OF GRATITUDE TO CHAIRMAN RAY ROBERTS OF TEXAS

(Mr. HARSHA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HARSHA. Mr. Speaker, when the record of this 95th Congress is complete, it will be obvious that the veterans of America owe a great debt of gratitude to the chairman of the Committee on Veterans' Affairs, RAY ROBERTS of Texas. He is proving himself to be an outstanding leader.

Since the administration sent to us its emasculating budget for the Veterans' Administration, he has been tireless in his efforts to restore spending cuts. Newspapers and magazines all over the country have carried his warnings that the 3,132 bed cuts proposed for next fiscal year is one more step along the path of dismantling a once superb medical program.

RAY ROBERTS has used every parliamentary method open to him in the House to keep the VA intact. Now that the Budget Committee has upheld the administration's budget, the only course open to him is to offer an amendment on the floor of the House.

Mr. Speaker, every Member of this body will have to answer to veterans, their dependents, and survivors living in their districts for their stand on Mr. ROBERTS' amendment. For that reason I include in the CONGRESSIONAL RECORD an article that appeared in the April 1978 issue of the Disabled American Veterans national magazine. It spells out the issues we will be voting on and tells something about the character of the chairman of the Committee on Veterans' Affairs who is leading this fight, the outcome of which is so crucial to veterans:

ENLISTS SUPPORT OF DAV—ROBERTS CHALLENGES PROPOSED VA MEDICAL CARE CUTBACKS

When it became clear that the VA medical system was threatened with severe cutbacks proposed in the Administration's budget for Fiscal Year 1978, Congressman Ray Roberts (D-Tex.) was among the first leaders in the world of veterans' matters to register his stern protest.

As chairman of the House Committee on Veterans' Affairs, he, for one, was not willing to stand by and watch the VA's health care system "sink into a medical slum."

Since taking that stalwart stand, Roberts has become the leading voice of those in

Congress challenging the Administration's plan to cut back 3,132 operating beds, slash medical research at 64 VA medical facilities, and cut 36 important construction projects.

Early in the battle against the cuts, Roberts enlisted the ready support of the DAV, which promised an all-out campaign to get funding for these medical programs restored in the FY 1979 budget. And, the Congressman joins National Commander Oliver E. Meadows in asking all DAV and DAV auxiliary members to write to their Congressmen and Senators, demanding restoration of the operating beds, medical research, and construction projects.

Due to Congressman Roberts' constant understanding of the needs of disabled veterans since taking over the chair of the House Veterans' Affairs Committee, the alliance was easy in forming.

That understanding was demonstrated in January when Commander Meadows presented the DAV's 1978 Legislative Program to a joint session of the House and Senate Veterans' Committees.

"Because of your long experience and knowledge of the subject," Roberts asked the National Commander, "I would like for you to expand on your feelings about a pension for any specific group of veterans . . ."

Commander Meadows replied that he did not see any justification for legislating by wars—"singling out one individual group that served in a particular war for benefits." The Commander went on to explain, "The concept of pensions is that they are paid to an individual who has need, disability, and unemployability. And, of course, that can happen to any veteran of any war."

The hearing ended with the usual good wishes. And, as the Pension Improvement Act of 1973 (H.R. 10173) makes its way through Congress, it reflects the principle articulated by Commander Roberts and Congressman G. V. "Sonny" Montgomery (D-Miss.), chairman of the Pension Subcommittee, the bill will bring all pensioners . . . no matter what war they served in . . . well above the poverty level, linking pensions to the Consumer Price Index.

DAV members have also cheered Roberts' vigorous leadership in sponsoring legislation for the service connected. Last year, he steered a bill through Congress, granting a 6.6-percent increase in disability compensation and broadening entitlement to specially adapted housing for the service disabled.

This year, Roberts is seeking legislation to provide another cost-of-living increase in disability compensation and DIC to become effective October 1.

A combat Navy veteran of World War II and Korea, Roberts first moved into the public service arena when he was appointed Director of the National Youth Administration of Texas, serving under Lyndon B. Johnson. In 1940, he joined the staff of Sam Rayburn, Speaker of the U.S. House of Representatives.

After proving himself a successful businessman in his hometown of McKinney, Texas, Roberts returned to public service. He served seven years in the Texas State Senate before being elected to fill the vacancy left by the death of his friend and mentor, Sam Rayburn, in the U.S. House of Representatives.

Today, in addition to chairing the House Veterans' Affairs Committee, Roberts chairs the powerful Water Resources Subcommittee of the Public Works and Transportation Committee.

Commenting on Roberts' style as a Congressman, DAV National Legislative Director William B. Gardiner said the Texan "never depends on flamboyance and bombastic oratory. He pursues his goals by informing himself on the issues, and wins his points through quiet persuasion."

He has put that style to work in this year's push to prevent encroachment of other Federal agencies on the VA's programs. For instance, when HEW Secretary Joseph Califano said that VA education programs would be among those included in a new Department of Education proposed by the Administration, Roberts was right on top of the problem.

Now he says with satisfaction, "President Carter has assured me in a private conversation that the GI Bill will remain in the VA."

Roberts is also disturbed by Civil Service Commission Chairman Alan Campbell's efforts to curtail veterans' preference in Federal employment. Responding to Campbell's charge that the preference has outlived its usefulness and prevents women and minority group members from attaining top government jobs, Roberts says, "That makes no sense to me. The first veterans' preference law was passed by Congress in 1865. It is part of the very fabric of American life and public service. If it is true that veterans are in top government jobs, then what's wrong with that?"

But, the proposed cuts in the VA medical care program are the chief concern occupying the Texas Congressman's mind these days. "What is needed," he recently said, "is a mighty voice from the towns, cities, and states of America that will warn this Administration that veterans will not countenance the dismantling of the hospital system and the pecking away at veterans' entitlements."

GREEN DISCUSSES AGRICULTURAL CREDIT ACT VOTE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GREEN) is recognized for 5 minutes.

Mr. GREEN. Mr. Speaker, I voted today in favor of H.R. 11504, the Agricultural Credit Act. I shared the Agriculture Committee's concern that present FmHA authorities are insufficient to deal with the severe economic squeeze American farmers are experiencing. This legislation is necessary to enable the FmHA to assist those farmers who have been unable to take advantage of commercial lending services.

Let me add that we New Yorkers are not about to see needy farmers go under because of cash flow interruptions and increased debts brought about by droughts, low commodity prices, and high production costs. An emergency Federal loan program clearly is required for these farmers and ranchers.

Certainly, a Government that can provide assistance to Lockheed Corp. and underwrite billions of dollars worth of international development and emergency assistance can also support a program to help its own farmers who want to help themselves.

In like manner, I hope that my colleagues from farming States will be able to support Federal loan assistance for New York City when our Banking Committee reports a bill for full House consideration. The New York City Seasonal Financing Act of 1975 expires on June 30 of this year, and continued Federal assistance is needed to enable New York City to sustain the efforts it has made to help itself.

The 1975 act authorized Federal loans to New York City of up to $2.3 billion a year to cover seasonal shortfalls in revenues. The city has met its repayment schedules for Federal assistance either on time or ahead of time, and the aggregate amount of interest returned to the Treasury during the 3-year period, over and above borrowing costs, has been $30 million. In addition, the city has embarked on a rigorous program to reduce operating expenses and to achieve a balanced budget.

Just like the farmers who will be assisted by the Agricultural Credit Act, New Yorkers have shown that they are ready and able to help themselves. And just like farmers, New Yorkers are not looking for any free handouts from Uncle Sam.

It would be pathetically parochial for New Yorkers to oppose the Agricultural Credit Act merely because there are no farms in New York City. It is beyond question that the failure of large numbers of farmers and ranchers would have a severe impact on consumers in New York City.

So, too, the impact of the bankruptcy of New York City would be felt in our Nation's farming regions. The effects on the country's municipal bond markets, the exchange rate of the dollar, and other complicated economic interworkings would eventually be noticed in the farmer's pocket.

The interdependence of the various sectors of our national economy should preclude narrowminded regionalism. In this spirit, I lent my support to this bill, which will authorize up to $6 billion over the next 2 years for emergency agricultural credit. In so doing, I want to take this occasion to urge my colleagues to remain open to the prospect of lending their support to legislation to authorize up to $2 billion over 15 years to assist New York City.

EFT AT YOUR OWN RISK!

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, last August I introduced H.R. 8753 (now H.R. 12193), legislation to regulate electronic funds transfers so that consumers would be protected in their use of such services. I had hoped the legislation could be enacted before consumers suffered tragic financial losses. Unfortunately, this has already happened.

A woman from the Midwest recently wrote me about her loss of $1,350. This amount, according to the consumer, was stolen by means of the theft of her debit cards and secret number and then use of the card on several occasions.

Apparently the debit cards and secret number were stolen from the consumer's house. She had complied with the institution's request to keep the cards and number separate. It was not until the periodic quarterly statement arrived that she realized the funds had been stolen. The funds were taken in six withdrawals within a period of 3 days, twice a day. A good security system should have at least checked this. It didn't. The woman and her son offered to sign affidavits that they had not taken the

money. From these facts it does not appear to me that the consumer was anything but careful with her card and number. The financial institution, a savings and loan association, refused responsibility for the loss.

The savings and loan's position does not reflect this institution's willingness to fairly share the risks involved in use of EFT services. Apparently, through no fault of hers, this consumer has been deprived of $1,350. The notice from the institution that came with the card stated in part "you may be liable for the unauthorized use of this card." The consumer sued and lost.

How many of us would feel such a vague statement was a clear notice that we would be held responsible for any unauthorized use of our EFT card? How many of us can afford such a "service" knowing, if trouble occurs, we could lose all of our money?

What is a consumer to do? Financial institutions want consumers to use electronic funds transfer services which eliminate human contact and signatures, two important means of security. Yet, apparently consumers are to accept all of the risks of these services. That is simply not fair. It is all too easy to find out a person's secret number. A thief need only look over a consumer's shoulder when he or she uses an EFT terminal. The thief then steals the consumer's card. That is all it takes. Institutions control the security precautions and offer the services. If more secure systems are currently too expensive perhaps they should not offer EFT until secure systems are available.

H.R. 12193 provides a fair sharing of the risks of unauthorized losses in EFT. The bill holds an institution responsible for all losses resulting from unauthorized transfer of funds unless there is consumer fraud or except if the losses occur by means of a funds transfer card, in which case the consumer would not be reimbursed for the first $50 of losses. A consumer clearly then has an incentive to keep the card and number secret, while the institution has an incentive to provide the best possible security.

This woman who has sadly lost $1,350 of her money should be a lesson to all of us. Unless financial institutions are willing to limit consumer liability for unauthorized EFT losses, I believe EFT services are too expensive a risk for consumers to bear.●

WAYS AND MEANS TRADE SUBCOMMITTEE PLANS HEARING ON METHODS TO CONTROL OIL IMPORTS, INCLUDING H.R. 8800

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

● Mr. VANIK. Mr. Speaker, for over half a year, there have been rumors that the administration was about to impose some form of tariff or quota on oil imports to force the Congress to complete action on the President's energy bill. For a long time, there were reports that a $5 a barrel oil import fee would be imposed if the Congress did not act soon. In Thursday's papers, there are reports that administration officials are now studying some form of licensing and auction system as a way to control oil imports and reduce the demand for foreign oil by driving up its price.

The President has almost dictatorial authority under section 232 or the Trade Expansion Act of 1962 to restrict imports when he determines that such action is necessary for the national security.

The President's authority to act under section 232 was limited by an amendment to the Senate-passed energy bill. That bill, of course, is currently mired in conference committee—and the President still has the authority to take unilateral and drastic actions to limit imports.

Rather than continue the parade of trial balloons on this issue, I believe that the Congress should hold hearings to discuss the various ways that imports can best be limited and remaining supplies allocated with a minimum of disruption.

The Congress must not leave the debate on the use of the 232 power to the administration alone. Through the forum of public hearings and public contribution to the debate, I believe the soundest, most feasible solution to our national energy emergency can be found.

Personally, I am a supporter of strong action to reduce our dependence on foreign oil and last fall I urged the President that he take action under section 232 to reduce our disastrous dependence on foreign oil.

Last year, I offered an amendment in the Ways and Means Committee to the energy bill to provide for a system of quotas and the auction of quota allocations. Without administration support, the amendment failed in committee by a vote of 20 to 11.

On August 4, 1977, Representative OTTINGER and I introduced H.R. 8800 which provides, among other things, for the establishment and administration of an oil import quota system.

In order to focus debate on the best ways to limit oil and to provide public comment for the administration on how best to administer any import limitation program, I intend to hold hearings on H.R. 8800 as soon as the schedule of the full Committee on Ways and Means and the Subcommittee on Trade permits. While I obviously support H.R. 8800, reference to this bill is meant only to help focus the debate. I hope that we will receive a wide range of comments on the entire energy import issue and various plans which have been advanced over the years to reduce our reliance on OPEC, et cetera.

Following is a description of the import control features of H.R. 8800 taken from the CONGRESSIONAL RECORD of August 4. Other references to the concepts in this bill can be found in the CONGRESSIONAL RECORDS of May 9, pages 13974 and 21635 and June 24, page 20739.

Mr. VANIK. Mr. Speaker on behalf of Representative RICHARD OTTINGER and myself, I am today introducing oil import control legislation similar to, but much more flexible than title I of H.R. 6860, which was reported by the Ways and Means Committee in 1975 and retained on the floor of the House.

As the committee's report on the bill stated:

The quota is not intended as an independent discipline but rather as a means of being sure that the conservation and conversion efforts result in a reduction in imports, rather than a cutback in domestic production . . .

This legislation uses a system of quotas, import licenses, and tariffs to achieve this goal.

This amendment is not designed to force down demand, but rather, to follow demand down; its purpose is to keep a taut line on the relationship between increasing domestic production, domestic conservation, and declining imports. Chairman ULLMAN described this portion of the 1975 bill as the "centerpiece in our effort to become less dependent on foreign oil."

However, the amendment we are offering is not nearly as inflexible as the 1975 language and contains language insuring that no region of the Nation bears a special burden as a result of quotas. Rather than trying to set specific barrel figures in concrete today for 7 or 8 years from now, we allow more flexibility. Basically, the amendment requires the President each year to submit a 7-year projection of oil production and oil demand adjusted for conservation. He is then directed each year to limit imports for the following year to no more than that year's difference between planned demand and planned production. The yearly level of imports set by the President could be modified if necessary because of weather conditions or national emergencies. Any level set by the President may be rejected through a 90-day congressional veto process, thus forcing the President to revise his import figures.

In other words, the amendment is a yearly yardstick by which we measure how well we are doing in increasing production, obtaining conservation, and limiting imports. This is significantly different from the wording of the 1975 language. Instead of setting specific barrel per day figures in concrete now, we allow more flexibility. The 1975 language set a level of imports of 6 million barrels per day for 1976 and 6.5 million per day for 1977. In recent months, we were importing an average of 9.3 million barrels per day. The 1975 Act was unrealistic and too inflexible, but it also reflects our failure to moderate the increase in imports, and the growth of our dependency on oil imports. Developments since 1975 strongly demonstrate the need for limits on imports; thus while more flexible, this new language would keep the pressure on.

There is one provision, however, which would give the President the discretion to force energy conservation by setting lower levels of imports. This would be subject to Congressional veto. Indeed, if the Congress thinks this is too much discretion, an amendment could be offered limiting his discretion to no more than 20 percent or 5 percent or whatever of the difference between demand and supply. If all our other efforts fail, however, this authority to begin to cut down on imports could be the one way to force America to save energy and develop domestic sources.

It is the stated goal and purpose of this legislation to enable the United States to achieve a level of oil imports of no more than 6.5 million barrels per day by 1985. We think the legislative history would make it clear that this discretion would not be used unless the other measures in the various, recent energy laws were proving inadequate.

To control the level of imports and to have a standby system for allocating imports through the free market system, the

legislation provides for a licensing system similar to the one we approved in 1975. The licensing system distributes the "right" to buy and import oil through a bidding process. As in the 1975 Act, special provisions are made to protect the small refiners and marketers and to guard against fraud in the bidding process. To the extent that the quota set by the President accurately reflects the difference between demand and supply the value of the license "tickets" will be nominal. If, however, the quota is set lower so as to create a gap between demand and supply, the value of the license tickets will be bid up in the traditional market system—there will be no Government bureaucracy set up to allocate imports among users.

As in the 1975 bill there is provision for the Government to insure that imports are fairly distributed throughout the Nation—and that no region, such as New England, suffers economically. Specifically, the bill provides that anytime the value of import licenses in a region rises to 1 percent of the value of imported oil—which will only happen when the import restrictions are set so tightly that they begin to limit the supply of oil—then the revenue raised from the sale of those import licenses in a region will be returned to the States in that region. The State governments can then rebate the increased cost of oil to consumers or help those consumers insulate and find other sources of alternative energy.

There may be other, better ways to guard against injury to a region or set of industries, and alternatives to this proposal can be discussed in the hearing process. It is clearly our intention, however, to insure that no one area of the country, such as New England, bears the major burden in our effort to obtain energy independence.

The 1975 bill also provided for a 2 percent ad valorem tariff on crude and a 5 percent ad valorem tariff on refined petroleum—tariffs which would have raised some $2 to $3 billion per year. Since under the new plan we do not want to further increase the world price of oil, the legislation we are offering provides only a de minimus tariff on crude designed to force the adequate monitoring of imports by the Customs Service. The tariff on refined imports would be 3 percent ad valorem, equivalent to the present license fee differential between crude and refined—a differential which is necessary to protect domestic refineries and to encourage the construction of new refineries in the Eastern United States.

Finally, this legislation is not effective until January 1, 1979. This will give the Government time to put into place the administrative structure for controlling oil imports. Adequate leadtime will avoid administrative confusion.●

TODAY MARKS THE 63D ANNIVERSARY OF THE ARMENIAN MASSACRES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANIELSON) is recognized for 60 minutes.

Mr. DANIELSON. Mr. Speaker, this is April 24, 1978. April 24 is a day which will live forever in the memories of the Armenian people.

Today is the 63d anniversary of the beginning of the Armenian massacres, which were the first organized genocide of the 20th century, a time of tragedy in which 60 percent of all Armenians living within the boundaries of Turkey met their deaths, and most of the remainder were scattered throughout the world.

Mr. Speaker, it was on April 24, 1915, that the then Government of Turkey—and I wish to emphasize that that is not the present Government of Turkey—caused the arrest of about 200 intellectuals and leaders of the Armenian community in Istanbul, Turkey, and thus officially began the pogrom which is now known to history as the Armenian massacres.

The 200 leaders first arrested included five members of the Turkish Parliament who were from the Armenian community. In the weeks and months that followed, the pogrom, the organized massacre of helpless people, was carried out through the portions of ancient Armenia which then lay with the political boundaries of Turkey. On April 24, 1915, there were about 2,500,000 Armenians living in that area of eastern Turkey south of the Caucasus, which was their ancestral home and where they had lived and worked from time immemorial. During the period of the massacres an estimated 1,500,000, about 60 percent of them, were killed or perished from starvation, thirst, and exposure in the desert areas of what is now Syria and Iraq and into which they were driven by their tormenters.

Of the remaining 1 million, about 100,000 lived in the city of Istanbul engaged in various occupations, and because of the fact that in Istanbul were found the diplomatic representatives of the rest of the world and good representation of the press and other media, and there was public scrutiny as to what was going on. Those 100,000 were spared their lives at least and given the opportunity to continue, under unfavorable circumstances but at least to continue their lives.

The remaining 900,000 were scattered to the four winds. Some of them escaped northeastward into what is now Soviet Armenia, the rest of them fled into the desert, into Iraq and Syria, and from thence into other parts of the world.

Many of them came to the United States of America where they found freedom and where they have flourished ever since. Many of them were not so fortunate and they went to other parts of the world. But I can say without any fear of contradiction that the Armenians of America, of whom we have now about 500,000, the descendants of those who fled into the wilderness, are among our best citizens. There is no group of immigrants which has a better record for good citizenship or of greater contribution to our culture, or for being law abiding, or for being self-reliant and not reliant upon the public welfare than the Armenian Americans.

Mr. SISK. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I yield to my colleague, the gentleman from California (Mr. SISK).

Mr. SISK. Mr. Speaker, I want simply to join with my good friend and colleague, the gentleman from California, Mr. GEORGE DANIELSON, in paying tribute to a great people, who have made a great contribution to the people of this country.

I happen to have the good fortune in my district in California to represent several thousand people of Armenia who fled from the terrible massacres our colleague has described. I have had the opportunity through the years to talk to many of these people who actually as youngsters literally found themselves saved by the fact that they were buried under the dead bodies of their parents. I think one of the great tragedies of the course of history is what these people had to undergo, and yet these people have come back. They are aggressive and they are excellent citizens. They have contributed so much to our country and particularly to the great State of California.

So I am particularly glad to have this opportunity to join with the gentleman from California (Mr. DANILSON) in paying tribute to a great people and in memory of a most tragic incident, which, Lord knows, we hope may never again recur in the history of the world.

I thank the gentleman for yielding.

Mr. DANIELSON. I thank the gentleman for his contribution.

Mr. KREBS. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from California (Mr. KREBS).

Mr. KREBS. Mr. Speaker, I thank the gentleman for yielding.

I commend the gentleman from California, Mr. GEORGE DANIELSON, for taking this special order and I certainly want to join him and my colleague, the gentleman from California (Mr. SISK) in the remarks they have just concluded.

We are obviously commemorating a day that is always going to be remembered by the civilized world. It is a day of tragedy not only for the Armenian people but also for all decent people around the world.

The reason it is important that we commemorate this day this year and each year thereafter is that, hopefully, never again will somebody be able to say that nobody even remembers the Armenian Massacre. I have specific reference, of course, to a purported dialog that took place in the early 1940's when Adolf Hitler was about to embark on the final solution in what became the biggest massacre of all history, and when he was asked whether this publicity that might result from the extermination of what later turned out to be no less than 6 million people, was not going to reflect adversely on the Third Reich, he thereupon, in true fashion, responded sarcastically, "Whoever discusses the Armenian Massacre of 1915?"

I think that exactly for that reason, if for no other, and obviously there are many other reasons, it is important to remember what these innocent people, even those who survived the massacre of 1915, had to go through to this very day. I say that because, as the gentleman from California (Mr. SISK) already has alluded to this and the gentleman now in the well from California you, GEORGE DANIELSON, have told us also, that when you talk to some of the survivors of the 1915 massacre it is very obvious that the scars of that event will forever be with these people.

I also think it is to the everlasting credit of those who survived that massacre and reached the shores of this country and became leaders of the communities in which they resided—communities such as the districts that the gentleman from California (Mr. SISK)

and I are privileged to represent which happen to have one of the largest concentrations of Armenians in America. If you look at Fresno, Tulare, and Kings Counties and various other communities of the San Joaquin Valley, and look at all of the professonal communities and the farming communities above all, one can see that Americans of Armenian descent have managed despite all of the discrimination through the past years to achieve prominence in their respective fields and have brought tremendous credit to their communities.

So, Mr. Speaker, I am privileged, indeed, to join the distinguished gentleman from California (Mr. DANIELSON) today in commemoration of this very important date, not only in the history of the Armenian people, but in the history of the world at large.

I thank the gentleman for giving me this opportunity to speak.

Mr. DANIELSON. Mr. Speaker, I wish to thank the two gentlemen who have just spoken. The gentleman from California (Mr. KREBS) not only represents a community which has a large number of Americans of Armenian descent in it, but who is one who has a unique understanding of the problem we are discussing. It is my recollection, sir, that you are of Jewish extraction, that you are an American who has lived in Israel and who has lived in Germany. If any of us have an understanding of the psychological shock and the trauma resulting from the massacre of a people, you, sir, probably understand it better than any.

So I deeply thank the gentleman for this contribution to this special order.

Mr. Speaker, I would like to point out that of the survivors, most of them—and this was true also of the holocaust in Germany—have been deprived, after their survival, of their properties, their homes, their farms, their businesses, and their personal properties.

One thing that is significantly different between the two massacres is that in Germany, the successor government, the modern Government of Germany, has tried to compensate for the massacre's consequences, which is different from the successor Governments of Turkey in terms of the fact that at least the modern German Government has acknowledged the wrongdoing of the predecessor government, and it has made to a very considerable extent some compensation for the losses of property. Of course, there is no way that compensation can ever be paid for the loss of life and human dignity, but at least an effort has been made along this line by the modern German Government.

Mr. KREBS. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from California.

Mr. KREBS. I thank the gentleman for yielding.

I think in that connection it is, unfortunately, also important to point out that while in Germany we have seen a very radical and drastic change in transition from the most vicious totalitarian regime in the history of men to a flourishing democracy with everything that it entails, in Turkey we have seen very little change since 1915. Not only did Turkey, of course, fight on the side of the Germans in World War I; they did the same thing for practical purposes in World War II. While it is true that it maintained a so-called neutrality in World War II, nevertheless, it was obvious wherein their sympathies lay at that time. Unfortunately, to this very day we do not have anything resembling a true democracy in Turkey. Of course, the situation in Cyprus demonstrates in no uncertain terms that very little has changed in Turkey since 1915.

Mr. DANIELSON. I thank the gentleman for his added contribution. Armenians everywhere will always remember the sad days of the massacres. Even today there is scarcely an Armenian American family that did not have some member of that family who suffered death during the summer of 1915. The Armenians of America can never forget that their fathers, their mothers, their brothers, and sisters were brutally killed or were left to perish in the desert heat. The memory runs very deep, and it will not be obliterated.

I am not of Armenian ancestry, but I have a host of friends who are, and I know their stories, having heard them time and time again. I also know that these fine people have been as good citizens as any we have ever had, and from that I infer that they were also good citizens when they lived within the political boundaries of Turkey. No group has ever worked harder or made a greater contribution to our economy and our culture than have they. They have never been a burden upon society.

One thing which I cannot understand, and I cannot believe that anyone understands, is that the present Government of Turkey, or any Government of Turkey since 1915, has never had the courage or the common decency or the will to at least admit the wrong of their Ottoman government and to make an honest effort to make amends. In 1915 and during the period of the atrocities, our own American Ambassador to Turkey, Henry Morgenthau, made public record of what he saw transpiring in Turkey. He sent reports to the Department of State as to what was happening to the Armenian people in Turkey. He protested to the Turkish Government and begged with them to show mercy to these helpless people. Yet nothing was done. At no time in the 63 years that have elapsed has any Government of Turkey taken any action whatever to acknowledge the fault of the Government of Turkey which was then in power, or to compensate the survivors in the Armenian community, even to the extent of the properties and the lands which were taken from them.

Strangely enough, some Governments of Turkey since 1915 have even denied that these events took place, even though diplomatic and historical records, including those of our own American Ambassador, Morgenthau, who even wrote a book detailing his experiences and what he saw take place, establish the facts beyond any reasonable doubt. On some occasions officials of the succeeding Turkish Governments have said that all that happened was an effort to suppress a rebellion by the Armenians who lived in the eastern portion of what was then Turkey. The facts themselves discredit that explanation. The persons killed, the persons driven from their homes and lands were not soldiers or persons capable of being soldiers. They included old men and women, the aged, the sick, the feeble. They included little children.

It must be apparent to all who can think that these people are not the substance of a rebellion. Even if they were, if there were a rebellion among 2,500,000 people, does that mean that they had to kill or disperse 2,500,000 people?

Commonsense tells us that there may be a few among that group who could have taken part in a rebellion; but for heaven's sake, not the old men and women, not the feeble, not the children. It was not necessary to obliterate the entire Armenian population in their own homeland.

Now, I know, I acknowledge gladly, that it was not the present-day Turkish Government that conceived this awful plan of genocide, that it was the policy of the Ottoman Empire, just as we know today it was not the present-day Germany that initiated the holocaust under the Hitler regime; but that is where the similarity ends with respect to these two nations, with respect to massive scale genocide against helpless minorities within their boundaries. On the one hand, Germany has held war crimes trials and has made or is making reparations for the actions and deeds of the past government. By doing so, it has made clear to the nations of the world that the past atrocities and genocides are not condoned as national policy within Western Germany. Even so, the holocaust against the Jews is still remembered and always will be, as it should be; but the German Government has separated itself from those crimes and history will record the fact that they made every reasonable effort to cleanse themselves of that guilt.

On the other hand, the present Government and all Governments of Turkey succeeding 1915 have been either unwilling or unable to come to grips with the dark blotch on their past history. If Turkey is harboring either the notion that the Armenian massacres never took place or that Armenians the world over will ever forget those horrors, they should know that either notion is sheer folly. By their refusal to face the facts and try to take steps to ameliorate such past tragedy, Turkey by its inaction continues to tell the world that apparently it still condones past acts of genocide as a national policy.

Let me say at this point, Mr. Speaker, that the day will come, and it surely will come, when the Government of Turkey must admit that the Armenian people within its borders were, in fact, the unfortunate victims of genocide. The leaders of the Turkish Government in power at the time of such an admission of responsibility will be the ones whom history will record and credit as the seekers of truth and justice.

Mr. Speaker, as Members of Congress,

as Members of this great Government of ours, I am sure that we all want to work for the common good with the governments of all free nations, all nations free or otherwise, around the world. We wish to work with Turkey, as well as we wish to work with any other country; but can the Government of Turkey fail to realize that we have within our borders 500,000 Americans of Armenian ancestry and that all 500,000 remember clearly the events of 1915? Can the Turkish Government fail to realize that those 500,000 Armenian Americans who pay taxes, yea, probably more than the average amount of taxes, for they are very successful in business and in commerce, that they do not want their tax money spent to send funds, relief, military aid or otherwise, to Turkey?

It is only human understanding that this is the case.

Can it be that the officials of Turkey do not recognize that it is incumbent upon them to acknowledge the fault of their antecedent government; that it is incumbent upon them to realize that they must dispel once and for all the concept that genocide is an acceptable means of government; that they must recognize these facts in order that an understanding can be brought about which is based upon sound logic and facts.

Mr. Speaker, as has been my practice during the 8 years that I have been in this Congress, I have ordinarily had as a summer intern a young man or woman of Armenian ancestry.

A couple of years ago I had an exceedingly bright intern, a young man by the name of Van Ajemian who just the other day sent me a copy of a story he had written concerning his grandmother's inconsolable grief. I wish to read it to the Members so that they can get some concept of the depth of feeling this young man has.

GRANDMOTHER'S INCONSOLABLE GRIEF: WHO CAN TELL BY LOOKING AT HER?

"The storm of grief bears hard upon (her) youth,
And bends (her) like a drooping flower to earth."

—*Nicholas Rowe.*

On an occasional Sunday morning you used to be able to see her standing on that empty lot near the corner of Lincoln Avenue and Montebello Boulevard in Montebello. She would be there with a kerchief wrapped around her head, and a small book held with both hands. Now and then she would cross herself with one hand in the Armenian Orthodox style, slightly different from that of the Greeks. She would try to bend as if genuflecting, but could do so only a little.

When my mother or I or one of her friends could not take her to the Armenian Church on 20th Street in Los Angeles, she would walk the five blocks from her house up the hill to that empty lot, where she would pray. Her little pilgrimages, which put a strain on her aging body, began after the local Armenian community had bought the lot for the building of a new church, one closer to the growing Armenian community of the east side: Montebello, Monterey Park, Pico Rivera and Whittier. But my grandmother doesn't go there anymore; her strength is no longer up to a long walk and an hour's prayer.

Yet, she still gets around by foot, doing her shopping alone at the corner grocery store and bringing the food home in her grocery cart. She knows some arithmetic (she once ran a grocery stand during the brief period of free enterprise in Soviet Russia), and can even utter numbers in English. Other than her numbers, her English vocabulary is limited to "no English," "not home," and "thank you very much." Despite her apparent isolation, she is not completely cut off from the world, as she does get the Asbarez, one of five Armenian-language newspapers published in the United States. Through the paper she has learned of Jimmy Carter, who made a campaign statement sympathizing with the plight of the Armenian nation. Now grandmother prays for him, mistakenly calling him "Julie" instead of "Jimmy." She also prays for Congressman George Danielson. She tells me in Armenian that they will bring justice to the Armenians.

One can never tell by seeing her pull her cart to the store and plant her seeds in the backyard just what kind of hard life she has led. She is a typical grandmother, proud of her sixteen grandchildren. She laughs, jokes, and even enjoys earthy humor—in Armenian, of course. She can even converse in village Turkish, and still retains some knowledge of Russian. Her devotion to the Armenian Church is typified by the small plaques of Holy Etchmiadzin, seat of the Armenian Church, found in her house. Someone has told her that our late President Kennedy was a good man, and she now hangs a picture of him in one of the rooms.

There is no outward sign, none at all (save the small indentation where her upper nose cartilage had been broken) that she, for all her typical grandmotherly traits, went through a hellish nightmare at the age of fourteen. No, you couldn't tell by looking at her. Only if you could understand her millenia-old Armenian tongue would you be able to unlock the chest containing the secrets of her past. It is my fortune to know Armenian well enough to have learned the secrets.

Grandmother never talks easily of those dark, troubled days. Indeed, we almost always have to get her a glass of water when she does, so that she can calm herself. It just happens that a word, a phrase, or even a happy song will trigger a memory of the past. And though the memory so triggered may at first be pleasant, it will end up turning into a haunting grief, grandmother's eyes filling with tears and the hearts of the audience filling with an uneasiness which betrays a frustration at not having been able to change history and an anger directed at the darker side of the human species.

"There was no trouble between the Armenians and Turks in the village of Dzart (near present-day Erzurum, Turkey), where I grew up," she recounted as I interviewed her for the Armenian Assembly's living history project. "We had a live-and-let-live attitude. The Turks would go about their business in their part of town, and we in ours. Then, things changed very suddenly."

It was during a time of international turmoil, namely, World War I, that the Ottoman government decided to get rid of the Armenian minority of eastern Anatolia, where the Armenians had been living for over two millenia. After all, the Armenians—all men, women and children—were conspiring with the Tsarist armies, weren't they? Talaat Pasha, Turkish Minister of the Interior, was confronted by the American ambassador about the massacres taking place against the Armenians. Talaat's reply: "Today's innocents will be tomorrow's subversives."

When grandmother gets into a story-telling mood, the consuming agony returns: "The Turkish soldiers took the Armenian men, from age thirteen on up, to St. Karapet monastery, where the Armenians were buried in the ground up to their necks. My two brothers were in the group. We ran after them. We cried when we saw the Turkish soldiers riding their horses over the half-buried men, crushing their skulls." Eventually her brothers' wives and her mother also perished. She was left with only a cousin and another relative. She survived only because of her cleverness and her faith. "The deportations . . . the people were multitude. You could count the stars in the heavens, but not the people. I would pray to St. Gregory the Illuminator (Armenian patron saint). I praise God, for St. Gregory would always help me out of danger." And grandmother invariably crosses herself after saying this.

She wandered through the interior of Turkey, crossing paths with Turks, Kurds, and even Armenian freedom fighters like Antranik and Mourat. At one point she wanted to throw herself into the Euphrates' headwaters, to wake up from the nightmare. Many mothers were doing this to their children to end the little ones' anguish. In some places the Turks would tie heavy stones around the necks of the deportees and cast them into the water, where the Armenians would drown and redden the biblical waters. "It was my sister-in-law who saved me. I was ready to jump, but she said, 'No, you must live so that you can avenge the death of your brothers.' And for this reason I didn't jump."

As I look at my radiant grandmother, I think to myself, "who can ever tell that she has heard the wail and lament of countless souls, has seen the mutilation of her loved ones, has been herself on death's doorstep?" Her face brightens upon seeing me; she showers me with a variety of blessings.

Yet, her mood will be different very soon. April 24 is commemorated by Armenians, from Soviet Armenia to Australia, as the day of remembrance of the massacres of 1915. Armenian churches everywhere will hold requiem services on the 24th. A crowd will gather at the Armenian Martyr's Monument in Bicknell Park, Montebello (you can see the monument to the south from the Pomona Freeway). There will be grandmother, clutching her candles, saying her prayers for those who were so cruelly separated from her just a generation ago. And she will pray for "Julie" Carter and George Danielson, because they will bring an antidote to the madness of genocide which began in the Ottoman Empire and swept through Europe in the forties, and nowadays breaks out in many countries.

"God bless you," she says to me. "May you blossom and become strong. May I never see the days of your suffering. Amen." And Vartanoush Nranian crosses herself.

VAN AJEMIAN.

MONTEBELLO, CALIF., *March 26, 1978.*

Mr. Speaker, I respectfully submit that this little story of Van Ajemian about his grandmother says as well as anyone can say why it is that this great tragedy in 1915 has to be righted. And it would be so easy to do so if the present Government of Turkey would only acknowledge the guilt of its previous Government, recognize the fact that genocide took place, and took some reasonable steps to make amends. You could never make amends for the loss of life, but at least for the loss of property. They should right the recorded history of that period, then a great step would be taken to right these wrongs.

We in this country, Mr. Speaker, in the last week have been privileged to see the television film "Holocaust" which was played on three or four separate evenings. The tragedies of that period were apparently the equal of the tragedies of Armenia in 1915. However, I recommend to the Government of Turkey that it look to the example of the Government of Germany to at least admit

the sins of past governments, to acknowledge the evil that took place, to cease hiding behind the fiction that they were merely suppressing a rebellion when they exterminated 1,500,000 innocent people and drove the remainder of them from their national homeland.

Mr. Speaker, on March 25, 1978, the Los Angeles Times carried a story setting forth the manner in which the present Government of Germany has attempted to make some recompense to the sufferers of the Jewish holocaust. It reads as follows:

BONN.—Over the past quarter century, the West German government has paid out billions of marks—about $28.5 billion of marks—about $28.5 billion at the current exchange rate—in compensation to Jewish victims and their families of Adolf Hitler's Third Reich.

The deadline to apply for compensation passed in 1969, but international Jewish organizations want the government to extend the program and accept new claims.

Among the recipients are survivors of concentration camps and others who can show that their lives were disrupted by the Nazis.

About 90% of the recipients are Jews. One-third of them live in Israel and one-third in West Germany. The others are scattered in other countries, including the United States.

The first law authorizing wiedergutmachung—literally, making good again—was enacted 25 years ago. Since then, the government has made payments totaling more than 57 billion marks. Last year alone the payments came to 1.8 billion marks, or about $900 million.

The government estimates that the program will continue through the year 2000 and that the total cost will exceed 85 billion marks. But officials concede that their estimates could be off.

"So far, all our estimates on the amount of money to be paid and the longevity of the beneficiaries have been too low," Wolfgang Kaphammel of the Finance Office, who has worked with the reparations program for 16 years, said.

"The life insurance actuarial tables are not valid for these people. Those who were able to survive the Nazi camps are very hardy people indeed."

The program has been an administrator's nightmare, Kaphammel said.

"We try to be understanding and tactful," he said, "but some people are never satisfied. One person hears that someone else got more money than he did so he comes in and makes a new appeal. Then there are the people who have come to the West (from Eastern Europe) since 1965 and do not know that under the law they cannot receive anything. They think our country is very rich and can afford to pay them. We try to be understanding and tactful."

Under the law, Dec. 1, 1969, was the deadline for applying for compensation, but Jewish organizations have sought to reopen the program largely to take care of persons who have emigrated from Communist Eastern Europe since 1965, the deadline for eligibility.

"The issue is brought up all the time," a government official said. "It is a political question."

The coalition government headed by Chancellor Helmut Schmidt takes the position that any legislation to approve an extension must be agreed upon by all the parties represented in parliament.

The opposition parties, the Christian Democratic Union and Christian Social Union, insist that the issue is the responsibility of the government, composed of Schmidt's Social Democrats and the Free Democratic Party.

One scheme was proposed by Dr. Nahum Goldmann, president of the World Jewish Congress and chairman of the Conference on Jewish Material Claims Against Germany, which includes representatives of 24 organizations.

Goldmann has proposed that Bonn contribute 600 million marks to set up an international foundation, based outside Germany, to assist recently arrived emigres from Eastern Europe who can claim damages because of Nazi war crimes.

"This would remove the program from control by German law," a government official said.

Jewish spokesmen were unanimous in their commendation of the manner in which the Bonn government has administered the program.

The Jewish organizations have also been highly critical of the East German Communist government, which has never acknowledged responsibility for recompensing Nazi victims.

Claims representatives met more than a year ago with East German officials and were offered $1 million to assist Jews from the Communist state who had become U.S. citizens.

"The offer is ridiculous in view of the claims outstanding," Goldmann said. "It's peanuts. Either we accept reparations for all victims or none at all."

"Unspeakable crimes have been committed in the name of the German people, calling for moral and material indemnity, both with regards to the individual harm done to Jews and to the Jewish property for which no legitimate individual claimants still exist," Adenauer said.

West Germany paid 1 billion marks to 12 West European countries to compensate Nazi victims there and 6.6 billion marks to a wide assortment of beneficiaries including the Lutheran and Roman Catholic churches and the Jewish Claims Conference.

Most recently West Germany signed an agreement with Poland that includes payments to individuals there who had claims arising from the Nazi occupation.

The two key programs that continue to make payments to Nazi victims around the world are the restitution system, which pays pensions, and the reparations program, which reimburses people for property lost, destroyed or stolen by the Nazis.

Until mid-1977, 4.3 million individuals had supplied for financial reimbursement under the West German restitution law and only 16,954 had not been settled.

Claimants included people who had been imprisoned, the survivors of prisoners, persons who said their professional careers had been interrupted, former government officials who lost their jobs and individuals whose health was broken. The claims are investigated with the help of the incredibly complete records kept by the methodical Nazis.

Former prisoners were granted five marks for each day of their confinement, the same payment given to persons locked into ghettoes or forced to wear yellow Star of David armbands.

Professional persons, on the other hand, were granted lifetime pensions based on their potential earnings. Survivors of camp victims were also given pensions, and former students were given lump sum settlements to compensate for their lost education.

When individuals dispute the decisions of the state offices, they can appeal through West German state and federal courts.

Widows have been paid an average of 700 marks a month and the maximum monthly pension paid is 1,800 marks. Orphans were paid until they reached their 18th birthday.

The number of persons receiving pensions reached a maximum of nearly 278,000 in 1972 and has been declining slowly ever since, but the total amount of pensions—tied to West German government raises—has increased every year.

Nearly 733,000 claims of property losses have been made. Only 1,809 were still outstanding in mid-1977.

Under this system, individuals describe what was lost to the Nazis—real property, jewelry, furniture, art works—and the government makes payment based on the estimated value.

Peter Menten, a Dutch former Nazi officer who was recently convicted as a war criminal, received 500,000 marks for art works he said were lost to the Third Reich. Now that he has been proved to have been a Nazi himself, Menten has been sued by the West German government for a million marks—the original payment plus interest.

East Germany pays pensions to some Nazi victims who live within its borders. As a Communist state, East Germany contends that it was liberated from Nazism by the Soviet army and that responsibility for Hitler's crimes rest with West Germany.

The question of payments to Nazi victims has been a major factor in preventing East Germany from establishing normal relations with Israel and hindering better relations with the United States, which has urged East Berlin to negotiate with the Jewish groups.

In contrast, West Germany maintains close relations with Israel.

A cornerstone in the West German wiedergutmachung program was the payment of reparations worth 3.45 billion marks to Israel over 12 years, starting in 1952. Eighty percent of the reparations to Israel consisted of goods to help build the industrial and agriculture base of the young country.

Initiated by the first postwar chancellor of Germany, Konrad Adenauer, a Roman Catholic who spent some time in a Nazi prison, the agreement was termed "something quite unprecedented" when it was signed in 1952 by Israeli Foreign Minister Moshe Sharett.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding.

Mr. Speaker, I want to commend the gentleman for his exceptionally fine statement and for bringing this to the attention of the full House of Representatives. It is particularly germane right at this time, as the gentleman knows, and not just because it is the anniversary of this atrocity, but because of other things which we will shortly be considering.

Mr. Speaker, I want to express my appreciation to the gentleman for bringing this to our attention.

Mr. DANIELSON. I thank the gentleman for his comments.

Mr. Speaker, I am mindful of what the gentleman says. I am sure that the gentleman from Ohio and all 435 of us in this House and all of those in the other body have as our one single motivating desire on every vote we cast that we cast our vote for what is in the best interest of our country. It makes it exceedingly difficult to do that once in a while, when we bear in mind the atrocities that some of our fellow Americans have suffered. I just hope to God that this message might reach someone who might be able to do something to right those wrongs.

Again, I thank the gentleman from Ohio for his contribution.

● Mr. ANNUNZIO. Mr. Speaker, today marks the 63d anniversary of the ruthless Turkish massacres of the Armenian people. I join my distinguished colleague

from the 30th district of California, Hon. GEORGE E. DANIELSON, who has taken this special order, and my other colleagues in marking this sad event.

In 1915, the Turks set out to exterminate the whole Armenian Christian population within the Ottoman borders. Systematically, and with cold callousness, the Turks first killed the writers, teachers, clergymen, and leaders of the Armenian people. Then the able-bodied men were brutally murdered and the young women enslaved. The remaining women, children, and old people were forced to march barefooted under the blazing sun, without food or water toward their ultimate destruction in the remote deserts of Der-el-Zor.

Along the way these helpless people were subjected to inhuman tortures and mutilation, to rape and massacre, and those who survived these initial brutalities, died one by one from exhaustion, disease, and starvation. The roads where these caravans passed were piled high with the corpses of these innocent victims of the Turks.

When the carnage was over, 1,500,000 martyrs had been slain and another million had been ruthlessly torn up from their ancient homeland and deported to the desolate deserts to die.

Not only had the Turks attempted to annihilate the Armenian nation, but at the same time they tried to obliterate every trace of the 3,000-year-old Armenian civilization. Universities, libraries, churches, and monasteries were burned, and with them, irreplaceable antiques, paintings, books, and relics were destroyed.

Not an Armenian alive today has been left untouched by these massacres. Grandparents, mothers and fathers, children, and even newborn infants were ruthlessly murdered. Whole families were wiped out with a single blow, and a new word, genocide, had to be coined to describe the Turks' efforts to destroy an entire race.

The massacres in 1915 were a more extensive repetition of the Armenian massacres in 1895 and 1896, which horrified a civilized world and caused Gladstone, Britain's Prime Minister, to rise up and make the last public speech of his career in defense of the Armenian people and against Abdul Hamid, the perpetrator of these crimes.

The Armenians are perhaps the oldest of the civilized races in Western Asia and were the first nation in the world to accept Christianity as their state religion. From time immemorial, the Armenian has worked peacefully and industriously in the high mountains which are his home between the Black Sea and the Caspian Sea. Here, church and people have maintained with amazing vitality their tradition and culture against wave after wave of alien conquests.

Mr. Speaker, at this point in the RECORD I would like to include "The Evidence of the Genocide" as compiled by the Armenian National Committee headquartered in Boston, Mass.:

ARMENIAN NATIONAL COMMITTEE,
Boston, Mass.

THE EVIDENCE OF THE GENOCIDE

The evidence of a planned and systematic genocide is overwhelming, as the following quotes—a brief sampling from thousands of readily available, authoritative, non-Armenian sources—indicate:

By any standards this was surely the most unprecedented, Indeed the most unimaginable racial annihilation, until then, in modern history. Nevertheless, apparently unconcerned by the enormity of their affront to civilization, the members of the Young Turk regime continued to view the "deportations" as nothing more than effective diplomacy, the realization of Abdul Hamid's injunction that "the best way to finish with the Armenian Question is to finish with the Armenians."

HOWARD M. SACHAR.

[Emergence of the Middle East 1914–1924, (Knopf, 1969)]

From May until October the Ottoman Government pursued methodically a plan of extermination far more hellish than the worst possible massacre. Orders for deportation of the entire Armenian population to Mesopotamia were despatched to every province of Asia Minor. No hamlet was too insignificant to be missed. The news was given by town criers that every Armenian was to be ready to leave at a certain hour for an unknown destination. There were no exceptions for the aged, the ill, the woman in pregnancy.

DR. HERBERT A. GIBBONS.

[The Blackest Page of Modern History (Putnam, New York 1916)]

In 1915 there occurred a "final solution" which is now almost forgotten, the deliberate extermination of the Armenians by the Turks. The Armenian "problem" was solved by the massacre or deportation of some 1,750,000 men, women and children from the Armenian provinces of Turkey. Over a million died or disappeared through massacres in Turkey or during the forced marches to the deserts of the Turkish eastern territories—the areas which were later to become Syria and Iraq.

ROGER MANVELL AND HEINRICH FRAENKEL

[The Incomparable Crime (Putnam 1976)]

When the Turkish authorities gave the orders for these deportations, they were merely giving the death warrant to a whole race; they understood this well, and, in their conversations with me, they made no particular attempt to conceal the fact.

I have by no means told the most terrible details, for a complete narration of the sadistic orgies of which these Armenian men and women were the victims can never be printed in an American publication. Whatever crimes the most perverted instincts of the human mind can devise, and whatever refinements of persecutions and injustice the most debased imagination can conceive, became the daily misfortunes of this devoted people. I am confident that the whole history of the human race contains no such horrible episode as this. The great massacres and persecutions of the past seem almost insignificant when compared to the sufferings of the Armenian race in 1915.

HENRY MORGANTHAU.

[Ambassador Morganthau's Story (Doubleday, Garden City 1918)]

A foreign witness has said that these deportation columns were merely a polite form of massacre, but in reality they were infinitely worse and more heartless; for instead of instant death they forced the victims to undergo all sorts of inhuman sufferings, while this cowardly and barbarous plan was to save the face of the authorities by posing as a necessary military measure. From June till August 1915 the hottest time of year when the victims were most likely to succumb, these processions of death wended their way endlessly from all the vilayets and towns where there were Armedians southwards in the direction of the desert.

FRIDTJOF NANSEN,
High Commissioner for Refugees, League of Nations.

[Armenia and the Near East, (New York 1928)]

And Hitler cited the Armenian Genocide with the comment, "Who talks nowadays of the extermination of the Armenians? The world believes in success only"?

His Eminence, Richard Cardinal Cushing, Archbishop of Boston, once termed the Armenian claim as the "oldest unresolved grievance on the agenda of world business" and charged the United Nations to effect a just solution for the Armenians in order to right the wrongs of the past and to demonstrate to the world that international justice is not merely an empty, meaningless phrase.

On this 63d anniversary of the Armenian Genocide—a crime with which no other in recorded history can compare—I would like to reiterate Cardinal Cushing's challenge to the United Nations that it fulfill its mission for world peace through international justice by proving that it is indeed a forum which can provide a peaceful redress for the legitimate grievances of the Armenians, and indeed, for any freedom-loving people whose inalienable rights of self-determination have been violated.

Mr. Speaker, as Members of Congress, let each of us examine our conscience, and let us do our utmost to alleviate the memory of this unjustified crime against the Armenian people, the scars of which are carried in the hearts and minds of every surviving Armenian.●

GENERAL LEAVE

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Illinois (Mrs. COLLINS) is recognized for 5 minutes.

● Mrs. COLLINS of Illinois. Mr. Speaker, because of commitments in my congressional district I was unable to vote on rollcall No. 244, the adoption of House Resolution 1143, the rule providing for the consideration of the bill, H.R. 11401 NASA authorization. I support the resolution and would have voted "aye." ●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, due to a delay in returning from my congressional district, I was absent on rollcall No. 244, the vote on the adoption of House Resolution 1143, providing for the consideration of H.R. 11401. Had I been present, I would have voted "aye." ●

THE NATIONAL CENTER ON PRODUCTIVITY AND QUALITY OF WORKING LIFE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 5 minutes.

● Mr. LAFALCE. Mr. Speaker, I am today introducing legislation which would extend for 1 year the life of the National Center for Productivity and Quality of Working Life. The National Center was created during the 94th Congress on November 28, 1975, when the President signed S. 2195 into law. Public Law 94-136 provides a 3-year authorization for appropriations for the Center through September 30, 1978. The Center was created as an independent agency governed by a 27-person Board of Directors consisting of representatives from government, business, and labor. The Center is the successor to earlier commissions dating back to 1971. During the 3-year life of the Center, it has operated with an annual budget of less than $3 million and a staff of fewer than 40.

FUNCTIONS AND ACCOMPLISHMENTS

Despite its limited resources, the Center has served and continues to serve several very useful functions and has to its credit several solid accomplishments. I would like to outline some of the functions and accomplishments in six areas.

First, in the human resources area, the Center has been instrumental in encouraging labor-management cooperation. Particularly in the face of increasing foreign competition, it is important that labor and management do their utmost to settle their differences in a way that is the least disruptive to our economy. Experience has shown that labor and management can cooperate in a way which is beneficial to both. This kind of cooperation supplements negotiated contracts and in no way interferes with the collective bargaining process. The Center has been in the forefront of encouraging the formation of labor-management committees on the plant level as well as the community level. It has, for instance, given technical assistance to the Buffalo-Erie County Labor-Management Committee.

Second, the Center has taken the initiative in special private sector projects. For instance, the Center funded a project involving the Rushton coal mine in Pennsylvania. This project involved increasing the role of the foremen in the area of safety and increasing the role of the other miners in the area of production. This Center-initiated project resulted in a reversal of the downward production trend and the worsening safety record so that now production has increased and safety violations have decreased. Particularly in view of the recent coal industry difficulties, this project is an important accomplishment not only in terms of the one mine but in terms of providing an example for others. In fact, earlier this month, a representative of the Center spent a day in Charleston, W. Va., discussing an agenda for a statewide labor-management committee and the Rushton project was of great interest to mine operators and UMW officials at the meeting and followup on the local level is likely.

Third, in the public sector, the Center has for the past year been working with local governments across the United States in establishing a network for the purpose of encouraging productive labor-management cooperation in local governments. While this is difficult to point to as an "accomplishment," it is a program where the Federal Government, at very modest cost, is serving a very useful role in terms of encouraging local communities to solve their own problems. Without the Center, it is doubtful that this sort of activity would be taking place.

Fourth, the Center is devoting considerable effort to the study of the impact of Government regulation on private industry. Most of us complain about Federal regulation and I for one am encouraged that at least one Federal agency is doing what it can to at least develop ways to measure regulatory impact. A report is being prepared which will contain guiding principles for establishing regulations which would hopefully result in productive achievement of the intended goals.

Fifth, in the area of technology, the Center is currently surveying small and medium sized manufacturing firms throughout the Nation to identify the reasons for the existing lag in the introduction of numerical control technology in those firms. This project is in response to a GAO report which cited this lag relative to our foreign competition. The importance of small batch manufacturing in terms of employment and defense readiness is significant and this project should be most useful to small and medium size manufacturing firms.

Sixth, from an overall perspective, the Center has performed a most useful catalytic function. It has encouraged the creation and support of other productivity and quality of working life centers around the country so that local efforts to make improvements in these areas can take place. The Center has, in response to its enabling legislation, sponsored several conferences around the country. As an independent agency with no regulatory power, it represents no threat or bias to labor or management and so both groups are willing to meet together when encouraged to do so by the Center. I saw this first-hand when the Center worked with me 2 years ago in sponsoring a labor-management seminar on productivity in my congressional district. Over 200 labor and management leaders attended that seminar and one interesting outcome was the establishment of a productivity course taught at night at a local community college. That course is now being taught and it includes 30 students from both labor and management. And so the dialog between labor and management continues. Earlier this month, the Center worked with me in sponsoring a followup seminar in which we heard from labor and management leaders from around the country discuss ways to work together. Finally, the Center publishes and distributes very worthwhile publications relative to various program areas. These publications serve to encourage local efforts to improve productivity and the quality of working life.

THE U.S. PRODUCTIVITY RECORD

Mr. Speaker, the recent productivity record in the United States is not something of which we can be proud. Our rate of productivity growth has decreased from an annual rate of about 3 percent during the first two postwar decades to less than 2 percent during the past decade. And this negative growth rate has occurred at a time of an increasing growth rate in other industrialized countries such as West Germany and Japan.

This low productivity growth rate has several effects. Inflation is spurred because costs of production rise without a corresponding increase in output. An employer's competitive trade position is adversely affected by productivity stagnation or loss. Inefficient use of resources means poor productivity which is reflected in higher prices which has resulted in American consumers buying more and more goods from foreign competitors. Therefore, low productivity means less demand for American products which contributes to our high unemployment rate. Finally, in the public sector, taxes increase or services decrease and the strength and credibility of Federal, State, and local governments are questioned when those units of government do not seek to improve their own productivity.

And so, Mr. Speaker, our poor productivity growth rate, particularly as contrasted to our foreign competitors, leads me to believe that it is imperative that this country make a commitment to the improvement of productivity. Other countries certainly have made that commitment and I think that we owe it to ourselves to make such a commitment. Two examples clearly illustrate our lack of commitment relative to other countries. The West Germany Government spends over $15,000,000 on its productivity efforts. The Japanese Government spends almost $15,000,000 on its efforts. These figures are most alarming when one considers the fact that West Germany, with less than a third of the U.S. population and Japan, with one-half of the U.S. population, each spends five times as much as the United States in its productivity efforts.

CENTER CONTINUATION

The National Center has a complicated mission and scant resources. Given these factors, I think the Center has done a commendable job. I was happy to note that the President's fiscal year 1979 budget at least proposed the same level of funding that the Center is now operating under. I think the Center's work should be expanded as part of an overall drive to combat inflation. I understand the President is considering reorganizing the Center's functions to line agencies and I support those shifts if they result in added emphasis to this major national problem. In the meantime the work of the Center must be continued.●

ANTIGUN LEGISLATION THROUGH DECREE

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from Florida (Mr. SIKES) is recognized for 10 minutes.

● Mr. SIKES. Mr. Speaker, the Bureau of Alcohol, Tobacco and Firearms issued a "Proposed rulemaking" on March 21 which would bring about Federal firearms registration by decree rather than through the enactment of legislation. It is my understanding that the administration supports this proposal. This is antigun legislation through regulation.

The BATF program would require the 168,000 federally licensed firearms dealers, manufacturers, and importers to submit nearly 700,000 reports yearly covering 25 million to 40 million transactions at a cost in the millions to consumers for increased paperwork and $10 million per year to the taxpayer. The Bureau has not offered any reason to believe that these regulations and the expense and paperwork they would entail are necessary. The stated purpose of the regulations is to improve the tracing of firearms used in crime and to enable the BATF to put resources into problem areas but, in the past, the Bureau has pointed with pride to their existing tracing capabilities. No reason is given for expending $5 million to $7 million of taxpayer's money, in addition to the costs of complying with these regulations by Americans to institute a new system. This is particularly true in light of frequently stated and widespread opposition to such a program.

This appears to be an attempt by the Bureau to circumvent the will of Congress by avoiding the legislative process. I have written to Mr. Rex C. Davis, Director of the Bureau of Alcohol, Tobacco and Firearms, strongly protesting this action and have suggested that if the Bureau wishes to submit a proposal to the Congress calling for gun registration that it be done through regular legislative channels. I have also joined in cosponsoring a concurrent resolution disapproving the proposed regulations.

Since firearms control first became an issue before the Congress and throughout the legislative history of the Gun Control Act of 1968, Congress has specifically and repeatedly rejected national gun registration. At least four amendments were offered to the so-called Bayh gun control bill in 1972, which would have required national registration of either handguns or all firearms. Each amendment failed. Also, during House Judiciary Committee hearings, the committee rejected four times amendments which would have initiated registration schemes. I do not think there can be any question as to the feelings of the Congress on this matter. This most recent attempt by the Bureau of Alcohol, Tobacco and Firearms to usurp congressional authority demonstrates once again that some governmental officials seem altogether too indifferent to the express will of Congress and to the wishes of the American people.

It is well, also, to bear in mind that the proposed new registration program has not been financed. It is important that the Members of Congress speak out clearly against funding of the program which does not have the sanction of Congress.

In this day when Americans everywhere deplore the computerization of our society and growing Federal intrusion into all aspects of our lives, I do not think it makes sense to expend additional millions of dollars to mandate further computerization and further Federal intrusion when there is no justifiable need for doing so.

I urge my colleagues also to join in support of the resolution disapproving the BATF proposed regulations. If the resolution is not adopted, these regulations will go into effect. Certainly, we do not want this to happen. Congress never intended that the bureaucracy create national gun registration.●

LEGISLATION TO CONTINUE DEFERRED COMPENSATION PLANS FOR STATE AND LOCAL PUBLIC EMPLOYEES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BOB WILSON) is recognized for 5 minutes.

● Mr. BOB WILSON. Mr. Speaker, I am introducing a bill today to reverse a proposed action by the Internal Revenue Service which would adversely affect the public employees of my district and the State of California, as well as other States. My bill requires the Treasury Department to issue regulations consistent with their long-standing actions regarding deferred compensation plans of State and local public employees. Since implementation of these plans, I understand that some 12,000 California State employees and thousands of local public employees participate. Both the city and county of San Diego received favorable rulings from the IRS—the city in 1973 and the county in 1976. Other local governments, such as Alameda County, have also received favorable IRS rulings. The State plan was approved by an IRS ruling in 1973.

These plans have many advantages. They allow the State's public employees to voluntarily set aside part of their current salaries to provide for their retirement years. The amounts deferred are not taxed in the year earned, but instead upon receipt in retirement. This encourages a systematic savings plan during the higher earnings' years and is a particularly important point in view of today's spiraling inflation.

Mr. Speaker, this legislation I have introduced today would continue the Internal Revenue policy in effect since the inception of the deferred compensation plans in my State of California and in other States with such plans. With this legislation, State and local public employees would be assured of the continuance of their deferred compensation plans—plans to which they have contributed in good faith over the years, looking toward a more secure retirement in the future.●

THE GUARDIAN OPPOSES LIFTING TURKISH ARMS EMBARGO

(Mr. BRADEMAS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. BRADEMAS. Mr. Speaker, the Guardian is one of the most respected newspapers in the English-speaking world. I ask unanimous consent to insert at this point in the RECORD an editorial dated April 7, 1978, in the Guardian opposing lifting of the embargo on U.S. arms to Turkey so long as there is no action by Turkey for a settlement on Cyprus.

The editorial follows:

[From the London, Guardian]
Apr. 7, 1978]

TOO SOON TO SELL THEM ARMS

The best thing that could happen in the Aegean and the Eastern Mediterranean would be for the Greek and Turkish Cypriots to come to terms. Their chances of doing this depend, as so much else depends these days, on the decisions and policies of the beleaguered President Carter. Yesterday the new U.S. Ambassador to Cyprus, Mr. Galen Stone, presented his credentials to President Kyprianou. And yesterday, also, the U.S. Congress began to consider President Carter's decision to resume arms deliveries to Turkey.

At the back of the book, which is now quite long, was the Turkish invasion of Cyprus in 1974. Since then successive Turkish governments have made party political capital out of what was once considered to be a Greek threat—which always was ephemeral—to persecute Turkish Cypriots. What has happened since has been a somewhat degrading series of semi-bargains between the United States and the Greek and Turkish governments, most of which have ignored the real problems of a divided Cyprus.

The semi-bargains have been bedevilled by semi-threats. The latest is a Turkish threat to leave NATO and come to terms with the Soviet Union. The Greek Cypriots think that the Americans think that this is serious, which it is not. Islamic Turkey's mistrust of the Soviet Union is at least as deep-seated as its mistrust of Greece, and much more nearly justified. If the Turks really are telling the Americans that they are thinking of changing sides then the Turks are bluffing. No Turkish Prime Minister could conceivably lead his country into membership of the Warsaw Pact.

The Congressional hearings on arms deliveries to Turkey ought to result in a bargain. Turkey had no cause or reason to invade Cyprus in 1974 and should be made to make amends. Turkey had no cause—other than rather sordid reasons of domestic politics—to carry its dispute with Greece over the Aegean to anrgy lengths. If Turkey remains intransigent on the issue of a Cyprus settlement, then President Carter should stand by his embargo. But if Turkey, belatedly, is ready to make realistic concessions, then the President should be allowed to resume shipments of arms to Turkey as well as to Greece. Both countries, after all, are essential partners in the western alliance.●

ADDRESS OF CONGRESSMAN JOHN BRADEMAS, ANNUAL MEETING, AMERICAN COUNCIL OF LEARNED SOCIETIES

(Mr. BRADEMAS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. BRADEMAS. Mr. Speaker, I had the privilege on April 20, 1978, of delivering an address at the annual meeting of

the American Council of Learned Societies in the National Portrait Gallery, Washington, D.C.

I insert at this point in the RECORD the text of my remarks on this occasion:

ADDRESS OF CONGRESSMAN JOHN BRADEMAS

I count it an honor to have been invited to be with you this evening at the annual meeting of the American Council of Learned Societies.

It is for several reasons that I feel very much at home with you. Not only was I for a brief time—between elections—a college teacher but also, in nearly twenty years in the House of Representatives, I have served on committees with primary responsibility for legislation that affects education and our institutions of culture generally.

This service has given me an opportunity to help write a wide variety of kinds of legislation to support colleges and universities, libraries, international education programs, elementary and secondary schools, the Smithsonian Institution, museums and, of course, the arts and the humanities.

So we have—you and I—been tilling much the same vineyard.

It is, indeed, a particularly propitious time for a Member of Congress who shares your concerns to be meeting with members of the American Council of Learned Societies.

For even now, Congress is considering various pieces of legislation that affect scholarship and learning in our country, including proposals to increase support of university libraries, to create a Department of Education, to stimulate research on urban problems and to provide more help to college students.

In addition, we meet not too many months after the inauguration of a new President of the United States and the installation of two relatively new Chairmen of both the Endowments, Livingston Biddle at the National Endowment for the Arts and Joseph Duffey, at the National Endowment for the Humanities.

So I should like, as we meet at a kind of time of passage, to talk with you this evening on three principal subjects: the work of the ACLS, some of the substantive questions that affect the humanities and some of the important tasks that, if we want to strengthen the humanities in American life, we must now undertake.

THE AMERICAN COUNCIL OF LEARNED SOCIETIES

Let me speak to you first of the achievements of your own organization. I note from your Annual Report that the ACLS considers the "core" of its activities to be its fellowship program, and surely giving scholars the opportunity for basic research is essential to humanistic scholarship and so to the humanities at large.

But, especially from the perspective of anyone in public life, you have other functions of great importance.

I understand that the ACLS was established in 1919 because the United States needed a spokesman in the International Union of Academies and that no organization then existed to serve this function; our National Academy of Sciences, unlike such academies in most other countries, was restricted to the sciences.

So for over a half a century the ACLS has in effect served as our national academy of the humanities. In your work with the International Council for Philosophy and Humanistic Studies and the United States National Commission for UNESCO and your official association with academic societies in other countries, you have been a spokesman for the United States on matters humanistic.

Your domestic base is set in your forty-two constituent societies and nearly one hundred associated research colleges and universities. As a federation of every major professional society in the United States directly concerned with the humanistic disciplines, you can speak with authority.

But you have also opened your ranks to the social science societies that have some humanistic orientation, and I suggest to you that your entire constituency gives you a potential power in the national scene of which you may not be aware and which you may not be exercising most effectively. It is to me significant that over two hundred of the nation's leading scholars in the humanities and social sciences serve on your Board, Council and your several committees.

I shall here note just a few examples of ACLS activities which I think illustrate the wide range of your concerns.

For nearly twenty years your American Studies Program has been informing European and Asian intellectual leaders about the United States, enabling them thereby to teach about important aspects of American history, literature and law, economy and government.

Your Dictionary of American Biography is a reference work indispensable in any serious library.

Your Dictionary of Scientific Biography is another significant contribution as are such other publications initiated by the ACLS and now operating independently as the Current Digest of the Soviet Press and the Journal of the History of Ideas. As one who spent two years of his life on a study of the anarchist movement in Spain, I am not unfamiliar with that latter journal.

Moreover, as sponsor in Congress of the International Education Act of 1965, which aims at supporting international studies and research at colleges and universities in this country, I have long been grateful for the leadership of the ACLS in foreign area studies. In fact, the original concept of organizing scholarly expertise around a cultural region grew out of the early work of the Council in Oriental Studies and Language Training, and today the ACLS administers a half dozen committees that deal with foreign area studies and is associated with a number of other similar efforts through the Social Science Research Council, the Universities' Service Center in Hong Kong and the International Research and Exchanges Board in New York.

As I am also a champion of research libraries, I appreciate too, what the ACLS has done to launch studies of the problems confronting research libraries and publishers and your help in preparing edition of American philosophers.

ACLS ROLE IN CREATION OF NATIONAL ENDOWMENT FOR THE HUMANITIES

Beyond all this, however, I think one of the most significant accomplishments of the Council is the role that it played in creating the National Endowment for the Humanities.

You will recall that it was the initiative of the ACLS that led to establishing a National Commission on the Humanities in 1963. Joined by the United Chapters of Phi Beta Kappa and the Council of Graduate Schools in the United States, the ACLS appointed a commission consisting of distinguished humanists, scientists, educators, businessmen and other interested citizens to study the state of the humanities in America. In issuing its public report, the Commission concluded that massive support for the humanities was urgently needed. The report, published and widely circulated in 1964, recommended the formation of a National Humanities Foundation.

Within one year, Congress passed legislation, in large measure a reflection of that recommendation, establishing the National Foundation on the Arts and the Humanities.

I need not for this group linger long on the indispensible support which the National Endowment for the Humanities has provided to research and scholarship in this country.

But the Endowment has assisted other types of activities which have brought the fruits of scholarship into more direct contact with the American people.

Museum exhibitions, like the King Tut show and the artifacts from Pompeii, have enjoyed remarkable popular success as well as scholarly acclaim.

The NEH has for five years sponsored courses by newspaper, with 400 newspapers participating and 300 colleges giving course credit.

The "Adams Chronicles" is an instance of the outreach of the NEH through television.

The Endowment has created a National Board of Consultants to help small colleges shape humanities curricula.

And the NEH has launched a Senior Centers Humanities Program which provides lectures and film courses at over 5,000 older Americans centers across the land.

Indeed, I think that a mark of the success of the NEH so far is that President Carter has asked for an increase in funds for its programs from the current figure of $121 million to $145.6 million for the Fiscal Year 1979.

When you consider that the Humanities Endowment began with an annual budget of only $2 million barely a decade ago, this support is indeed impressive.

SOME ISSUES IN POLICY FOR HUMANITIES

Yet I think we must recognize that there have been problems, too, during these years of achievement and I shall here mention only a few of the issues that have arisen during this period.

One is the fear of government control. With public funds must go public accountability for their expenditures. But I think that most observers would agree that both Endowments have functioned in an appropriately accountable way and without inappropriate interference from government.

Congressman Albert Quie of Minnesota, the number one ranking Republican on the House Education and Labor Committee, recently recalled his own early apprehension about government involvement in the arts and humanities but said that the record had persuaded him otherwise. In his words, "a *little* government has indeed gone a long way in touching many lives for the better."

A second issue has revolved around the respective expectations attached to the two Endowments and their relative achievements. Some observers have criticized the Humanities Endowment as having fallen short of its arts counterpart in the sense of public visibility and political popularity. My own view is that this difference is primarily attributable to inherent differences between the arts and the humanities.

The arts, by their nature, are directly apprehended through sight and sound and are therefore bound to occupy a position in the popular mainstream. The humanities are different. In the words of George Bonham, "Intellectual work tends to be private work, and it will never be shared by the large numbers more common to the creative and performing arts."

This difference, of course, places an added burden on the humanities to make effective its outreach programs and to be sensitive to the need to develop public and political support.

But we must, I think, avoid the paranoia which comes from equating the two fields and in comparing their performance in some simplistic way.

That the Congress has been sensitive to this point is demonstrated by the fact that appropriations for the two Endowments have since their inception been maintained at approximate parity.

A third issue is the so-called elitist-populist controversy. I think this question ought to be resolved by a recognition that we must have both a core of scholarship, without which the humanities would wither, and a serious effort to make the humanities acces-

sible beyond the university community. An insistence that we must somehow choose up sides between the "thinkers" and the "people" is really, in my view, pointless.

Yet another problem has been discussed cogently by Joseph Duffey in an address last February to the American Council of Education. Mr. Duffey suggested that the humanities in the United States have become increasingly specialized and professionalized in our research oriented graduate schools, and this increasing fragmentation has undermined the classic concept of the humanities as an intellectually integrating force.

If this move away from a concern with question that are basic to all the disciplines has been costly to the humanities within the academic community, the loss to society at large is perhaps greater still. For to the extent that the humanities become more technical, more balkanized, more arcane, they will be impeded in playing their traditional role of providing the basis for common culture.

THE HUMANITIES AND PUBLIC AFFAIRS

Not only does such a development relate broadly to the lives of our citizens, but more specifically still to matters of public policy.

In a technologically sophisticated age, it is all the more essential that we introduce humanistic considerations to the decision making process as we wrestle with such complex and vital questions as health care, energy and environmental protection, not to speak of the issues of nuclear, defense and foreign policy.

It is to this linkage between the world of the humanities, on the one hand, and of public affairs, on the other, of which I should like to say just a few additional words.

For the longer I serve in Congress, the more I am persuaded of the truth of what President Lyndon Johnson used to say, "My problem is not so much doing what is right as knowing what is right."

As a legislator, I can tell you that we want most earnestly to write laws based on more than our best intentions; we want the best evidence we can get for what is right.

But if we are wisely and effectively to write the nation's laws, we need not only the most objective and accurate information we can get, but also the soundest judgment we can find in terms of values.

And it is here that I think we in the world of politics need more help from the humanists in the academy.

Now I do not suggest that the relationship between professional intellectuals and professional politicians be a one-way street, with the Congressman waiting for the memorandum from Harvard telling him what he ought to do.

There must be built into the process of which I speak, if it is to be fruitful, a give and take that will enable the professional scholar to get a purchase on the way the legislator perceives and defines his problem.

There is some echo of what I am saying in this observation of Harold Howe: " . . . somehow we have to find . . . communication between those on the one hand who bear responsibility for action and those on the other who try to illuminate the implications of the various actions [that] action must consider."

A phrase I have found useful in describing what I think that we, at least those of us in Congress, need is "operative access to relevant intelligence."

By access, I mean being able to get at what we require; second, we must be able to do so with reasonable facility—the access must be operative.

Third, we really don't want to know everything about the subject but only what is relevant to our purpose, and fourth, we want access to intelligence, not simply information. We're already overwhelmed by reports, surveys, paper. We want to get at the best judgement as well as the most pages.

My own view is that developing a capability for operative access to relevant intelligence is far more important to the future role of Congress in the American political system than are many of the reforms of Congress more commonly discussed—but that is the subject for another speech.

There is I think justification for what I have been saying in the words of Woodrow Wilson in his famous address to the American Political Science Association in 1910.

Said President Wilson: ". . . the man who has the time, the discrimination, the sagacity to collect and comprehend the principal facts and the man who must act upon them must draw near to one another and feel that they are engaged in a common enterprise . . ."

This linkage, and how to strengthen it, between the world of the professional humanist and that of the political decision maker is surely crucial as we consider the many public policy problems with which the nation must deal.

But this is only one of many issues that should concern us as we look to the future of the humanities in American life. There are other questions as well that should preoccupy us, and the Endowment over little more than a decade has helped stimulate questions about the humanities which it seems to me require our most intense deliberation.

WHITE HOUSE CONFERENCE ON THE HUMANITIES

It is in fact because of this conviction that, together with Senator Claiborne Pell in the Senate, I have proposed two sets of White House Conferences, one on the humanities and one on the arts, to be held in late 1979.

Under our bill these two conferences, to be convened in Washington D.C. would each have been preceded by similar meetings in every one of the fifty states at which delegates would be selected and proposals discussed for consideration at the nationwide conferences.

The House approved this legislation this past February and the Senate, I am delighted to be able to tell you, approved an identical bill earlier this week and so we are now awaiting President Carter's approval.

It seems to me that a White House Conference on the Humanities can provide a splendid opportunity for scholars and teachers, representatives of state and local governments, business and labor, spokesmen for colleges and universities and knowledgeable persons from a diversity of backgrounds to discuss and debate the many issues facing the humanities in our country. Not least of these questions is, to repeat, one of the subjects on which I touch tonight, the contribution that the humanities can make in the process of making decisions on public policy.

Let me here, in further explaining the proposed conference, quote your distinguished President, Robert Lumiansky, who in his testimony before my Subcommittee made the following observation:

"I want to express vigorous support for the intent of this bill because maintenance of our strength in these fields requires widespread attention to the role which the humanities can play in our national life. That we have expected too much of science and technology is clear from various difficulties resulting from advances in those fields. That well-meant national programs in the social sciences have fallen short of expectations is also plentifully clear. Perhaps the addition of nationwide attention to the humanities can be a positive factor in the solution of some of the problems with which we are plagued.

"The advantage which concern with the humanities can bring to discussion of the nation's present and future is the clearer understanding of our national heritage and the fostering of a greater number of literate and rational minds to address the problems which confront us. As I see it, in order to establish the possibility for such discourse, a White House Conference on the Humanities can serve a very imporant function."

Now that Congress has sent the bill to the White House, I trust that you of the ACLS will also give your support to legislation to provide the appropriations to implement it. Moreover, I hope you will play a lead role among other humanists in generating interest in participating in the state-wide Conferences and in the National Conference in Washington.

THE HUMANITIES SHAPE OUR CHARACTER AS A NATION

For those of us gathered here tonight share a responsibility. We have an obligation to see that the humanities flourish in the United States—flourish because they are rich and rewarding in themselves and add beauty, wit and wisdom to our lives; flourish because they enable us to appreciate our own heritage and gain those insights into other cultures which lead to mutual understanding; and flourish because they serve as an essential counterweight in a nation which tends to be dominated by the material aspects of life. Indeed, our enormous scientific and technological achievements demand special attention to the humanities because, as Glenn Seaborg has said: "without knowledge of the humanities, science would lack wisdom, inspiration and purpose."

So it will in the final analysis be the humanities that shape our character as a nation.

Let me in closing tell you of a passage I read earlier today in the latest volume of the Proceedings of the American Antiquarian Society. I cite an essay by James Russell Wiggins on "Charting Cultural Priorities."

Said Mr. Wiggins:

"Friends of museums and libraries must occasionally feel as though there is nothing upon which they can depend but prayer. They are, however, practical people (as well as religious people) of the kind once described to me by Sir William Lawther, then Secretary of the British Coal Miners' Union. He told me that he and his Methodist neighbors used to pray to God to smite the coal owners. After giving prayer a reasonable time to effect their ends, he said, the miners would leave the church and throw stones at the coal owner's houses to help God answer their prayers."

Mr Wiggins concluded that "Friends of cultural institutions will not be content to rest on prayer alone either. They will, in my opinion, work to broaden both the contributions that their institutions make to society and the popular understanding of those contributions . . ."

I am confident that in addition to relying on prayer and stones, that friends of cultural institutions in the United States can also rely upon the work of the American Council of Learned Societies.●

PERSONAL EXPLANATION

(Mr. BRADEMAS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. BRADEMAS. Mr. Speaker, I insert at this point a statement regarding a recorded vote I missed on Thursday, April 13, 1978, and an indication of how I would have voted had I been present.

The vote was on rollcall No. 223, a vote on a motion offered by Mr. MOFFETT of Connecticut, that the conference committee meetings between the House and the Senate on H.R. 5289, relating to natural gas regulation, be closed to the public, provided, however, that any sitting Member of Congress shall have the right to attend any closed or open meeting. The motion was rejected by a vote of 6 to 371. Had I been present, I would have voted against the motion.●

RADIOACTIVE CONTAMINATION OF BIKINI—A WARNING TO ALL MANKIND

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SEIBERLING. Mr. Speaker, the news media have been slow to explore the awesome implications of recent news articles concerning the decision of our Government once more to remove the native population of Bikini Island, once the site of fallout from U.S. nuclear weapons tests. Bikini was declared safe for habitation in 1969 by the Atomic Energy Commission after a $5 million cleanup that included plowing the land, removing all vegetation and planting new coconut and other trees and bushes. Those trees and bushes produced crops last year that turned out to be contaminated with radioactive strontium and cesium.

Now, more than 25 years after the Bikini tests, the Government says that Bikini cannot safely be inhabited for another 50 to 75 years.

A Defense Nuclear Agency official is quoted as saying, "the Government had learned from Bikini." One of the things the Government has apparently learned is how difficult it will be to make the continental United States inhabitable if it is ever subjected to a large scale nuclear attack. Accordng to an article in the Washington Post on April 18:

In the Pacific, the islands are porous and water washed the radioactive elements straight into the soil and down to the water table below.

On the U.S. mainland, rain would carry radioactive material left by a nuclear explosion down streams and into rivers, spreading it rapidly over a broad area.

"I'm not sure we could do surgical removal" in the United States, an Energy Department official said yesterday.

The same article also points out that on one of the northern islands of the Enewetak Atoll, an 18-kiloton device exploded but failed to chain react, spreading plutonium all over the island. The article goes on to say:

Officials decided the island could never be decontaminated and instead should be used as the burying ground for radioactive material and soil removed from other islands in the atoll.

Mixed with concrete, the radioactive waste is being buried in Runit's crater. Eventually it will be covered over with an 18-inch thick concrete cap, fenced off and put off-limits for 24,000 years.
